PART I.

Government of India Notifications, Appointments, Promotions, &c.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 11th October, 1906.

No. 16.—In exercise of the power conferred by section 10 of the Indian Councils Act 1861 (24 & 25 Vict., c. 67), and section 1 of the Indian Councils Act, 1892 (55 & 56 Vict. c. 14), the Governor General is pleased to nominate Mr. Gangadhar Rao Madhav Chitnavis, C.I.E., to be an Additional Member of the Council of the Governor General for the purpose of making Laws and Regulations.

J. M. MACPHERSON,

Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Simla, the 12th October, 1906.

No. 2366.—In exercise of the power conferred by section 5 of the Scheduled Districts Act, 1874 (XIV of 1874), and with the previous sanction of the Governor General in Council, the Lieutenant-Governor of Eastern Bengal and Assam is pleased to extend, with effect from the 1st January 1907, the Indian Registration Act, 1877 (III of 1877), to the Jowai sub-division of the Khasi and Jaintia Hills District, with the exception of the Bhoi, Nongphyllut and Narpuh circles.

ESTABLISHMENTS.

The 9th October, 1906.

No. 1197.—The services of the Hon'ble Mr. E. D Maclagan, I.C.S., are placed temporarily at the disposal of the Department of Revenue and Agriculture, with effect from the 8th November 1906.

The 10th October, 1906.

No. 1204.—With reference to the Home Department notifications no. 395, dated the 10th April 1906, and no. 949, dated the 15th August 1906, it is hereby notified that the Honourable Sir Andrew Henderson Leith Fraser, K.C.S.I., returned from leave and resumed charge of the office of Lieutenant-Governor of Bengal on the 8th October 1900.

The 12th October, 1906.

No. 1211.—The services of Babu Nagendra Chandra Sen, Deputy Magistrate and Deputy Collector, are placed at the disposal of the Government of Eastern Bengal and Assam.

MEDICAL.

The 6th October, 1906.

No. 850.—The services of the undermentioned officers are placed temporarily at the disposal of the Government of Bengal :

Captain M. Mackelvie, M.B., I.M.S.

Captain E. H. B. Stanley, I.M S.

The 12th October, 1906.

No. 863—Captain C. W. F. Melville, M.B., I.M.S., is appointed to officiate as Professor of Materia Medica and Pathology, Medical College, Lahore, during the absence on furlough of Major H. G. Melville, M.B., I.M.S., or until further orders.

SANITARY.

PLAGUE.

The 11th October, 1906.

No. 1834.—The following telegram is published for general information :

Telegram, dated Therapia, the 5th October 1906.

From—His Britannic Majesty's Ambassador Extraordinary and Plenipotentiary at Constantinople,
To—His Excellency the Viceroy.

Five days' quarantine imposed on arrivals from Suez for Yambo and Jeddah at Abou Saad if carrying passengers or pilgrims ; if without, forty-eight hours with disinfection and deratisation. Quarantine on arrivals from Suez in Mediterranean ports forty-eight hours. Trebizond clean.

The 12th October, 1906.

No. 1836.—Whereas the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Ajmer in the Ajmer district, if pilgrims or other persons from the Bombay Presidency (excluding all places in Sind except the town of Karachi), the United Provinces, the Punjab, the Central Provinces and Central India, are permitted to assemble at that place on the occasion of the ensuing Pushkar Fair:

In exercise of the power conferred by section 2, sub-section (1), of the Epidemic Diseases Act, 1897 (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Sendra, Beáwar, Kharwa, Mangaliawás, Sarádhna, Tabíji, Ajmer, Madár, Ládpura, Akhri, Hatundi, Nasirabad, Singawal and Barl on the Rajputana-Malwa Railway shall be sold from the 15th October to the 5th November 1906 (both days inclusive) within the Bombay Presidency (excluding all places in Sind except the town of Karachi), the United Provinces, the Punjab, the Central Provinces and Central India, to any pilgrim or other person intending or believed to be intending to proceed on pilgrimage to the Pushkar Fair.

No. 216.—Mr. R. W Egerton, Superintending Engineer, 1st class (temporary rank), is confirmed in the appointment of Consulting Engineer to the Government of India for Railways, Calcutta.

No. 217.—Mr. W. Home, Superintending Engineer, 1st class (supernumerary), State Railways, is permitted to retire from the service of Government, under Article 465 of the Civil Service Regulations, with effect from the 1st October 1906.

C. A. R. BROWNE, *Lieut.-Col., R.E.,*

Secretary, Railway Board.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs., on Thursday, the 11th October 1906, based on the Indian Daily Weather Reports of the period.

Monsoon conditions were rather feebly developed during the week, and precipitation was almost entirely confined to Burma, northeast India and the interior of the Peninsula.

Burma.—Precipitation was widespread from the 5th to the 7th, but by the 8th it had diminished and was largely confined to Tenasserim. During the next two days rainfall increased and was well distributed, but on the 11th weather was dry. Skies were moderately overcast until the 10th, and after that they were clear or lightly clouded. Temperature was normal or in defect in upper Burma, and generally normal in lower Burma.

Northeast India and Orissa.—The monsoon was very weak in this division and only isolated falls occurred except in the Brahmaputra valley. In this area rainfall was fairly abundant during the first three days of the period, but during the remaining days it was very scanty. Skies were moderately overcast in Assam from the 5th to the 7th, but otherwise they were clear or lightly clouded over northeast India and Orissa. Temperature was normal or in slight excess.

The United Provinces, Central India and the Central Provinces.—On the 5th light rain was reported from Gorakhpur, Sutna, Pendra and Nagpur, and on the 11th from Bahraich and Dehra Dun. Skies were clear, and temperature was approximately normal.

Northwest India.—A thunderstorm with hail occurred at Sonemarg on the 5th and at Murree on the 11th, while on the latter date light rain was also reported from Rajkot. Skies were generally clear. Temperature was in defect in Gujarat for the first half of the week and normal for the rest of the time: in Kashmir it was in considerable excess, but elsewhere it was about normal.

The Peninsula.—In Hyderabad, the Madras Deccan and Mysore the monsoon gave more than the amount of precipitation usual at the time of year, while there was also light rain in the Bombay Deccan and the rest of the Madras Presidency. Skies were lightly to moderately clouded, and temperature was normal or in excess.

The rainfall for the whole period from the 4th May to the 11th October is practically normal over the greater part of the Indian region. It is 20 per cent. or more in excess in the West Satpuras and the subdivisions of Simla, Indore, Bellary and Mysore; and 20 per cent. or more in defect in Baluchistan, Sind and the rainfall subdivisions of Jaipur, Ranchi and Cuttack.

The following summarises the chief rainfall amounts of the week, as reported at 8 hrs. each day:—

October 5th. Diamond Island 4·18″, Yamethin 1·09″ and Mandalay 2·35″.
„ 6th. Minbu 0·91″, Monywa 0·83″, Tezpur 2·42″, Gauhati 2·50″ and Kurnool 1·30″.
„ 7th. Cocanada 1·72″.
„ 8th. Coimbatore 1·69″.
„ 9th. Toungoo 2·05″ and Lashio 4·85″.
„ 10th. Dinajpur 1·50″.
„ 11th. Ootacamund 1·39″.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 6th October 1906.

Burma.—The rainfall of the week was moderate and general. Transplanting of wet-weather paddy has been completed in Kyaukse and in parts of Pakokku and is progressing elsewhere in Upper Burma. Reaping of hill side paddy has been completed in Akyab and is commencing in Katha and the Southern Shan States. Sowing of late sesamum continues; ploughing and sowing of miscellaneous crops are in progress; transplanting of paddy and sowing of millet in Yamethin are now progressing actively; plucking of cotton has commenced in the Yenmabin sub-division of Lower Chindwin; more rain is required in Thayetmyo and in the north of Tharrawaddy. The recent rain has been very beneficial and crops generally promise well. The price of paddy has risen considerably in Akyab and Henzada and slightly in Minbu; it has fallen considerably in Mergui; elsewhere it is unchanged.

Eastern-Bengal and Assam.—The weather is seasonable. Light to moderate rain has fallen in all districts benefitting the standing crops. Prospects of tea are good in the Surma Valley, Darrang, Nowgong, and Lakhimpur and fair elsewhere. Harvesting of early rice and transplanting of late rice are practically finished. The outturn of early rice is generally fair. Prospects of winter rice and other standing crops are generally good except in parts of Tippera, Noakhali, Sylhet, Kamrup, and Lakhimpur, where the late rice has been damaged by recent heavy rain and floods. Insects are causing slight damage to the crops in parts of Chittagong, Sylhet, and Lakhimpur. The cutting of jute is still progressing and the outturn is good. Prices of common rice :—Kohima 11; Manipur 10; Rangamati 7 to 10; Sibsagar 9; Tezpur 8; Bogra 7⅛; Chittagong and Dibrugarh 7; Pabna 6¾; Faridpur 6⅜; Dinajpur 6⅝; Dacca, Barisal and Gauhati 6½; Noakhali 5½ to 6½; Silchar 6⅝; Malda and Comilla 6¼, Jalpaiguri, Sylhet, Dhubri, and Nowgong 6; Mymensingh 5 5/16; Rampur Boalia 5¼; Rangpur and Aijal 5; and Shillong 4½ seers per rupee. Prices have risen in seven; fallen in eight; and remain stationary in the remaining districts.

The numbers of person receiving gratuitous relief are —Malda 89, Mymensingh 353, Dacca 1,355, Tippera 50, Noakhali 374; and Khasi and Jaintia Hills 400. Eleven men, 194 women, and 35 children are employed on test works in Dacca; elsewhere there are none on test works. No loans were distributed during the week. The high prices are felt by the non-agricultural more than by the agricultural population.

Bengal.—Rain is reported from most districts but the fall was generally very light except in Cooch Behar where it was over 10 inches; in Birbhum, Murshidabad, the Sonthal Parganas, and Palamau the fall was moderate. More rain is required for winter rice in most of the districts of Bihar as well as in Bankura, Hooghly, Howrah, and the 24-Parganas. Locusts passed through Bhagalpur and Purnea but no very great damage is reported. Distress continues in the 24-Parganas, Jessore, Saran, Muzaffarpur, and Darbhanga; the number of persons reported to be receiving gratuitous relief is as follows :—24-Parganas 10,220, Saran 1,504, Muzaffarpur 5,425; and Darbhanga 35,575, total 52,724; the number of persons attending test works is:—Saran 962 and Darbhanga 2,137. Fodder is sufficient in all districts except in parts of the 24-Parganas, Muzaffarpur, and Darbhanga. The water-supply for cattle is generally sufficient. The price of common rice has risen in seven and fallen in nine districts.

United Provinces.—The rainfall during the week was light and extended only to a part of the Province. More rain is wanted for the late rice in the eastern districts. Early rice and other autumn crops are being gathered and cotton is being picked. Sugarcane is in good condition except in Benares where it was slightly injured by insects. Gram, peas, potatoes, linseed and in some places wheat and barley are being sown. Rain has caused some damage to the *bajra* and sesamum crops in parts of Jalaun and Hamirpur. Cholera and fever continue in a few districts. Food stocks and pasturage are ample. Prices show a tendency to rise owing to the demand for seed.

The weekly report on the famine and scarcity is as follows :—There was slight rain in Banda, Jhansi and Jalaun, causing slight damage to *bajra* and sesamum, otherwise the prospects are very good. Relief operations have been closed in the Agra Division and the numbers on gratuitous relief are being reduced in Bundelkhand. The numbers on relief now are:—Allahabad Division—on works *nil*; on gratuitous relief 50,000; Gorakhpur—on works 42, on gratuitous relief 158; grand total 50,200.

Punjab.—There was no rain during the week. Prices of food-grains are generally unchanged; wheat is rising in Hissar and Rawalpindi and falling in Gurgaon and Ambala. Harvesting of certain autumn crops and sowing of spring crops continue. Cotton-pickings have also commenced in some districts. The condition and prospects of the standing crops are generally good, and the yield is expected to be good to average. Locusts appeared and did damage to certain standing crops such as *Toria* (*Brassica Campestris*) *mash* (*Phaseolus Mungo*) etc., in the Hissar, Lahore, Amritsar, and Sialkot districts and laid eggs in parts of Amritsar, where necessary measures for their destruction have been adopted. Cotton is being attacked by boll worm in Lyallpur and Multan, and insects are damaging maize in Amritsar. Cattle are in good condition. Fodder is sufficient. There are no complaints regarding the water-supply.

North-West Frontier Province.—There was no rain during the week. Rain is wanted for standing crops in the Bannu district. The condition of the standing crops on irrigated and unirrigated lands is good except in Swabi where it is slightly below average. Harvest prospects and probable outturn of autumn crops are fair. Spring sowings are in progress. Canal water, and the Kilapani supply are sufficient. There is no irrigation from hill torrents in Dera Ismail Khan. The condition of cattle is good except in Dera Ismail Khan tahsil and in the villages of the Tank and Kulachi tahsils. Stocks of food-grains are sufficient. Fodder is procurable. Prices are fluctuating. Prices :—wheat 15 to 18½; maize 15 to 18; gram 16¼ to 18¾; and *bajra* 12 to 17½ seers per rupee.

Jammu.—No rain during the week. Prices are fluctuating. Prices :—wheat 15 to 20, and maize 24 to 32 seers per rupee. The condition of the standing crops is good. Fodder is sufficient.

Kashmir.—The weather is bright. The rice crop is in good condition and is being reaped. Maize and other autumn crops have been slightly damaged for want of rain. Spring crops have been sown in some places.

Rajputana.—Rain fell in six districts of Kotah, varying from 109 to 461 cents; Tonk reports 50 cents: and there was also slight rain in a few other places. The autumn crops are being harvested and land is being prepared for spring sowings. Prospects are favourable. The condition of cattle is good. Pasturage is sufficient. Prices have generally fallen but are still high in some places. Famine relief has been closed in Marwar.

Central India.—Rainfall general in Gwalior, Indore, and Bhopawar, and slight in Malwa and Bundelkhand. Ploughing for and sowing of spring crops and reaping of autumn crops are in progress. The standing crops and the probable outturn are fair to good. Crops have been slightly damaged by locusts in parts of Gwalior, and cotton

has been partially injured in parts of Bhopawar. Pasturage is good and sufficient. Prices are high in Gwalior and Baghelkhand, and are slightly falling in Bhopawar and parts of Malwa.

The weekly report on the famine and scarcity is as follows :—The numbers on relief in Bundelkhand are .—on works 1,000, on gratuitous relief 1,200, total 2,200. Prices 14 to 17 seers per rupee. Works and gratuitous relief have been closed in Datia, Bijawar, and the Lughasi Jagir.

Central Provinces.—With the exception of a shower in Balaghat the week was practically rainless. The days are cloudy and warm but the mornings are cool. Preparation of land for spring sowing is in progress everywhere. Spring sowings have begun in parts of most districts. Reaping of rice has begun in Damoh, Mandla, Narsinghpur, Hoshangabad and Chanda and minor crops are being cut in Damoh, Chhindwara, Mandla, Seoni, and Jubbulpore. Early rice, *kodon* (millet), and sesamum are in ear in Bhandara; sowing of linseed, gram, and second crops in rice fields continues in Chhattisgarh; *juar* is in ear and cotton in pod in Akola and Amraoti. Sesamum and cotton have been slightly damaged by September rains in Jubbulpore. Spring sowings have begun in parts of Jubbulpore, Mandla, and Seoni. The standing crops are flourishing and prospects are good. Fodder and water are sufficient everywhere. The price of rice has slightly fallen in Mandla, Seoni, and Chhindwara but has risen slightly in Narsinghpur; gram is dearer in Chhindwara and Bhandara by 2¼ and 1¼ seers per rupee, respectively; and *juar* is slightly cheaper in Amraoti, elsewhere prices are steady and are equal to the scarcity level in Nagpur, Chanda, Balaghat, Drug, and Bilaspur.

Bombay.—There was good rain during the week in Thar and Parkar, Dharwar, Kolhapur, and Kathiawar, and slight rain in Hyderabad, Gujarat, the Konkan, the Deccan, Belgaum, Bijapur, Palanpur, Cutch, and Mahi Kantha. More rain is needed in parts of the Deccan and the Karnatak for maturing crops and spring sowing. Slight damage to crops by locusts has occurred in parts of Karachi; by grasshoppers in Sholapur; by insects in Upper Sind Frontier; and by excessive rain in Thar and Parkar the standing crops are generally in good condition elsewhere. Harvesting of autumn crops continues and sowing of spring crops is progressing in parts of Broach, the Deccan, the Karnatak, Baroda, Mahi Kantha, Rewa Kantha, and Kolhapur Cotton-picking has commenced in Sukkur, Thar and Parkar, Ahmedabad, and Ahmednagar. Drinking water is adequate and water in irrigation canals, tanks, and wells and channels is sufficient. Agricultural stock is insufficient in parts of Ahmednagar, Poona, Sholapur, Bijapur, and Cutch but is generally in good condition; abundant green grass is available everywhere. Stocks of grain in markets are adequate. Prices are falling. The quantity of grain purchasable per rupee is in the Deccan 20 to 47 per cent; in the Karnatak 11 to 30 per cent; and elsewhere 5 to 30 per cent. less than the normal The demand for labour in fields and on private works is increasing and provides sufficient employment. The public health is generally good. The numbers on relief are :—British districts — Deccan—on works 105, on gratuitous relief 6,637, total 6,738; Karnatak—on works 3,284, on gratuitous relief 10,080, total 13,364; Native States.—on works 681, on gratuitous relief 1,444, total 2,125.

Hyderabad.—Rainfall—37 cents. Prospects are favourable. The autumn and early rice crops continue fair to good and are being weeded. Spring crops are being generally sown. Prices :—wheat 8¼, rice 7¾, and *juar* 16¾ seers per rupee.

Mysore.—Good rain in Bangalore, Kolar, Tumkur, Mysore and Hassan and slight rain elsewhere. The standing crops are in good condition but more rain is needed in parts of Tumkur, Kadur, and Shimoga. The prospects of the season are generally good. Cattle are healthy and water and fodder are available.

Coorg.—Rainfall two inches 37 cents. Picking of cardamom continues. Prices of food-grains are stationary. Water and fodder are sufficient.

Madras.—There was no rain in Madras; the fall was good in Bellary, Salem, Guntur, Trichinopoly, and Nilgiris; and light to fair elsewhere. Irrigation supplies are sufficient except in parts of Vizagapatam, Bellary, South Arcot, Salem, Madura, and Tinnevelly. Ploughing, sowing, weeding, and transplanting are in progress in parts. The standing crops are generally fair but require more rain in parts of Coimbatore and Tanjore. Harvests continue with outturns poor to normal and bumper. Pasture is sufficient except in Tinnevelly. Fodder is scanty in parts of the Circars, Bellary, and Anantapur. The condition of cattle is generally good. The price of rice is stationary in thirteen districts; has fallen in seven, and has slightly risen in three. The prices of millets have fluctuated as follows:—*ragi* is stationary in seven districts, has fallen in twelve, and has slightly risen in two. *Cholam* is stationary in three districts; has fallen in six; and has slightly risen in five. *Cumbu* is stationary in three districts, has fallen in eight, and has slightly risen in four.

The number of persons in receipt of relief during the preceding and present weeks in each Province or State is shown in the following table.

Name of Province or State	Preceding week (Revised figures.)			Present week.			Increase or decrease.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

Simla, the 1st October, 1906.

Review of Irrigation in India in 1904-05.

Read—

Note by R. N. Burn, Esq., Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure of Irrigation Works in India for 1904-05.

Provincial Revenue and Administration Reports of Irrigation Works for triennium ending 1904-05.

Irrigation Works are divided into two main classes—Major and Minor Works—the former being sub-divided into (I) Productive and (II) Protective Works. Capital and Revenue Accounts are kept for all Major Works, and the revenue due to them, whether directly in the form of water-rates and miscellaneous receipts, or, indirectly, on account of enhancements of land revenue due to irrigation, is shown in the Annual Finance Accounts.

A.—Major Works.

I.—Productive Works.

2. The most important irrigation works in India are those classed as Productive Works, or works the capital cost of which has been wholly or mainly provided from loan funds in the expectation that they would prove directly remunerative, and that the net revenue derived from them would fully cover all charges for interest within a reasonable time after their completion. This expectation is never likely to be realized in respect of any of the four works constructed in Bengal, of the seven in Bombay (Deccan and Gujarat) and of the Kurnool-Cuddapah Canal and Barur Tank in Madras. The capital outlay recorded against these thirteen works to the end of the year under review amounted to Rs. 9,81,60,200, on which the net revenue realized during the year yielded a return of 1·33 per cent. compared with 1·32, 0·81, and 0·80, the averages of the past three triennia. The interest charges to the end of the year exceeded the net revenue by Rs. 9,71,63,449, the excess for the year being Rs. 25,26,318. The area irrigated by these works during the year was 926,524 acres.

3. These unfavourable financial results are, however, more than balanced by those attained on the 28 remaining productive works now in operation, the net revenue on which during the year was equivalent to a return of 9·96 per cent. on the capital outlay. The general financial results of all the works of this class are shown separately by provinces in the following statement. The totals are brought into comparison with those of the two previous years.

Financial results of Productive Works in operation.

Province.	Number of works.	Area irrigated.	Capital outlay to end of 1904-05.	Net revenue in 1904-05.	Percentage of net revenue on capital outlay.
Irrigation.		Acres.	Rs.	Rs.	
Punjab	8	5,281,831	10,87,88,346	1,33,72,729	12·29
United Provinces of Agra and Oudh	5	1,909,316	8,73,54,769	66,18,918	7·58
Madras	8	2,940,599	7,18,66,138	63,15,990	8·79
Sind	8	1,201,889	2,51,82,593	13,03,352	5·17
Bombay	7	31,885	1,15,40,851	2,16,316	1·87
Bengal	3	800,2[illegible]7	6,17,98,560	9,83,712	1·59
Do.	*1	...	26,15,151	—4,555	..

Total Imperial	41	12,209,466	37,43,46,123	2,86,18,713	7·70
Native States, Punjab ...	†	407,301	1,52,45,774	7,80,469	5·12
GRAND TOTAL, IMPERIAL AND NATIVE STATES—1904-05	41	12,616,767	38,95,91,897	2,95,99,182	7·60
1903-04	41	12,989,801	38,19,40,850	2,85,71,105	7·42
1902-03	39	11,852,669	37,58,04,788	2,78,02,602	7·10

* Hijili Tidal Canal, which is a purely navigation work.

† Part of the works in the Punjab.

Of the increase of Rs. 46,51,047 in the capital outlay as compared with 1903-04, Rs. 18,80,399 was spent in the Punjab, Rs. 11,90,152 in the United Provinces and Rs. 10,42,199 in Madras, the balance being incurred in the other Provinces.

The net revenue was the largest on record and the percentage return was the highest yet attained.

4. The irrigated area, although slightly less than that of the preceding year, exceeded that of other previous years. The steady increase of area irrigated by the Productive Works in the last three triennia, *i.e.*, 1904-05 to 1896-97, is shown in the following table in which the areas for the year under consideration are compared with those of 1903-04 and the averages of the three triennia. Taking into account the three triennia, every province shows a marked increase with the exception of the United Provinces and Bombay in which provinces a gradual decrease is noticeable, while, comparing the year under review with the preceding year, it will be seen that there was an increase in all the provinces except the United Provinces, Sind, and Bengal.

* Lower Sohag and Para only.
† Transferred from Minor Works in 1903-04.

The percentages of net revenue on capital outlay for the year are compared in the following statement with those of 1903-04 and of the three triennia, 1904-05 to 1896 97 :

Name of Canal.	PERCENTAGE.				
	1904 05.	1903-04	Average of Triennium.		
			1902-03 to 1904-05.	1899-1900 to 1901-02.	1896 97 to 1898-99.
Western Jumna, Imperial ...	10·07	8 71	9·13	9·37	10 70
Sirhind, Imperial ...	6 86	7 11	7·31	8·01	9 27
Bari Doab	12·13	12·68	12·56	12·41	12 91
Lower Chenab	24·48	23 18	23·09	14·13	7 44
Upper Sutlej Canals, including Lower Sohag and Para.	10·37	12 19	9·72	*6·17	*7·45
Sidhnai	25·88	15 31	15·08	8 69	16 62
Indus Inundation Canals† ...	10·04	11·88	10 72	...	...
Native States	5·11	5·59	5·74	5 20	6 22

* Lower Sohag and Para only.
† Transferred from Minor Works in 1903-04.

On the Lower Jhelum Canal, which was opened during 1901-02, the loss in working amounted to Rs. 19,135 against Rs 68,751 in 1903-04 and Rs. 1,12,030 in 1902-03. Excluding this canal, which is not yet complete, the net revenue of the productive works in the Punjab rose from Rs. 1,29,23,771 in 1903-04 to Rs. 1,33,92,164 in the year under review or 14·17 per cent. on the capital outlay. The highest percentage attained was on the Sidhnai Canal, which earned a net revenue of 25·88 per cent. on the capital outlay against 15·31 per cent in the previous year. The greatest amount of net revenue was however obtained on the Lower Chenab Canal which earned Rs. 68,80,159 or more than the total amount of net revenue realised on all other works in the Punjab, and the return on the Capital outlay was 24·48 per cent. This canal is still developing and the ultimate percentage of profit has not yet been reached.

6. In the United Provinces of Agra and Oudh the areas irrigated are as below :

Name of Canal.	AREA IRRIGATED				
	During 1904 05.	During 1903-04.	Average of Triennium.		
			1902-03 to 1904-05.	1899-1900 to 1901 02.	1896-97 to 1898-99
	Acres.	Acres.	Acres.	Acres.	Acres.
Ganges	818,551	977,652	889,355	1,030,836	966,286
Lower Ganges, including Fatehpur Branch.	627,925	906,659	794,548	732,136	871,130
Agra	185,297	259,908	227,309	238,444	244,442
Eastern Jumna	277.543	305,177	288,933	306,733	307,432
Total ...	1,909,316	2,449,396	2,200,145	2,308,149	2,389,290

The net revenue from these canals, in the year under review, represented a return of 7·58 per cent. on the capital outlay against 7·17 per cent. in 1903-04 and 7·41 per cent. in 1902-03. The relative percentages of profit compared with those of 1903-04 and the past three triennia are given in the following table:

Name of Canal.	PERCENTAGE.				
	1904-05.	1903-04.	Average of Triennium.		
			1902-03 to 1904-05.	1899-1900 to 1901-02.	1896-97 to 1898-99.
Ganges Canal	9 63	9·91	10·01	10 26	9·84
Lower Ganges Canal ...	4·66	3·85	4 10	3·55	5 01
Agra Canal	5·75	5 49	5·79	5 52	6 06
Eastern Jumna Canal ...	22 82	21 82	23·16	25·31	29·66

As in other years, the highest percentage was yielded by the Eastern Jumna Canal, which is the most remunerative work in the United Provinces.

7. The following statement shows the area irrigated in the Madras Presidency in 1904-05 compared with that of the previous year and the averages of the past three triennia:

Name of Canal.	AREA IRRIGATED				
	During 1904-05.	During 1903-04	Average of Triennium.		
			1902-03 to 1904-05.	1899-1900 to 1901-02.	1896-97 to 1898-99.
	Acres.	Acres.	Acres.	Acres.	Acres.
Srivaikuntam Anicut ...	44,074	43,978	44,193	43,653	41,518
Godavari	878,999	802,858	830,830	804,995	771,925
Kistna	618,247	617,042	631,046	606,311	523,094
Penner	129,007	162,134	151,594	153,048	148,378
Kurnool	88,919	46,306	65,126	69,302	61,066
Periyar	156,684	152,614	154,439	141,987	90,160
Barur Tank	5,493	5,561	5,460	5,354	4,587
Cauvery Delta	989,226	976,174	982,585	980,644	987,016
Total ...	2,940,599	2,806,667	2,865,273	2,805,296	2,627,744

The area irrigated in the year under review exceeded all previous records.

The percentage of net revenue on the capital outlay was 8·79 compared with 8·48 in 1903-04 and 9·27 in 1902-03.

The percentages of net revenue on capital outlay of the different systems for the year compared with the previous year and the past three triennia are—

Name of Canal.	PERCENTAGE.				
			AVERAGE OF TRIENNIUM.		
	1904-05.	1903-04.	1902-03 to 1904-05.	1899-1900 to 1901-02.	1896-97 to 1898-99.
Godavari Delta	19·34	17·61	18·46	17·48	17·99
Kistna Delta	14·49	12·96	14·41	15·71	12·94
Cauvery Delta	25·90	27·37	27·22	31·17	41·00
Penner	0·13	4·67	3·25	4·86	5·05
Kurnool-Cuddapah ...	0·18	0·46	0·49	0·37	0·18
Barur	1·07	—23	0·76	1·54	1·47
Srivaikuntam	6·34	5·25	5·91	6·39	4·40
Periyar	4·08	8·86	8·86	3·25	...

The most unremunerative works in the province are the Kurnool-Cuddapah Canal and the Barur Tank, and it is not expected that they will ever become remunerative. A steady improvement is noticeable in the case of the Periyar Project, and it is anticipated that its return will still further improve when the distributing works are completed.

The net revenue on the Penner River Canals fell to 0·13 per cent., the decrease being due to the grant of large remissions and to a diminution in the area of second crop cultivation in 1904-05 on account of the unfavourable character in the season. The highest percentages were yielded by the Godavari and the Cauvery Delta systems which are the most remunerative works in the Madras Presidency. The accumulated net revenue of all the productive works in the province up to the end of the year under review after paying off the interest charges amounted to Rs. 8,58,41,824 against the capital outlay of Rs. 7,18,66,138 incurred on those works.

8. For the canals in Sind the figures are :

Name of Canal.	AREA IRRIGATED				
			AVERAGE OF TRIENNIUM.		
	During 1904-05.	During 1903-04.	1902-03 to 1904-05.	1899-1900 to 1901-02.	1896-97 to 1898-99.
	Acres.	Acres.	Acres.	Acres.	Acres.
Jamrao	260,031	271,728	267,039	133,483	...
Desert	199,513	207,615	198,063	110,912	113,967
Unharwah	66,595	81,296	70,747	79,248	78,818
Begari	232,598	271,009	243,073	255,863	237,171
Eastern Nara	269,415	260,918	262,134	281,097	260,879
Dad	68,085	73,797	67,379	18,747	*Nil*
Mahiwah	28,619	44,440	27,162	3,454	*Nil*
Nasrat	77,033	52,072	43,035	*Nil*	*Nil*
Total ...	1,201,889	1,262,905	1,178,932	912,804	690,835

The total area irrigated was slightly lower than that of the previous year, but exceeded the averages of the past three triennia.

The net revenue from these canals was equivalent to a return of 5·17 per cent. compared with 5·94 per cent. in the preceding year, the decrease being due to falling off on all the canals, excepting the Desert Canal. There was a loss in working of Rs. 32,088 on the Dad Canal against a net revenue of Rs. 1,802 in the previous year. The net revenue on the Nasrat Canal was Rs. 14,471 against Rs. 54,079 in 1903-04 in which year the canal was brought into operation.

Percentage returns on capital outlay are:

Name of Canal.	PERCENTAGE.				
	1904-05.	1903-04.	Average of Triennium.		
			1902-03 to 1904-05.	1899-1900 to 1901-02.	1896-97 to 1898-99.
Jamrao	3·85	5·08	4·25	2·46	...
Desert	7·17	3·25	4·71	7 08	5·45
Unharwah	9·54	12·05	11·07	17·96	16 47
Begari	17 23	18·31	17 13	21·00	17·51
Eastern Nara	6·26	6·82	6·61	7 32	6 68

9. In Bombay (Deccan and Gujarat) the return on the capital expenditure fell to 1·87 per cent. compared with 2 19 in 1903-04 and with 2 06, 1·84, and 1·60 for the three triennia 1904-05 to 1896-97. The works are small compared with those of other provinces; the extent of the area irrigated by them continues steady with slight variations.

10. In Bengal, the areas irrigated are as follows:

Name of Canal.	AREA IRRIGATED				
	During 1904 05.	During 1903-04	Average of Triennium.		
			1902 03 to 1904 05.	1899-1900 to 1901-02.	1896-97 to 1898-99.
	Acres.	Acres.	Acres.	Acres.	Acres.
Sone	492,205	505,803	49 ,878	481,333	476,466
Midnapore	85,892	93,367	88,9·8	78,190	71,322
Orissa	222,070	210,161	219,[illegible]76	201,955	191,832
Total ...	800,227	809,331	801,862	761,478	739,620

The percentage of net revenue on capital outlay on the Hijili Canal, which is a purely navigation channel, was —0·17 compared with 0·66 in 1903-04 and

0·22, 0·58 and 1·62, the averages of the past three triennia. The navigation receipts on the Bengal canals have suffered from the competition of the railways.

11. Irrigation on the Mandalay Canal, which was opened in 1902-03, is developing satisfactorily; the area irrigated in that year was 7,223 acres, in 1903-04 30,044 acres, and in the year under review 43,719 acres; the forecast in the project estimate being 10,000, 20,000 and 40,000 acres respectively.

12. In addition to the 41 productive works now in operation, five new works were under construction during the year, *viz.*, the Shwebo and Mon Canals in Upper Burma, the Naulakhi Canal in Sind, and the Upper Chenab and Upper Jhelum Canals in the Punjab. The total outlay on these works to the end of the year (excluding interest charges) amounted to Rs. 41,98,376, of which Rs. 10,90,792 were expended during the year. In addition, Rs. 46,51,047 were spent on works now in operation, principally on extensions or improvements which are likely to prove remunerative and to increase the efficiency of the systems. The total capital expenditure on irrigation works during the year, therefore, amounted to Rs. 57,41,839 against Rs. 82,80,763 in the previous year.

No capital expenditure was incurred during the year on navigation works.

II.—Protective Works.

13. Protective irrigation works are those which have been sanctioned in consideration of their value as famine protective works, but without any expectation of their becoming directly remunerative. The cost of their construction has been met from the famine grant. There are at present six of these works in operation, particulars of which are shown in the statement below:

Financial results of Protective Works in operation.

Name of works.	Province.	Area irrigated in 1904-05.	Capital outlay to end of 1904 05.	Net revenue in 1904-05.	Return on capital outlay.
		Acres.	Rs.	Rs.	Per cent.
Lower Swat River Canal	North-West Frontier Province.	159,112	41,70,702	4,04 573	9·70
Betwa Canal ...	United Provinces.	117,573	48,67,742	41,048	0·84
Rushikulya Project	Madras ...	96,274	50,04,036	37,110	0·74
Mhasvad Tank ...	Bombay ...	8,615	20,91,430	2 766	0·13
Nira Canal ...	„ ...	48,822	56,99,988	45,350	0 80
Shetphal Tank ...	„ ...	3,127	7,06,228	5,164	0·73
Total 1904-05 ...	...	433,823	2,25,40,178	5,36,011	2 38
„ 1903-04 ...	...	383,990	2,22,45,025	7,22,340	3·25
„ 1902-03 ..	...	370,021	2,20,56,312	6,21,229	2 82

The Swat River Canal, although sanctioned as a protective work, has proved a highly remunerative one. The remaining five works are not likely to prove remunerative. The Betwa Canal, which has so far only paid its working expenses in the years 1897-98 and 1898-99 in which the net revenue was Rs. 22,876 and Rs. 477, respectively, has, in 1903-04 and in the year under review, earned a net revenue of Rs. 25,568 and Rs. 41,048, respectively, a result which is due to certain improvements made in the distributary system. The construction of an additional reservoir, which was sanctioned by the Government of India in April 1904, will provide additional storage for 1,484 million cubic feet of water, which, it is anticipated, will make the canal more remunerative. The area irrigated by this canal in the year under review was higher than that of any other year.

On the Nira Canal, notwithstanding the increase in the area irrigated from 30,638 acres in 1903-04 to 48,822 acres, the net revenue fell to Rs. 45,350 against Rs. 1,91,194 in 1903-04, the falling off being partly due to a decrease in the area of sugarcane and partly to rates for short periods only having been charged for a large area of sugarcane which was ploughed up owing to damage done by locusts.

The area irrigated during the year exceeded that of the previous year as well as the averages of the past three triennia, as is shown by the following statement:

Protective Works.

Name of work	Province.	Area irrigated: During 1904-05	During 1903-04	Average of Triennium: 1902-03 to 1904-05.	1899-1900 to 1901-02	1896-97 to 1898-99.
		Acres.	Acres.	Acres.	Acres.	Acres.

Burma	43,719	10,91,135	25·0	5·3	1·8	86·4
Total 1904-05 ...	13,050,590	36,51,74,650	28·0	3 6	1·2	31·5
" 1903-04 ...	13.373,791	35,61,70,380	26·6	3·5	1·1	30·6
" 1902-03 ...	12,222,690	34,68,76,620	28·4	3·6	1·1	29 6

Compared with the year 1903-04 the general results are almost identical, but there are considerable variations in some of the provinces, the most important of which are noted below.

In respect of the average value of the crops, the United Provinces have increased from Rs. 31·2 per acre, owing principally to increase in the value of wheat, and Madras from Rs. 24·4 on account of increase in the price of rice, and Sind from Rs. 15·8 owing to increase in the value of the outturn. Bombay has decreased from Rs. 119·2 per acre on account of smaller prices having been obtained for sugar.

In Bombay the average assessment has decreased from Rs. 9 per acre and in the case of Burma has increased from Rs. 3·1 per acre.

Working expenses have always been rather high in Bombay, but there has been a reduction in the year under review as compared with the previous year. The working expenses in Burma have decreased from Rs. 3·2 owing to the larger area irrigated by the Mandalay Canal; as irrigation develops the rate of working expenses per acre will decrease still further.

The variations in the rates of assessed revenue and working expenses account for the variations in the percentage of working expenses on gross revenue.

15. Eleven Protective irrigation reservoirs were under construction in the Central Provinces, Rs. 11,89,353 having been spent on them to the end of the year.

B.—MINOR WORKS.

III.—Works for which Capital and Revenue Accounts are kept.

16. All expenditure incurred in the construction and development of minor irrigation works is met from revenue. These works are treated as provincial in all provinces except Sind, Bombay, Baluchistan, Rajputana, North-West Frontier Province and the Punjab, in which all but a few works are Imperial. Capital and Revenue Accounts are kept for 87 of the larger and more important minor works, and the financial results attained during the year under review are shown in the following statement :

Financial results of Minor Works in operation for which Capital and Revenue Accounts are kept.

Province.	Number of works.*	Area irrigated	Capital outlay to end of 1904-05.	Net revenue in 1904-05.	Percentage of net revenue on capital outlay.	Rate of revenue assessed per acre.

* Includes works under construction.

17. The capital outlay during the year on Minor Irrigation works amounted to Rs. 17,39,489. The expenditure in the North-West Frontier Province was Rs. 1,29,829; in the United Provinces, Rs. 2,66,650; in Madras, Rs. 5,95,762; in Deccan and Gujarat, Rs. 1,14,710; and in Sind, Rs. 2,92,507.

In the other provinces the expenditure was less than Rs. 30,000 in each case, while in Burma the transfer of the Bawlo Island embankment to the class of Agricultural Works for which neither Capital nor Revenue Accounts are kept accounts for the reduction in the capital outlay to the end of the year as compared with that at the close of the preceding year.

18. Comparison of the area irrigated during the year and the preceding year and the average of three previous triennia gives:

Province.	Area irrigated				
	During 1904-05	During 1903-04.	Average of Triennium.		
			1902-03 to 1904-05.	1899-1900 to 1901-02.	1896-97 to 1898-99.
	Acres.	Acres.	Acres.	Acres.	Acres.
Punjab	35,103	58,541	109,677	519,448	709,833
North-West Frontier Province	27,813	29,127	19,090	...	...
United Provinces ...	77,289	121,389	112,018	134,577	118,376
Madras	521,786	599,600	568,519	532,548	540,911
Sind	798,431	855,177	816,017	831,324	801,948

Baluchistan	8,778	4,686	5,468	5,345	5,033
Burma	445,860	453,123	445,571	483,271	396,906
Total ...	1,976,978	2,187,292	2,140,150	2,521,472	2,678,690
Punjab, Bikanir State ...	11,012	9,650	8,765	9,915	6,344
Grand Total ...	1,987,990	2,196,912	2,148,915	2,531,417	2,685,031

The gradual reduction in the area irrigated in the past three triennia is due mainly to the transfer of the Lower Sutlej and Chenab Inundation Canals in 1900-01 from Minor Works for which Capital and Revenue Accounts are kept to Minor Works for which only Revenue Accounts are kept, and of the Upper Sutlej Inundation Canals in 1902-03 and of the Indus Inundation Canals in 1903-04 to Productive Works.

The net revenue in the Punjab fell from 6·70 per cent. on the capital outlay in the preceding year to 0·01 per cent. in the year under review owing to the reduction in revenue of the Shahpur Inundation Canals and to a greater loss in working on the Ghaggar Canals.

In the case of the United Provinces the net revenue was 3·73 per cent. compared with 2·98 in 1903-04 and 3·18, 3·23, and 5·61, the averages of the three triennia, 1904-05 to 1896-97.

Rajputana gave a return of 3·35 per cent. against 1·83 in 1903-04 and 2·14, —1·37, and 3·06, averages of the three triennia, 1904-05 to 1896-97.

The Works in Bombay earned a net revenue of Rs. 39,517 against Rs. 64,557 in 1903-04 and Rs. 27,728 in 1902-03.

In Baluchistan, against a loss of Rs. 9,496 in 1902-03 and a net revenue of Rs. 20,742 in 1903-04, the net revenue in the year under review amounted to Rs. 46,852.

The working expenses exceeded the gross revenue in Bengal by Rs. 1,249.

The area shown in Burma is not under irrigation, but represents the area of cultivation on lands reclaimed by river flood embankments, the revenue of which is credited to the capital account of the works. This area in 1904-05 was less than that of 1903-04 by 7,263 acres.

IV.—Works for which only Revenue Accounts are kept.

19. There are numerous Minor Works for which separate Capital Accounts are not kept, either because the works are too small, or because they have not been constructed by the British Government, which has simply undertaken their improvement and maintenance. For such works only Revenue Accounts are maintained; they are credited with a share of the land revenue depending on their maintenance and are debited with all expenditure incurred on construction, extension, improvements, and maintenance. Particulars for the year 1904-05 are shown by provinces in the statement below:

Financial Results of Minor Works for which only Revenue Accounts are kept.

Province.	Area irrigated.	Revenue receipts.	Charges	Net revenue.
	Acres	Rs.	Rs.	Rs.
Burma . .	472,804	13,51,325	10,88,617	2,62,708
Bengal	...	95,112	1,39,748	—44,636
Punjab	569,287	15,70,773	10,44,027	5,26,746
Bombay, including Sind	1,033,044	23,95,072	(a) 12,66,691	11,28,381
North-West Frontier Province.	...	...	3,306	—3,306
Central Provinces ...	...	54,12,282	35,42,389	18,69,893
Total 1904-05 ..	2,075,135	1,08,24,564	70,84,778	37,39,786
„ 1903-04 ...	2,293,991	54,23,360	33,39,404	20,83,956
„ 1902-03 ...	1,846,330	37,26,471	31,08,360	6,18,111

(a) Indirect charges not included.

The improvement in net revenue is very satisfactory.

V.—Works for which neither Capital nor Revenue Accounts are kept.

20 There is a third important class of Minor Works in the Madras Presidency for which neither Capital nor Revenue Accounts are kept. These include over 28,000 tanks and 6,000 irrigation channels, the improvements and repairs of which are executed by the Public Works Department, or, in the case of the smaller works, by civil officers: the expenditure during 1904-05 amounted to Rs. 27,17,568, of which about one-fifth was spent by civil officers. The areas charged as irrigated by these small works in 1904-05 aggregated 2,9[illegible]8,076 acres, or nearly as much as the area irrigated by all the Major Works in the Presidency taken together, compared with 3,591,696 acres in 1903-04 and 3,323,141, 3[illegible]11,902, and 3,111,652 acres, averages of the triennia 1901-05 to 1896-97. The revenue derived therefrom amounted to Rs. 61,85,[illegible]78 compared with Rs. 96,0[illegible],[illegible] in 1903-04, the decrease being due to the unfavourable character of the season.

21 The following table summarizes the results of irrigation for all India during 1904-05 and compares them with those of the two previous years

Financial and Irrigational Results of Irrigation Works in operation in India.

Class of work	[illegible]	[illegible]	[illegible]	[illegible]	Area irrigated
	R	Rs.	Rs.		Acres.
I and II —Major Works } I —Productive, II —Protective	11 21,[illegible]2,075	1,47,14 875	3 01,3[illegible] 19[illegible]	7 [illegible]1	13,0[illegible] [illegible]90
III.—Minor Works for which Capital and Revenue Accounts are kept.	6 01 16,[illegible]11	47,[illegible]2,312	29,78,12[illegible]	4 9[illegible]	1,970 978
IV.—Minor Works for which only Revenue Accounts are kept.	...	1,08,21,50[illegible]	[illegible]7,39 780		2 075 1[illegible]5
V —Works for which neither Capital nor Revenue Accounts are kept		66,07,659	24,89 [illegible]2[illegible]		3,[illegible]0 ,867
Total 1904-05 ..	47,25,78,[illegible]69	[illegible] 69,19,11[illegible]	3,93 12,[illegible]27	([illegible])7 01	20,10[illegible] [illegible]10

„ 1902-03 ...	45,50,18,458	5,94,79,805	3,68 58,307	(a)6·91	19,801,273

(a) Percentages calculated on works of classes I, II, and III.

The total area was over 20 million acres, while the value of the crops raised by the works for which capital accounts are kept is estimated at Rs. 41 3 crores, or 67 per cent. of the capital outlay expended on them.

ORDER.—Ordered that this Review, with a copy of the note by the Accountant General, Public Works Department, be forwarded to the Finance and Revenue and Agricultural Departments and to the Local Governments and Administrations in the Public Works Department noted on the margin for information.

The Governments of Madras, Bombay, Bengal, the United Provinces of Agra and Oudh, the Punjab, Burma and Eastern Bengal and Assam.
The Honourable the Chief Commissioners of the Central Provinces and Coorg.
The Honourable the Resident at Hyderabad.
The Honourable the Agents to the Governor-General for Central India, Rajputana and Baluchistan.
The Honourable the Agent to the Governor General and Chief Commissioner, North-West Frontier Province.
The Accountant General, Public Works Department.

Ordered, also, that the Review and the note be published in the Supplement to the *Gazette of India*.

Ordered, further, that a copy of the Review and note be forwarded to His Majesty's Secretary of State for India for information.

E. G. STANLEY,

for Secretary to the Government of India.

No. 8073—8087—18.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

EMIGRATION.

RESOLUTION.

Simla, the 12th October, 1906.

The Government of India have received from His Majesty's Secretary of State for India a copy of an Act passed by the Parliament of the Commonwealth of Australia to amend the Immigration Restriction Act of 1901, extracts from which were published in the Supplement to the *Gazette of India,* dated 10th May 1902, with Resolution No. 13—38-2, dated the 9th May 1902. The more important provisions of this law, which is entitled "The Immigration Restriction Amendment Act, 1905," are noted below for general information.

2. The portion of section 3 of the Principal Act which relates to the dictation test is as follows:

"The immigration into the Commonwealth of the persons described in any of the following paragraphs of this section (hereinafter called "prohibited immigrants") is prohibited, namely:

(*a*) Any person who when asked to do so by an officer fails to write out a dictation and sign in the presence of the officer a passage of fifty words in length in an European language directed by the officer."

This section has now been amended by section 4 of the new Act, the material provisions of which are as follows:

"4. Section 3 of the Principal Act is amended—

(*a*) by omitting the whole of paragraph (*a*), and inserting in lieu thereof the following paragraph:

"(*a*) Any person who fails to pass the dictation test: that is to say, who, when an officer dictates to him not less than 50 words in any prescribed language, fails to write them out in that language, in the presence of the officer.

No regulation prescribing any language or languages shall have any force until it has been laid before both Houses of the Parliament for thirty days and, before or after the expiration of such thirty days, both Houses of the Parliament by a resolution, of which notice has been given, have agreed to such regulation."

3. A section has been enacted which makes intermediate provision for the application of section 3, as amended, as follows:

"5. Until a regulation prescribing any language or languages under section 3 of the Principal Act as amended by this Act shall come into force, any language authorized by section 3 of the Principal Act before the commencement of this Act shall be deemed to be a prescribed language within the meaning of that section as so amended."

4. The following new section has been inserted:

"4-B. (1) Any person who has resided in Australia for a period or periods in the aggregate of not less than five years, and who is about to depart from the Commonwealth, may in manner prescribed apply to an officer authorized in that behalf for a certificate in the prescribed form excepting him, if he returns to the Commonwealth within the period limited in the certificate, from the provisions of paragraph (*a*) of section 3 of this Act.

"(2) The officer may in his discretion give the certificate on payment of the prescribed fee, or, without assigning any reason, withhold it.

"(3) Where the Minister is satisfied that a certificate given under this section has been obtained by any untrue statement of fact or intention, the

Minister may revoke the certificate, which shall thereupon be taken to be of no effect and shall on demand be delivered up to the Minister.

"(4) A person to whom a certificate under this section has been issued (which certificate has not been revoked) shall not, on his return to the Commonwealth within the time limited by the certificate, if he produces and delivers the certificate to an officer, be required to pass the dictation test."

5. Section 5 of the Principal Act has been amended, and now reads thus—

"(1) Any immigrant who evades an officer or who enters the Commonwealth at any place where no officer is stationed may if at any time thereafter he is found within the Commonwealth be *required to pass the dictation test*, and shall if he fails to do so be deemed to be a prohibited immigrant offending against this Act.

"(2) Any immigrant may at any time within one year after he has entered the Commonwealth be *required to pass the dictation test*, and shall if he fails to do so be deemed to be a prohibited immigrant offending against this Act.

The following sub-section has also been added :

"(3) In any prosecution under the last preceding sub-section, the averment of the prosecutor contained in the information that the defendant has entered the Commonwealth within one year before his failing to pass the dictation test shall be deemed to be proved in the absence of proof to the contrary."

6. Section 6 of the Principal Act has been amended, and now stands as follows :

"Any prohibited immigrant within the meaning of paragraph (*a*) only of section 3 may if thought fit by an officer be allowed to enter the Commonwealth or to remain within the Commonwealth upon the following conditions :

(*a*) He shall on entering the Commonwealth or on failing *to pass the dictation test* deposit with an officer the sum of one hundred pounds.

(*b*) He shall within thirty days after depositing such sum obtain from the Minister a certificate of exemption in the form of the Schedule or depart from the Commonwealth, and thereupon the deposit shall be returned; but otherwise the deposit or any part thereof may be forfeited and he *shall be deemed to be* a prohibited immigrant offending against this Act.

7. It will be observed that the most important change effected by the Amending Act is the substitution of "any prescribed language" for "an European language" in the case of the dictation test. The languages will be prescribed by the Regulations which will be framed under the Act. The Governor General in Council requests all Local Governments to take such measures as seem to them best calculated to make the provisions of the Act generally known to natives of India, more especially in places from which emigration to the Australian Colonies is believed to be most common. Intending emigrants should be warned at the ports of embarkation of the difficulties they may encounter in proceeding to these Colonies.

ORDERED that a copy of the above Resolution be forwarded, for information and guidance, to the Local Governments and Administrations noted in the margin and to the Home and Foreign Departments for information.

The Secretary to the Government of Madras
" " " " Bombay.
" " " " Bengal
" " " " the United Provinces

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, OCTOBER 13, 1906.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 21st March 1906.

From the 7th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 31st March all Notifications and other matter intended for publication in those Parts should be addressed to the Officiating Publisher at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's Gazette, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's Gazette. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next Gazette."

J. P. HEWETT,
Secretary to the Government of India.

No. 409 of 1906.—John Charles Fredell, manufacturer, a citizen of the United States, residing at No. 754 Arthur Ave, Pocatello, county of Bannock, and state of Idaho, U.S.A. *Improvements in electrically controlled optical appliance* (Specification filed 21 September 1906.)

No. 410 of 1906.—The Imperial Automatic Light, Limited, manufacturers, of 23/27 Station Buildings, Haggerston, in the county of London, England. *Improvements in acetylene storm lamps* (Specification filed 21 September 1906.)

No. 411 of 1906.—Andrew Murray Anderson, engineer, of Invercargill, in the Colony of New Zealand. *Improvements in the control cocks of Westinghouse brake couplings.* (Specification filed 21 September 1906.)

No. 417 of 1906.—Thomas Alexander Stephen Wood, engineer, of 4 St. Thomas road, Craven Park road, Harlesden London, England. *Improved construction of apparatus for cleaning, dyeing, or otherwise treating wool, hair, cotton and other animal or vegetable fibrous or textile material.* (Specification filed 20 September 1906.)

No. 4021 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 128 of 1896.—Michael Kirshner. *Improvements in machines for making continuous cigarettes with crimped lamp.* (From 8 October 1906 to 8 October 1907.)

No. 115 of 1897.—Walter Scott Wilkinson *Improvements in the manufacture of paving blocks, tiles and the like* (From 27 September 1906 to 27 September 1907.)

No. 96 of 1898 —Samuel Edward Haskin. *Improvements in apparatus for use in treating wood* (From 3 October 1906 to 3 October 1907.)

No. 139 of 1898.—Ernest Harry Archer *Improvements in or connected with the attachment together of boards of built up veneer for the formation of boxes.* (From 25 November 1906 to 25 November 1907.)

No. 376 of 1898 —Fredrick Robert Jones. *Improvements in vertical sugarcane mills.* (From 23 November 1906 to 23 November 1907.)

No. 274 of 1899.—Benjamin Garver Lamme. *Improvement in systems of electrical distribution and regulation.* (From 6 October 1906 to 6 October 1907.)

No. 228 of 1900.—Walter Frederic Perman. *An improved tea-leaf rolling machine to be known as "Perman's Express Tea Roller."* (From 24 September 1906 to 24 September 1907.)

No 296 of 1900.—Thomas Henry Pearse. *Improvements in cotton gins and wool burrers.* (From 12 March 1907 to 12 March 1908.)

No. 96 of 1901.—George Henry Oatway and John Henry Gartside. *Improvements in automatic fire alarms.* (From 2 October 1906 to 2 October 1907.)

No. 218 of 1901.—Howard Darling Colman. *Improvements in knot-tying implements.* (From 11 October 1906 to 11 October 1907.)

No. 271 of 1901.—John Steen. *An improved method of fabric softening.* (From 9 October 1906 to 9 October 1907)

No. 206 of 1902.—Samuel Cleland Davidson. *Improvements in apparatus for filtering, humidifying and cooling air.* (From 18 October 1906 to 18 October 1907.)

No. 4022 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorizing others so to do, has ceased —

No. 392 of 1901.—Amidhar Ranchhodji Desai. *The teaching of arithmetical numeration and notation as well as the first four rules of arithmetic.* (Specification filed 28 June 1902.)

No. 404 of 1901.—The American By-Products Company *Manufacture of oil adapted for sulphonating from cotton seeds.* (Specification filed 24 June 1902.)

No. 405 of 1901.—The American By Products Company. *Manufacture of dyestuff from cotton seeds.* (Specification filed 24 June 1902.)

No. 430 of 1901.—Gavin Jones. *Improvements in apparatus for ventilating and cooling especially applicable to railway vehicles.* (Specification filed 24 June 1902.)

No. 458 of 1901.—James Tait Williams *Improvements in mechanism for sounding bells or other sonorous bodies.* (Specification filed 24 June 1902.)

No. 461 of 1901.—Benjamin Garver Lamme. *Improvements in windings for electrical machines.* (Specification filed 5 July 1902.)

No. 123 of 1902.—Donald Barns Morison. *Improvements in mortar boxes for stamp mills.* (Specification filed 24 June 1902.)

No. 124 of 1902.—Actiengesellschaft "Magneta" (Electrische Uhren ohne Batterie und ohne Contacte). *Improvements in or relating to armatures for electric clocks.* (Specification filed 24 June 1902.)

No. 133 of 1902.—Leon Joseph Bisson. *Improved manufacture of photo-mechanical printing plates.* (Specification filed 5 July 1902.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions

No. 180 of 1900.—Tracy Barbour Hatch *Electric propelling mechanism for boats, etc.* (Specification filed 28 June 1900.)

Fee in respect of the continuance of an exclusive privilege—

4 (*c*) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of R50 for the above invention.

No. 449 of 1898.—John Dey and Alexander Dey. *Improvements in time recorders.* (Specification filed 26 June 1899.)

No. 101 of 1899.—Samuel Cleland Davidson. *Improvements in apparatus for the manufacture of compressed pellets, tabloids, or blocks of dried vegetable or other substances.* (Specification filed 27 June 1899.)

Fee in respect of the continuance of an exclusive privilege—

4 (*d*) After the expiration of the sixth year and before the expiration of the seventh year from the date of the filing of the specification—

The sum of R50 for each of the above inventions.

NOTICES

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. A consolidated index for the year 1905, entitled "Inventions and Designs in 1905," is also on sale, price one rupee. It contains a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in that year, together with lists of designs applications

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or 1*s.* 1*d.* Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and Designs Act, V of 1888.

HONOURABLE THE AGENT TO THE GOVERNOR-GENERAL IN BALUCHISTAN.

NOTIFICATION.

Dated Quetta, the 4th October 1906.

No. 4455.—The following is substituted for the form prescribed by Rule 1 of the Rules published under the Agent to the Governor-General's Notification No. 4775, dated the 22nd July 1891 :—

By order,
A. L. JACOB, Captain,
First Assistant.

FORM OF BREWERY LICENSE.

LICENSE TO WORK A BREWERY UNDER SECTION 5 OF ACT XII OF 1896.

License to work a brewery for the manufacture of malt liquors of any description according to the European method at in the district of is hereby granted to subject to the conditions prescribed in the rules made by the Chief Revenue Authority, under sections 8 and 55 of Act XXII of 1881 as amended

by Act XIII of 1890 (corresponding to sections 9 and 65 of the Excise Act, XII of 1896) regarding the time and manner of the issue and return of liquor from and to a brewery and the payment or refund of Excise duty, to such other rules for the security of the public revenue as may be hereafter made and issued under the same authority and to the conditions hereinafter specified, the infraction of any of which rules or conditions shall entail forfeiture of license.

1. No attempt shall be made to extract spirits from the grain or refuse of the brewery unless the brewer also holds a license to possess and work a distillery.

2. No wholesale vend of malt liquor shall be made at the brewery without a wholesale license or retail vend without a retail license.

3. No malt liquor shall be sold or given from the brewery to European soldiers or non-commissioned officers, whether with their regiments or on staff or civil employ, without written permission of the Officer Commanding or other official superior.

4. The brewer shall deposit any sum not exceeding R5,000 that may be required by the Collector, under the orders of the Chief Revenue Authority, as security for abstention from any attempt to defraud the revenue by removing from the brewery liquor liable to duty on which duty has not been paid, or by rendering false returns of the outturn issues and receipts of liquors or from any act involving forfeiture of license and the whole or such portion of the above sum as the Chief Revenue Authority may determine shall be liable to forfeiture in the event of any attempt to defraud the revenue or of the intentional commission of any act involving forfeiture of the license being proved. On the license expiring otherwise than by forfeiture, the sum so deposited shall be returned by the Collector.

5. Such deposit shall further be at the disposal of the Collector for the discharge of all payments, whether of Excise duty or of fines or forfeitures, to which the brewer may be liable by law, by these rules, or by the conditions of this license.

6. The brewer shall provide suitable accommodation within the brewery for any Excise Officer or Officers who may be there stationed to check the outturn, issues and receipts of fermented liquors, and to see that the provisions of the Excise Act and of the rules framed under it are duly complied with.

7. The Excise Officer or Officers stationed at a brewery shall be allowed free access at any time of the day, and if specially authorised by the Collector or other officer in charge of the brewery at any time during the night, to every part of the brewery premises, for purposes of inspection or for the performance of Excise duties. The Collector or other officer placed by him in charge of the brewery shall be allowed free access to every part of the premises at any hour of the day or night.

8. The brewer shall provide and maintain sufficient and just liquid Imperial measures and other necessary and reasonable appliances to enable the officers to take account of or check by gauge or measure all casks, jars, bottles or other vessels issuing from the brewery, and must render all reasonable assistance to the officers in the gauging, measuring or check of such vessels.

9. The brewer shall maintain the following books :—

(*a*) A book showing the quantity of fermented liquor manufactured and issued from the brewery, with a detail of the places to which liquor issued has been consigned and the names of the consignees.

(*b*) A book showing returns of fermented liquor, made at the brewery or receipts of liquor, whether imported or Baluchistan brewed, with a detail of the persons and places by whom and from which liquor has been returned or received. This book should show in a separate column any imported beer received at the brewery on which duty has been paid at the port of landing and on which duty is not again chargeable under these rules.

10. With the sanction of the Revenue Commissioner, payments and refunds of duty in any licensed brewery may be made by book credit in any account kept for the purpose by the Excise Officer in charge of or the Excise Officer stationed at the brewery, on the understanding that the account thus maintained be settled quarterly and that any sum found to be due by the brewer be paid into the nearest Government Treasury within one week of the expiration of the quarter.

11. A quarterly account shall be prepared by every brewer and shall be forwarded by him to the Collector of the district on or before the 15th day of each of the months of January, April, July and October. Such account shall show the total quantity of liquor issued during the preceding quarter, the quantity on which duty was payable, the amount of duty paid either in cash or by book credit, the quantity of liquor returned unsold to the brewery, and the amount received as a refund of duty actually paid. Any other returns regarding the outturn and receipts of liquor at the brewery or the payment or refund of Excise duty that may from time to time be prescribed or required under the orders of the Chief Revenue Authority shall be promptly and punctually furnished.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Simla, the 15th October, 1906.

No. 147.—Mr. J. P. Henderson, Executive Engineer, 1st grade, Burma, is permitted to retire from the service of Government under the provisions of articles 635 and 641 (*c*) of the Civil Service Regulations, with effect from the afternoon of the 20th October 1906.

The 18th October, 1906.

No. 148.—The following is published for general information:

No. 1140-E., dated Simla, the 15th October 1906.

RESOLUTION—By the Government of India, Public Works Department.

Revised rates of pay to be drawn by Royal Engineer Officers in the Engineer Establishment of the Public Works Department.

Read—

(1) Resolution by the Government of India, Public Works Department, No. 1101-E, dated the 25th August 1905.

(2) Despatch to His Majesty's Secretary of State for India, No. 146, dated the 3rd May 1906.

(3) Despatch from His Majesty's Secretary of State for India, No. 40-P. W., dated the 29th June 1906.

Read also—

Resolution by the Government of India, Public Works Department, No. 471-E., dated the 30th April 1906.

RESOLUTION.—In consequence of the improvement in the pay of Civil Engineers in the administrative grades of the Public Works Department, under the orders contained in the Resolution of the 25th August 1905, quoted in the preamble, the Governor General in Council has decided, with the concurrence of His Majesty's Secretary of State for India, to introduce the following changes in connection with the rates of pay of Royal Engineer Officers in the Public Works Department, who, under existing rules, draw either consolidated salary *plus* military pay proper, or staff salary with the military pay and allowances of their rank.

(1) *As regards future entrants.*—

(*a*) All future entrants to the Public Works Department will come on to the staff scale of pay laid down in Public Works Department Code, Volume I, paragraph 10, and will continue on that scale through the Assistant and Executive grades.

(*b*) On promotion to the administrative grades, whether officiating or permanent, they will be brought on to the civil scale of pay sanctioned in the resolution of the 25th August 1905, and be subject to the conditions specified in the resolution of the 30th April 1906, that is, they will cease to draw exchange compensation allowance when they rise to these grades.

(2) *As regards Officers already in the Department.*—

(*a*) Officers who are already on the permanent strength of the Department, but who have not yet reached the administrative grades, will continue on the scale of pay now drawn until they receive promotion to the rank of Superintending Engineer, whether officiating or permanent, when they will be allowed the option of electing to continue to draw the staff or consolidated scale of pay, or the new civil rates.

(*b*) Those already in the administrative grades, whether officiating or permanent, will have the option of continuing on the staff or consolidated scale of pay, or of electing the new civil rates. Such election will take effect from the 21st August 1905, the date on which the new civil scale was introduced, or from the date of actual promotion to the administrative grades if subsequent to that date.

(*c*) All officers already on the permanent strength of the department will be eligible for exchange compensation allowance in the administrative grades.

ORDER.—Ordered that the foregoing resolution be communicated to Local Governments, Administrations, and Officers noted in the margin, for information and guidance, and that it be published in Part I of the *Gazette of India*.

The Governments of Madras, Bombay, Bengal, the United Provinces of Agra and Oudh the Punjab, Burma, and Eastern Bengal and Assam, Public Works Department.
The Honourable the Chief Commissioner of the Central Provinces.
The Chief Commissioner of Coorg.
The Honourable the Resident at Hyderabad.
The Honourable the Agents to the Governor General for Central India, Rajputana, and Baluchistan.
The Honourable the Agent to the Governor General and Chief Commissioner, North-West Frontier Province.
The Accountant General, Public Works Department.
The Secretary, Railway Board.
The Director General, Military Works Services.

ORDERED also that a copy be communicated to the Finance Department.

No. 149.—It is hereby notified that subject to the conditions laid down in Public Works Department Resolution No. 139-A E., dated 17th June 1899, published in Notification No. 278, dated 29th June 1899, one vacancy in the Superior Accounts Branch of the Public Works Department will be open to competition at the next examination for admission into that branch of the service.

Applications for nominations should be addressed to the Accountant General, Public Works Department, in accordance with paragraph 3 of the rules referred to, not later than the 15th January 1907.

The 19th October, 1906.

No. 150.—Mr. Sunder Lal, a qualified student of the Thomason Civil Engineering College, Rurki, is appointed to the Provincial Service of the Engineer Branch of the Public Works Department as an Assistant Engineer, 3rd grade, with effect from the 22nd September 1906, and is posted to the Central Provinces.

No. 151.—With reference to Public Works Department Notification No. 115, dated 31st August 1906, Mr. J. E. Lacey, Assistant Accountant General, Public Works Department, officiated in Class III of Examiners from 15th August 1906 to 16th October 1906 inclusive.

L. M. JACOB,

Secretary to the Government of India.

(a) Figures for week ending 6th October 1906. Imported.

H. H. RISLEY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs., on Thursday, the 18th October 1906, based on the Indian Daily Weather Reports of the period.

The weather of the week was characterized by a further weakening of monsoon conditions in northeast India and Burma, and the appearance of an area of low pressure in the extreme southwest of the Bay on the 16th. This disturbance gave widespread rain over the southern half of the Peninsula on the 18th

Burma.—Only a few isolated falls of rain occurred in the period, and during the first half of the week skies were lightly overcast, throughout the latter part however they were almost clear. Both day and night temperatures were normal.

Northeast India and Orissa—On the 12th light to moderately heavy rain fell locally except in Bihar, but by the following morning it had diminished considerably and was chiefly confined to Bengal and west Bihar. During the remainder of the period only occasional scattered falls occurred except on the 15th when precipitation was fairly general in Chota Nagpur. Skies were generally clear or lightly clouded, and temperature was normal

The United Provinces, Central India and the Central Provinces.—Light rain was reported from Raipur on the 12th and 15th, and from Chakrata on the 16th Skies remained clear and temperature about normal

Northwest India—In Gujrat there were a few light falls of rain during the week, but elsewhere weather was dry and skies generally clear The nights were hotter than usual except in Gujrat and the day temperatures were approximately normal.

The Peninsula.—The monsoon was fairly active in the southern half of the Peninsula, and for the first four days precipitation was generally light and chiefly confined to the interior. On the 16th however an area of low pressure appeared off the east coast of Ceylon and rainfall increased rapidly, extending over nearly the whole of the southern half of the Peninsula by the 18th, it was heavy on the south of the Madras coast, and light to moderate elsewhere. Skies were clear or lightly overcast until the disturbance began to affect the weather when they clouded over, and at the end of the week they were heavily overcast in the southern half and lightly to moderately clouded elsewhere. Temperature was normal except on the 18th when the maximum was in defect in the greater part of the Madras presidency owing to the rain.

The total rainfall for the whole period from the 4th May to the 18th October is 20 per cent. or more in defect in Baluchistan, Sind and the rainfall subdivisions of Jaipur, Ranchi and Cuttack, and practically normal in other parts of the Indian region, except the West Satpuras and the subdivisions of Simla, Indore and Mysore where it is 20 per cent. or more in excess.

The following summarises the chief rainfall amounts of the week, as reported at 8 hrs. each day:—

October 12th. Bassein 2·15", Bogra 2·55", Burdwan 2·14", False Point 1·57" and Bhuj 1·20".

" 13th. Jessore 1·55".

" 14th. Mergui 1·60".

" 15th. Cuddapah 1·06", Trichinopoly 1·02" and Tinnevelly 1·16".

" 16th. Gaya 1·65" and Madura 1·34".

" 17th. Pamban 3·52".

" 18th. Negapatam 3·50" and Pamban 3·94".

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 13th October 1906.

Burma.—Light to moderate rain has fallen everywhere. Reaping of hill side paddy has commenced in Toungoo, is completed in Kyaukpyu, and continues in several centres. Transplanting of wet-weather paddy is still in progress in parts of Upper Burma. Reaping of early wet-weather paddy is completed in Meiktila and the Northern Shan States. Reaping of early sesamum is completed in Magwe and the Northern Shan States; gathering of ground-nuts has commenced in Magwe township of Magwe; plucking of cotton has commenced in Meiktila and is progressing elsewhere; ploughing for and sowing of *juar*, late sesamum, and beans are completed in Myingyan; cultivation of dry crops continues in most places. More rain is wanted in Thayetmyo and in parts of Bassein and Meiktila. Some damage to crops has been done by floods in parts of Mandalay, Shwebo, and Lower Chindwin and by insects in portions of the Southern Shan States; cotton has been damaged in parts of Sagaing by heavy rain; the state of the standing crops is on whole good and prospects are favourable. The price of paddy is considerably above normal everywhere, it has risen very largely in Prome, considerably in Mergui and slightly in two districts, it has fallen slightly in four districts, elsewhere it is stationary.

Eastern-Bengal and Assam.—The weather is seasonable. Light to moderate rain has fallen in all districts except the Chittagong hill tracts. More rain is wanted for transplanted rice in Rajshahi. The outturn of tea is good in the Surma Valley, Darrang, and Nowgong, and fair elsewhere. Ploughing of land for mustard has commenced. Sowing of pulses is in progress. Harvesting of early rice and transplantation of late rice are practically finished. The outturn of early rice is generally fair. The prospects of winter rice and of other standing crops are moderate except in places where damage was caused by floods. Insects are causing slight damage to paddy in parts of Sylhet and Lakhimpur. Cutting of jute is still in progress, and the outturn is good. Prices of common rice:—Kohima 11; Manipur 10; Rangamati 7 to 10; Sibsagar 9; Chittagong and Tezpur 8, Dinajpur 7 3/16; Gauhati and Dibrugarh 7; Pabna 6¼; Faridpur 6¼ to 6½; Noakhali 6 to 6½; Comilla and Silchar 6⅜; Dacca and Barisal 6¼, Malda, Sylhet, Dhubri, and Nowgong 6; Mymensingh 5⅞; Rangpur 5¾; Jalpaiguri 5½; Rampur Boalia 5⅞; Tura 5; and Shillong 4⅞ seers per rupee. Prices have risen in three; fallen in eight; and have remained stationary in the remaining districts.

The number of persons receiving gratuitous relief in Noakhali is 401. There are 213 persons on test works in Dacca and about 50 persons on gratuitous relief in Comilla. The high prices are felt by the non-agricultural more than by the agricultural population. Rupees 359 have been distributed in agricultural loans in Chittagong.

Bengal.—There was good rainfall in Birbhum, Bankura, Nadia, Jessore, Cooch Bihar, and in some sub-divisions of Burdwan and the 24-Parganas, but there was no rain in Saran, Champaran, Monghyr, Cuttack, and Palamau; in other districts the rainfall was very light. More rain is wanted in many districts, especially in most parts of Bihar. Damage to *aman* paddy by floods is reported from Jessore. Locusts passed through the 24-Parganas, Jessore, and Purnea. Distress continues in the 24-Parganas, Jessore, Saran, Muzaffarpur, and Darbhanga. The number of persons receiving gratuitous relief are:—24-Parganas 12,007, Saran 1,171, Muzaffarpur 5,534, Darbhanga 32,872, total 51,584; the number of persons attending test works are:—Saran 2,146, Darbhanga 3,256. Fodder is reported to be insufficient in four districts. The water-supply is generally sufficient. The price of common rice has risen in eleven and fallen in seven districts.

United Provinces.—There was a slight sprinkling of rain in fourteen districts. Rain is urgently needed in the south-eastern and eastern submontane districts where the late rice is suffering. The standing crops elsewhere are doing well and are being harvested. Ploughing for and sowings of spring crops are in progress. Cholera and fever still continue in a few districts. Fodder and supplies are sufficient. Prices are generally stationary but show a tendency to rise in seven districts, and to fall in five.

The weekly report on the famine and scarcity is as follows:—Twenty-one cents rain in Banda, and 114 cents in Gorakhpur, more rain is required in latter district for late rice which is suffering. Prospects in Bundelkhand are excellent. Prices have fallen there but are still high in Gorakhpur. Numbers on relief are now:—Allahabad Division—on works *nil*; on gratuitous relief 33,000; Gorakhpur—on works 41, on gratuitous relief 207; grand total 33,248.

Punjab.—There was slight rainfall at Murree in the Rawalpindi district during the week. There have been slight fluctuations in the prices of food-grains; wheat is rising in Delhi, and falling in Gurgaon, Jullundur, Rawalpindi, and Mianwali, and warning rates prevail in Shahpur. Harvesting of the autumn and sowings of the spring crops continue. The condition and expected yield of the standing crops are generally good to average; outturn of cotton is poor in Amritsar. Locusts appeared and damaged the standing crops slightly in Gurgaon, Ambala, Jullundur, Ferozepore, and Shahpur, the *toria* (*Brassica Campestris*) crop is reported to have been badly damaged by locusts in Lahore; locusts laid eggs in parts of Jullundur, Ferozepore, and Amritsar, and prompt measures have been taken for their destruction; cotton is still being damaged by insects or boll-worm in Multan, and Lyallpur and maize in Amritsar. Cattle are in good condition. Fodder is sufficient. There are no complaints regarding the water-supply.

North-West Frontier Province.—No rain during the week. Rain is wanted for unirrigated tracts in the Bannu district. The condition of the standing crops on irrigated and unirrigated areas is good except in Swabi where it is slightly below average. Harvest prospects and probable outturn of autumn crops are fair. Spring sowings are in progress. The canal water and the Kilapani supply is sufficient. There is no irrigation from hill torrents in Dera Ismail Khan. A flight of locusts passed southward on the 14th in the Dera Ismail Khan district and slightly damaged the standing crops. The condition of cattle is good except in the Tank and Kulachi tahsils. Stocks of food-grains are sufficient. Fodder is procurable. Prices are fluctuating. Prices:—wheat 15 to 18½; maize 15 to 20$\frac{5}{16}$; gram 17$\frac{1}{16}$ to 19; and *bajra* 13 to 17½ seers per rupee.

Jammu.—No rain. Prices are fluctuating. Prices:—wheat 11 to 20 and maize 12 to 32 seers per rupee. The condition of the standing crops is good. Fodder is sufficient. Scarcity exists in Kishtwar owing to failure of the spring crops.

Kashmir.—The weather is bright. Prices are stationary.

Rajputana.—Harvesting operations continue and also sowings for spring crops. Prospects are favourable. The condition of cattle is good. Pasturage is sufficient. Prices are fluctuating in Karauli, but have fallen or are steady elsewhere; prices are still high in some places.

Central India.—Rainfall good in Gwalior; partial in Bhopal; none in Baghelkhand, Bundelkhand and Malwa, and slight in Bhopawar. Ploughings for and sowings of spring crops are in progress. The standing crops and probable outturn are fair to good. Crops have been slightly damaged by locusts in parts of Gwalior, and cotton has been partially injured in parts of Bhopawar. Pasturage is good and sufficient. Prices are high in Gwalior and Baghelkhand; normal in Bhopal; steady in Bundelkhand; fallen slightly in parts of Malwa; and are stationary in Bhopawar.

The weekly report on the famine and scarcity is as follows:—The numbers on relief in Bundelkhand are:—on works 270, on gratuitous relief 440, total 710. Prices—14 seers per rupee. Works and gratuitous relief have been closed in Ajaigarh, Bhilsa, and Garauli.

Central Provinces.—There was no rain during the week except a few showers in Raipur. The days are clear and warm but nights and mornings are cool. Spring sowings are in progress everywhere but a shower of rain is needed to accelerate them in Chanda, Wardha, and Raipur. In Akola some rain is desirable for *juar* in inferior soil. *Juar* is in ear and cotton in pod in Akola, Amraoti and Buldana; in Mandla and Balaghat the germination of spring crops is satisfactory, harvesting of rice and other minor crops is in progress everywhere except in Wardha, Nagpur, and the Berar districts. Locusts passed over Etawah (Saugor) towards the Bhopal State but caused no damage. *Juar* is suffering from disease in Wardha and in Ramtek tahsil (Nagpur) from insects: some damage from grasshoppers is also reported in the Mehkar taluk (Buldana); cotton is stunted owing to excessive moisture and consequent delay in weeding in Nagpur. The standing crops are otherwise generally in good condition. Fodder and water are sufficient throughout. The price of rice has slightly fallen in Narsinghpur and of gram in Chhindwara; in Damoh gram is dearer by 1 seer per rupee: prices elsewhere are stationary and are equal to the scarcity level in Nagpur, Chanda, Balaghat, Drug, and Bilaspur.

Bombay.—There was good rain during the week in Kolaba, Ratnagiri, Kanara, Belgaum, Dharwar, Kolhapur, and Kathiawar, and slight rain in the remaining Native States and in Gujarat, Thana, the Deccan, and Bijapur. More rain is needed for maturing crops and for spring sowings in parts of the Deccan and Bijapur. The standing crops have been slightly damaged by locusts in Karachi and Cutch; by grasshoppers in Sholapur; by insects in Upper Sind Frontier and Khandesh; and by rats and rust in Karachi; and are generally in good condition elsewhere. Harvesting of autumn crops and sowing of spring crops continue. Picking of cotton is progressing in Sukkur, Thar and Parkar Ahmedabad, and Ahmednagar. The supply of water for drinking and irrigation purposes is adequate. Agricultural stock is insufficient in parts of Ahmednagar, Poona, Sholapur, Bijapur, and Cutch. Cattle are generally in good condition. The fodder-supply is sufficient. Stocks of grain in markets are adequate. Prices are falling. The quantity of

grain purchasable per rupee is in the Deccan 18 to 47 per cent; in the Karnatak 11 to 30 per cent; and elsewhere 5 to 30 per cent less than the normal. Labourers get sufficient employment in fields and on private works. The public health is generally good. The numbers on relief are:—British districts:—Deccan—on works 81, on gratuitous relief 1,363, total 1,444; Karnatak—on works 2,130, on gratuitous relief 5,275, total 7,405; Native States:—on works 246, on gratuitous relief 965, total 1,211.

Hyderabad.—Rainfall—42 cents. Prospects continue favourable. The autumn harvest has commenced in parts. The standing autumn and early rice crops are fair to good. Spring sowings continue. Prices:—wheat 8½, rice 7½, and *juar* 17 seers per rupee.

Mysore.—Rain good generally throughout the State. The standing crops are in good condition. The prospects of the season are good. Cattle are healthy. Water and, fodder are available.

Coorg.—Rainfall one inch 89 cents. Picking of cardamom continues. Prices of food-grains are stationary. Water and fodder are sufficient.

Madras.—There was no rain in Madras; the fall was good in Nilgiris, Anantapur, Coimbatore, Cuddapah, Salem, Trichinopoly, Kurnool, Bellary, North Arcot, Madura, and Tinnevelly; and light to fair elsewhere. Irrigation supplies are sufficient except in parts of the Circars, the Deccan, South Arcot, Salem, Madura, and Tinnevelly. Ploughing, sowing, weeding, and transplanting are in progress in parts. The standing crops are generally fair but some require more rain in parts of Godavari and Tanjore, and some are diseased in parts of Bellary and Anantapur. Harvests continue with outturn poor to normal and bumper. Pasture is sufficient except in parts of Tanjore and Tinnevelly. Fodder is scanty in parts of the Circars, Bellary, Anantapur, Coimbatore, and Tanjore. The condition of cattle is generally good. The price of rice is stationary in twelve districts; has fallen in nine; and has slightly risen in two. The prices of millets have fluctuated as follows:—*ragi* is stationary in eight districts; has fallen in ten; and has slightly risen in three. *Cholam* is stationary in three districts; has fallen in nine; and has slightly risen in two. *Cumbu* is stationary in three districts; has fallen in nine, and has slightly risen in three.

The number of persons in receipt of relief during the preceding and present weeks in each Province or State is shown in the following table:

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

FORESTS.

Simla, the 9th October, 1906.

RESOLUTION.

In connection with the raising of the status of the Forest School at Dehra Dun to that of Imperial Forest Research Institute and College, the Government of India have had under consideration the questions of the system of recruitment for the Provincial Forest Service, and of the training both for that Service and for the Subordinate Executive Service. After consulting Local Governments, they have arrived at the following conclusions, which are based upon the general principle that it is sufficient for them to prescribe maximum limits of expenditure and minimum limits of qualifications and training, and to leave each Local Government within those limits to draw up rules for its own Forest Service.

2. While the Government of India attach great importance to the efficient training of Deputy Rangers, Foresters and Guards, they consider that the training of these subordinate officials should now be left to Local Governments. They have accordingly decided that the Vernacular class hitherto maintained at the Forest School, Dehra Dun, shall be abolished. They trust that all Local Governments will make satisfactory arrangements for the training of the Subordinate Executive Service below the rank of Ranger, and will be glad if each Local Government will in due course inform them as to the system which it has adopted with this object.

3. In future the education to be given at the Imperial Forest College will be conducted entirely in English, and will be designed for the training of candidates for the post of Ranger and for the Provincial Service. The ordinary course will last for two years, its main object being to give such an education as will fit a candidate for appointment as Ranger. At the close of this period of two years an examination will be held, on the results of which three classes of certificate will be issued, known respectively as the Honours, Higher Standard and Lower Standard certificates. Candidates will be admitted to this course in accordance with the College rules.

4. In addition to the ordinary course of two years, arrangements will now be made at the Forest College to give a third year's training, both theoretical and practical, designed to fit the student for early appointment to the Provincial Forest Service. Ordinarily no student will be admitted to this third year course unless he has obtained the Higher Standard certificate at the close of the two years' course, and unless his Local Government or Native State desires that he should remain at the College for a third year. Should however a Local Government or Native State desire that any particular student should undergo only a selected portion of the College training, or that any selected Ranger should be given the third year's course, without having passed by the Higher Standard, or some years after he has so passed, the Principal may arrange to give him the required training, provided that he is satisfied that the student's qualifications are such as to enable him to benefit from the course of instruction desired, and that there is room for him at the College. He may also, on the same conditions, admit any private student who is prepared to defray his own expenses.

5. The Government of India are prepared in future to leave it to Local Governments to draw up their own rules regarding appointments to the post of Ranger, subject to the following conditions. The rules should provide for the appointment as Rangers of subordinate officials of long service and

tried ability and probity, in order to encourage efficiency among the Deputy Rangers and Foresters. In such cases selection may be made by the Local Government without restrictions as to the special training the officers may have undergone or the educational certificates they may have obtained; but it may sometimes be advisable to require a selected subordinate to undergo a special course of training or to pass specified examinations before his permanent appointment to the class of Ranger. Direct appointments to this class however should only be given to trained candidates who have obtained the Higher Standard certificate at the Forest College, and have satisfied such other conditions as the Local Government may think fit to impose. It will in future be left to Local Governments to give what weight they choose to the Honours and Lower Standard certificates of the Forest College. It will also be for them, subject to the rules of the College, to draw up their own rules as to the selection of candidates to be admitted to the ordinary College course; and they may grant to such selected candidates, whether already in the service or not, a stipend not exceeding Rs. 50 per mensem for the two years' course.

6. The Government of India have learned from the reports submitted by Local Governments that there is a general feeling of dissatisfaction with the existing standard of qualifications of the members of the Provincial Service. This inferiority of standard appears to be to some extent due to the present practice of appointing to the lowest grade of Extra-Assistant Conservator men who have served for a considerable period as Rangers, so that a candidate who looks forward to an appointment in the Provincial Service cannot expect to attain to it until he is somewhat advanced in years, and has poor prospects of reaching the higher grades of that Service. The Government of India think it of great importance, in order to maintain a high standard of efficiency among the Ranger class, that officers of that class should remain eligible for promotion to the Provincial Service, and are accordingly pleased to rule that in future a Local Government may appoint to the lowest grade of Extra-Assistant Conservator any selected Ranger of long service and of tried ability and probity, irrespective of the educational certificates he may hold, but subject to any special training or examination which the Local Government may see fit to prescribe in each case. In order however to encourage men of good education and good social standing to enter the Provincial Service, they consider it desirable to introduce a system under which a Local Government may select candidates for direct appointment to that service; and in order that such specially selected candidates may acquire the higher qualifications necessary to fit them for the duties of the Provincial Service, they have, as already explained, resolved to arrange for a third year's course at the Forest College. Such candidates may be selected by the Local Government either before or after completion of the ordinary two years' curriculum, but before being allowed to take up the third year's course, they must have obtained the Higher Standard certificate of the College; and before appointment to the Provincial Service they must have obtained a certificate from the Principal that they have satisfactorily completed the third year's training. Candidates who are specially selected by the Local Government for direct appointment to the Provincial Service may be granted a stipend not exceeding Rs. 100 per mensem during the course of three years' training, or such portion of it as the Local Government may prescribe. When such a candidate has satisfactorily completed the third year's training at the College, he may be posted to the Forest Service either as a Ranger or as a probationary Extra-Assistant Conservator, but may not be permanently appointed to the Provincial Service until he has completed at least three years' satisfactory service. It will rest with the Local Government to decide whether the probationary period should be longer than three years, and how the candidate should be employed until he is given a permanent appointment in the Provincial Service; and until he can be absorbed in the permanent staff, he may be given such salary as the Local Government thinks proper, not exceeding Rs. 150 per mensem for the first three years, or thereafter Rs. 200 per mensem. It will be for the Local Government to decide when such a candidate should be given a permanent appointment, and whether any proportion of vacancies in the Provincial Service should be guaranteed to candidates of this class. If any Local Government

considers it necessary to compensate the existing staff of Rangers for their diminished prospects of promotion owing to the introduction of this new class of selected candidates for direct appointments in the Provincial Service, the Government of India will be prepared to consider any definite proposals which it may desire to make with this object.

7. In order to meet the peculiar circumstances of Burma, which already possesses a Forest School of its own, the Government of India are pleased to approve of the following modifications in the scheme described above in its application to that Province. Pending the establishment of an English course at the Burma Forest School, Conservators may make direct appointments as probationary Rangers of natives of Burma with a knowledge of English on a pay of Rs. 75 per mensem. Men so appointed will be on probation for two years, during which time their removal or dismissal will rest with the Conservator. After two years' approved service they may be confirmed in their appointment by the Local Government, but will not be eligible for an appointment on more than Rs. 100 per mensem until they have obtained a Higher Standard certificate in the English course at the Burma Forest School or at the Forest College. Candidates selected for direct appointment to the Burma Provincial Service, though they may undergo their first two years' training at the Burma Forest School, must complete the third year's course at the Imperial Forest College, and must thereafter remain on probation for at least three years, during which time they may be given such salary as the Local Government may prescribe, not exceeding Rs. 175 per mensem for the first three years, or thereafter Rs. 200 per mensem.

8. The attention of Local Governments is invited to the changes which have been made in the Forest Department Code and in the rules of the Forest College; and they are desired to submit for the information of the Government of India any rules they may draw up to carry out the objects of this Resolution.

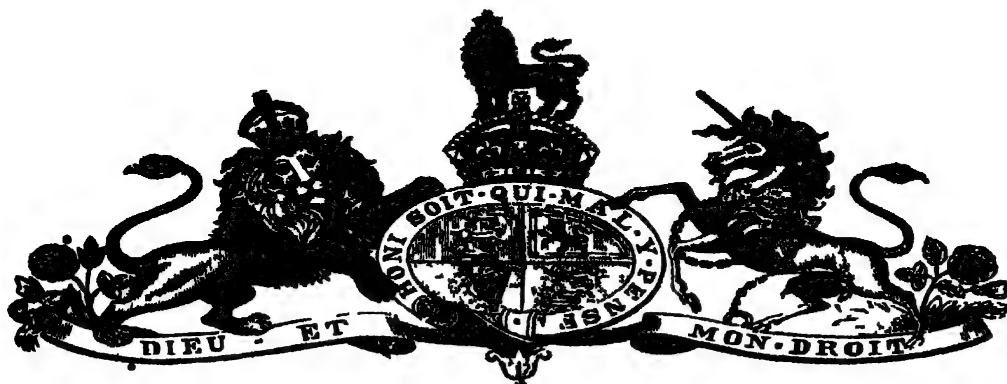
ESTABLISHMENTS

Simla, the 15th October, 1906.

No. 1219.

The Honourable SIR ARUNDEL TAGG ARUNDEL, K.C.S.I., has resigned his office as an Ordinary Member of the Council of the Governor General of India, with effect from the 15th October 1906.

No. 1220.



A vacancy having occurred in the office of an Ordinary Member of the Council of the Governor General of India by the resignation of the Honourable SIR ARUNDEL TAGG ARUNDEL, K.C.S.I., His Majesty the King, Emperor of India, has been graciously pleased to appoint the Honourable SIR HARVEY ADAMSON, Kt., C.S I., to be an Ordinary Member of the Council of the Governor General of India.

The Honourable SIR HARVEY ADAMSON has, on this day, taken upon himself the execution of his office under the usual salute.

H. H. RISLEY,

Secretary to the Government of India

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 21st March 1906.

From the 7th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 31st March all Notifications and other matter intended for publication in those Parts should be addressed to the Officiating Publisher at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's Gazette, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's Gazette The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next Gazette."

J. P. HEWETT,
Secretary to the Government of India.

DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 19th October 1906.

NOTIFICATIONS.

No. 4138 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 15th October 1906:—

No. 510 of 1906.—J. N. De, photographer and artist, 35 Nil Komol Kundoo's lane, Sibpur, Howrah. *A self adjustable easy chair.*

No. 511 of 1906.—James Robinson Hatmaker, gentleman, of No. 25 Rue de la Faisanderie, Paris, France. *Improved milk-food for infants and others and method of manufacture.*

No. 512 of 1906.—Thomas Henry Glasscoe, gas engineer, of 'Ivydale,' Herongate road, Wanstead, in the county of Essex, England. *Improvements in and relating to carburetted air apparatus.*

No. 513 of 1906.—Thomas Henry Glasscoe, gas engineer, of 'Ivydale,' Herongate road, Wanstead, in the county of Essex, England. *Improvements in the arrangement and construction of carburetted air gas apparatus and relating to automatically and thermostatically controlled mixing valves.*

No. 514 of 1906.—Thomas Henry Glasscoe, gas engineer, of 'Ivydale,' Herongate road, Wanstead, in the county of Essex, England. *Improvements in gas burners.*

No. 515 of 1906.—William George Meddings, Inspector of New Zealand telegraphs, of Remuera, in the provincial district of Auckland, and colony of New Zealand. *An electrical device for recording the breaking of a fire prevention sprinkler.*

No. 516 of 1906.—Charles Butters, metallurgist, of 28 Bishopsgate street Within, London, England. *Process and apparatus for filtering slimes.*

No. 517 of 1906.—Marconi's Wireless Telegraph Company, Limited, of 18 Finch lane, in the city of London, England. *Improvements in or relating to wireless telegraphy.*

No. 518 of 1906.—Sreemanthula Kuppachary, carpenter, Venkatagiri Town Madras. *An improved water-lift.*

No. 519 of 1906.—Rai B. B. Chakravarti Bahadur, executive engineer, Benares Provincial Division, Benares. *Improved lock-tile called "Chakravarti" tile.*

No. 520 of 1906.—Edward Murray Tomlinson, clerk in Holy Orders, of The Castle House, Petersfield, Hants, England. *Improved hand signalling lantern for the use of railway guards, shunters and others.*

No. 521 of 1906.—James Walker, temporary engineer, Public Works Department, 7 Arsenal road, Poona. *An instantaneous hose coupling.*

No. 522 of 1906.—James Norman Caught, engineer, of No. 67 Fitzroy street, St. Kilda, in the state of Victoria and commonwealth of Australia. *An improved tap for drawing kerosene and other liquids from tins and like vessels.*

No. 523 of 1906.—Francis Lawrence Lane, engineer, and the Leeds Forge Company, Limited, engineers, of the Leeds Forge, Leeds, in the county of York, England. *Improvements in wagon doors.*

No. 524 of 1906.—W. C. R. Savage, Lieutenant, 32nd Lancers (I.A.), Sialkot, Punjab. *An improvement in the manufacture of playing cards.*

No. 4139 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras,

Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection from 11 A.M. to 3 P.M. at the Secretary's office, 2 Bankshall Street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 63 of 1906.—Wilford Arthur Peloquin Cosserat, signal engineer, on the Bengal-Nagpur Railway, British India. *Improvements in signals and in cabin levers used therewith.* (Specification filed 21 September 1906.)

No. 107 of 1906.—Wilford Arthur Peloquin Cosserat, signal engineer, Bengal-Nagpur Railway. *Improvements in the securing of railway signals.* (Specification filed 12 October 1906.)

No. 112 of 1906.—Ronald Frank Mayes, chief draughtsman, Locomotive and Carriage Department, B. B., & C. I. Railway, Parel, Bombay. *Improvements in the locking devices of railway brakes.* (Specification filed 9 October 1906.)

No. 115 of 1906.—Lewis Joseph Orland Oakley, Superintendent of Stables, of the Maharaja of Cooch Behar, at present residing at "Woodlands", Alipore, in the district of 24 Pergunnahs. *A polo nose-band.* (Specification filed 9 October 1906.)

No. 277 of 1906.—Percy John Neate, engineer, of "Belsize," Watts Avenue, Rochester, in the county of Kent, England. *Improvements in spring wheels for vehicles and cycles.* (Specification filed 5 October 1906.)

No. 278 of 1906.—Percy John Neate, engineer, of "Belsize," Watts Avenue, Rochester, in the county of Kent, England. *Improvements in springs.* (Specification filed 5 October 1906.)

No. 388 of 1906.—William Henry Wolff, executive engineer, Bombay, Baroda and Central India Railway, at present residing at Bulsar, Gujarat, British India. *Improvements in keys for railway chairs.* (Specification filed 21 September 1906.)

No. 423 of 1906.—Donald Murray, telegraph engineer, of 3 Lombard Court, in the city and county of London, England. *Improved actuating mechanism for keyboard operated machines.* (Specification filed 12 October 1906.)

No. 451 of 1906.—William Taylor, engineer, of the firm of Taylor Brothers, Midland Foundry, Sandiacre, in the county of Derby, England. *Improvements in means or appliances for operating railway and tramway points, and the like.* (Specification filed 12 October 1906.)

No. 4140 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 147 of 1895.—William Bull. *Improvement in burning bricks and tiles.* (From 2 December 1906 to 2 December 1907.)

No. 341 of 1895.—Theodore Guilleaume. *Improved means for insulating electric conductors.* (From 18 January 1907 to 18 January 1908.)

No. 94 of 1899.—Gopal Mahadeo Vidwans. *A box latrine.* (From 6 November 1906 to 6 November 1907.)

No. 121 of 1901.—John Howard Ross. *Improvements in acetylene gas generators.* (From 29 October 1906 to 29 October 1907.)

No. 198 of 1901.—Charles Arthur Berkeley Beatty. *A new or improved fastening for stable door guard poles.* (From 8 October 1906 to 8 October 1907.)

No. 68 of 1902.—Frank Conrad. *Improvements in instruments for indicating the phase relation or the difference in frequency of two alternating or polyphase current circuit.* (From 26 November 1906 to 26 November 1907.)

No. 136 of 1902.—Thomas Steel Perkins. *Improvements in controllers for electric motors.* (From 12 November 1906 to 12 November 1907.)

No. 141 of 1902.—James Hinks and Son, Limited, and Harry Dain Hinks. *Improvements in tubular or hurricane lanterns.* (From 28 October 1906 to 28 October 1907.)

No. 361 of 1902.—Arthur Charles Cavendish Liardet. *Improvements relating to bottles and similar liquid containing vessels.* (From 25 October 1906 to 25 October 1907.)

No. 4141 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorizing others so to do, has ceased:—

No. 390 of 1901.—Montague Churchill-Shann. *Improvements in punkah pulling machines.* (Specification filed 7 July 1902.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for the above invention

No. 121 of 1900.—Henry Marles and George Weller Butt. *Improvements in carving machines.* (Specification filed 12 July 1900.)

Fee in respect of the continuance of an exclusive privilege—

4 (*c*) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of R50 for the above invention.

No. 170 of 1899.—Dr. Carl Auer von Welsbach *Improvements in illuminating conductors for incandescent electric lamps.* (Specification filed 27 June 1899)

Fee in respect of the continuance of an exclusive privilege—

4 (*d*) After the expiration of the sixth year and before the expiration of the seventh year from the date of the filing of the specification—

The sum of R50 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. A consolidated index for the year 1905, entitled "Inventions and Designs in 1905," is also on sale, price one rupee. It contains a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in that year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or 1*s.* 1*d.* Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and Designs Act, V of 1888.

BOARD OF EXAMINERS.

NOTICES.

SUPPLEMENT TO

The Gazette of India.

No. 42.} CALCUTTA, SATURDAY, OCTOBER 20, 1906.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

No. 1444-I., dated 1st October 1906.

Note by R. N. Burn, Esq., Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure of Irrigation Works in India for 1904-1905.

(The figures in the statements embodied in this note are taken from the Finance and Revenue Accounts of the Government of India, Administrative Accounts of Irrigation Works, and the statement of Financial results of Irrigation operations in India.)

1. Irrigation Works in India are divided into Major and Minor Works; Major Works being further sub-divided into Productive, or those which are expected to pay the cost of up-keep and also interest on Capital outlay, and Protective, which are calculated to guard against a probable future expenditure in relief of distress. For the purposes of this note Minor Works are sub-divided into—

(*a*) Works for which Capital and Revenue Accounts are kept.
(*b*) Works for which Capital Accounts are not kept.

Works for which Capital and Revenue Accounts are kept.

2. The general financial result of all works—both Irrigation and Navigation—for which Capital and Revenue Accounts are kept is as follows:—

	Productive Works.	Protective Works.	Minor Works.	TOTAL.
	Rs.	Rs.	Rs.	Rs.
CAPITAL OUTLAY—				
During 1904-1905 . .	57,41,839	22,20,061	17,39,489	97,01,389
To end of 1904-1905 . .	37,85,44,499	(a)2,72,03,422	(b) 6,04,46,314	46,61,94,235
REVENUE ACCOUNT, 1904-1905—				
Gross Revenue . . .	4,23,67,174	9,46,540	47,42,312	4,80,56,026
Maintenance and working .	1,35,48,461	4,10,518	17,63,889	1,57,22,868
Net Revenue . . .	2,88,18,713	5,36,022	29,78,423	3,23,33,158
Interest	1,42,48,920	9,79,443	...	...
Net profit after paying interest on Capital . . .	1,45,69,793	—4,43,421	...	...
Percentage of net revenue of the year on the Capital outlay to end of the year . . .	7·61	1·97	4·93	6·93
Against in 1903-1904 . .	7·43	2·90	5·42	6·93
„ „ 1902-1903 . .	7·37	2·61	5·28	6·85

(a) Includes Rs. 85,294 on account of famine expenditure in the Central Provinces brought on as previous outlay in 1904-05.

(b) Includes Rs. 2,33,306 on account of famine expenditure in Bombay brought on as previous outlay in 1904-05.

PRODUCTIVE WORKS.

3. There are 46 works so classed, one of which, the Hijili Tidal canal in Bengal, is a purely navigation work.

4. Of the 46 works classed as Productive, five * were not open for irrigation by the end of 1904-1905, and thirteen, that is, all the canals in Bengal and in the Deccan and Gujarat, as also the Kurnool canal and Barur tank in Madras, have failed to fulfil the conditions of Productive Works.

* Shwebo Canal.
Mon „
Naulakhi „
Upper Chenab „
Upper Jhelum „

5. The Capital invested on the construction of Productive Works at the end of 1904-1905 amounted to Rs. 37,85,44,499, and the net revenue derived from them during that year was Rs 2,88,18,713, or a return of 7·61 per cent. on the Capital outlay, against 7·43 per cent. in the previous year. The increase was due to the development of irrigation from the canals in the Punjab, the Sone canals in Bengal, and the Lower Ganges canal in the United Provinces; also to the introduction, in Madras, of re-settlement rates on the Kistna project.

6. No new canals were opened for irrigation during the year, but as irrigation from the canals under construction and those partially opened, becomes fully developed, the net profit from Productive Works may be expected to show a further increase.

7. At the end of 1904-1905, there were 35,090 miles of open Productive Irrigation canals, against 34,707 miles open at the end of the previous year, the increase being chiefly in the Punjab and United Provinces. The acreage irrigated during 1904-1905 amounted to 12,207,283 acres against 12,623,687 acres in the previous year.

8. Statements I and II show in detail the financial results of individual Productive Works, the irrigated area, and the mileage open. It will be seen from Statement No. I that the net revenue from these works up to the end of 1904-1905 exceeded the accumulated interest charges by Rs. 14,26,80,162; the highest net profit during 1904-1905 was obtained from the projects in the

Punjab; next follow Madras, the United Provinces, and Sind. The works in the other Provinces have not yet paid off the interest charges.

PROTECTIVE WORKS.

9. As the term implies, canals, tanks, etc., so classed are constructed on a consideration of the protection they give against famine without any expectation of a return sufficient to pay interest and working expenses. There are 24 works so classed, 17 of which are still under construction.

10. The Capital expenditure on these works to the end of 1904-1905 amounted to Rs. 2,72,03,422 or to Rs. 2,25,40,178 on the six works earning revenue and exclusive of the expenditure on the Gokak canal These works gave a net revenue of Rs. 5,36,011, of which the Nira canal in Bombay accounted for Rs. 45,350 and the Lower Swat River canal in the North-West Frontier Province for Rs. 4,01,573. The latter canal paid the maintenance and interest charges of the year and returned a net profit of Rs. 2,13,780, the percentage of net revenue on the Capital invested in it being 9·70.

11. At the end of the year there were 1,350 miles of open protective canals, against 1,403 miles at the end of the previous year. The area irrigated during the year amounted to 433,823 acres, of which 159,412 acres were irrigated by the Lower Swat River canal. The acreage irrigated during the year was in excess of that irrigated in 1903-1904 by 49,833 acres.

12. Statements III and IV show in detail the financial results of individual Protective Works, the irrigated area, and the mileage open of each.

MINOR WORKS.

Works for which Capital and Revenue Accounts are kept.

13. There were 89 works so classed in 1904-1905, 35 of which are in Bombay and 33 in Madras. Of these 89, six are purely navigation works, four being in Madras and two in Bengal.

14. The expenditure incurred on the construction of Irrigation Works alone amounted to Rs 3,86,25,986 at the end of 1904-1905, and the net revenue during that year to Rs. 28,07,281, or a return of 7·27 per cent. on the Capital outlay, against 8·46 per cent. in the previous year. This decrease is entirely due to the net revenue from Irrigation Works in Madras and Sind being less than that of 1903-1904 by Rs. 2,70,000 and Rs. 1,99,000, respectively. Although these works are constructed for the general improvement of the country, and not as remunerative works, yet many of them are paying considerably over 4 per cent. on the Capital invested in them; and one, *viz.*, the Ghar canal in Sind, has paid 92·67 per cent during the year under review.

15. Excluding the area shown under Burma, *viz.*, 445,860 acres, which is not under irrigation, but represents the area of cultivation on lands reclaimed by river flood embankments, the area irrigated by Minor Irrigation Works during 1904-1905 was 1,531,118 acres, against 1,734,169 acres in the previous year, or a decrease of 11·71 per cent. This is accounted for chiefly by a falling off in the area irrigated in Madras, Bombay, and the United Provinces.

16. The Capital outlay to end of 1904-1905 on the six navigation canals amounted to Rs. 2,18,20,328, and the net revenue during that year to Rs. 1,71,142. The whole of this was brought in by the Calcutta and Eastern canals, which gave a return of 2·52 per cent. on the Capital outlay. All the other navigation canals worked at a loss.

17. Statements V and VI show the financial results, the irrigated area, and the open mileage of individual works.

Works for which Capital Accounts are not kept.

18. The works under this head are numerous and are all small works, many of which were constructed at the time of the Native rule in India. The cost of their construction cannot now be ascertained, and separate Capital and Revenue accounts are not therefore kept for them. The enhanced land revenue due to these works is assessed and collected along with the ordinary land revenue, and accounted for in the Civil Accounts.

19. The following statement shows the direct receipts from and expenditure on works of this class and compares the transactions of the year 1904-1905 with those of the previous four years :—

	IMPERIAL.		PROVINCIAL.		LOCAL.		TOTAL.

20. The receipts during 1904-1905 were better than those of the previous year by Rs. 12,532, the increase occurring entirely under Imperial. The expenditure during 1904-1905 exceeds that of the previous year by Rs. 3,35,064, and occurs under Imperial and Provincial. It is due to a larger outlay on canals in the Punjab, minor works in Bombay, and agricultural works in Bengal.

General.

21. The General result of Irrigation Works for which Capital and Revenue Accounts are kept, exclusive of purely navigation canals, is brought out in Statement VII. At the end of 1904-1905 the State had spent Rs. 44,17,58,753 on the construction of these works and received a net revenue of Rs. 3,21,66,571 during the year, which is equivalent to 7·28 per cent. on the Capital invested. The area irrigated and the area of cultivation on lands reclaimed by river flood embankments in Burma amounted to 14,618,084 acres, or 22,841 square miles.

22. In addition to the expenditure on "35—Protective Irrigation Works" shown in Statements III and VII, a further sum of Rs. 10,92,150 * has been charged to that head during the year 1904-05 on account of outlay on surveys and investigations of Irrigation Projects and on Special Establishments employed on the preparation of Famine relief programmes.

	Rs.
* Surveys and Investigations	9,38,204
Famine Programmes	1,53,946
TOTAL	10,92,150

R. N. BURN,

Accountant General, P. W. Dept.

Documents accompanying.

Statement shewing the financial results, as affecting the general tax-payer, in respect of the construction of Irrigation Works in India during, and to end of, 1904-1905.

No. 19-I., dated 20th June 1906.

Submitted to the Government of India, Public Works Department.

CONTENTS.

PART I.

Government of India Notifications, Appointments, Promotions, &c.

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

Simla, the 26th October, 1906.

No. 18.—The Governor General is pleased to accept the resignation by the Hon'ble Mr. Alexander Cochrane Logan, of the Indian Civil Service, of his office of Additional Member of the Council of the Governor General for the purpose of making Laws and Regulations.

No. 19.—In exercise of the power conferred by section 10 of the Indian Councils Act, 1861 (24 and 25 Vict., c. 67), and section 1 of the Indian Councils Act, 1892 (55 and 56 Vict., c. 14), the Governor General is pleased to nominate the Hon'ble Sir Steyning William Edgerley, K.C.V.O., C.I.E., of the Indian Civil Service, to be an Additional Member of the Council of the Governor General for the purpose of making Laws and Regulations.

J. M. MACPHERSON,

Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Simla, the 26th October, 1906.

No. 2463.—Mr. H. Claughton is appointed to be Assistant to the Officer in charge of the Records of the Government of India, with effect from the 11th October 1906.

ESTABLISHMENTS.

The 26th October, 1906.

No. 1254.—The services of Maulvi Muhammad Nizam-ud-din Hasan Khan, a Deputy Commissioner in Berar, are replaced at the disposal of the Hon'ble the Chief Commissioner of the Central Provinces, with effect from the date on which he was relieved of his duties in the Bhopal State.

No. 1257.—Mr. H. A. Anderson, C.S.I., is permitted to resign His Majesty's Indian Civil Service, with effect from the 12th October 1906.

No. 1263.—The Honourable Mr. J. O. Miller, C.S.I., on return from privilege leave, resumed charge of the office of Chief Commissioner of the Central Provinces from the Honourable Mr. S. Ismay, C.S.I, on the forenoon of the 22nd October 1906.

EXAMINATIONS.

The 26th October, 1906.

No. 696.—With reference to rules 4 and 9 of the rules published with the Home Department Notification no. 529, dated the 8th September 1889, it is hereby notified that the examination prescribed for filling up vacancies in the lower division of the secretariat clerical service of the Government of India and attached offices will be held at Calcutta in the Senate House of the Calcutta University, commencing on Saturday, the 5th January 1907.

No examination will be held during 1907 for filling up vacancies in the clerical establishment of the offices subordinate to the Government of Bengal.

The examination at Allahabad and Lahore will be held at the same time at the places to be appointed by the Governments of the United Provinces and the Punjab respectively. The hours of examination at Calcutta will be from 10 A.M. to 1 P.M. and from 1-30 P.M. to 4-30 P.M. daily.

The probable number of vacancies in the lower division of the secretariat clerical service of the Government of India and attached offices to be competed for is nine. Of these, five will be reserved for candidates domiciled in the United Provinces, the Punjab, the Central Provinces, Rajputana, Central India, and Baluchistan, provided that a sufficient number of such candidates duly qualified appear for the examinations to be held at Allahabad and Lahore. The remaining vacancies will be offered for competition among the candidates examined at Calcutta and such candidates temporarily resident, but not domiciled in, any of the provinces enumerated above, as may be permitted to present themselves for examination at Allahabad and Lahore.

Candidates should pay the prescribed fee (Rs. 10) into the nearest treasury and forward the treasury receipt to the Secretary to the Board of Examiners, Calcutta. Candidates paying their fees in Calcutta should pay them into the Bank of Bengal.

Application for permission to appear at the examination should be made to the Secretary to the Board of Examiners, Calcutta, between the date of this notification and the 15th December next (inclusive).

The attention of intending candidates is called to rule 8 of the rules* published with the Home Department Notification of the 8th September 1899, prescribing the particulars and documents which should accompany the application for permission to appear at the examination.

* *Particulars and documents prescribed in rule 8 of the rules published with the Home Department Notification of 8th September 1899—*

(1) Evidence that the candidate at the date of making his application is not less than 18 and not more than 24 years of age. The date of the candidate's birth must be stated.

(2) In case the candidate has been educated at a school in which students' good conduct registers are kept, the candidate's register for the last year of his attendance at school when a year has not elapsed since he left school. In other cases, a certificate that the candidate is of good moral character from the head of the institution in which he has last been educated, or from some respectable householder to whom he is well known in private life, and who is himself known to a district or sub-divisional magistrate or to the head of some Government office,—this last fact being certified by the countersignature of the officer in question.

(3) If the candidate is employed under Government, a certificate by the head of the office or department to the effect that, in his opinion, there is no objection to the candidate appearing at the ensuing clerkship examination.

(4) A statement whether the candidate has appeared at any previous clerkship examination and, if so, in what year.

SANITARY.

PLAGUE.

The 26th October, 1906.

No. 1890.—The following telegram is published for general information :

Telegram, dated Pera, the 24th October 1906.

From—His Britannic Majesty's Ambassador Extraordinary and Plenipotentiary at Constantinople,

To—His Excellency the Viceroy.

Measures against Port Said, medical inspection, disinfection and rat destruction. Same quarantine measures adopted against Adalia.

PORT BLAIR.

The 24th October, 1906.

No. 965.—In continuation of the Home Department notification no. 497, dated the 10th May 1905, as amended by *corrigendum* no. 723, dated the 20th July 1906, the following officiating appointments are made in the Port Blair Commission, *vice* Mr. H. H. D'Oyly, 1st Assistant Superintendent on leave, with effect from the 3rd May 1906 :

Mr. A. Brown, 2nd Assistant Superintendent, to officiate as 1st Assistant Superintendent.

Khan Bahadur Mahomed Ashiq Ali Khan, 3rd Assistant Superintendent, to officiate as 2nd Assistant Superintendent.

Mr. R. F. Lowis, 4th Assistant Superintendent, to officiate as 3rd Assistant Superintendent.

Mr. W. H. Brookes, 5th Assistant Superintendent, to officiate as 4th Assistant Superintendent.

Mr. C. W. B. Anderson, 6th Assistant Superintendent, to officiate as 5th Assistant Superintendent.

Mr. H. M. S. Clarke, 7th Assistant Superintendent, to officiate as 6th Assistant Superintendent.

Mr. H. H. Tayler, Officiating 8th Assistant Superintendent, to officiate as 7th Assistant Superintendent.

No. 968.—In the Home Department notification no. 316, dated the 23rd March 1906, notifying certain permanent appointments in the Port Blair Commission, *vice* Mr. F. E. Tuson, retired, *omit the words* "with effect from the date of his return to duty from leave" wherever they occur.

No. 969.—The Home Department *corrigendum* no. 495, dated the 10th May 1906, making certain amendments in its notification no. 316, dated the 23rd March 1906, is hereby cancelled.

POLICE.

The 22nd October, 1906.

No. 1050.—The services of Lieutenant R. S. Waters, 40th Pathans, are placed at the disposal of the Government of Burma for employment in the Burma military police.

ECCLESIASTICAL.

The 27th October, 1906.

No. 480.—The Reverend R. G. Jamieson, a chaplain on probation, is appointed to be a junior chaplain of the Church of Scotland on the Bengal ecclesiastical establishment, with effect from the 26th October 1906.

ARCHÆOLOGY AND EPIGRAPHY.

The 24th October, 1906.

RAILWAY BOARD

NOTIFICATIONS.

Simla, the 22nd October, 1906.

No. 222—Mr D. Willison McQuillen, a qualified student of the Thomason Civil Engineering College, Rurki, is appointed to the Provincial Service of the Engineering Establishment of the Railway Branch as an Assistant Engineer, 3rd grade, with effect from the 19th September 1906, and is posted to the North Western Railway.

No. 223—With reference to Railway Board Notification No. 188, dated the 6th October 1905, Lieutenant-Colonel C. A R Browne, R.E, is permanently transferred from the Accounts Branch to the Superior Revenue Establishment of State Railways Management Department, and confirmed as Deputy Manager, Oudh and Rohilkhand Railway, with rank in class I, grade 2 from the 1st January 1906. Lieutenant-Colonel Browne will continue to hold the appointment of Secretary to the Railway Board, until further orders.

No. 224—Rai Sahib Milki Ram, Assistant Store-keeper, North Western Railway, in class III, grade 1, of the Superior Revenue Establishment of State Railways, is appointed to officiate as a Store-keeper in class II of that Establishment, during the absence of Mr. S H Maule-Cole on privilege leave

The 23rd October, 1906.

No. 225—Mr. J. M. Hartley, Examiner of Accounts, has been granted by His Majesty's Secretary of State for India, furlough for three months in extension of that sanctioned in Railway Board Notification No 94, dated 21st April 1906

No 226—The temporary promotion of Mr J C Mills, Deputy Manager, Eastern Bengal State Railway, to class I, grade 2, of the Superior Revenue Establishment of State Railways, as ordered in Railway Board notification No 187, dated 6th October 1905, is ante-dated to 1st December 1904.

No. 227—Mr J. C. Mills, Deputy Manager, Eastern Bengal State Railway, while acting as Manager of that line in 1905 held officiating rank in Special class, 2nd grade, of the Superior Revenue Establishment of State Railways, during the privilege leave portion of Mr. Manson's combined leave and thereafter temporary rank in that grade.

By Board notification No. 7, dated the 3rd March 1905, so far as it relates to Mr. Mills, is cancelled

The 24th October, 1906.

No. 228.—Mr. N. C. Haldar, officiating District Traffic Superintendent, North Western Railway, in class II of the Superior Revenue Establishment of State Railways, is promoted to temporary rank in class II, grade 4, of that Establishment, with effect from the 1st January 1906, and until further orders.

The 25th October, 1906.

No. 229—Mr. J. R. Tickell, Superintending Engineer, 2nd class, temporary rank, State Railways, whose services were lent to the Bombay, Baroda and Central India Railway

Company, is permitted to retire from the service of Government, under Article 465 of the Civil Service Regulations, with effect from the 30th September 1906.

No. 230.—Mr. H S. Jones, Superintending Engineer, 2nd class, temporary rank, State Railways, whose services were lent to the Bombay, Baroda and Central India Railway Company, is permitted to retire from the service of Government, under Article 465 of the Civil Service Regulations, with effect from the 29th April 1906.

No. 231.—It is hereby notified for general information that the Railway Board have been pleased to sanction a survey being made, by the Agency of the Great Indian Peninsula Railway Company for a line of railway from Bir to Bhopal, a distance of about 110 miles.

C. A. R. BROWNE, *Lieut.-Col., R.E.,*
Secretary, Railway Board.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

SANITARY.

H. H. RISLEY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs., on Thursday, the 25th October 1906, based on the Indian Daily Weather Reports of the period.

Pressure during the week was low in the south of the Arabian Sea and in the south-east of the Bay, in both of which areas weather was disturbed and in the latter a depression had formed at the end of the week. Owing to this distribution of pressure precipitation was confined almost entirely to the southern half of the Peninsula and monsoon winds were cut off from Burma and northeast India.

Burma.—Only a few isolated falls occurred during the week, and skies were clear or lightly overcast, while temperature was approximately normal.

Northeast India and Orissa.—In Chota Nagpur there was light well distributed rainfall on the 19th and 20th, but with this exception only occasional falls occurred in northeast India and Orissa throughout the week. Skies were generally clear or lightly overcast, and temperature was normal or in slight excess.

The United Provinces, Central India and the Central Provinces.—Chakrata reported a thunderstorm with hail on the 20th and Raipur a light fall of rain on the 21st. Skies were clear, while the temperature was steady throughout the week and was about normal.

Northwest India.—Local disturbances gave light rain and snow in Kashmir and on the 22nd light rain in the Frontier Province, while in the extreme north of the Punjab there was light precipitation on the 20th and 23rd. Skies were generally moderately clouded in Kashmir and clear in the rest of northwest India. On the 23rd and 24th temperature was in considerable excess in Rajputana and in moderate defect in the extreme north : elsewhere it was normal or in slight excess throughout the period.

The Peninsula.—Owing to the low pressure in the south of the Arabian Sea and of the Bay the monsoon gave abundant and widespread rainfall over the southern half of the Peninsula except in Mysore, but in the rest of the Peninsula very little rain fell. In the area of precipitation skies were moderately to heavily overcast throughout the week, but elsewhere they were lightly clouded or clear. The rain in the southeastern districts of Madras cooled the air very much, and temperature was considerably below normal in these parts, but in the remainder of the Peninsula it was normal or in slight excess.

The rainfall during the past week has not appreciably affected the distribution of the rainfall for the period from the 4th May to the 25th October, and the total precipitation remains 20 per cent. or more in defect in Orissa, Chota Nagpur, Sind and the Jaipur subdivision . it is more than 20 per cent in excess in Mysore, the west Satpuras and the rainfall subdivisions of Simla and Indore, and it is approximately normal elsewhere.

Rainfall Division with representative station.	Rainfall sub-division named after representative station.	Rainfall data for week ending on 25th October 1906			Rainfall data from 4th May 1906 to 25th October 1906			Seasonal percentage departure from normal.

J. PATTERSON,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

SIMLA;
The 25th October, 1906.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 20th October 1906.

Burma.—Slight rain has fallen in several districts in Lower and Upper Burma and also in the Southern Shan States and the Chin Hills. Transplanting of wet-weather paddy is completed in Minbu and in parts of Lower Chindwin and Myingyan; reaping of early wet-weather paddy has commenced in Kyaukpyu and in the Shwebo township. Cultivation of dry crops is progressing in most districts. In the Taungtha township of Myingyan the paddy crops in some places have been damaged by floods, and some small areas in Sagaing are inundated and the paddy crops have been destroyed; in parts of the Singu township of Mandalay the paddy crops have failed for want of rain; more rain is still needed in Yamethin. The price of paddy has risen considerably in Minbu, largely in Henzada and Kyaukse, and slightly in Maubin and Thaton.

Eastern Bengal and Assam.—The weather is seasonable. Light rain has fallen in most districts of the Rajshahi and Dacca Divisions and in Nowgong and Lakhimpur and moderate rain in the Khasi and Jaintia Hills; elsewhere there was no rain. Rain is needed for tea in Cachar and for late rice in Lakhimpur. Plucking and manufacturing of tea continue; prospects are good in Darrang and Nowgong and fair elsewhere. Ploughing of land for mustard and sowing of pulses are in progress. Harvesting of the early rice and transplantation of the late rice are finished. The outturn of early rice is generally fair. The prospects of winter rice and other standing crops are moderate. Steeping and washing of jute are still in progress; the outturn is good. Swarms of locusts passed through Rajshahi, Pabna, and the Khasi Hills but no damage is reported. Prices of common rice:—Manipur 15; Kohima 11; Sibsagar 9; Rangamati 8 1/16; Tezpur 8; Chittagong 7½; Dinajpur 7 3/16; Bogra 7¼; Pabna, Gauhati, Nowgong, and Dibrugarh 7; Faridpur 6¾; Dacca, Barisal, Noakhali, and Silchar 6½; Comilla 6⅜; Malda 6¼, Jalpaiguri, Rampur Boalia, Dhubri and Sylhet 6; Mymensingh 5⅞, Rangpur 5¾; Tura and Aijal 5 and Shillong 4½ seers per rupee. Prices have risen in five; fallen in nine; and remained stationary in the remaining districts.

There are 247 persons on test works in Dacca. The numbers of persons receiving gratuitous relief are:—Mymensingh 535; Noakhali 446; Comilla 50 and Sylhet 8,259. The high prices are felt by the non-agricultural more than by the agricultural population.

Bengal.—The rainfall was fairly general in the Burdwan, Presidency, and Chota Nagpur Divisions; good rain was received in Gaya and in the Sonthal Parganas, but no rain fell in most of the districts of Bihar and in Orissa where it is still badly wanted. Locusts made their appearance in Nadia and Jessore but little or no injury has been done. ***Aman*** paddy has been damaged by floods in the latter district. The numbers of persons reported to be receiving gratuitous relief are.—24-Parganas 11,372, Saran 887, Muzaffarpur 6,069, Darbhanga 26,498, total 44,826. The numbers of persons attending test works are:—Saran 2,528, Darbhanga 4,023 Fodder and water are generally sufficient. The price of common rice has risen in eleven and fallen in five districts.

United Provinces.—The rainfall during the week was confined to slight showers in ten districts. Harvest operations continue and prospects are generally good. The cutting of early rice is approaching completion in Pilibhit and Rae Bareli. Late rice is being irrigated where necessary in Etawah, Fyzabad, Cawnpore, Allahabad, and Azamgarh. Spring sowings are in progress everywhere and germination is reported to be satisfactory. Fields are being prepared for sowing poppy in Sitapur, Fatehpur, and Bahraich and sowings have begun in parts of Budaun and Benares. Some injury to cotton by insects is reported from Jalaun. Cholera prevails in six districts but is now abating. Agricultural stock is in good condition. Markets are full and fodder is sufficient, except in Hardoi, Rae Bareli, and Jaunpur where it is dear. Prices still continue high.

The weekly report on the famine and scarcity is as follows:—There was slight rain in Gorakhpur, where more is still required for the late rice. Standing crops are doing well. Fever prevails in Jhansi and Jalaun. Prices are stationary in Hamirpur and Jalaun; falling in Jhansi; and are rising in Gorakhpur. Gratuitous relief lists have been closed in Hamirpur, Jhansi, and Jalaun and valedictory doles of a fortnight's allowance have been given. The numbers on relief are now:—Allahabad Division—on works *nil;* on gratuitous relief 28,000; Gorakhpur—on works 204, on gratuitous relief 333, grand total 28,537.

Punjab.—Slight rain occurred in parts of Sialkot, Shahpur, Rawalpindi and Lyallpur during the week. The price of wheat is rising in Rohtak and Rawalpindi, and falling in Hissar, Gurgaon, and Sialkot; slight fluctuations have taken place in the prices

of other food-grains. Harvesting of the autumn and ploughing for and sowing of the spring crops continue. The condition and expected yield of the standing crops are good to average; the condition of the cotton crop in Lyallpur is bad. Locusts appeared in Rohtak, Amballa, Jullundur, Ferozepore, Amritsar, Sialkot and Mianwali and did slight damage to the standing crops in parts of Amballa and Ferozepore. Measures are being taken for the destruction of eggs deposited by locusts in Jullundur, Ferozepore, Amritsar, and Sialkot. Insects are damaging cotton in Multan. Cattle are generally in good condition. Fodder is sufficient. There are no complaints regarding the water-supply.

North-West Frontier Province.—Rainfall:—one inch in Hazara, half an inch in Kohat and Peshawar 6 cents in Bannu; none in Dera Ismail Khan. The rain has been very opportune for both harvests but more is wanted for unirrigated tracts in Bannu. The condition of the standing crops on irrigated and unirrigated areas is good except in the Swabi tahsil where it is slightly below average; in the Kalachi tahsil of the Dera Ismail Khan district the standing crops have been slightly damaged by locusts Harvest prospects and the probable outturn of the autumn crops are good Spring sowings are in progress. The water-supply is sufficient. The condition of cattle is good. Stocks of food-grains are sufficient. Fodder is procurable. Prices are slightly falling. Prices:—wheat 14 to 18½; gram $17\frac{3}{16}$ to 20; maize 15 to $22\frac{7}{16}$; and *bajra* 13 to 20 seers per rupee.

Jammu.—There was slight rain during the week. Prices are fluctuating. Prices:—wheat 11 to 23 and maize 12 to 34 seers per rupee. The condition of the standing crops is good. Fodder is sufficient except in the Kishtwar and Ramban tehsils.

Kashmir.—The weather was bright with slight rain on one day during the week. Prices are almost stationary. The cold is increasing.

Rajputana.—Harvesting operations continue and also sowings for spring crops. Prospects are favourable. Slight damage has been caused by locusts in Tonk, Jaipur, and Kishangarh. The condition of cattle is good. Pasturage and fodder are sufficient. Prices are rising in Tonk; falling in Partabgarh, Shahpura, and Karauli; and are steady elsewhere. Prices are still high in some places.

Central India.—The rainfall of the week was good in Gwalior; general in Indore; and light showers fell in parts of Bhopawar. Ploughing for and sowing of spring crops and reaping of autumn crops are in progress The standing crops and probable outturn are fair to good. Cotton has been slightly damaged in Jhabua by hail. Pasturage is good and sufficient. Prices have fallen in Gwalior, Dhar, and parts of Malwa, and are steady elsewhere.

The weekly report on the famine and scarcity is as follows:—The numbers on relief in Bundelkhand are.—on works 50, on gratuitous relief 100, total 150. Prices—14¾ seers per rupee. Works and gratuitous relief have been closed in Samthar and Baoni.

Central Provinces.—With the exception of a slight shower in the Chhattisgarh district the week was rainless. The weather continues to be clear and warm but the nights and mornings are cool. Autumn harvesting and spring sowings are in full swing everywhere. Nagpur, Wardha, and Akola report that autumn crops on light soil are suffering from want of moisture, and more rain is required in Chanda for spring sowings; the standing crops elsewhere are in good condition and prospects are generally good. Fodder and water are sufficient everywhere. The prices of wheat and rice have slightly risen in Hoshangabad and Betul respectively; *juar* has become cheaper by one seer in the rupee in Nimar and by 2¼ seers in Akola; elsewhere prices are steady but still continue equal to the scarcity rate in Nagpur, Chanda, Balaghat, Drug and Bilaspur.

Bombay.—The rain during the week was moderate in Kanara, Dharwar, Kolhapur, and Kathiawar; and slight in Thar and Parkar, Ahmedabad, Panch Mahals, Kolaba, Ratnagiri, Nasik, Bijapur, Belgaum, Baroda, Palanpur, and Mahi Kantha. More rain is needed for maturing crops and for spring sowings in parts of Broach and the Deccan. The standing crops have been slightly damaged by locusts in Karachi, Sholapur, and Satara; by grasshoppers in Broach and Sholapur; by insects in Sukkur, Upper Sind Frontier, Khandesh, and Bijapur; and by blight in Hyderabad; and are generally in good condition elsewhere. Harvesting of autumn crops is progressing and a good outturn is expected. Sowing of spring crops continues except in parts of Nasik, Ahmednagar, and Poona where they are retarded for want of sufficient moisture. Cotton-picking is progressing in Sukkur, Thar and Parkar, Ahmedabad, Khandesh, and Ahmednagar. The supply of water for drinking and irrigation purposes is adequate. Agricultural stock is insufficient in parts of Ahmednagar, Poona, Sholapur, Bijapur, and Cutch. Cattle are generally in good condition. The fodder-supply is sufficient. Stocks of grain in markets are adequate. Prices are falling. The quantity of grain purchasable per rupee is in the Deccan 18 to 47 per cent; in the Karnatak 11 to 30 per cent; and elsewhere 5 to 30 per cent. less than the normal. The demand for labour in the fields is increasing and labourers get sufficient employment. The public health is generally good. The numbers on relief are:—British

districts :—Deccan—on gratuitous relief 946 ; Karnatak—on works 1,707, on gratuitous relief 5,033, total 6,740 ; Native States :—on gratuitous relief 805

Hyderabad.—Rainfall—36 cents. Prospects are favourable. The autumn harvest is in progress. Spring sowings continue. The early rice is fair to good. Prices :—wheat 8½ ; coarse rice 7½ ; and *juar* 17 seers per rupee.

Mysore.—Fair rain throughout the State. The standing crops are in good condition but more rain is needed in parts of Tumkur and Shimoga. Cattle are healthy. Water and fodder are available.

Coorg.—Rainfall :—one inch 12 cents. Picking of cardamom continues. Prices of food-grains are stationary. Water and fodder are sufficient.

Madras.—The rainfall of the week was heavy in Tanjore ; fair in Kurnool, Guntur, Vizagapatam, Godavari, Bellary, Ganjam, and Kistna ; and good elsewhere. Irrigation supplies are sufficient except in parts of Ganjam, Kistna, the Deccan, Salem, Madura, Tinnevelly, and Malabar. Ploughing, sowing, weeding, and transplanting are in progress in parts. The standing crops are generally fair but some require more rain in parts of Godavari. Harvests continue with outturn poor to normal and bumper. Pasture is sufficient except in parts of North Arcot, Tanjore and Tinnevelly. Fodder is scanty in parts of the Circars, Anantapur, Coimbatore, and Tanjore. The condition of cattle is generally good. The price of rice is stationary in fifteen districts ; has fallen in five, and has very slightly risen in three. The prices of millets have fluctuated as follows :—*ragi* is stationary in six districts ; has fallen in twelve ; and has slightly risen in three. *Cholam* is stationary in three districts ; has fallen in nine ; and has slightly risen in two. *Cumbu* is stationary in three districts ; has fallen in eleven ; and has very slightly risen in one.

The number of persons in receipt of relief during the preceding and present weeks in each Province or State is shown in the following table :

NOTIFICATIONS.

GEOLOGY AND MINERALS.

Simla, the 26th October, 1906.

No. 8496—92.—The following draft of a rule which it is proposed to issue in exercise of the power conferred by section 20 of the Indian Mines Act, 1901 (VIII of 1901), is published as required by the said section for the information of persons concerned.

2. The draft will be taken into consideration by the Governor General in Council on or after the 26th January 1907, and any objection or suggestion which may be received from any person with respect to the draft before that date will be considered by the Governor General in Council.

Draft Notification.

In exercise of the power conferred by section 20 of the Indian Mines Act, 1901 (VIII of 1901), the Governor General in Council is pleased to make the following rule for application to all mines in British India in supersession of the Rule published with the Notification of the Government of India in the Department of Revenue and Agriculture, No. 3842—86-15, dated the 8th December 1904.

RULE.

Form of Annual Return.

The following form shall be correctly filled up in duplicate by the managing agent, or if there is no managing agent, by the owner, agent or manager of a Mine, and one copy forwarded to the Chief Inspector of Mines and the other to the District Magistrate not later than the 1st February in each year.

I.

Year ending on the 31st December 190 .

1. Name of Mine.
2. Date of opening.
3. Date of closing.
4. Nature of moving power.
5. Situation of Mine — District / Province
6. Name and postal address of — Owner / Managing Agent / Agent / Manager / Assistant Manager

II.

Average number of persons employed daily during the year ending on the 31st December 190 .

Name or No. of pit, or excavation.	Below ground				Above ground.				Gross total below and above ground
	Male adults.	Female adults.	Children under 12.	Total.	Male adults.	Female adults.	Children under 12.	Total.	
1	2	3	4	5	6	7	8	9	10
Total ...									

III.

Output of Mineral during the year ending on the 31st December 190 .

Name or No. of pit or excavation	Depth from the surface of the lowest point of the seam or vein worked in feet.	Name of mineral worked	Total amount of mineral raised	Total value of mineral at the mine.	Number of days worked.	IN CASE OF COAL MINES. No. of coke ovens.	System of coking adopted, viz., bee hive, Simon Carves, etc.	Tons of coke produced
1	2	3	4	5	6	7	8	9

IV.

Accidents and inspections.

NO. OF SEPARATE ACCIDENTS REPORTED DURING THE YEAR. Fatal.	Serious.	Total.	NO. OF PERSONS Killed	[illegible]	No. of prosecutions under the Act, with the section under which the prosecution was instituted.	No. of persons convicted under the Act with the section under which the conviction were obtained.	NO. OF INSPECTIONS. [illegible]	By Mine Inspector.	Total.
1	2	3	4	5	6	7	8	9	10

Signature of Managing Agent, Owner, Agent, or Manager. } ——————

—————— 190 .

NOTES AND INSTRUCTIONS.

(1) Failure to forward a correct return to the Chief Inspector of Mines not later than the 1st February in each year, will render the managing agent, owner, agent, or manager liable on conviction to a penalty which may extend to Rs. 500.

(2) It will greatly facilitate the preparation of the statistics if the return is despatched as soon as possible after the close of the year.

(3) The output should be given—

(a) in troy ounces in the case of gold;

(b) in carats in the case of gem-stones;

(c) in cwts.,—or in cwts. and lbs. where the circumstances require greater particularisation in order to give an accurate estimate of small outputs,—in the case of alum, amber, asbestos, chromite, corundum (not being gem corundum), graphite, jadestone, mica, steatite and tin ore; and

(d) in tons, in the case of clays, coal, coke, iron-ore, limestone, magnesite, manganese-ore, other unspecified metalliferous ores, salt and slate.

(4) The total amount of mineral raised during the year must be given, including in the case of coal mines, the colliery consumption and the coal made into coke.

(5) The value of the mineral given should be based on the actual or estimated wholesale price of the mineral at the pit's mouth. In the case of coal sold into wagons at the colliery, the cost of loading should be deducted from the selling price.

(6) In the case of mica mines a "plot" is to be regarded as a "pit" for the purposes of statements Nos. II and III and the figures to be entered in columns 4 and 5 of statement No. III relate to the quantity and value of marketable mica consigned.

(7) The average number of persons employed daily should be obtained by dividing the aggregate number of daily attendances (permanent and temporary) by the number of working days.

(8) Every person of or above the age of 12 years should be entered as an adult.

No. 8549—82.—The following draft of a notification which it is proposed to issue in exercise of the power conferred by Section 20 of the Indian Mines Act, 1901 (VIII of 1901), is published as required by the said section for the information of persons likely to be affected thereby.

2. The draft will be taken into consideration by the Governor General in Council on or after the 26th day of January 1907, and any objection or suggestion which may be received from any person with respect to the draft before that date will be considered by the Governor General in Council.

Draft Notification.

In exercise of the power conferred by Section 20 of the Indian Mines Act, 1901 (VIII of 1901), the Governor General in Council is pleased to direct that for the last sentence in rule 30 of the rules regarding Mine Managers and their certificates, published with Notification No. 2968—82, dated the 21st April 1906, the following shall be substituted, namely:

"Every regulation made by the Board under this rule shall be published in the Local Official Gazette, and except as regards examinations held before the end of January 1907, no such regulation shall take effect until six months from the date on which it was first so published."

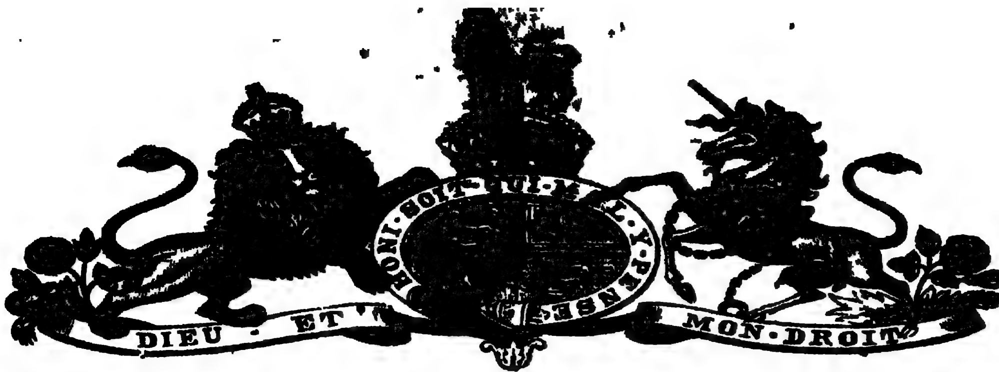
The 24th October, 1906.

No. 228.—Mr. N. C. Haldar, officiating District Traffic Superintendent, North Western Railway, in class II of the Superior Revenue Establishment of State Railways, is promoted to temporary rank in class II, grade 4, of that Establishment, with effect from the 1st January 1906, and until further orders.

The 25th October, 1906.

No. 229.—Mr. J. R. Tickell, Superintending Engineer, 2nd class, temporary rank, State Railways, whose services were lent to the Bombay, Baroda and Central India Railway



Company, is permitted to retire from the service of Government, under Article 465 of the Civil Service Regulations, with effect from the 30th September 1906.

No. 230.—Mr. H. S. Jones, Superintending Engineer, 2nd class, temporary rank, State Railways, whose services were lent to the Bombay, Baroda and Central India Railway Company, is permitted to retire from the service of Government, under Article 465 of the Civil Service Regulations, with effect from the 29th April 1906.

No. 231.—It is hereby notified for general information that the Railway Board have been pleased to sanction a survey being made, by the Agency of the Great Indian Peninsula Railway Company for a line of railway from Bir to Bhopal, a distance of about 110 miles.

C. A. R. BROWNE, *Lieut.-Col., R.E.,*

Secretary, Railway Board.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, OCTOBER 27, 1906.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 21st March 1906.

From the 7th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 31st March all Notifications and other matter intended for publication in those Parts should be addressed to the Officiating Publisher at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's Gazette, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's Gazette. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next Gazette."

J. P. HEWETT,
Secretary to the Government of India.

Rates of subscription.	Per annum. R	a.	p.

O. T. BARROW,
Comptroller General,

The 25th October 1906.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 25th October 1906.

NOTIFICATIONS.

No. 4226 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 22nd October 1906:—

No. 525 of 1906.—Tulsidos Khemchand Sipahimalani, medical practitioner, Bruce road, Quetta, Baluchistan. *A pain balm.*

No. 526 of 1906.—Karl August Brauning, technician, of 11 Anna Paulownastraat, Zaandam, province of North Holland, in the kingdom of the Netherlands. *Improvements in and connected with magazine fire-arms.*

No. 527 of 1906.—Hugh Inglis, chief clerk, Burnfoot, Cardross, Dumbartonshire, Scotland, and William Liddle, engineer, Kipps Cottage, Coatbridge, Lanarkshire, Scotland. *Improvements in spark arresters for locomotives.*

No. 528 of 1906.—Akbar Ali, mechanic, Mohalla Sufian, Ludhiana, Punjab. *A loom with a single shaft for shedding, picking and beating up.*

No. 529 of 1906.—L. D. Horne, engineer, Pahartali, district Chittagong. *The manufacture of compressed bamboo-fibre tea boxes.*

No. 530 of 1906.—Joseph Melland-Smith, civil engineer, of No. 34 Old Broad street, in the city of London, England. *Improvements in couplings for railway and other vehicles.*

No. 531 of 1906.—Harry Pitt Kennedy, sub-marine engineer, B. B. & C. I. Railway, residing at Panjoo, Thana district, and William John Greengrass, of the Vacuum Oil Company, residing at Byculla, Bombay. *Manufacturing an anti-corrosive or rust preventing composition, to be called Greengrass and Kennedy's anti-corrosive cement composition.*

No. 532 of 1906.—Edmund Joseph Feeny, engineer, of Ottawa, in the county of La Salle, and state of Illinois, United States of America. *Improvements in pumps.*

No. 4227 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 124 of 1906.—Kartar Singh, medical practitioner and chemist, Rawalpindi Cantonments. *Mushicide or the signal rat exterminator.* (Specification filed 12 October 1906.)

No. 232 of 1906.—John James Francis Hume, Lieutenant-Colonel, Commanding 2nd Battalion, the Connaught Rangers, Ahmednagar. *An improved entrenching tool.* (Specification filed 13 October 1906.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 91 of 1900.—Louis Lombard-Gerin. *Improvements in auto-motor trolleys for electrically-driven vehicles.* (Specification filed 17 July 1900.)

Fee in respect of the continuance of an exclusive privilege—

4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of R50 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. A consolidated index for the year 1905, entitled "Inventions and Designs in 1905," is also on sale, price one rupee. It contains a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in that year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or 1s. 1*d*. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and Designs Act, V of 1888.

THE HON'BLE THE AGENT TO THE GOVERNOR-GENERAL IN BALUCHISTAN.

NOTIFICATION.

Quetta, the 19th October 1906.

No. 4727.—The next half-yearly examination in the Baluchi language by the Higher Standard will be held (in the Darbar Hall) at Quetta on Monday, the 5th November 1906, commencing at 10-30 A.M.

By order,
A. L. JACOB, Captain,
First Assistant to the Agent to the Governor-General.

THE HONOURABLE THE AGENT TO THE GOVERNOR GENERAL AND CHIEF COMMISSIONER IN BALUCHISTAN.

NOTIFICATION.

Quetta, the 20th October 1906.

No. 4753.—The following revised rules for the encouragement of the study of the Brahui language, which have been sanctioned by the Government of India, are published for general information :—

REVISED RULES FOR THE ENCOURAGEMENT OF THE STUDY OF THE BRAHUI LANGUAGE.

1. (*a*) A reward of R300 will be granted to any officer of the Political Department of or below the substantive grade of Political Agent of the second class, to the Irrigation Officer, to any District Superintendent, Assistant District Superintendent, and Deputy Superintendent of Police, Extra Assistant Commissioner or Native Assistant, not being a native of or a resident in a district in which Brahui is ordinarily spoken, who shall pass an examination in that language, provided that it is ordinarily spoken within the limits of the district in which he is stationed, or by any tribe with whom he has official relations.

(*b*) A similar reward of R150 will be granted under the same conditions to any Tahsildar, Naib Tahsildar, Munsif, Inspector or Deputy Inspector of Police, not being a native of or a resident in a district in which Brahui is ordinarily spoken. Officiating Tahsildars, Naib Tahsildars, and Munsifs may appear for examination, but will not become entitled to the reward, until they are confirmed in their appointment

(*c*) The above rewards shall be admissible to officers already in receipt of the Pashtu or Baluchi allowance or who have earned a reward for qualifying in either of those languages.

(*d*) Military officers serving in Sind and Baluchistan, whether in military or in temporary civil employ, may appear for examination under these rules receiving a reward of R300 for passing. The reward will be admissible only to those officers who have not more than ten years' service in those provinces.

Other persons may appear at an examination under these rules with the special permission of the Local Government.

2. Examinations will ordinarily be held at Quetta on the last Monday in November.

3. Candidates for examination must forward their applications through the proper channel to the Local Government not less than a month before the date of the examination.

4. For the conduct of the examination a Committee will be appointed by the Hon'ble the Agent to the Governor-General, and shall consist of a Gazetted Officer as President and two members, one of whom should ordinarily be a Brahui.

5. The tests which a candidate for the reward must undergo are as follows :—

(i) He must be able to converse freely with Brahuis in such a manner and to such an extent as shall satisfy the examiners that he is able to understand them and make himself understood, both in ordinary conversation and in the usual course of office business.

(ii) He must write down in the English or Urdu character sentences spoken in Brahui by one of the natives, or a conversation held between two of them, and must explain it correctly in English or Urdu.

(iii) He must translate in Brahui, without assistance, sentences set by the examining committee (writing them either in the English or Urdu character), so that the translation shall be substantially correct, and shall be intelligible when read to a native in whose language it is written

The sentences to be translated under the third requirement should be of the same description as, and not more difficult than, those under the second requirement.

6. In order to pass the examination, candidates must obtain half marks in each subject. Candidates who obtain three-fourths of the maximum marks will be held to have passed with credit.

7. The results of the examination shall be reported by the President to the Local Government, and the names of the successful candidates shall be published in Part II of the *Gazette of India*.

By order,

A. L. JACOB, Captain,

First Assistant and Secretary.

ORDERS BY THE HONOURABLE THE CHIEF COMMISSIONER OF AJMER-MERWARA.

NOTIFICATIONS.

Dated Mount Abu, the 20th October 1906.

No. 238.—Whereas land is required in the Ajmer District for a public purpose, *viz.*, for improvement of the street in Mohalla Kumaran near Delhi Gate, Ajmer.

This declaration is made in accordance with the provision of section 6 of Act I of 1894, and under section 7 of that Act, the Collector of Ajmer is hereby directed to take orders for the acquisition of the land specified below:—

District.	Parganah.	Village	AMOUNT REQUIRED									Purpose for which required	REMARKS.

A. H. GRANT,

Secretary to the Chief Commissioner.
North-West Frontier Province.

The 19th October 1906.

No. 143.—On return from the leave granted to him in Notification No. 114, dated the 13th July 1906, Mr. R. C. Boyle, Adjutant, Kohat Border Military Police, and Samana Rifles, resumed charge of his duties on the forenoon of the 8th October 1906, relieving Mr. D. Petrie.

By Order, etc.,

W. BARRATT, Lieut.-Colonel,

Staff Officer to the Chief Commissioner,
North-West Frontier Province.

The 20th October 1906.

No. 144.—Lieutenant B. E. M. Newland, I.M.S., assumed charge of the Civil Medical duties of Chitral on the forenoon of the 11th of October 1906, relieving Lieutenant W. S. McGillivray, I.M.S.

The 23rd October 1906.

No. 145.—In exercise of the powers conferred by section 4 of the Vaccination Act 1880 (XIII of 1880), and with the previous sanction of the Governor General in Council the Agent to the Governor General and Chief Commissioner of the North-West Frontier Province is pleased to extend the said Act to the Cantonment of Nowshera.

No. 146.—The following rules made by the Agent to the Governor General and Chief Commissioner of the North-West Frontier Province under section 20 of the Vaccination Act, 1880 (XIII of 1880), for the proper enforcement of the said Act within the limits of the Nowshera Cantonment, are hereby published for general information :—

RULES.

Appointment of vaccine station.

1. A public vaccinator will be appointed at Nowshera. The Cantonment Committee shall, from time to time, appoint a place or places as public vaccine stations and shall cause to be affixed on the outside of such place of places in a conspicuous position, a signboard, on which shall be

printed, in letters easily legible, and in English and Urdu characters, the following inscription :—

"Nowshera Cantonment Vaccine Station."

Qualifications of public vaccinator.

2 No person shall appoint a public vaccinator except the Administrative Medical Officer, North-West Frontier Province.

Authority to appoint, suspend and dismiss public vaccinators.

3. The appointment, suspension and dismissal of the public vaccinator employed within the limits of the Cantonment shall rest with the Administrative Medical Officer, North-West Frontier Province. Vaccination will ordinarily be performed during the winter months only.

Time of attendance of public vaccinators and their residence.

4. The public vaccinator shall be bound to attend at the vaccine stations, to which he may be attached by the Civil Surgeon, Peshawar, at such hours as shall be fixed by the Civil Surgeon during the vaccination season. His services for the remainder of the year will be placed at the disposal of the Cantonment Committee.

Distinguishing badge to be worn by public vaccinator.

5. The distinguishing badge of a public vaccinator shall be a red cross on a white ground and shall be worn on the breast.

Fee chargeable by private vaccinators and the authority to which they are subject.

6. Persons licensed by the Local Government to act as private vaccinators shall in no case demand a higher fee than one rupee for a single operation and shall perform their duties under the orders and subject to the general control of the Civil Surgeon, Peshawar.

Facilities for procuring vaccination of children at private houses.

7. Persons desirous of procuring the vaccination of their children at their own houses may apply for that purpose to the Civil Surgeon of Peshawar, who shall thereupon depute an authorized vaccinator to comply with the request.

Grant and form of certificate of successful vaccination, unfitness for or of insusceptibility of vaccination.

8. Whenever it is ascertained that a child is unfit for vaccination or is insusceptible of successful vaccination a certificate in Form A attached to these Rules shall be granted in the former case to the parent or guardian of such child by the vaccinator, and in the latter in Form B which should be signed by the vaccinator and countersigned by the Civil Surgeon of Peshawar In like manner, whenever it is ascertained that a child has been successfully vaccinated, a certificate shall be granted by the vaccinator to the parent or guardian of such child in Form C attached to these Rules

Nature of lymph to be used.

9. The lymph to be used shall be pure lymph obtained on the fifth day, taken from the udder or from the soft skin in the neighbourhood of the udder of a buffalo under the age of one year which is free from contagious disease and has perfect full-sized vesicles, or Glycerinated Lymph from the Punjab Lymph Depôt.

Supply of a sufficient quantity of such lymph.

10. If the parent or guardian of a child produced for vaccination desires that human lymph may be used, the vaccinator shall comply, and the lymph shall be taken from a child, subject to its parent's or guardian's consent, that has two perfect vesicles left untouched on the arm to run their regular course. Not more than two children shall be vaccinated from each full-sized vesicle open for the purpose of extraction of lymph, and not more than 60 children from a single buffalo calf or six children from a single child

Re-vaccination and the age of the child.

11. If the result of the first vaccination is a failure, the child should be vaccinated again If this second operation also is not successful, a third trial should be made.

Desirability of children being vaccinated at an early age.

12. Although the Vaccination Act does not render liable to punishment the omission to get children under the age of six months vaccinated, yet it is very desirable that children be vaccinated at an earlier age. As a rule, all healthy unprotected children over one month old presented for vaccination should be vaccinated by the public vaccinators.

Fee payable to public vaccinator for vaccinating a child outside his circle.

13. A fee of one rupee shall be payable to a public vaccinator who vaccinates a child at the request of the parent or guardian outside the limits of Cantonment.

Registers to be kept by the Cantonment Committee.

14. The following registers shall be kept up by the Cantonment Committee :—

(a) A Register showing the names of children born within the local area subject to these Rules on and after the date of an application of Act XIII of 1880 to such area.

(b) A Register showing the names of unprotected children born in the area aforesaid previous to the date of the application of Act XIII of 1880 and who were at that date under the age of 14 years if boys and 8 years if girls.

(c) A Register showing the names of unprotected boys and girls respectively under these ages brought within the local area aforesaid at any time after the application of Act XIII of 1880 and who had resided there for a month.

(d) A Register showing the result of each vaccination or its postponement and the delivery of certificates, if any.

Rules for the preparation of registers.

15. The preparation of register (a) shall be effected from the register of births maintained in the Cantonment office or Police office, of registers (b) and (c) from the information to be collected under the orders of the Secretary of the Cantonment Committee, of register (d) from the reports submitted by the vaccinator as hereinafter prescribed.

Register to be kept by vaccinator

16. Every public and private vaccinator employed within the local area to which these Rules apply shall keep up the following registers :—

Register A, showing—

(1) Name, sex, age, parentage, caste and residence of each child vaccinated.
(2) Date of vaccination
(3) Date of inspection after vaccination.
(4) Result whether successful or unsuccessful
(5) Date of second operation.
(6) Date of inspection after second operation.
(7) Result whether successful or unsuccessful.
(8) Date of third operation.
(9) Date of inspection after third operation.
(10) Result whether successful or unsuccessful.

Register B, showing—

(1) Name, sex, age, parentage, caste and residence of each child produced but found unfit for vaccination.
(2) Date of certificate of postponement granted under section 9 of Act XIII of 1880.
(3) Date on which the child was represented for vaccination and the result of inspection.
(4) Date of renewal of postponement certificate, if any.
(5) Remarks.

N.B.—If on the child being presented it is found to be in a fit state for that operation, the fact should be recorded in column 3 of register B, and entry of the fact of vaccination when performed should be made in Register A, a reference to such entry being made in the column of remarks of register B opposite the corresponding entry in latter.

Register C, showing a record of all vaccinations and re-vaccinations (voluntary) of adults.

Preparation of vaccination reports and returns.

17. Every public and private vaccinator shall prepare a monthly report during the vaccination season on the general result of the vaccine operations during that period, and shall submit the same through the Civil Surgeon to the Secretary of the Cantonment Committee accompanied by a return showing—

(1) Number of boys vaccinated during the month.

(2) Number of girls vaccinated during the month.

(3) Results—

(a) Number successful.

(b) Number unsuccessful.

(c) Number insusceptible.

(4) Number of vaccinations and re-vaccinations of adults, with results.

18. The vaccinator is to perform vaccination or re-vaccination on all persons presenting themselves voluntarily.

C. B. RAWLINSON, Major,

Revenue Commissioner, North-West Frontier Province.

REVENUE AND FINANCIAL SECRETARY TO THE CHIEF COMMISSIONER, NORTH-WEST FRONTIER PROVINCE.

NOTIFICATION.

Peshawar, the 19th October 1906.

No. 4492.—Whereas the Municipal Committee of Abbottabad has applied to the Chief Commissioner, under the provisions of section 40, Act XX of 1891 (the Punjab Municipal Act), and whereas it appears to the Chief Commissioner of the North-West Frontier Province that land is required by the said Municipal Committee for a public purpose, namely, extension of the Abbottabad town, it is hereby declared that the undermentioned land is required for the said purpose.

This declaration is made under the provisions of section 6 of Act I of 1894 and under section 7 of the said Act, the Deputy Commissioner, Hazara District, is hereby directed to take orders for the acquisition of the land specified below.—

Specification of land.

Comprising a review of the progress of the Department for the quinquennial period 1901-02 to 1905-06.

No. 181-B.P., dated the 5th October, 1906.

From—C. Stewart-Wilson, Esq., *I.C.S., Director-General of the Post Office of India,*

To—The Secretary to the Government of India, Department of Commerce and Industry.

I have the honour to submit the Annual Report on the Post Office of India for the year ended the 31st March, 1906. In accordance with the instructions

of Government conveyed in Finance and Commerce Department letter No. 1830-S.R., dated the 11th April, 1901, the report contains a review of the progress of the Department during the period from 1901-02 to 1905-06 and a comparison with the preceding quinquennial period. This report, with that for 1900-01, deals with fifteen of the seventeen years of Sir Arthur Fanshawe's Director-Generalship. These two reports will show that the period during which the Department had the advantage of his guidance has been full of progress and that the Post Office which he took over was a very different concern from that which he left on the last day of the year under review.

Charge of the Post Office.

2. The administration of the Department was in the hands of Sir Arthur Fanshawe throughout the year. I did not assume charge till the afternoon of the 31st March, 1906.

Principal events, inland post.

3. The year under report was remarkable for an unusually large number of important improvements in the postal service. The weight of letters that may be sent through the post for the half-anna rate of letter postage was raised from the 1st April, 1905, to three-quarters of a tola from half a tola. From the same date the regulations relating to postcards of private manufacture were revised so as to allow the public to use part of the address side for written communications, etc.; and arrangements were made to grant, under certain conditions, compensation up to R25 for the loss, or damage caused to the contents, of an uninsured registered letter, packet, or parcel in course of transmission by post. The use of one-anna and half-anna postage stamps for revenue purposes was authorised with effect from the 1st October, 1905. The fees for telegraphic money orders were reduced from the 1st January 1906 and at the same time the rates for sending remittances by "Urgent" or "Deferred" telegram were differentiated. The fees for insurance on articles posted were reduced by one-half from the 1st July, 1905; and from the 15th February, 1906, a reduction was made in the fee for a certificate of posting. In the rules of the Savings Bank certain changes were made in the early part of the year to enable depositors to hold their deposits wholly or in part, at call or subject to six months' notice of withdrawal, the rate of interest on deposits at call being reduced from 3⅛ per cent. to 3 per cent., while the rate of interest on deposits requiring six months' notice of withdrawal was fixed at 3½ per cent. per annum.

With effect from the 1st March, 1906, the Zemindari Dâk Establishments in Bengal, Eastern Bengal and Assam, all the district post establishments in the United Provinces, Ajmer-Merwara, Coorg, and the North-West Frontier Province, the Provincial district post establishments in the Central Provinces, and the district post establishments in Burma formerly paid from Local Funds were transferred to the Imperial establishment.

The constitution of the new province of Eastern Bengal and Assam in October, 1905, led to the abolition, as a separate postal administration, of the Bihar circle and to certain changes in the area of the Bengal, Assam, Central Provinces, and Eastern Bengal circles.

Plague continued to cause serious interference with the work of the Department. A large number of post offices in various parts of the country had to be removed into tents, huts, and other temporary quarters, where work was often carried on with much difficulty though without serious inconvenience to the public. In the Bombay circle alone 123 post offices had to be temporarily vacated. The total number of deaths of postal servants from plague fell from 359 in the previous year to 162 in the year under report. There were no cases of desertion of duty from fear of the disease and rewards were given in nearly 200 cases to subordinates who displayed conspicuous courage and devotion to duty in the face of exceptional risk. Special grants were made in several cases to the widows or heirs of men who succumbed to the disease at their posts.

At the beginning of the year a severe earthquake in the Kangra and Kulu Valleys completely disorganised the postal work in that part of the country. Six postal officials were killed, and five, including the Divisional Superintendent

and the Postmaster of Dharmsala, were severely injured. For some time all postal communication with Dharmsala was completely cut off, but through the personal exertions of the Officiating Postmaster-General, Mr. A. Simcox of the Bombay Civil Service, who proceeded to the spot as soon as news of the disaster reached him, communication was soon restored. Mr. Simcox was ably supported by the mail contractor, Lala Behari Lal, who was subsequently granted by Government a substantial monetary reward for the good work which he did on the occasion. It is gratifying to be able to record that, notwithstanding the loss of life and the panic that the disaster created, the postal staff with few exceptions stuck to their posts.

In September a severe flood, attended with considerable loss of life, afflicted the Kashmir Valley. The suddenness with which this flood came down left little time for the removal of the effects from the post office building at Srinagar, but the postal staff with most commendable zeal saved all the Government property at the expense of many of their own belongings. Compensation was granted to three of the postal officials concerned for property lost by them.

During the year there were, as usual, many cases of mail interruptions owing to breaches of railway lines. In one case it was four months before the normal route could be resumed.

Special arrangements were made in connection with the visit of Their Royal Highnesses the Prince and Princess of Wales to this country. A post office was attached to the Royal Camp, every possible convenience being afforded to the members of the Royal Party in transacting their postal business. Mr. H. S. H. Pilkington, my Personal Assistant, was placed on special duty in charge of the postal arrangements, and earned His Royal Highness' special thanks for the good work done by the post office.

In connection with the Royal visit, manœuvres on a very large scale were held in the vicinity of Rawalpindi. Over 50,000 troops were engaged on the manœuvres and eighteen field post offices and two field sorting offices were provided for the convenience of these troops. The postal arrangements connected with the manœuvres were in the hands of Mr. C. C. Sheridan and were carried out most successfully.

Field post offices continued to be maintained throughout the year for the British Contingent in China.

4. In pursuance of the accepted policy of raising pay on account of the growth of work and money responsibility, increases in pay were sanctioned during the year in the case of 9 head postmasters, 264 sub-postmasters, and 459 branch postmasters. The pay of 360 postmen and village postmen was also raised. Increases in pay of postal officials.

It is interesting to note that during the last five years, the pay of no less than 42 head postmasters, 1,115 sub-postmasters, 2,230 branch postmasters, and 8,165 postmen and village postmen has been raised, and that increases were also sanctioned to the pay of several thousands of runners, mail peons, letter-box peons, and other inferior servants.

5. The letter postage to Australia and Egypt (including the Soudan) was reduced to 1 anna for half an ounce. Principal events, foreign post.

The foreign money order system was extended to the British Protectorate of Somaliland, the Federated Malay States of Negri-Sembilan, Pahang, Perak and Selangor, Portuguese East Africa, and the Marianne (or Ladrone) Islands. The maximum limit of amount for a single money order was raised to £40 in the sterling money order exchanges with the British Central Africa Protectorate, Italy (including Massowa and Assab in Erithrea), Italian offices at Bengasi (*Tripoli*), Canea (*Crete*) and Durrazzo, Janina and Scutari (*Turkey*), Switzerland, Cape Colony (including Basutoland and British Bechuanaland), the States of the Australian Commonwealth, Fiji, Trinidad, and British Guiana; and the maximum limit of amount for a single money order was raised to R600 in the rupee money order exchanges with Ceylon, the Straits Settlements, Hong-

Kong (including the countries and postal agencies served through Hong-Kong), the British East Africa Protectorate (including Uganda), the German East Africa Protectorate, Somaliland Protectorate, the Seychelles, Sarawak, Zanzibar, Portuguese India (Goa and Daman), Mauritius, and British North Borneo.

British postal orders purchased in India, which hitherto have been payable only in the United Kingdom and at certain British post office agencies abroad, are now payable also in a large number of British Colonies and at any post office in India. The rates of commission payable in respect of British postal orders purchased in India have been reduced by one-half.

The foreign parcel post was extended to the Republic of Panama, the Federated Malay States and a large number of places in China at which post offices are maintained by the Imperial Chinese Postal Administration. The rates of postage and conditions in respect of parcels for the following countries were revised :—

Straits Settlements, Mauritius, Zanzibar, Gibraltar, Hong-Kong, Guatemala, North-Eastern Rhodesia, New Zealand, Cyprus, Macao, British East Africa Protectorate (including Uganda), Paraguay, Republic of Honduras, Dominican Republic, and Republic of Colombia.

Arrangements were made, in the case of uninsured parcels exchanged between India and Ceylon, for the payment under certain conditions of compensation not exceeding 25 francs (R15-0-0), in the case of the loss of, damage to, or abstraction from, such articles.

The fees for insurance of articles posted for transmission by the Foreign Post were reduced by one-half. Insurance to destination was made available for parcels for Formosa, certain foreign postal agencies in China, Japanese offices in Corea, Queensland, South Australia, Tasmania, Victoria, and Western Australia; and letter insurance was extended to the Netherlands-India, the Portuguese colony of Timor, Corea and certain Japanese postal agencies in China.

The limit of amount which may be specified for remittance to the sender in the case of the exchange of value-payable articles between India and Ceylon was raised from R150 to R600.

Working of the P. & O. contract.

6. The Peninsular and Oriental Steam Navigation Company's outward steamers carrying the European mails were due to arrive at Bombay at 2 P. M. on Friday of each week. During the year under report 52 weekly mails were received, arriving on 49 occasions on Friday, twice on Saturday, and once on the following Tuesday. In the case of the Friday arrivals, the contract time was exceeded twice. One Saturday arrival was due to detention by fogs and the other to a violent sandstorm in the Suez Canal; while the late arrival on Tuesday was due to the detention of the "Persia" owing to the block in the canal consequent on the blowing up of the wreck of the "Chatham." The shortest time occupied in transit by the mail from London to Bombay was 13 days, 7 hours, and 52 minutes, while the average time for the year was 13 days, 14 hours, and 26 minutes. In the opposite direction, that is, from Bombay to London, the quickest transit was 12 days, 23 hours, and 29 minutes, the average time for the year being 13 days and 16 hours.

Section I.—Post offices and postal communications.

(1) Post offices, letter-boxes, and village postmen.

Post offices, letter-boxes, etc., during 1905-06.

7. Appendix I shows the number of post offices, letter-boxes, and village postmen, both Imperial and District Post, in each circle at the close of the year, as compared with the corresponding figures at the close of the previous year. There was an increase, during the year, of 742* in the number of post offices, 1,070 in the number of letter-boxes, and 54 in the number of village postmen. The growth of post offices was greatest in the Bombay circle, and the largest additions to letter-boxes were in the Madras, Bombay, and United Provinces circles. The number of post offices in charge of schoolmasters and other persons who are not regular servants of the Department rose from 9,918 to 10,556.

8. The total number of post offices was 11,061 in 1895-96 and 12,970 in 1900-01, while at the end of 1905-06 there were 16,775. There was thus an increase of over 1,900 offices or about 17 per cent. during the first period of five years, and of over 3,800 offices or 29 per cent. during the second period. The circles where progress in this respect has been most rapid are the Punjab, Madras, and Bombay. In the Punjab the number of post offices has nearly doubled in ten years. The new offices opened year by year are chiefly small village offices, which are placed in most cases in the charge of schoolmasters, petty shop-keepers, etc. The number of post offices in charge of such extra-departmental agents was 5,956 in 1895-96, 7,809 in 1900-01, and 10,556 at the close of the year under report. Growth of post offices and facilities for rural delivery since 1895-96.

The provision of letter-boxes has received much attention during the last ten years The total number of these boxes was 19,390 in 1895-96, 25,509 in 1900-01, and 37,107 in 1905-06. There was thus an increase of 6,000 during the first period of five years and of more than 11,500 during the second period. Progress in this respect has been most rapid in the Bombay, Madras, and Punjab circles.

The total number of village postmen was 7,291 in 1895-96, 7,936 in 1900-01, and now stands at 8,376. There has been less increase, therefore, during the last five years than during the preceding quinquennial period, the chief reason being that many more offices have been opened in rural tracts, every such office reducing the necessity for village postmen. Thus in the Punjab and Madras circles where the number of village offices opened has been conspicuously large, the number of village postmen employed has been practically stationary during the past five years. The total number of postmen and village postmen taken together was 16,871 for 1895-96, 19,141 for 1900-01, and 23,279 for 1905-06.

(2) Postal communications.

9. In Appendix I also are shown the distances over which mails were conveyed in each circle by the various agencies employed by this Department. The total figures for the year under report and for the preceding year are given in the following statement — Postal communications during 1905-06.

	Nature of Postal Communications				
	Railway.	Runners and boats	Mail cart, Tonga, etc	Steamer	Total.
Mileage at close of 1904-05	*26,829	94,418	9,009	18,580	*148,836
„ „ of 1905-06	27,683	95,891	8,845	19,452	151,871
Increase or Decrease	+854	+1,473	—164	+872	+3,035

* Revised figure

It will be seen that there was a slight decrease under the head of mail cart and tonga lines and an increase under all other heads, the percentage of increase being greatest in the case of steamer lines and least in the case of runner and boat lines.

10. During the last ten years the total mileage of postal lines has been steadily increasing, although there has been much variation in the distances over which mails are carried by the various agencies employed by the Post Office. In 1895-96 the total length of these lines was 122,282 miles, in 1900-01 it had risen to 131,621 miles, an increase of 7·6 per cent. and for the year under report stands at 151,871 miles, an increase of 15·4 per cent., or rather more than 20,000 miles. Growth of postal communications since 1895-96

The distances over which mails are carried by railway has been constantly increasing with the development of the railway system of the country. The

total length was 18,879 miles in 1895-96, 22,839 miles in 1900-01, and 27,683 miles in 1905-06. There was thus an increase of nearly 4,000 miles under this head in the first period of five years and of nearly 5,000 miles in the second period, being at the rate of about 21 per cent. for each period. The actual distance over which mails are carried by runners and boats is now 95,891 miles, as compared with 85,023 miles in 1900-01 and 81,071 miles in 1895-96. It will be seen that the increase during the last five years was at the rate of 12·8 per cent., which is considerably in excess of the increase (4·9 per cent.) during the preceding 5 years. This was partly due to rapid progress in the opening of new post offices in Madras, Bombay, and the Punjab which had to be linked up with the existing system by new runners' lines. The amalgamation of the posts of the three states of Bikanir, Alwar, and Dhar with the Imperial Post contributed also to the increase.

Mail tonga lines, which include horse and camel posts, have increased by 2,000 miles since 1895-96, the total mileage having risen from 6,839 in that year to 7,937 in 1900-01 and 8,845 in 1905-06.

The total mileage of steamer lines is now 19,452, as compared with 15,822 in 1900-01 and 15,493 in 1895-96. Thus it will be seen that there was an increase of 329 miles in the first period of five years and 3,630 miles during the second period. The chief reasons for the large increase during the last five years are the inclusion of the Bombay-Aden service, the introduction of the fast Persian Gulf service from Karachi to Basrah, the opening of a line between Bombay and Vijayadrug and certain small steamer lines in Burma.

Section II.—Correspondence and Parcels—Postage Stamps.

(1) Correspondence and parcels.

Statistics of postal articles during 1905-06.

11. The estimated number of postal articles of all kinds, exclusive of money orders and parcels, issued for delivery during the year, added to the actual number of parcels, amounted to 734 millions or more than 56 millions in excess of the number during the preceding year. Statistics showing the different classes of articles delivered in the various postal circles during 1905-06 will be found in Appendix II, and a general summary of the results is given in the following statement:—

Classes of postal articles.	1904-05.	1905-06.	Increase (+) or decrease (—).	Percentage of increase (+) or decrease (—).
Letters—paid	253,135,426	272,095,430	+18,960,004	+7·49
„ unpaid	31,422,509	33,517,246	+2,094,737	+6·63
„ registered	13,663,469	15,253,767	+1,590,298	+11·64
Total letters	298,221,404	320,866,443	+22,645,039	+7·59
Postcards	299,486,463	324,260,499	+24,774,036	+8·27
Total letters and postcards	597,707,867	645,126,942	+47,419,075	+7·93
Registered newspapers	37,078,187	40,200,838	+3,122,651	+8·42
Book and pattern packets	39,593,010	4,7319,064	+4,126,054	+10·42
Total articles of the letter mail	674,379,064	729,046,844	+54,667,780	+8·11
Parcels—registered	3,081,903	3,308,014	+226,111	+7·34
„ unregistered	1,459,464	1,647,365	+187,901	+12·87
Total parcels	4,541,367	4,955,379	+414,012	+9·12
Grand total of all postal articles	678,920,431	734,00[illegible]	+55,081,792	+8·11

It will be seen that there was a large increase under every head. The total number of postcards now exceeds the number of paid letters in every circle except Burma, Assam, and Sind and Baluchistan. It is satisfactory to observe that the percentage of increase was smallest in the case of unpaid letters, though these still continue to form far too large a proportion of the inland correspondence.

Average number of postal articles per head of population during 1905-06.

12. The second table in Appendix I shows, for each postal circle, the number of post offices, letter-boxes, and postal articles in relation to area, population and literate population, the two latter being taken from the 1901 census figures.

Altogether there were 2·60 postal articles—letters, postcards, packets, and parcels—per head of the total population and 46·08 postal articles per head of the literate population. As in previous years, the number of postal articles per head of the general population was highest in Bombay where it was 5·56.

Average number of postal articles per head of population since 1895-96.

13. From the statement on the margin it will be seen that since 1895-96 the number of postal articles per head of total population has risen from 1·44 to 2·60 and the number per head of the literate portion of the population from 34·31 to 46·08. The figures for 1895-96 are based on the census of 1891 and those for 1905-06 on the census of 1901 and can, therefore, be fairly compared, referring, as they do, to years similarly placed as regards the census. They indicate not only the very great progress made by the Indian Post Office in the last ten years, but also the immense possibility of expansion which lies before it.

NAMES OF POSTAL CIRCLES	Number of postal articles per head of population.		Number of postal articles per head of literate population.	
	1895-96.	1905-06.	1895-96.	1905-06.
Bengal, Eastern Bengal, Assam, Bihar	1·27	2·16	30·87	35·66
Bombay	2·97	5·56	55·37	78·43
Madras	1·32	2·80	23·64	41·49
United Provinces	1·08	1·64	42·04	56·15
Punjab	2·03	3·44	62·31	98·90
Burma	1·89	2·55	9·52	12·05
Central Provinces	·95	2·12	49·11	67·17
Rajputana	·65	1·80	*	49·23
Sind and Baluchistan	2·92	3·63	77·08	137·19
All circles together	1·44	2·60	34·31	46·08

* Enumeration not taken under this head in the census of 1891.

It is interesting to note that during 1905-06 the number of articles per head of total population was, if the little Sind and Baluchistan circle is excluded, highest in the Bombay circle with the Punjab circle next, while, in the matter of the number of articles posted by the literate portion of the population, these two circles still head the list, but their relative position is exactly reversed. It has been necessary to group the Bengal, Bihar, Eastern Bengal and Assam circles together in this statement, owing to the partition in October 1905.

Foreign correspondence during 1905-06.

14. The foreign correspondence received in India for delivery is included in the total figures contained in Appendix II. It is, however, customary to give separately certain statistics of the correspondence exchanged between India and the United Kingdom. The number of letters and postcards received from the United Kingdom was 7,939,242 in the year under report, as compared with 6,971,660 in the preceding year, while the number of newspapers, book-packets, and samples was 10,322,809, as compared with 10,292,047 in the previous year. The number of letters and postcards despatched to the United Kingdom from this country during 1905-06 was 7,241,342, as compared with 6,387,816 despatched during the preceding year, and the number of newspapers, book-packets, and samples was 1,467,138, as compared with 1,323,542 during 1904-05. The increases of 13·88 per cent. and 13·36 per cent., respectively, in the number of letters and postcards received and despatched are due, as stated in the previous reports, to the natural operation of the cheap rates of letter postage and the continued growing popularity of pictorial postcards.

As regards the correspondence exchanged with countries other than the United Kingdom, the Union statistics which used to be taken every three years have been discontinued under the terms of the Principal Convention of

Washington.* The figures for 1905-06 are, therefore. of no statistical value, being merely a repetition of those based upon the statistics recorded ten years ago in 1896.

Foreign parcels during 1905-06.

15. The total number of parcels sent by the foreign post from this country during 1905-06 was 235,408, as compared with 221,445 during the previous year. The total number received in this country during 1905-06 was 289,070, as compared with 257,268 during the previous year. There was thus an increase of 6·31 per cent. in the number of parcels despatched and of 12·20 per cent. in the number of parcels received by the foreign parcel post.

More than 64 per cent. of the whole foreign parcel traffic of the year was with the United Kingdom. The number of parcels received from that country during the year under report was 214,884, as compared with 190,853 received during the year 1904-05. In the opposite direction also the increase, which has been so noticeable of late years, was fully maintained, the number of parcels sent to the United Kingdom during the year under report being 118,865, as compared with 107,993 during 1904-05, and 91,192 during 1903-04, so that there has been an increase of more than 27,000 parcels during the last two years.

Most of the parcel traffic with the United Kingdom continues to be sent by the cheaper though longer sea route *viâ* Gibraltar, but there was also an increase in the traffic by the Brindisi route, the number of parcels received by this route having been 26,708, as compared with 24,393 in the previous year, and the number sent having been 19,285, as compared with 16,755 sent in 1904-05.

In the case of the exchanges with countries other than the United Kingdom, there was a satisfactory development of the traffic in both directions, the number of parcels received from these countries during 1905-06 being 73,490, as compared with 65,945 during the preceding year, while the number despatched from India was 115,101, as compared with 111,996 during the previous year. The parcel post service with Egypt, Persia, Italy, and France shows specially gratifying progress.

Delivery work during 1905-06.

16. Appendix II shows that 734,002,223 letters, postcards, newspapers, packets, and parcels were issued for delivery, and these figures, added to the 19,920,168 money orders issued for payment, make a grand total for all these classes of articles of 753,922,391, as compared with 696,876,108 in 1904-05, being an increase of 8·18 per cent. as against 7·43 per cent. in the previous year. Of the total number of articles issued for delivery or payment, it is estimated that 716,874,022 or 95·09 per cent. were actually delivered or paid as compared with 663,163,750 or 95·16 per cent. in the previous year.

Growth of inland correspondence since 1895-96.

17. From the figures given in the statement on the opposite page it will be seen that there has been a steady and rapid increase during the last ten years in the number of letters, postcards, newspapers, and book-packets dealt with by the Post Office. The Indian Post Office carried nearly 320 millions more of these articles in 1905-06 than in 1895-96, or well over a million articles for each working day in excess of what it carried ten years ago.

It will be observed that the growth during the last quinquennial period in the case of letters and postcards has been at the rate of 37·49 per cent., which is considerably in excess of the growth (28·84 per cent) during the preceding five years. The increase has been conspicuously rapid in the case of registered letters, being at the rate of 43·76 per cent, as compared with 32·77 per cent. in the preceding quinquennial period. In 1905-06 the Department delivered nearly 106 millions more postcards than in 1900-01, and over 170 millions more than in 1895-96, the percentage of increase during the last five years being 48·5. This is largely due to the growing popularity of private postcards both for the purpose of advertising and in the shape of "pictorial" postcards. The percentage of increase during the quinquennial period is smallest in the case of unpaid letters, which is satisfactory.

CLASSES OF POSTAL ARTICLES.	1895-96.	1900-01.	1901-02	1902-03.	1903-04.	1904-05.	1905-06.	PERCENTAGE OF INCREASE (+ OR DECREASE (—) DURING 1905-06 AS COMPARED WITH	
								1895-96.	1900-01.

* This figure represents the total number of newspapers of all kinds

† This figure represents the number of unregistered parcels posted during the half-year which ended on the 31st March 1896.

The most remarkable feature shown by the statement is the increase of book and pattern packets, the percentage of increase on the number for 1895-96 being 140·26 and on that for 1900-01, 54·47.

In 1898 special rules and rates of postage were introduced for "registered newspapers," and since then periodical publications which are not "registered" have been classified as book packets.

Growth of inland parcel traffic since 1895-96.

18. The figures relating to parcels in the statement are not mere estimates, but are actual figures. The system of receiving unregistered parcels for transmission through the inland post was introduced from the 1st August 1895, and the growth of this class of business shows that it has met a demand, the number of unregistered parcels having been more than trebled during the last five years. Nor has the traffic in registered parcels suffered, as is shown by the fact that their numbers have increased during the last five years by over 50 per cent.

Growth of correspondence exchanged with the United Kingdom since 1895-96.

19. Details of the postal articles, other than parcels, exchanged in each direction between India and the United Kingdom for the last five years, in comparison with the figures for the years 1895-96 and 1900-01, are given in the following statement :—

	1895-96.	1900-01.	1901-02.	1902-03.	1903-04.	1904-05.	1905-06.	Percentage of increase (+) or decrease (—) during 1905-06 as compared with 1895-96.	Percentage of increase (+) or decrease (—) during 1905-06 as compared with 1900-01

NOTE:—The figures relating to correspondence despatched from India to the United Kingdom are based on statistics taken for each mail, and those relating to correspondence received from the United Kingdom are based on special statistics taken during the year.

The Imperial penny postage rate came into force on Christmas Day, 1898. In 1897-98, the last full year during which the 2½ annas rate was in force, a little over three millions of letters and postcards left India for the United Kingdom, and about three and a half millions arrived in India from the United Kingdom. In 1899-1900, the first full year after Imperial penny postage was introduced, the numbers had gone up to 3½ and 4½ millions, respectively. Six years later, in 1905-06, these figures have mounted up to 7½ and 8 millions. In five years the number of letters and postcards sent from India to the United Kingdom has all but doubled itself and the number of the letters and postcards from the United Kingdom to India has gone up by 86 per cent.

The postal traffic in newspapers, book-packets, and samples from the United Kingdom to India also shows a rapid increase, which contrasts with the small and nearly stationary figures which represent this class of traffic in the opposite direction.

Growth of the foreign parcel post since 1895-96.

20. There has been a very great development of foreign postal parcel traffic during the last ten years, during this period several new direct parcel exchanges have been established. The total number of parcels received by India from all parts of the world by the foreign parcel post was 105,546 in 1895-96, 157,103 in 1900-01, and 289,070 in 1905-06. The total number despatched from India by the foreign parcel post was 114,832 in 1895-96, 144,427 in 1900-01, and 235,408 in 1905-06.

(1) With the United Kingdom.

The parcel post with the United Kingdom occupies, as usual, by far the most important position, and the transactions, in both directions, of each of

the last five years, in comparison with those of the years, 1900-01 and 1895-96, are given in the following statement, which does not differentiate between rates as regards the year 1895-96, because the Brindisi route was not used for parcel post till after that year:—

	1895-96	1900-01	1901-02	1902-03.	1903-04	1904-05	1905-06	Percentage of increase (+) or decrease (—) during 1905-06, as compared with 1895-96	1900-01

During the five years ending with 1900-01 there was some falling-off in the number of parcels sent from India to the United Kingdom, owing mainly to the precautions against plague and the consequent restrictions on the contents of parcels from this country. During the last five years, however, there has been a rapid development in the number of these parcels.

In 1904-05 the rates of parcel postage to the United Kingdom and to a number of British colonies and possessions were considerably reduced in consequence of the acceptance by India of the scheme for a cheap uniform scale of parcel postage within the Empire, and the reduced rates have operated as a fresh stimulus to the parcel traffic with the mother country and the colonies and possessions concerned.

The growth of the parcel post between India and countries other than the United Kingdom will be seen from the following statement — (2) With other countries.

	1895-96.	1900 01.	1901-02	1902-03	1903-04.	1904-05.	1905-06.	Percentage of increase (+) or decrease (—) during 1905-06 as compared with 1895-96.	1900-01.

These figures too show a very satisfactory development.

21. The total number of postal articles, excluding money orders, that reached the Dead Letter Offices during the year under review was 6,385,202, as compared with 5,264,164 in the previous year. Details of the distribution of these articles among the several offices and the manner of their disposal will be found in Appendix III. Of the total number of articles, 1,668,153 or 26·13 per cent. were disposed of by being redirected to the persons to whom they were addressed, while 3,155,257 or 49·41 per cent., were issued for return to the senders. Out of the total number of articles issued by the Dead Letter Offices, only 352,608 or 7·31 per cent. came back to them undelivered. The total number of articles Work of Dead Letter Offices during 1905-06.

finally deposited as "dead" was 1,914,400. This figure, which is only ·26 per cent. of the total number of articles given out for delivery during the year, includes a large number of articles which from their nature were not capable of delivery. The Dead Letter Offices at Calcutta, Bombay and Madras alone received no fewer than 57,781 articles which bore no address at all. In articles opened in the five more important Dead Letter Offices there were found cheques, hundies, currency notes, bills of exchange, coins, and other property of the nominal value of R7,89,974. Of this amount R21,670 was represented by valuable property found by the Bombay Dead Letter Office in articles without any address whatever.

Work of Dead Letter Offices since 1895-96.

22. A comparison of the results of the year under report with those of the years 1900-01 and 1895-96 shows that the percentage of articles consigned to the Dead Letter Offices on the total number given out for delivery by post Offices has practically remained stationary. In the matter, however, of the number of articles disposed of by Dead Letter Offices by redirection to addressees, it is gratifying to note that the percentage of such articles on the total number received in the Dead Letter Offices was 26·13 in 1905-06 as compared with 20·39 in 1900-01 and 18·38 in 1895-96.

As a further indication of progress, it may be observed that the percentage of articles returned to the Dead Letter Offices as undeliverable on the total number issued by them for delivery to the addressees or senders, which was 12·9 in 1890-91, fell to 10·50 in 1895-96 and to 7·31 in 1905-06. It may be added that during the last five years the fall has been a steady one.

(2) Postage stamps.

Sale of postage stamps, etc., in 1905-06.

23. Particulars regarding the issues from treasuries of ordinary postage stamps, postcards, embossed envelopes, and stamped wrappers, and also of service postage stamps, postcards, and envelopes, will be found in Appendix IV. The total value of the issues of ordinary postage stamps, etc., amounted to more than 200 lakhs of rupees, showing an increase of 20 lakhs over the total value of the issues of the previous year, while the total value of the issues of service stamps was 33 lakhs, or an increase of R1,34,750 over the total value of the issues of the previous year.

As regards ordinary stamps, the largest contributors to the total of more than 200 lakhs of rupees were Bengal where the value of the issues was in excess of 40 lakhs, Bombay, where the value was in excess of 38 lakhs, Madras, where the value was in excess of 36 lakhs, and the Punjab and North-West Frontier Province, where the value was in excess of 26 lakhs.

The inland single quarter-anna postcard, which is sold for the face value of the stamp, continues to command the highest sales, the total issues being over 135 millions. The quarter-anna stamp had the next largest sales. The numbers sold increased, in the most remarkable way, from 74½ millions to more than 113¾ millions. This is owing partly to the popularity of the pictorial postcard and partly to the use of such stamps as a kind of seal or wafer along the edges of the flaps of envelopes. It is quite common to see four ¼-anna stamps used in this way where one 1-anna stamp on the face of the cover would have been sufficient. The half-anna adhesive stamp came next with issues over 93 millions, and this was followed by the small half-anna envelope, which also is sold for the face value of the stamp, the issues of which were over 77 millions. Of the special envelopes and wrappers supplied by the Department for which a charge is made on account of stationery, there was an increase in the sales of the half-anna wrappers and two-anna small registration envelopes. In the case, however, of the one-anna wrappers, of the half-anna and one-anna square envelopes, of the two-anna large

registration envelopes, and of the two-and-half-anna and one-anna converted envelopes, the sales showed a decrease.

Owing to the remarkable increase in the sales of the quarter-anna postage stamp it was necessary to overprint during the year several millions of the half-anna stamp with the lower value.

As regards service stamps, there was an increase in the sales of the stamps and envelopes of all denominations with the exception of the one-anna thick square and two-anna large registration envelopes and of the one-rupee stamp. The overprinting of the large registration envelope for service purposes has been discontinued from 1st January 1906.

Besides the sales of postage stamps, one-anna revenue or receipt stamps to the value of R3,35,596 were sold during the year through the agency of the Post Office. Non-judicial stamps and Court-fee stamps are also sold at many post offices, but, except in Burma, the postmaster acts, as regards these stamps, as a private vendor, and the stamps do not form part of the post office balance. In Burma, where general stamps are kept by the postmasters in the same way as other stamps, the sales amounted to R96,049.

On and after the 1st October 1905, postage stamps of the denominations of half-anna and one-anna were made available for the payment either of postage or of the stamp duty payable in all cases in which a one-anna adhesive revenue (receipt) stamp is required to be employed under the Indian Stamp Act (II of 1899) In connection with this, stamps, showing on their face that they are "Postage and Revenue" stamps, are under preparation. As a consequence of the unification of the ½ and 1 anna postage and revenue stamps, the privilege of pen-marking postage stamps, by writing or drawing lines across them, had to be withdrawn, in order to protect Government revenue against the use for postal purposes of stamps which had already been employed in payment of stamp duty.

Growth in sale of postage stamps, etc, since 1895-96.

24. The total value of ordinary postage stamps, etc, issued from treasuries rose from rather more than 1 crore and 13 lakhs in 1895-96 to nearly 1 crore and 50 lakhs in 1900-01 and to nearly 2 crores and 1 lakh of rupees in 1905-06, or, in other words, has increased by 77·50 in the last ten years and by 34·06 in the last five years. In the matter of numbers, the following figures are interesting. The quarter-anna stamp was introduced on the 1st October 1898 and the number sold in 1900-01 was 21,682,206. By 1905-06 it had risen to 113,929,836. With the enormous increase in the use of this stamp, there was, as was to be expected, a falling-off in the sale of the quarter-anna post-card, the number of which increased from 103,545,081 to 136,361,854 during the five years ending with 1900-01, but was only 135,884,800 in 1905-06. The number of half-anna stamps rose from 48,732,030 in 1895-96 to 72,468,768 in 1900-01 and to 93,101,330 in 1905-06; while, in the case of the half-anna envelope, which is sold for its face value, the number increased from 70,291,359 in 1895-96 to 77,327,274 in 1900-01 and has practically remained stationary since the latter year. In the case of the one-anna stamp, the number sold in 1905-06 was over 329 per cent. higher than in 1895-96 and over 159 per cent. higher than in 1900-01, the increase being due to some extent to Imperial penny postage.

The total value of service stamps issued rose from R23,41,113 in 1895-96 to R29,10,178 in 1900-01 and to R33,10,886 in 1905-06.

Section III.—Insurance and Value-payable Post.

(1) Insurance.

Insurance business during 1905-06.

25. During the year the total number of letters and parcels insured for transmission by post was 550,770 and their aggregate value over 14½ crores

of rupees. The following statement shows the insurance business done during the year as compared with the preceding year :—

	Insured letters.		Insured parcels.		Total.		
	Number.	Value.	Number.	Value.	Number.	Value.	Insurance fees.
		R		R		R	R
1904-05	136,593	2,94,13,062	315,244	7,88,54,099	451,837	10,82,67,161	2,90,001
1905-06	199,679	4,62,80,434	351,091	9,94,61,652	550,770	14,57,42,086	2,34,197
Percentage of increase (+) or decrease (—)	+46·19	+57·35	+11·37	+26·13	+21·89	+34·61	—19·24

Owing mainly to the reduction of the rates of insurance fees from July 1905, the number of articles insured increased by 21·89 per cent. and their aggregate value by 34·61 per cent., while this was necessarily accompanied by a decrease of 19·24 per cent. in the amount of fees realised. The highest proportionate increase in the number of insured articles posted occurred in Eastern Bengal and Assam, and in Madras.

The average amounts for which each letter and parcel was insured were R232 and R283, respectively, against R215 and R250 in the year before.

Claims for compensation.

26. The number of claims for compensation in respect of insured articles was 47 as compared with 18 in the previous year. Of these 47 claims, 28 were admitted, the loss having been caused in 23 cases by fraud or negligence on the part of postal servants, and in the remaining 5 cases by highway robbery of mails in Native States. The total amount paid in satisfying these claims was R6,668-4-8, of which sum R1,964-10-8 were recovered, so that the actual loss to the Department was R4,703-10-0. This sum represents a percentage of 2·01 on the total amount realised from insurance fees as compared with R1,090 representing a percentage of ·37 in 1904-05. It must not be supposed that the remaining 97·99 per cent. represents profit in the Department, as the cost of the numerous special precautions taken to safeguard such articles is very considerable.

Of the nineteen cases in which claims were not admitted three were finally rejected, while the other sixteen were pending at the close of the year. In the three cases in which payment of compensation was refused, the Post Office declined to accept responsibility as the insured articles in question had been delivered in good condition with all the seals intact and under clear receipts from the addressees.

Growth of insurance business since 1895-96.

27. The total number of letters and parcels insured for transmission by post was 294,983 in 1895-96, 317,986 in 1900-01 and 550,770 in the year under review.

The total number of insured letters was 93,764 in 1895-96, 103,163 in 1900-01, and 199,679 in 1905-06. Four letters out of every 10,000 given out for delivery were insured in 1895-96 and in 1900-01. In 1905-06 six letters in every 10,000 were insured. The increase during recent years has been marked, but especially so since the reduction of the rates of insurance fees from the 1st July 1905. All circles have contributed to this increase. The average amount for which each letter is insured has on the whole had a tendency to decrease. From R262 in 1895-96 it fell to R248 in 1900-01 and to R232 in 1905-06.

The number of parcels insured was 201,219 in 1895-96, 214,823 in 1900-01, and 351,091 in 1905-06, representing a percentage of 9·16 in 1895-96, of 8·02 in 1900-01 and 7·09 in 1905-06 on the total number of parcels of all kinds posted. The increase in the number of parcels insured was 13,604 during the previous

quinquennial period as compared with 136,268 during the five years ending with 1905-06.

The average amount for which each parcel is insured is now R283 as compared with R 311 in 1895-96 and R326 in 1900-01.

(2) Value-payable post.

Value-payable business during 1905-06.

28. The total number of value-payable articles of all kinds sent through the post during the year under report was 5,715,695; as compared with 4,813,514 in the previous year. The total amount declared for recovery was over 6 crores of rupees as against over 5 crores in the preceding year, while the amount of commission realized was R8,67,735 as compared with R7,49,199 in the previous year. There was thus an increase of 18·74 per cent. in the number of articles, of 18·54 per cent. in the amount specified for recovery, and of 15·82 per cent. in the commission. The number of value-payable articles posted during the year at the Calcutta General Post Office and its town sub-offices was 1,472,393 as compared with 1,395,946 in the preceding year and the Department realized on the delivery of these articles and paid over to the tradesmen of Calcutta a total sum of R1,79,18 627, or well over a million pounds sterling.

The increase for the year under report extended to all classes of value-payable articles. The largest numerical increase was under the head of unregistered packets which showed an advance of 26·50 per cent. over the figures of the preceding year. I regret to say that this latter figure has been appreciably swelled by the growing use made of the Post Office by firms trading in various parts of the country on what is known as the "coupon" or "snow-ball" system.

Progress of value-payable business since 1895-96.

29. There has been a marked and steady increase in value-payable work during the last ten years. The total number of articles sent by the value-payable post was 1,850,000 in 1895-96, 2,600,000 in 1900-01 and 5,700,000 in 1905-06. The declared value of these articles was two crores 16 lakhs in 1895-96, three crores 42 lakhs in 1900-01 and six crores 5½ lakhs or over four million pounds sterling in 1905-06, while the commission realized stood at more than 8½ lakhs in 1905-06, as compared with 6 lakhs in 1900-01, and hardly 4 lakhs in 1895-96. It may be of some interest to note here that the proportion which Calcutta contributes to the total figures is now decreasing. The number of value-payable articles posted in that city was 683,462 in 1895-96, 896,762 in 1900-01 and 1,472,393 in 1905-06.

General character of value-payable business.

30. The average value of value-payable articles of all kinds does not vary greatly. It was R11-8 in 1895-96, R13-1 in 1900-01, and R10-9 in 1905-06.

As already remarked, unregistered book packets contribute the largest proportion of the total number of articles sent by the value-payable post. The average value of this class of article was R4 in 1895-96, R3-13 in 1900-01 and R3 in 1905-06, thus showing a tendency to decrease. The total number of value-payable unregistered book packets was 787,932 in 1895-96, 1,072,108 in 1900-01 and 2,732,048 in 1905-06, or more than thrice the number of ten years ago. Next to unregistered book packets come parcels registered and unregistered. The total number of registered parcels sent by the value-payable post was 695,411 in 1895-96, 649,133 in 1900-01 and 911,189 in 1905-06. The average value of a registered parcel was R9-9 in 1895-96, R9-11 in 1900-01, and R11-10 in 1905-06. The value payable system was extended to unregistered parcels during the year 1898-99. The total number of unregistered parcels sent under the value-payable system was 271,021 in 1900-01 and has risen to 1,111,287 during the year under report. The average value of this class of article was R3-4 in 1900-01 and R3-14 in 1905-06.

The number of registered letters and registered book packets sent by the value-payable post is comparatively small. It was 163,501 in 1895-96, 240,033

in 1900-01, and 376,822 in 1905-06. The average value of articles of this combined class is much higher than in the case of parcels and unregistered book packets. It was R32-7 in 1895-96, R39-15 in 1900-01, and R42-2 in 1905-06.

The number of railway receipts sent as such by the value-payable post was 230,849 in 1895-96, 376,593 in 1900-01, and 584,349 in 1905-06. The average value was R28-4 in 1895-96, R35-5 in 1900-01, and R36-12 in 1905-06.

Progress of value-payable business with Ceylon since 1895-96.

31. The number of value-payable articles sent from India to Ceylon was 18,464 in 1895-96, 37,365 in 1900-01 and 54,232 in 1905-06. The increase in the last quinquennial period was not so marked as it was during the five years ending with 1900-01. The number of articles sent from Ceylon to India was 315 in 1895-96, 597 in 1900-01, and has now risen to 2,056.

Section IV.—Money orders.

General money order business during 1905-06.

32. Appendix V (*a*) shows the entire money order transactions of the department year by year for a period of ten years, separate figures being given for inland and foreign money orders. The total number of money orders issued during 1905-06 was 20,296,418, as compared with 18,300,528 in the previous year, and the total amount remitted was over 36½ crores, as compared with about 34 crores in 1904-05. Foreign money orders constitute as usual only a small percentage of the entire transactions of the year, being only 3·32 per cent. of the total number of money orders issued.

Inland money order business during 1905-06.

33. Appendix V (*b*) shows the issues and payments of inland money orders for 1905-06 according to postal circles and compares the results of the year with those of the previous year. More than 19½ million inland money orders, ordinary and telegraphic, of the aggregate amount of over 33 crores of rupees, were issued during the year; and the commission amounted to about 38½ lakhs of rupees. There was an increase, over the transactions of the previous year, of 11·13 per cent. in the number of inland money orders issued, of 6·77 in their amount, and of 6·92 per cent. in the amount of commission realised.

The average amount of an inland money order was R16-14-3 as compared with R17-9-3 in the preceding year.

Telegraphic money order business during 1905-06.

34. Appendix V (*b*) also gives separate figures for telegraphic money orders. There was a large increase both in the number and in the amount of such orders issued, as well as in the postal commission realised, which amounted to R2,34,283, as compared with R2,17,990 in the preceding year. The increase was most marked in the last three months of the year, and this is probably due almost entirely to the more favourable scale of fees which was introduced on the 1st January 1906. The average amount of a telegraphic money order was R102-14-11 as compared with R104-14-11 for 1904-05.

Special money order business during 1905-06.

35. The special classes of money orders for the payment of revenue, rent and miscellaneous Government dues are included under inland money orders in Appendix V (*b*), but separate figures are not shown there for these classes of orders.

(1) Revenue money orders.

The revenue money order system is in force in the Provinces of Bengal, Eastern Bengal and Assam, the United Provinces, the Central Provinces, the Punjab and the North-West Frontier Province. In the Provinces of Bengal, and Eastern Bengal and Assam, taken together the number of revenue money orders increased from 377,823 to 416,110 and the amount remitted from R23,55,277 to R26,20,337. In the Central Provinces there was a falling-off, in the number of orders from 28,574 to 24,104 and in their amount from R10,25,594 to R8,56,009. In the Punjab and North-West Frontier Province circle the number of orders decreased from 19,896 to 18,001 and the amount remitted from R15,42,571 to R14,01,168. In the United Provinces, although

there was a very slight increase in the number of orders from 266,412 to 266,532, the amount remitted fell from R54,88,907 to R51,25,827.

(2) Rent money orders.

The rent money order system is in force in the Provinces of Bengal, Eastern Bengal and Assam, the United Provinces, and the Central Provinces. In the Provinces of Bengal, Eastern Bengal and Assam taken together there was an advance in both the number and amount of rent money orders. The number of orders increased from 72,623 to 80,432 and their amount from R10,56,651 to R12,04,984. In the Central Provinces the number of orders issued rose from 2,140 in 1904-05 to 2,349, and their amount from R43,222 to R43,656 during the year under report. In the United Provinces there was a decrease in both the number and amount of orders; 116,973 orders of the aggregate amount of R14,21,879 being issued as compared with 118,163 of the aggregate amount of R14,83,611 in the year 1904-05.

(3) Remittances of miscellaneous Government dues by money orders.

The system of remitting other miscellaneous Government dues by money orders is in force in the Provinces of Bengal, Eastern Bengal and Assam, the United Provinces, the Punjab, the North-West Frontier Province, Madras, and Burma. In the Provinces of Bengal, Eastern Bengal and Assam the progress reported last year in this class of business was sustained. The number of official money orders issued in these Provinces taken together increased from 79,386 to 87,553 and their amount from R21,92,510 to R24,98,661. In the United Provinces 35,543 orders of the aggregate amount of R7,09,739 were issued as compared with 36,594 orders of the aggregate amount of R7,76,540 in the preceding year. In Madras 8,106 official money orders for R1,12,268 were issued as against 9,804 in 1904-05 amounting to R1,47,215. In the Punjab and North-West Frontier Province circle the number of orders issued was 5,028 of the aggregate amount of R1,69,556 as compared with 6,221 of the aggregate amount of R1,83,620 in the previous year; and in Burma the number fell from 309 in the previous year to 284 in the year under report and the aggregate amount from R23,585 to R11,337.

Foreign money order business during 1905-06.

36. Figures relating to the money order exchanges with foreign countries will be found in Appendix V (*c*), which shows both sterling money order exchanges which are in force with the United Kingdom and its Colonies, and with foreign countries generally, and rupee money order exchanges which are in force chiefly with countries and places in the Far East and Africa. The money order transactions with the Native States of India which have separate postal arrangements are also included, for the purpose of convenience, in this appendix.

(1) Sterling money orders.

There was an increase in the total number of sterling money orders issued by India during the year under report from 115,540 in 1904-05 to 120,033. This was principally due to an increase of nearly 2,000 in the number of remittances sent by money order to the United Kingdom and of more than 2,000 in the number of remittances sent to France. In the case of sterling money orders received for payment in this country, there was a decrease during the year, the number of such orders having dropped from 90,056 in 1904-05 to 73,307. This was due mainly to a falling-off in the number of remittances received from Cape Colony, Egypt, Natal, and the Transvaal. The figures fell in the case of Cape Colony from 16,123 in 1904-05 to 8,450, in the case of Egypt from 5,556 to 4,110, in the case of Natal from 13,879 to 11,634, and in that of the Transvaal from 14,560 to 8,116.

The average amount of a sterling money order was £3 5*s*. 0*d*., as compared with £3 3*s*. 8*d*. in the preceding year, in the case of issues from India, and £8 18*s*. 8*d*., as compared with £7 6*s*. 7*d*. in the preceding year, in the case of payments.

(2) Rupee money orders.

In the case of rupee money order exchanges the chief transactions consist of remittances to India, and there was an increase during the year in these

remittances, the total number of rupee orders received for payment in this country being 224,424, as compared with 207,704 received in 1904-05. There was an increase of 2,392 in the number of orders received from Ceylon, of 1,298 in the number from British East Africa, of 308 in the number from the Portuguese Settlements (India), of 248 in the number from Mauritius, and of 218 in the number from Hongkong. On the other hand, there was a falling-off of 6,518 in the number of money orders received from the Straits Settlements and of 308 in the number from German East Africa. During the year under report direct exchanges of money orders were established with the Federated Malay States and with the Somaliland Protectorate.

The average amount of a rupee money order was R39-15-8, as compared with R40-2-7 in 1904-05, in the case of issues from India, and R41-14-0, as compared with R38-10-11 in the preceding year, in the case of payments.

British postal orders during 1905-06.

37. During the year under report there was a further increase in the sales of British postal orders, the total number of orders sold being 178,385 as compared with 158,786 in the preceding year, and the total value (including poundage) £120,616 as compared with £106,379 in 1904-05. The chief increases occurred in the Punjab and North-West Frontier Province, Bengal, Madras, United Provinces, and Bombay. Of the total number of British postal orders sold, 83,515 were of the value of one pound, 25,390 of the value of 10*s*., and 16,641 of the value of 5*s*. each. British postal orders purchased in India, which have hitherto been payable only in the United Kingdom and at certain British post office agencies abroad, are now payable also in a large number of British colonies and at any post office in India. This extension of the system came into operation from the 1st October 1905, and during the period of six months ending with the 31st March 1906, 4,785 orders of the aggregate value of £3,001 13*s*. 0*d*. were paid in this country Of these, 1,399 of the value of £886 16*s*. 11½*d*. were British postal orders issued in India, and had been used for inland remittances.

Growth of inland money order business since 1895-96.

38. Statistics of the money order transactions for each of the last five years in comparison with those of the years 1895-96 and 1900-01 will be found in the statement on the opposite page.

The total number of inland orders issued was a little more than 10 millions in 1895-96, nearly 13 millions in 1900-01, and is now well over 19½ millions; in other words the inland money order business has all but doubled itself in ten years. The increase for the period of five years ending with 1905-06 was more than double the increase for the period ending with 1900-01, owing to the reductions in commission from the 1st April 1902 and the 1st April 1903

The total number of money orders sent by telegraph was 130,337 in 1895-96, 183,246 in 1900-01, and 216,597 in 1905-06. The increase for the quinquennial period ending with 1905-06 was 33,351 as compared with the increase of 52,909 for the preceding period, but the amount of telegraphic money order work done varies greatly from year to year, being largely influenced by the circumstances of trade. The advantages afforded by this system for remitting money expeditiously have always been more fully appreciated in Burma than elsewhere. In 1895-96 the total number of telegraphic money orders issued from that province was 53,424 or 41 per cent. of the entire number of such orders, in 1900-01 the total number was 80,293 or 44 per cent. of the entire number of orders, and in 1905-06 the total number was 95,520, representing a percentage of 44·10 of the entire number for the whole of India.

Character of inland money order business.

39. During the year nearly twenty million inland money orders were issued and paid, representing a sum of well over twenty-two million pounds sterling. These figures and the fact that the average amount of an inland money order, which was R20-8 in 1895-96 and R20-5 in 1900-01, now stands at R16-14

Statement showing entire money order business of the Post Office including inland and foreign money orders, both ordinary and telegraphic, for the years 1895-96, 1900-01 to 1905-06.

and still has a steady tendency to decrease, show that this department is meeting a real want in carrying small sums of money. The commission charged for our service, considering what is done in the way of payment at the payees' house, taking his receipt and delivering it to the remitter, as well as the size of India and its comparatively defective communications, is probably far the lowest in the world. Still it may be doubted whether more should not be done to provide the poorer labouring classes with an even cheaper method of remitting quite small sums. This matter is at present receiving consideration.

Growth of foreign money order business since 1895-96.

40. In the foreign money order business there has been substantial progress during the last ten years. In 1895-96 direct money order exchanges were in existence with 26 countries, and money could be remitted by post to 79 other countries. There are now direct exchanges with 34 countries, while money can be remitted by post to 112 countries or places in addition to those with which direct exchanges are in force.

(1) With the United Kingdom.

The most important exchange has always been that with the United Kingdom. The number of money orders issued by India for payment in the United Kingdom was 48,082 in 1895-96, 67,127 in 1900-01, and 104,001 in 1905-06, the amounts represented by these numbers being £153,678, £218,228, and £339,886, respectively. These issues are supplemented by the sale of British postal orders, of which 49,566 of the total value of £31,915 were sold in India in 1895-96, 83,945 of the total value of £53,612 in 1900-01, and 178,385 of the total value of £120,616 in 1905-06. The number of remittances from the United Kingdom to India has shown no regular tendency to increase. 22,009 money orders were received for payment in this country in 1895-96, 23,024 in 1900-01 and 27,414 in 1905-06; the sums remitted amounting to £97,562, £72,496 and £110,152, respectively.

(2) With other countries.

After the United Kingdom, the countries with which most money order business is done are Ceylon and the Straits Settlements. In the case of Ceylon the main business consists of remittances from that colony, a large part of these remittances being due to the development of the value-payable post. The number of money orders received from Ceylon for payment in this country was 54,864 amounting to nearly 19 lakhs of rupees in 1895-96 and had increased to 104,114 amounting to 34½ lakhs of rupees in 1900-01. The total number for 1905-06 was 136,967 representing a sum of 39½ lakhs of rupees. In the case of the Straits Settlements, the main business also consists of remittances to India. The number of money orders received from the Straits Settlements was 15,088 in 1895-96, 35,335 in 1900-01 and 36,123 in 1905-06, the amounts remitted being 8 lakhs, 16½ lakhs and 18¾ lakhs, respectively.

Section V.—Post Office Savings Banks.

Savings Bank business during 1905-06.

41. Appendix VI shows in detail, according to postal circles, the Savings Bank transactions of the year as compared with those of the previous year. There were 1,115,758 active accounts in existence at the end of the year showing a net increase of 56,945 or 5·38 per cent. in the number of active accounts. The total amount at credit of depositors at the close of the year exceeded 13 crores 99½ lakhs, and was 58½ lakhs or 4·37 per cent. more than the balance at the close of the preceding year.

The withdrawals, exclusive of all transfers, increased by over 43½ lakhs and the interest paid by R1,39,297 while there was a decrease of over 6½ lakhs of rupees in the amount deposited. From July 1905, depositors have been allowed to deposit money either at call or subject to six months' notice of withdrawal. The interest on deposits at call has been reduced from 3½ per cent. to 3 per cent., while interest at the rate of 3½ per cent. is given on deposits that are held subject to six months' notice of withdrawal.

The 1,115,758 active accounts were composed of—

		Crores.	Lakhs.
53,249 security deposit accounts with a balance of	R	0	62½
7,700 public accounts with a balance of	"	0	42
334 regimental and other conjoint accounts with a balance of	"	0	8½
137,313 minors' accounts with a balance of	"	2	37
917,162 ordinary accounts with a balance of	"	10	49

These figures show that 94·51 per cent. of all the accounts and 91·92 per cent. of the total balance of 13 crores and 99¼ lakhs represent savings of private persons Of the total number of accounts open at the close of the year, 90·89 per cent. were held by natives of the country.

Occupation of depositors.

42. In Appendix VI will be found a classification, according to their occupation, of depositors in the Post Office Savings Bank. It will be seen that, as was the case last year, the largest number of accounts were held by the under-mentioned classes of depositors in the following order:—

(1) persons of no occupation or whose incomes are derived from others classed as "Indefinite" in the statement,

(2) the professional class, and

(3) the domestic class.

Investment in Government securities during 1905-06.

43. The number of Government promissory notes purchased through the Post Office was 2,894 of the nominal value of R16,77,300, as compared with 1,797 of the nominal value of R11,32,400 in the previous year. The number of Government promissory notes sold was 289 of the nominal value of R1,64,800, as compared with 78 of the nominal value of R52,400 in the preceding year. The nominal value of the Government promissory notes held in the custody of the Comptroller-General at the close of the year on account of depositors in the Post Office Savings Bank was R28,22,300, as compared with R18,56,400 on the 31st March 1905. The value of securities in the custody of the Comptroller-General in the 3½ per cent. loans was R27,52,900 and R69,400 in the 3 per cent. loans. During the year under report 417 investment certificates for fractional amounts of Government promissory notes, of the nominal value of R17,850, were purchased and 119 investment certificates, of the nominal value of R5,221, were sold.

Financial effect of the Post Office Savings Bank.

44. An estimate of the financial result of the working of the Savings Bank during the year under review is given below, as directed in Resolution No. 2428 of the 13th May 1902 by Government in the Finance and Commerce Department:—

Receipts.	Amount.	Expenditure.	Amount.
	R		R
		Interest actually paid to depositors .	39,51,135
Interest at 3½ per cent. per annum on the balance of the deposits .	47,84,698	Estimated cost of managing the bank	4,59,087
Total .	47,84,698	Total .	44,10,222

Growth of Savings Bank business since 1895-96

45. The statement on the next page shows the savings bank transactions during each of the last five years as compared with those of the years 1895-96 and 1900-01. At the end of the year 1895-96, the number of active accounts open was 653 892 ; the number of such accounts rose to 816,651 at the close of

1900-01, and to 1,115,758 at the end of 1905-06. The balance at credit of depositors was R9,04,23,072 in 1895-96; it was R10,04,32,569 in 1900-01, and R13,99,26,259 in the year under review. The total number of accounts has increased by 70·63 per cent. and the balance at credit of depositors by 54·75 per cent. during the last ten years. During the previous quinquennial period the number of active accounts increased by 162,759 or 24·89 per cent., and the balance at credit of depositors by R1,00,09,497 or 11·06 per cent., as compared with an increase of 299,107 or 36·63 per cent. in the former and of R3,94,93,690 or 39·32 per cent. in the latter during the five years ending with 1905-06.

In 1895-96 the average balance at the credit of each depositor was R138; in 1900-01 it decreased to R122, and in 1905-06 it stood at R130.

Investment in Government securities since 1895-96.

46. The following statement gives details of the purchase and sale of Government promissory notes through the agency of the Post Office for each of the last five years in comparison with those for the years 1900-01 and 1895-96. There were 2,894 purchases of Government promissory notes during 1905-06 as compared with 557 in 1900-01 and 257 in 1895-96, the nominal value of the investments in 1905-06 being over four times that of the investments in 1900-01 and more than eleven times that of the investments in 1895-96. The nominal value of the Government promissory notes held in the custody of the Comptroller-General has increased largely during the last two years. The amount so held was R28,22,300 at the close of 1905-06, as compared with R10,24,400 at the close of 1900-01 and R4,69,000 at the close of 1895-96. The marked increase in the number and value of Government promissory notes purchased and sold is due to the fact that no commission or brokerage of any kind is charged in connection with transactions through the agency of the Post Office, and also to the fact that interest on Government promissory notes which remain in the custody of the Comptroller-General is exempt from income-tax.:—

Section VI.—District Post.

Work of District Post during 1905-06.

47. In Appendix VII details are given of the establishments, income, and expenditure of the District Post, and also of the work done under this head for the years 1904-05 and 1905-06.

In accordance with the terms of the Resolution of the Government of India in the Finance and Commerce Department, No. 6802-A., dated 9th November 1903, the establishments in the Punjab, Bombay, and Sind, which were formerly paid from Provincial revenues, were transferred to the Imperial establishment with effect from the 1st March 1905. Particulars relating to these establishments, as explained last year, were included in Appendix VII of the Report for 1904-05. They have now been excluded from the figures for 1905-06. With effect, however, from the 1st March 1906 the following District Post establishments were, under the orders of the Government of India, transferred to the Imperial establishment, namely:—

(1) the Provincial District Post establishments in the Central Provinces;
(2) the Zemindari Dâk establishments in Bengal, Eastern Bengal and Assam;
(3) all the District Post establishments in the United Provinces, Ajmer-Merwara, Coorg, and the North-West Frontier Province;

(4) the District Post establishments in Burma which were formerly paid from Local funds.

All these establishments were Imperial on the 31st March 1906 and were paid from District Post funds for only 11 months of the year.

The total expenditure of the year under report as shown in Appendix VII was R8,(6,789 as compared with R11,09,275 in the previous year. There was a decrease of 691 in the number of post offices, of 2,062 in the number of letter-boxes, of 1,095 in the number of postmen and village postmen and of 5,712 miles in the length of mail lines maintained out of District Post funds. As regards the use made of the District Post, there was also a decrease of 5,845,461 or 39·09 per cent. in the number of articles of all kinds received for delivery, and of 3,842,679 or 35·12 per cent. in the number of articles posted in District Post letter-boxes and post offices. There was thus a decrease under every head which is mainly due to the transfer to Imperial of the Provincial District Post establishments in the Punjab, Bombay, and Sind as already explained.

During the year a large number of establishments, which were actually paid from District Post funds, or which, though paid from Imperial funds, had not been finally taken over as Imperial were found to be self-supporting, and it was accordingly arranged that credit for them should no longer be taken in the administrative accounts, and that they should be included in future with the ordinary establishment of the Department. The total monthly charges accepted in this way amounted during the year to R4, 697 as compared with R2,995 in 1900-01 and R1,679 in 1895-96.

Section VII.—Miscellaneous.

Post Office Guarantee Fund.

48. The following statement shows the transactions of the Post Office Guarantee Fund. On the recommendation of Sir Arthur Fanshawe, the Government of India, in their letter No. 1444-C., dated 3rd May 1905, from the Department of Commerce and Industry, sanctioned the discontinuance of subscriptions to the Fund until further notice and accordingly no subscriptions were realised from postal servants during the year under report. The balance at credit of the Fund, including the nominal value of Government securities purchased on its behalf, rose from R10,12,864 on the 31st March 1905 to R10,31,482 on the 31st March 1906. The amount decreed against the Fund in connection with frauds committed by officials of the Department was R9,037 as compared with R9,846 in the previous year, and with an average amount of R12,868 in the last ten years. A sum of R35,075 was added to the Fund during the year on account of interest :—

49. The number of complaints recorded as having been made by the public during the year was 38,505 against 35,428 in 1904-05, being an increase of 8 per cent. The percentage of cases in which the complaints were found to be well-founded was 33·75 and the percentage of entirely groundless complaints was 40·17 per cent. In the remaining cases either it was not possible to arrive at a definite conclusion or the investigation had not been completed by the end of the year. Complaints by the public.

A large proportion of these complaints related, as usual, to money orders, specially to those sent by illiterate labourers, many of which are despatched with quite inadequate addresses.

It is very doubtful whether the number of complaints recorded is in itself any indication of the quality of work done by the Post Office. While there is always a strong tendency to saddle the Post Office with blame without reason and to shift blame on to the Department with the full knowledge that the fault does not lie with it, there are not wanting proofs that the ordinary villager often puts up with losses and delays without saying anything about them.

The officers of the Post Office welcome all reasonable complaints as being a most valuable assistance to them in mending abuses, detecting faulty procedure, and sometimes in tracing crime. This attitude is gradually becoming better known and we may hope that the public will, in the course of time, learn to assist the Department by reporting its deficiencies, while ceasing to trouble it with complaints about errors with which it is not concerned

50. During the year under report 2,723 complaints were received regarding the special classes of postal articles shown in the following statement:— Complaints regarding special classes of articles during 1905-06.

	Registered articles (other than parcels and insured and v.-p. articles)	Ordinary registered parcels	Insured letters and insured parcels	Value-payable registered articles of all kinds	Total for 1905-06	Total for 1904-05.
Number of complaints received .	1,283	929	206	305	2,723	2,320

It will be seen that there was an increase of 403 or 17·37 per cent. in the total number of these complaints over the figure of the preceding year, which is partly accounted for by the fact that the total number of articles falling within these special classes was 11·15 per cent. more than in the preceding year.

Out of the total of 2,723 complaints, 1,556 were found to be groundless, that is to say, the enquiry showed either that no loss had occurred, or that the loss had not occurred through the fault of a postal official. In 417 cases no definite conclusion had been arrived at by the end of the year, and in 750 cases or 27·54 per cent. of the total the complaints were accepted as being well grounded If these complaints are classified according to the special classes of articles to which they relate it will be found that during the year 232 well-grounded complaints were made in respect of 2,045,734 ordinary registered parcels, 47 in respect of 550,770 insured articles, 102 in respect of 2,438,964 value-payable registered articles, and 369 in respect of 14,607,092 registered articles of other kinds.

Application for compensation was received in respect of 144 inland registered articles posted during the year under report. Compensation amounting to R931-1-11 was paid in respect of 73 articles, while applications for compensation in the case of 45 articles were rejected. Enquiries had not been completed in regard to 26 articles at the close of the year.

Offences by servants of the Post Office during 1905-06.

51. The number of cases in the several postal circles in which servants of the Post Office were held to be guilty of offences punishable by law is shown in Appendix VIII, and a summary of the figures is given on the margin.

	1904-05.	1905-06.
Number of convictions in courts of law . . .	210	209
Number of cases punished departmentally . . .	235	203
	445	412

The total includes 48 cases of misappropriation of office cash, 126 money order frauds, 14 savings bank frauds and 63 cases of theft from mails or post offices. Most of the remaining offences were committed in respect of letters, parcels or other postal articles entrusted to the Post Office for conveyance. Among the offenders convicted or departmentally punished were 84 departmental postmasters and 28 clerks, 66 extraneous agents in charge of post offices, 81 postmen and village postmen, and 14 runners. The defalcations and losses amounted to R36,844-0-11 as compared with R27,498-11-0 in the previous year and R25,217-3-0 in 1903-04. R21,356-10-9 were recovered from the offenders or their sureties, R5,884-3-0 were decreed against the Guarantee Fund, R200-6-0 were written off as irrecoverable, and R9,402-13-2 remained unadjusted at the close of the year.

Offences by other persons during 1905-06.

52. The offences against the Post Office committed by persons not belonging to the Department included three cases of money order frauds involving a sum of R90 and one case of fraudulent withdrawal from the savings bank of a sum amounting to R188-5-6. In addition to these offences, there were 57 cases of theft of Government money from the mails and post offices, besides 23 cases of highway robbery, which are separately dealt with. The total amount stolen was R8,685-10-9, of which R3,090-6-11 were recovered. R1,003-13-0 were decreed against the Guarantee Fund, R3,712-1-6 were written off as finally lost, and R879-5-4 remained unadjusted at the close of the year.

Highway robberies of the mails during 1905-06.

53. There were no less than twenty-three highway robberies of the mail during the year under report as compared with twelve in the previous year. Of these seventeen occurred in British territory and six in Native States. Of the robberies in British territory, one was committed in Bengal, two in Bombay, one in the Madras Presidency, twelve in the United Provinces, and one in Burma.

Three cases were unfortunately attended with loss of life, and it is a matter of regret that in none of these cases the perpetrators of the crimes were traced. The first case occurred on the 17th April 1905 when the runner with the mails of the Vissannapet post office in the Kistna district of Madras was murdered at a place only two miles from the post office. The runner left the post office at about noon and the same afternoon his body with marks of violence was found on the road. The mail bags, which contained nothing of value, were found torn open near the body of the runner. The second case occurred on the 10th July 1905 in the Nadia district of Bengal, where a runner was murdered in broad daylight at a place seven miles distant from Kanchrapara. The mails which he had been carrying were subsequently recovered, with the exception of a cash bag containing R40, of which no trace was obtained. A runner of the same line was arrested on suspicion by the Police, but was subsequently discharged for want of evidence to connect him with the murder. In the third case a camel-man bringing the mails from Dthali to Aden on the 16th January 1906 was shot dead by Arabs. A portion of the mail which he had been carrying was subsequently recovered. In addition to the cases of actual highway robbery mentioned above, there was a serious though unsuccessful attempt to rob the mails in the Dir Native State in the North-West Frontier Province. On the night of the 3rd November 1905 the Chitral mails

were attacked by a party of armed men. The entire escort of three Dir Levy sepoys was overpowered and killed while defending the mail bags. The mails were saved by the runner who managed to escape with them. The leader of the gang was shot through the chest by one of the sepoys and his body was found on the scene of the attack.

In only six of these cases did Government suffer loss, and the total loss incurred amounted to R3,921-8-0. Of this amount a sum of R1,740 was cash stolen from the mails and R2,167 represents compensation that had to be paid, or will have to be paid, for the loss of insured and registered articles The entire mail was recovered in eight cases and part of the mail in eleven other cases, while in the remaining four cases the whole mail was lost. Prosecutions were instituted in six cases, in five of which convictions were obtained

Casualties during 1905-06.

54. There were various other cases during the year under report in which the lives of postal servants were lost and mails and postal property destroyed. In December a mail runner on the Alwar-Partabgarh mail line in the Central Provinces was killed by a man-eating tiger in broad daylight. In September a runner of the Akyab-Chittagong mail line while crossing a stream was attacked and all but carried away by a crocodile. A ferry boat is employed during the rains for crossing the mails over this stream, but on the day of the occurrence the boatman was absent, and as the water was not high, the runner attempted to ford the stream. He was extricated from the jaws of the crocodile, but subsequently died of his injuries In the same month a runner in the Central Provinces was drowned in attempting to cross a river in flood. In March 1906, a fatal accident occurred at the Benares Cantonment Station on the Oudh and Rohilkhand Railway. A runner foolishly attempted to cross the Railway lines to get to the Benares Cantonment Railway Station post office, and was killed by a passing engine A village postman of the Umaigarh post office in the Etah District of the United Provinces was murdered on his beat, while staying for the night in a Zemindar's house which was attacked by dacoits.

There were three cases of loss of lives during the year due to avalanches in the Himalayan passes. In February 1906 two runners on the Burzil Stage on the Gilgit mail line were overwhelmed by an avalanche. The mails were recovered, but one of the runners was killed and the other seriously injured. During the same month the mail runners of the Gangtok-Chumbi Road in Tibet, while crossing the Nathu Pass with the mails, were buried under an avalanche. The mails were saved and all the men but one managed to escape. In March 1906 a similar accident occurred to the runners carrying the Gilgit mails from Astore. In this case one man was killed and the mails were lost.

During the year 28 post offices were destroyed by fire in different parts of the country. A small post office in the Rangpur District of Assam was also destroyed by a cyclone.

Post Office staff during 1905-06

55. Appendix IX, an abstract of which is given in the margin, shows the entire establishment of the Department, both Imperial and District Post, the numbers in the different classes being shown separately for each postal circle. On the 31st March, 1906, the numerical strength of the Post Office staff was 83,426 as compared

POSTAL OFFICIALS	1904-05	1905-06.	Percentage of increase
Chief officers of the Direction, Account officers and heads of circles, and Superintendent, Workshop, Aligarh	27	27	
Superintendents, Probationary Superintendents, Assistant Superintendents and Inspectors	535	529	
Postmasters including Deputy, Assistant, Sub and Branch Postmasters	6,323	6,460	2·16
Extraneous Agents, such as schoolmasters and stationmasters	9,918	10,556	6·43
Clerks	10,643	11,509	8·13
Postmen and other servants	21,150	22,261	5·25
Road establishment	20,427	20,694	1·30
Village postmen	8,322	8,376	0·64
Signallers and other servants employed for telegraph work in combined offices	2,755	3,014	9·40
TOTAL	80,100	83,426	4·15

with 80,100 at the close of 1904-05. The staff of the Post Office included 271 pensioned soldiers of the Native Army, of whom 83 were non-commissioned officers and 188 sepoys.

The number of women employed in the Post Office was 68, all of whom except two were either Europeans or Eurasians.

The total number of servants of the Department who were dismissed during the year was 485, and of this number 209 were postmen and village postmen and 32 belonged to the road establishment.

Use of private presses during 1905-06.

56. The charges incurred during the year on account of printing work done by private presses amounted to R12,607, as compared with R13,021 in the year 1904-05.

Section VIII.—Non-postal branches of the Post Office.

Postal-Telegraph offices during 1905-06.

57. During the year under report 128 combined post and telegraph offices were opened, and 16 previously existing offices were closed. There was, therefore, a net increase of 112 in the total number of combined offices, as compared with a net increase of 58 during 1904-05. Of the 128 new combined offices, 125 were opened at places which had previously been without a Government Telegraph office and 108 at places where there had previously been neither a Government nor a Railway Telegraph office. The total number of combined offices open on the 31st March 1906 was 2,029, as compared with 1,917 on the 31st of March of the preceding year. The total number of signallers employed by the Post Office was 2,866, as compared with 2,699 at the close of 1904-05, and during the year under report 472 servants of the Post Office qualified as signallers. There were 907 boys employed as messengers at combined offices as compared with 836 at the close of the preceding year.

Traffic statistics of combined offices during 1905-06.

58. In Appendix X will be found the traffic statistics of combined offices arranged according to postal circles. For the year under report there was an increase of 693,296 or 17·22 per cent. in the number of messages sent, of 596,660 or 14·35 per cent. in the number of messages received; and of R2,50,246 or 9·37 per cent. in the revenue realised on sent messages as compared with the figures of the previous year. The total revenue from messages despatched from combined offices amounted to R29,20,346 as compared with R26,70,100 during the preceding year. The total number of messages (excluding free messages) sent was 4,717,436 and the number received was 4,754,614

Telegraph receiving offices during 1905-06.

59. In addition to the telegrams sent and received during the year by the 2,029 combined offices, there were 61,771 telegrams booked at receiving post offices for despatch by post to telegraph offices as compared with 52,894 in the previous year. The revenue realised on these telegrams was R34,601 as compared with R33,190 in 1904-05.

The number of telegrams received at post offices in the Persian Gulf on account of the Indo-European Telegraph Department was 240 as compared with 295 in the year 1904-05, and fees to the amount of R2,049 were realised, as compared with R1,998 in the previous year.

Progress of combined office system since 1895-96.

60. The total number of combined offices was 1,208 in 1895-96, 1,691 in 1900-01, and 2,029 at the end of 1905-06. There has, therefore, been an increase of eight hundred and twenty-one combined offices during the last ten

years. The statement below shows the development according to postal circles of the combined office system during the past ten years:

NAMES OF CIRCLES.	Number of combined offices open on 31st March 1906.	Number of combined offices open on 31st March 1896.	Number of combined offices open on 31st March 1901.	Increase in the number of combined offices during 10 years from 1895-96 to 1905-06	Increase in the number of combined offices during 5 years from 1900-01 to 1905-06
Madras	429	245	358	184	71
Bengal	278	151	204	127	74
Bombay	253	140	208	113	45
Punjab and North-Western Province	246	144	212	102	34
United Provinces	197	144	170	53	27
Assam	158	84	104	74	54
Burma	120	61	86	59	34
Eastern Bengal	114	58	80	56	34
Central Provinces	109	63	89	46	20
Rajputana	74	33	58	41	16
Sind and Baluchistan	51	23	41	28	10
Bihar	..	62	81	—62	—81
TOTAL	2,029	1,208	1,691	821	338

The number of combined offices in the Sind and Baluchistan and Rajputana circles has more than doubled, and in Burma has nearly doubled during the ten years. The increase in the Assam and Eastern Bengal circles is to some degree only apparent, and is largely due to the transfer to these circles of districts from Bengal on the partition of that province. Since 1883, when offices of this class were first opened, the Post Office has always been most willing to assist the Telegraph Department by undertaking to work combined offices at a cost very far below what would otherwise be possible, and the very large traffic created by these offices shows how greatly they are appreciated by the public.

Carrying Agency on the Kalka-Simla line.

61. The gross expenditure on the tonga service on the road between Kalka and Simla, was R1,43,054 as compared with R2,89,285 on account of the combined tonga and bullock train services in the previous year, showing a decrease of R1,46,231. The receipts amounted to R33,008 as compared with R94,485 in 1904-05. The charges, therefore, exceeded the receipts by R1,10,045 as compared with R1,94,800 in the previous year. The decrease in expenditure was chiefly due to the abolition of the bullock train service which was altogether dispensed with in October 1904 and to the reduction made in the tonga establishment which is now maintained at sufficient strength to carry only the mails and a few passengers in each direction daily. The difference between the receipts and expenditure on the line, amounting to R1,10,045, is by no means excessive considering that during the year under review 4,361 tonga loads of mails were carried over the line in both directions, and that the tonga line ensures that mail and passenger communication with Simla is maintained even if the railway line is blocked.

It may not be out of place to mention here that this contingency occurred after the close of the year and that the railway was unable to carry any of the passenger traffic between Simla and Kalka in either direction for over five weeks.

Receipt of salt revenue during 1905-06.

62. The Post Office continued during the year to be used as an agency for the receipt of salt revenue at certain selected offices in the Punjab, the United Provinces, the Central Provinces, and Rajputana; and, as will be seen from the following comparative figures, the results of the year's working again show a largely increased business done through the Post Office, as compared with the

previous year, though the number of post offices authorised in this respect remained practically the same:—

		1905-06.	1904-05.
Number of post offices authorised to receive salt revenue	No.	262	257
Number of indents received . .	No.	1,331	748
Quantity of salt indented for . .	Mds.	328,390	161,071½
Value " " " " . .	Rs.	5,13,724	3,43,582
Postal commission realised . . .	Rs.	880	491

Sale of quinine at post offices during 1905-06.

63. The Post Office continued also to act as an agency for the sale of Government-manufactured quinine to the public. During the year under report, the supplies obtained for sale by post offices in the several postal circles amounted to 5,935 lbs. 9 oz. 159½ grs as compared with 7,027 lbs. 0 oz. 315⅝ grs. the revised figures of the previous year. The apparent decrease of 1,091 lbs. 7 oz. 156⅛ grs. is mainly due to the introduction of a change of procedure in connection with the revised arrangements for the sale of quinine in 7-grain powders and two-anna parcels, and is not necessarily an indication that the actual sales have fallen off to this or to any extent.

Growth of the sale of quinine since 1895-96.

64. The system was first introduced as a tentative measure in the Lower Provinces in 1892, and, on the experiment proving successful, was gradually extended to the whole of India. The supplies of the drug to post offices amounted to 2,485 lbs. in 1895-96, rose to 4,004 lbs. in 1900-01, and were 5,935 lbs. in the year ending with the 31st March 1906. There has thus been a growth in the work done by the Post Office in this respect during the past decade, though the rate of increase has varied from year to year. The highest figure so far reached has been 7,027 lbs in 1904-05.

Postal Insurance Fund.

65. Appendix XI shows the operations of the scheme of Life Insurance, Endowment Assurance, and Monthly Allowances, during the year, as compared with those of the previous year, and Appendix XII shows the financial results of the administration of the Postal Insurance Fund up to the end of the year under report. During the year, 1,679 new policies were issued of the aggregate value of R22,66,522. Of these policies, 249 of the aggregate value of R3,42,750 were Life Insurance policies, while 1,430 of the aggregate value of R19,23,772 were policies of Endowment Assurance. The total sum realised during the year on account of premia on both old and new policies amounted to R7,03,588, as compared with R6,17,508 in the previous year. Claims to the extent of R2,12,108 were discharged as compared with payments amounting to R2,01,846 during the preceding year; and eighty Life Insurance policies representing a gross assurance of R83,150, sixty-three Endowment Assurance policies representing R65,300 and one Monthly Allowance contract for R15—either lapsed or were surrendered or cancelled during the year. The lapses and surrenders during 1904-05 were seventy-nine Life Insurance policies representing R93,650, thirty-nine Endowment Assurance policies representing R51,418, and one Monthly Allowance contract for R4.

Of the 1,679 persons holding policies issued during the year, 1,595 were pure Asiatics by race One of these persons was a woman employed under Government, so that there are now eight female policy-holders in all.

The general results of the past two years are summarised below.—

Life Insurance and Endowment Assurance.	Up to 31st March 1905.	Up to 31st March 1906.
Number of lives insured	11,730	13,409
	R	R
Amount received in premia	37,67,287	44,70,875
Amount of Insurance	1,72,70,319	1,95,36,841
Amount of claims met	11,91,873	14,03,981

At the close of the year there were 11,483 active policies in existence representing an aggregate insurance of R1,69,20,817, of which 4,506 policies were held by Post Office servants and 6,977 by servants of other Departments. Eleven new contracts for Monthly Allowances were entered into during the year and there were 107 such contracts in existence at the end of the year, the total of the Monthly Allowances contracted for being R1,060-3-3.

Eleven life annuities were purchased from the Post Office under Article 807 of the *Civil Service Regulations*.

Payment of military pensioners during 1905-06

66. Thirty thousand seven hundred and seventy-four pensioners of the Native Army had their pensions paid through the agency of the Post Office in the Punjab and North-West Frontier Province during 1905-06 as compared with 30,454 in 1904-05, and the amount paid on this account was R22,02,910 as compared with R21,57,732-9-2 in the previous year. The commission credited to the Post Office as remuneration for this special service was R16,521-13-0.

Section IX.—Financial Results.

Receipts and Expenditure for 1905-06.

67. The following table is a summary of the receipts and charges of the year as shown in the Post Office Accounts and given in Appendix XIII.—

	Receipts.		Charges.	
	1904-05.	1905-06.	1904-05.	1905-06.
	R	R	R	R
1. Postal Service proper .	2,35,00,553	2,47,00,726	1,79,93,354	1,95,69,737
2. Non-postal branches—				
(a) Mail cart, parcel van, passenger and goods service . . .	75,422	33,514	75,422	33,514
(b) Mail steamer subsidies .	...	...	10,55,216	11,25,024
(c) Contributions from Native States . .	6,000	6,000	...	...
Total .	2,35,81,975	2,47,40,240	1,91,23,992	2,07,28,275

Financial position of the Post Office at the close of 1905-06.

68. Appendix XIII shows also, under a distinct head (III), certain receipts and charges which appear in the Finance and Revenue Accounts but not in the Post Office Accounts. These are reproduced on the margin; and, if their totals be added to those given in the table in the preceding paragraph, the total receipts of the year amount to R2,47,72,783 and the total charges to R2,36,39,048 as shown in the Finance and Revenue Accounts. In order, however, to arrive at the true financial result of the year's administration, it is necessary, in the first instance, to exclude the charges on account of District Post establishment (R10,90,763) which were entirely met by grants from Provincial revenues and District Post funds, and also the receipts from the same establishments (R32,543). When

Receipts, 1905-06.	R	Charges, 1905-06.	R
District Post collections, including Zamindary dâk receipts in Bengal.	32,543	District Post establishments, including Zamindary dâk in Bengal.	10,90,763
		Stores from England	8,95,755
		Payments under postal arrangements with Lords of the Treasury.	9,18,390
		Other payments	5,865
Total .	32,543	Total .	29,10,773

this is done, the actual receipts amount to R2,47,40,240 and the actual charges to R2,25,48,285. To the latter figure must then be added the net balance (R9,01,434) of the items shown in the margin. The difference between receipts and charges thus stands at R12,90,521, but this requires further adjustment by the addition of a sum of R3,20,896 representing the charges on account of unremunerative establishments in the Bengal, Eastern Bengal, Assam, Madras, Bombay, Sind and Baluchistan, and Punjab circles, which were formerly paid from Provincial revenues and were, in accordance with the terms of the Resolution of the Government of India in the Finance and Commerce Department, No. 6802-A., dated the 9th November 1903, transferred to Imperial from the beginning of the years 1904-05 and 1905-06 on the understanding that credit should be taken for them in the Administrative Accounts of the Post Office. The final result is a surplus for the year of R16,11,417 as compared with R14,18,224 in 1904-05 and R21,02,601 in 1903-04. It was explained in the report for 1904-05 that the decrease in the net surplus for that year was mainly due to the fact that a supplemental payment of nearly 7 lakhs of rupees had to be made on account of India's contribution to the cost of the Eastern Mail Service. The decrease of 5 lakhs in the year under report as compared with the year 1903-04 is due partly to the normal rate of increase in the revenue from the sale of ordinary postage stamps having been somewhat diminished as the result of the change in the letter postage scale introduced from the 1st April, partly to the payment of a larger sum on account of the contribution to the cost of the Eastern Mail Service, and partly to an increase in the ordinary expenditure. This estimate of the financial position of the Post Office does not take into account the services rendered by the Department to Government in the management of the Post Office Savings Bank, in carrying official correspondence at exceptionally low postage rates, and in the maintenance of many unremunerative mail lines which are required for military or administrative purposes.

	Details	Total
	R	R
Add to charges—Railway free service estimated	34,659	
Rent of Government buildings	5,17,209	
Gratuities	6,477	
Leave allowances paid out of India	19,788	
Pensions (being the average of five years capitalized at 10 165 years' purchase)	8,67,746	
		14 45 879
Deduct—Share of Marine subsidies which should strictly have been borne by the Military, Political, and other departments	5,28,124	
Postage on unpaid official correspondence sent from India to the United Kingdom (formerly collected and brought into account)	16,321	
		5,44,445
Net amount to be added		9,01,434

Review of the financial position for the last ten years.

69. In 1895-96 the receipts, as shown in the Post Office Accounts, were 1 crore and 70 lakhs of rupees. In 1900-01 they had risen to 2 crores and 2 lakhs of rupees, and for the year that ended with the 31st March 1906 they amounted to 2 crores and 47 lakhs of rupees. There was thus a total increase in revenue of 32 lakhs during the period ending with 1900-01 and of 45 lakhs during the last five years. This growth of revenue has been steady and consistent throughout the whole period, though the actual increase has necessarily varied from year to year. The highest annual increase was nearly 12 lakhs in 1903-04, and for 1905-06 the increase amounted to rather more than 11½ lakhs.

The revenue of the Department is derived almost entirely from the sale-proceeds of postage stamps and from postage and money order commission realized in cash. The revenue derived from the first source has shown continuous growth throughout India, though, owing to the substantial concessions that have been made from time to time to the public in the matter of postage rates, the rate of growth from year to year has not been constant. It has been

most marked in the Bengal and Punjab circles, where the revenue from postage stamps for 1905-06 exceeded that for 1895-96 by nearly 15 lakhs and 11 lakhs, respectively, representing increases of 67·36 and 65·19 per cent. In the case of the Madras and Bombay circles, there were increases of 12 lakhs and nearly 11½ lakhs, respectively, but the percentages were only 53·08 and 47·27. It may also be mentioned that in the case of the Sind and Baluchistan circle, which deals with small figures, the percentage of increase was no less than 71·41. There has also been a steady increase in the revenue from money order commission, the total amount realized from this source having been 26½ lakhs in 1895-96, 34 lakhs in 1900-01, and 39½ lakhs in 1905-06.

The expenditure of the Department, which necessarily increases from year to year, was 1 crore and 33 lakhs in 1895-96, 1 crore and 55 lakhs in 1900-01, and 2 crores and 7 lakhs in 1905-06. The ratio of increase during the ten years has been, on the whole, rather higher than in the case of receipts, but this was only to be expected in view of the sacrifices of revenue made during the period.

The net profit earned by the department after making the adjustments shown in paragraph 68, was 10½ lakhs in 1895-96 and had risen to nearly 22½ lakhs in 1900-01. Since that date there has been a fall in the surplus which has varied from year to year as the figures on the margin will show. For the year 1905-06 it was a little over 16 lakhs of rupees. The decreases in the years 1901-02 and 1902-03 are due to the reduction in parcel postage rates from the 1st July 1901, which was followed by the reduction in money order fees from the 1st April 1902, while the further decreases in the last two years are explained above.

	R
1901-02	17,95,978
1902-03	15,36,007
1903-04	21,02,601
1904-05	14,18,224
1905-06	16,11,417

70. The following figures show the financial result during the year under report of the amalgamation of the posts in Kashmir with this Department. *Financial result of working the posts in Kashmir*

The total revenue was R1,78,785 in 1905-06 as compared with R1,41,150 in 1904-05, and the expenditure was R1,77,840 as compared with R1,82,999. There was thus a net balance during the year under report of R945 over actual out-of-pocket expenses, and this is the first year since the amalgamation in November 1894 for which the working of these posts has not resulted in a loss. This satisfactory result is due mainly to an increase in the sales of postage stamps, which in turn is no doubt largely due to the increased popularity of Kashmir as a summer resort of Europeans and to the consequent growth of postal business with India and foreign countries.

Section X.—Notice of Officers.

71. I have much pleasure in bringing to the special notice of Government the excellent work done in Bengal and Madras by Messrs. E. A. Doran and G. R. Clarke, Postmasters-General of those circles. I would also bring to the notice of Government the names of Messrs. C. C. Sheridan, then Superintendent of post offices, and H. S. H. Pilkington, my Personal Assistant, who carried out the difficult postal arrangements connected with the Rawalpindi manœuvres and T. R. H. the Prince and Princess of Wales' tour with the greatest credit to the Department. *Mention of officers of the Department.*

The names of the following officers have been brought to notice by the heads of postal circles and should also be mentioned: Mr. C. H. Stuart, Postmaster, Rangoon, for his able management of the Rangoon post office throughout the year; Messrs. D. M. Kalapesi, 3rd Personal Assistant to the Postmaster-General Bombay, Moorhouse, then Deputy Postmaster, Bangalore, Sultan Ali and Heysham, Assistant Superintendents, Railway Mail Service, and

Lala Shib Sahai, Head Clerk, Sorting Branch, Punjab Circle, for good work done in connection with T. R. H. the Prince and Princess of Wales' tour; and Mr. R. D Romer, Superintendent of post offices, Ahmedabad Division, for successfully carrying on the postal work of his Division when the railway service was disorganised by floods.

Much of the strain of the sorting arrangements in connection with T. R. H. the Prince and Princess of Wales' tour fell on Pundit Chandika Pershad, Personal Assistant to the Inspector-General, Railway Mail Service, who was in bad health at the time. I regret to say that this officer died on 19th April 1906. With him the Department lost a zealous servant who had done much good work for it during his long service.

Another serious loss to the Department was the death on the 21st February 1906 of Mr. V. Kanakasabhai Pillai, B.A., B.L., Superintendent of post offices, an officer of high attainments and long service, whose great personal influence in the Madras Presidency was always used by him for the advantage of the Post Office.

Mr. C. Wynch, who had served the Department, both loyally and efficiently in India, China, and Somaliland during his short service, died on 3rd February, 1906. He was a singularly promising young officer and his death has been a grea loss to the Post Office.

Soon after the close of the year the Department lost, by retirement, Mr. J. Cornwall, Postmaster-General of the United Provinces, an officer much respected both by his colleagues and by the general public wherever he had worked during his long period of service in the Post Office.

I have the honour to be,

SIR,

Your most obedient servant,

C. STEWART-WILSON,

Director-General of the Post Office of India.

SCHEDULE OF PRINCIPAL STEAM SERVICES, 1905-06.

By the British India Steam Navigation Company.

(1) Direct communication three times a week between Calcutta and Rangoon. (2) Weekly communication between Chittagong, Akyab, Kyauk Phyu, Sandoway and Rangoon. (3) Weekly direct communication between Madras and Rangoon. (4) Communication three times a week between Rangoon and Moulmein. (5) Weekly communication between Rangoon, Tavoy and Mergui. (6) Fortnightly communication between Moulmein, Yeh, Palaw, Tavoy, Mergui and Bokpyin. (7) Weekly direct communication between Bombay and Karáchi. (8) Weekly communication between Bombay and Karáchi *viâ* the Coast ports. (9) Weekly communication between Karáchi and Busrah *viâ* the Persian Gulf ports. (10) Weekly communication between Karachi and Busrah *viâ* the *principal* Persian Gulf ports. (11) Daily communication between Tuticorin and Colombo. (12) Fortnightly service from Negapatam to the Straits. (13) Additional services between any of the ports served by the above-mentioned lines, between any of the ports on the Coromandel Coast and Rangoon, and between Burma and the Straits.	Under contract with the Post Office from 1st May 1904 on an annual subsidy of R10,00,000.

By the Asiatic Steam Navigation Company.

(14) Six-weekly communication between Calcutta and Port Blair, with extensions to Madras and Rangoon.	The consideration is not in the form of subsidy, but of guaranteed rates for the transport of Government stores; the contract is for five years, from 1st July 1901, and is terminable after the five years by a notice of six months.

By the Irrawaddy Flotilla Company, Limited.

(15) Daily communication (Fridays excepted) between Myingyan and Pokôkku. (16) Daily communication (Mondays excepted) between Prome and Thayetmyo. (17) Communication twice a week between Thayetmyo and Pokôkku. (18) Communication three times a week between Minbu and Thayetmyo. (19) Weekly communication between Kindat and Pokôkku. (20) Weekly communication (provided the depth of the water permits) between Kindat and Homalin.	Under contract with the Burma Government for a period of five years from 1st July 1902. The subsidy is R7,000 per mensem towards which the Post Office contributes R2,723.
(21) Daily communication between Katha and Bhamô.	Under contract with the Burma Government up to 31st March 1907. The subsidy is R1,500 a month towards which the Post Office contributes R388.
(22) Communication three times a week between Rangoon and Bassein. (23) Daily communication (Sundays excepted) between Bassein and Myaungmya.	Under contract with the Burma Government from 1st January 1896, and to continue in force until six months' notice is given by either party, the subsidy being R1,250 per mensem, towards which the Post Office contributes R250.

By the Irrawaddy Flotilla Company, Limited—continued.

(24) Weekly communication between Moulmein and Kya-in.	Under contract with the Burma Government to continue in force until six months' notice is given by either party, the subsidy being R100 per mensem.
(25) Daily communication between Moulmein and Duyinziek.	Under contract with the Burma Government to continue in force until six months' notice is given by either party, the subsidy being R350 per mensem.
(26) Communication three times a week between Moulmein and Kyondo. (27) Daily communication between Moulmein and Natmaw (28) Daily communication between Moulmein and Kado.	Under contract with the Burma Government to continue in force until six months' notice is given by either party, the subsidy being R260 per mensem.
(29) Communication three times a week between Moulmein and Shewgun.	Under contract with the Burma Government to continue in force until six months' notice is given by either party, the subsidy being R250 per mensem

By the Arracan Company, Limited.

(30) Communication three times a week between Akyab and Buthidaung (31) Communication twice a week between Akyab and Paletwa. (32) Communication once a week between Akyab and Kyauktaw (33) Communication once a week between Akyab and Myaungbue.	Under contract with the Burma Government for five years from 1st April 1905 Subsidy R35,000 a year.
(34) Weekly communication between Akyab and Sakanmaw, *via* Myebon and Kyauk-Phyu.	Under contract with the Burma Government for one year from 1st April 1905. Subsidy R20,000 a year.

By the Euphrates and Tigris Steam Navigation Company

(35) Weekly communication on the river Tigris between Busrah and Bagdad	Under contract for ten years, from the 1st May 1904, with His Majesty's Secretary of State for India. Subsidy R24,000 per annum: steamers to run in connection with line No 10

By Messrs Apcar & Co., Calcutta, and Jardine, Matheson & Co., Hong-Kong.

(36) Communication at irregular intervals between Calcutta and the Straits and Hong-Kong, the dates of departure being regulated mainly with reference to the Calcutta opium sales.	No subsidy

By the Peninsular and Oriental Steam Navigation Company.

(37) Fortnightly communication between Calcutta and Colombo, touching occasionally at Madras (38) Fortnightly communication between Bombay and Colombo	Non-contract lines maintained by the Company in connection with the China and Australian mail services. Under Article 21 of the contract between the Peninsular and Oriental Steam Navigation Company and His Majesty's Postmaster-General relating to the conveyance of the East India, China, and Australia mails, mails sent by these non-contract steamers are conveyed without any payment other than the subsidy specified in that contract

By other Agencies.

(39) By Rivers Steam Navigation Company—Daily communications between Rowmari and Dhubrighat, between Dhubrighat and Gauhati, and between Dhubrighat and Tezpur on the Brahmaputra River	Under contract with the Post Office from the 1st May 1903 to the 30th April 1906. Annual subsidy R75,000 towards which the Bengal Government and the Eastern Bengal and Assam Governments contribute R50,000
(40) By Messrs Shepherd & Co.'s Steamers—Daily communication between Bombay and Goa.	Under contract with the Post Office from 1st October 1905 to 31st May 1906 The monthly subsidy is R3,000, towards which the Post Office contributes R2,800, and the Goa Government R200.
(41) By M. G. Bwin and Brothers.—Weekly communication between Kyauk-Phyu and Cheduba, and Kyauk-Pyu and Ramree	Under contract with the Burma Government for five years from 1st April 1905 Subsidy R16,000 a year.
(42) By Messrs. Cowasjee Dinshaw and Brothers.—Weekly communication between Aden, Berbera, and Zeyla	Under contract with the Government of the Somaliland Protectorate for a period of 12 months from the 1st April 1905 The monthly subsidy is R1,050, of which sum R300 is at the sole charge of the Protectorate Government, and the balance, *viz.*, R750, is paid in equal shares by the Protectorate Government and the Indian Post Office.

APPENDICES.

Statement showing, according to postal circles, (1) the number of post offices, letter-boxes and village postmen, and (2) the distances over which mails were conveyed by Railway, mail carts, runners and steamers at the close of the year 1905-06 and of the preceding year.

[These figures relate to both the Imperial and the District Post.]

Names of Postal Circles. (7) Total deposited as dead	1,870,330	11,262	15,770	12,951	4,087	1,914,400	1,507,450
Percentage of (7) on (a)	32·46	7·26	5·08	13·24	6·76	29·98	28·64

* The figures represent the total number of articles of each kind received in each Dead Letter Office from post offices and other Dead Letter Offices after deducting articles transferred to other Dead Letter Offices.

† The Dacca Dead Letter Office was opened on the 6th November 1905.

‡ The Dinapore Dead Letter Office was abolished on the 16th October 1905.

(a) Includes contributions from Tributary States. (b) Includes lines paid from the revenues of Feudatory States. (c) Includes contributions from Feudatory States, R11,991.

*From the 1st March 1905 all the D. P. Establishments in the Bombay and Sind and Baluchistan Circles and those in the Punjab and North-West Frontier Province which were formerly paid from Provincial revenues were transferred to the Imperial Establishments in accordance with the terms of the Resolution of the Government of the India in the F. and C. Department, No. 6802-A., dated 9th November 1903, and particulars relating to these establishments have been excluded from this statement.

†The entries against Madras relate to the D. P. Establishments in Coorg only.

G

Appendix VIII.

Statement showing, according to postal circles, the number of offences punishable by law committed by Post Office servants during the year 1905-06.

[The figures relate to both the Imperial and the District Post.]

Names of Postal Circles	Number of ascertained cases against Post Office servants: Number of convictions in courts of law	Number of cases punished departmentally.	Total.
Bengal	12	39	51
Bombay	28	20	48
Madras	52	42	94
United Provinces	25	32	57
Punjab and N.-W. F. Province	25	39	64
Assam	11	4	15
Burma	22	6	28
Central Provinces	7	8	15
Eastern Bengal	9	1	10
Rajputana	14	2	16
Sind and Baluchistan	3	8	11
Railway Mail Service	1	2	3
Total for 1905-06	209	203	412
Total for 1904-05	210	235	445

Note.—The figures in this Appendix shew the cases in which punishment was awarded during the year, as it is only when a case is closed that it can be entered with certainty as having been committed by a Post Office servant. Besides the 412 cases shewn above there were 59 cases in which postal servants were charged with offences but no punishment was imposed owing to the cases not being concluded or the death or escape of the offenders.

Appendix IX.

Statement showing the Post Office staff for the year 1905-06 and the preceding year.

[The figures relate to both the Imperial and the District Post.]

No. 158.—Brevet-Colonel E A. Waller, R.E, Examiner of Accounts, has been granted by His Majesty's Secretary of State for India furlough for a further period of five months and twenty-four days in extension of that notified in Public Works Department Notification No. 67, dated 4th May 1906.

L. M. JACOB,

Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Simla, the 1st November, 1906.

No. 2586-*G.*—Major J. Fisher, Indian Medical Service, an Agency Surgeon of the 2nd class and Residency Surgeon, Mewar, held charge of the current duties of the office of the Resident, Mewar, in addition to his own duties, from the 29th August to the 15th September, 1906, inclusive.

No 4500-*I.A.*—The services of Mr. C. J. Smith, Assistant Engineer, 3rd grade, Madras, are replaced at the disposal of the Public Works Department, with effect from the 16th December, 1906.

The 2nd November, 1906.

No. 4541-*I.A* —In exercise of the powers conferred by the Indian (Foreign Jurisdiction) Order in Council, 1902, the Governor General in Council is pleased to make the following Law for the purpose of regulating the residence of foreigners within the limits of the Civil and Military Station of Bangalore.

Preamble

Short title and extent.

1. (*1*) This Law may be called the "Bangalore Foreigners Law, 1906."

(*2*) It extends to the Civil and Military Station of Bangalore as defined for the time being by notification under the Bangalore Municipal Law, 1897.

Definition.

2 The word "foreigner" means any person, not being a European British subject within the meaning of the Code of Criminal Procedure, 1898, as applied to the Civil and Military Station of Bangalore, or a subject of any Native Prince or State in India, or a Native of British India

Proof of being foreigner

3. If a question arises whether any person alleged to be a foreigner and to be subject to the provisions of this Law is a foreigner or not, or is or is not subject to the provisions of this Law, the onus of proving that such person is not a foreigner or is not subject to the provisions of this Law, shall lie upon such person.

Resident may order foreigner to remove himself.

4. The Resident in Mysore may, by writing, order any foreigner to remove himself from the Civil and Military Station of Bangalore, or to remove himself therefrom by a particular route to be specified in the Order.

Foreigners refusing to remove or returning without authority after removal may be apprehended and detained.

5. If any foreigner ordered to remove himself from the Civil and Military Station of Bangalore or ordered to remove himself therefrom by a particular route, neglects or refuses so to do ; or

if any foreigner, having removed himself from the said Civil and Military Station in consequence of an order issued under section 4 of this Law, or having been removed from the

said station under such an order, wilfully returns thereto without an authority in writing granted by the Resident in Mysore,

such foreigner may be apprehended and detained in safe custody until he is discharged therefrom by order of the Resident in Mysore upon such terms and conditions as the said Resident deems sufficient for the peace and security of the said Civil and Military Station, and of British India and of the territories of Princes and States in India.

No. 2604-*G.*—Mr. A. R. Jelf, a Political Assistant of the 2nd class, is appointed to officiate as a Political Agent of the 4th class and is posted temporarily as Assistant Secretary to the Chief Commissioner, North-West Frontier Province, with effect from the 11th October, 1906.

No. 2605-*G.*—Captain R. A. Lyall, a Political Assistant of the 3rd class, is posted as Assistant Commissioner of the Thal Sub-Division of the Kohat District.

L. W. DANE,

Secretary to the Government of India.

No 246—With reference to Railway Board Notification No. 245, dated 2nd November 1906, Mr. R. C. F. Volkers, Railway Accounts Officer, is appointed Secretary, sub. *pro tem.*, to the Railway Board.

No. 247.—Mr. H. P. Burt, Manager, Eastern Bengal State Railway, in Special Class, 1st grade, of the Superior Revenue Establishment of State Railways, is granted privilege leave for one month and four days combined with furlough for nine months and twenty-six days, under Articles 233 (*i*) and 308 (*b*) of the Civil Service Regulations, with effect from the 20th November 1906, or subsequent date.

No. 248.—With reference to Railway Board Notification No. 247, dated the 2nd November 1906, Brevet-Lieutenant-Colonel C. H. Cowie, R.E., Deputy Manager, North Western Railway, in class I, grade 1, of the Superior Revenue Establishment of State Railways, is appointed to officiate as Manager, Eastern Bengal State Railway, until further orders.

No. 249—With reference to Railway Board Notification No. 248, dated the 2nd November 1906, Mr J. C Mills, Deputy Manager, Eastern Bengal State Railway, in class I, grade 2, of the Superior Revenue Establishment of State Railways, on return from leave, is transferred to the North Western Railway as Deputy Manager.

No. 250—Lieutenant C. St. J. Lynch, R.E., whose services have been placed at the disposal of the Railway Board, is appointed an Assistant Engineer, 2nd grade, with effect from the 12th March 1906 and posted to the Eastern Bengal State Railway.

No. 251.—Lieutenant J. A. B. P. Bowen, R.E., whose services have been placed at the disposal of the Railway Board, is appointed an Assistant Engineer, 3rd grade, with effect from the 27th February 1906, and posted to the North Western Railway.

No. 252.—Mr L. H. Whelan, Assistant Examiner of Accounts, attached to the Office of the Government Examiner of Railway Accounts, Bombay, is granted, under Article 339 of the Civil Service Regulations, extraordinary leave without allowances for three months, with effect from the 5th November 1906.

No. 253.—Lieutenant A. H L. Mount, R.E., whose services have been placed at the disposal of the Railway Board, is appointed an Assistant Engineer, 3rd grade, with effect from the 1st October 1906, and posted to the North Western Railway.

C. A. R. BROWNE, *Lieut.-Col., R.E.*,

Secretary, Railway Board.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

SANITARY.

PLAGUE.

Simla, the 1st November, 1906.

H. H. RISLEY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs., on Thursday, the 1st November 1906, based on the Indian Daily Weather Reports of the period.

The depression which formed over the Andamans last week advanced towards the south Circars coast, and was in the neighbourhood of Cocanada on the morning of the 28th It then curved and moved very slowly along the coast, being in the vicinity of Waltair on the following morning: thereupon the depression diminished rapidly and had disappeared by the end of the week. This disturbance carried abundant rainfall over the Circars, Orissa and the greater part of northeast India, while light rain occurred locally in Burma.

Burma.—The depression in the south of the Bay prevented moist winds from penetrating into Burma, and for the first four days of the week there was only light rain at the Andamans and at Diamond Island; but as the depression advanced northwestward rainfall increased slightly and on the 30th and 31st over a third of the stations in Burma reported light rain. On the following day precipitation again diminished and was confined to a few of the coast districts. Skies were generally lightly to moderately clouded and temperature was approximately normal.

Northeast India and Orissa.—The depression did not affect the weather in this division until it was nearing the south Circars coast on the 28th when good rain fell on the Orissa coast. Precipitation spread northwards and eastwards, and by the 31st had extended over nearly the whole division: it was locally heavy in Orissa and light to moderate in amount elsewhere. On the 1st rainfall had diminished considerably owing to the disappearance of the depression, but it was still widespread in deltaic Bengal and Chota Nagpur. Skies were clear or lightly clouded up to the 27th, but during the remainder of the week they were heavily overcast except in parts of Bihar. Owing to the rain and heavy cloud maximum temperature was in defect on the 30th and 31st, the deficiency averaging 11° in Chota Nagpur on these two days, during the rest of the week it was approximately normal. Night temperature was generally normal or in slight excess.

The United Provinces, Central India and the Central Provinces.—Muktesar reported a light fall of rain on the 28th, and in the southeast of the Central Provinces light rain fell on the 31st and 1st Skies were clear throughout the week in the United Provinces except in the eastern districts, but in Central India and the Central Provinces they were lightly to moderately clouded.

Northwest India.—No rain fell throughout the week, and skies were clear except in Gujarat and Rajputana where light cloud appeared for two days. Both maximum and minimum temperatures were normal or in excess, the greatest average departure being 8° in the minimum in Rajputana on the 28th.

The Peninsula.—On the 26th there was widespread rain in the extreme south, but as the depression in the Bay moved northwestward the rainfall diminished and by the 30th it had ceased in this part. The disturbance however gave rain in the Circars from the 28th to the 30th, and in places it was heavy Skies were moderately to heavily overcast except in the Konkan and the Bombay Deccan on several days of the week, but on the other days they were clear or lightly clouded. Temperature was normal or in defect except on the last two days of the week, the greatest deficiency being 8° at Nellore on the 29th.

The total rainfall of the period from the 4th May to the 1st November is now 20 per cent. or more in defect only in Orissa, parts of Rajputana, Sind and Baluchistan. It is 20 per cent. or more in excess in the west Satpuras and the rainfall subdivisions of Burdwan, Simla and Indore, and is practically normal elsewhere.

The following list summarises the chief rainfall amounts of the week, as reported at 8 hrs each day:—

October	26th.	Calicut 5·37", Cochin 5·18" and Trivandrum 2·36".
"	27th.	Cochin 1·02".
"	28th.	False Point 2·05".
"	29th.	Balasore 1·04" and False Point 3·58".
"	30th.	False Point 1·75" and Gopalpur 4·24".
"	31st.	Calcutta 1·93", Hazaribagh 1·25", Ranchi 1·69", Chaibassa 1·20", Balasore 1·28" and Cuttack 4·07".
November	1st.	Cherra Poonjee 2·92", Shillong 2·67" and Jessore 2·77".

J. PATTERSON,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

SIMLA;
The 1st November, 1906.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 27th October 1906.

Burma.—Slight rain has fallen in four districts, moderate rain in the Southern Shan States and one inch in Sandoway. Early wet-weather paddy is being reaped in the Arakan Hill tracts, Kyaukpyu, Sandoway, Mergui, Lower Chindwin, and Northern and Southern Shan States. Hill side paddy is being reaped in Toungoo, Myitkyina, Katha, Ruby Mines and the Southern Shan States. The sowing of wet-weather paddy has been completed in Thayetmyo; and transplanting in the inundated tracts of Sagaing; and reaping has commenced in Shwebo. The reaping of paddy in the uplands in Mandalay has been nearly completed. The ploughing for and transplanting of paddy are in progress in Pakokku. Early sesamum is being reaped in Pakokku and miscellaneous crops in Thayetmyo. Ground-nuts are being gathered in Magwe and cotton is being plucked in Sagaing, Lower Chindwin, Meiktila and Myingyin. Ploughing for and sowing of miscellaneous crops are general in most of the Upper Burma districts. In Prome the crops are suffering in parts for want of rain, and more rain is still required on the high lying lands in Bassein and in parts of Myingyan. The paddy crop in the Yamethin sub-division is estimated at 10 annas The price of paddy has risen slightly in Prome, considerably in Mandalay, largely in Minbu, fallen slightly in Bhamo and is stationary elsewhere.

Eastern-Bengal and Assam.—The weather is seasonable. Light rain has fallen in Rajshahi, Bogra, and Sibsagar and in the Dacca, Chittagong and Surma Valley and the hill districts-Divisions; elsewhere there was no rain. The rain has benefited tea in Cachar and improved the prospects of pulses in places. Rain is needed for late rice in Lakhimpur. Plucking and manufacture of tea continue; prospects are good in Sylhet, Darrang, Nowgong and Lakhimpur; moderate in Cachar and fair elsewhere. Ploughing of land for mustard and sowing of pulses are in progress. The sowing of mustard has commenced. The prospects of winter rice and other standing crops are moderate. Steeping and washing of jute are still in progress; the outturn is good. Prices of common rice:—Manipur 16; Kohima 11, Rangamati 7 to 10; Nowgong and Sibsagar 9; Tezpur 8; Dacca and Chittagong 7½; Dinajpur 7 3/16, Bogra 7½; Silchar, Dibrugarh and Comilla 7; Noakhali 6½ to 7, Mymensingh 6 11/16; Barisal 6¾; Faridpur 6⅓, Malda 6¼; Jalpaiguri, Rangpur, Sylhet, Dhubri and Gauhati 6; Rampur Boalia, Aijal and Tura 5; and Shillong 4½ seers per rupee. Prices have risen in three; fallen in nine; and been stationary in the remaining districts.

There were 266 persons on test works in Dacca. The number of persons receiving gratuitous relief are:—Mymensingh 201; Noakhali 203 and Sylhet 12,319. The high prices are felt by the non-agricultural more than by the agricultural population. Prices are gradually falling in many districts and the condition of people is improving. Report from Pabna not received.

Bengal.—There was no rain during the week in the two Bihar Divisions except in the Sonthal Parganas where the rainfall recorded for the week amounted only to 0·21 inches. In Puri and Sambalpur the rainfall was somewhat heavy and in the rest of the province it was generally light. Rain is still needed in parts of Burdwan, Midnapur, Hooghly, the 24-Parganas, and in most of the Bihar Districts for the *aman* paddy crop. Lands are being prepared for spring crops, the sowings of which have commenced in several districts. Slight damage by locusts is reported from Champaran. The number of persons receiving gratuitous relief is:—24-Parganas 11,101; Saran 674; Muzaffarpur 5,243; Darbhanga 25,406; total 42,424. The number of persons attending test works is:—Saran 1,211; and Darbhanga 4,218. Fodder and water are sufficient. The price of common rice has risen in eight; and has fallen in ten districts.

United Provinces.—There was no rain during the week. The late rice is suffering in the South-Eastern and Eastern Submontane Districts. The condition of other crops is good. Autumn harvesting and sowings for the spring crop continue. Cane is being pressed and cotton is being picked. Cholera and fever are still prevalent in a few districts. Fodder and food supplies are generally sufficient. Prices have risen in eight districts.

The weekly report on the famine is as follows:—Relief operations have been closed except in Gorakhpur. The prospects in that district, except of the rice crop which is suffering from want of rain and where the crops were destroyed by floods, are good. Prices remain high owing to exports. The numbers on relief are:—Gorakhpur—on works 543, on gratuitous relief 670, total 1,213.

Punjab.—Slight rain occurred in parts of Sialkot, Shahpur, and Rawalpindi during the week. Prices of food-grains are generally unchanged; wheat is slightly rising in

Rohtak only. Harvesting of autumn and sowing of spring crops continue. The condition and the prospects of standing crops are good and the outturn of autumn crops is good to average. The condition of cotton is bad in Lyallpur. The outturn is poor in Amritsar and Shahpur. Locusts have appeared in parts of the Province and young locusts are damaging the crops in Amritsar and Shahpur. Measures are being taken for the destruction of locusts. Cattle are generally in good condition. Fodder is sufficient. There are no complaints regarding the water-supply.

North-West Frontier Province.—There was no rain during the week. It is wanted for unirrigated tracts. The condition of the standing crops on irrigated and unirrigated areas is good except in the Swabi tahsil where it is slightly below the average. Locusts have slightly damaged sprouting crops in the Dera and Kulachi tahsils. Harvest prospects and the probable outturn of the autumn crops are good. The outturn of cotton is below the average in Dera Ismail Khan. The spring sowings are in progress. The water-supply is sufficient. There is no irrigation from hill torrents in Dera Ismail Khan. The condition of cattle is good except in the Kulachi tahsil where fodder is somewhat scarce. Prices are falling. Prices :—wheat $14\frac{6}{16}$ to $19\frac{1}{2}$; gram $16\frac{14}{16}$ to 22; maize 15 to $25\frac{1}{2}$ and *bajra* 13 to 21 seers per rupee.

Jammu.—Slight rain fell during the week in tehsil Adhampur. Prices are fluctuating. Prices :— wheat 11 to 23 and maize 12 to 34 seers per rupee. The condition of the standing crops is good. Fodder is sufficient. Land is being prepared for the spring harvest.

Kashmir.—The weather is bright. Prices are almost stationary. The cold is increasing.

Rajputana.—Harvesting operations continue and also sowings for spring crops. Prospects are favourable. Slight damage has been caused by locusts in Marwar, Jaisalmer and Tonk. The condition of cattle is good. Pasturage and fodder are sufficient. Prices are rising in Tonk and Karauli; falling in Kotah and are steady elsewhere. Prices are still high in some places.

Central India.—There was no rain during the week. The autumn harvesting and the sowing of spring crops are in progress. The standing crops and the probable outturn are fair to good. The cotton crop has been slightly damaged in parts of Malwa owing to the heat. Pasturage is good and sufficient. Prices are high in Gwalior and Baghelkhand; have fallen slightly in Bhopawar and are steady elsewhere.

The weekly report on famine and scarcity is as follows :—The numbers on relief in Bundelkhand are :—on works *nil*; on gratuitous relief 9, total 9. Prices—14 seers per rupee. Works and gratuitous relief closed in Orchha.

Central Provinces.—There was a sprinkling of rain in the Chhattisgarh district but elsewhere the weather has been cloudy and cool. The autumn harvest is progressing and threshing has commenced in places. Spring sowings continue and germination is good. Cotton-picking has commenced in parts of Nimar, Chanda, Akola, and Buldana. A shower is required to improve the prospects of the autumn crops in Chhindwara and Chanda. Slight damage is reported to linseed and rice from insects in parts of Chanda and Balaghat. Locusts appeared in the Basim taluq and in Buldana but did little or no damage. The standing crops continue generally to be very promising. Fodder and water are sufficient everywhere. Gram in Hoshangabad and Akola, rice in Saugor and Betul and *juar* in Nimar have become slightly cheaper; gram in Saugor, rice in Mandla and *juar* in Saugor have become a little dearer; elsewhere the prices of food-grains are steady or fluctuate slightly but continue equal to the scarcity level in Nagpur, Chanda, Balaghat, and Bilaspur.

Bombay.—The rain during the week was moderate in Belgaum, and Savantwadi and slight in Ratnagiri, Kanara, Poona, Sholapur, Bijapur, Dharwar, Kolhapur, and Kathiawar. More rain is needed for maturing crops and spring sowings in parts of Broach, the Deccan and the Karnatak. The standing crops have been slightly damaged by locusts in Karachi, Thar and Parkar, Ahmednagar, Poona, Sholapur, and Satara; by grasshoppers in Broach and Sholapur; by insects in the Upper Sind Frontier and Bijapur; and by blight in Hyderabad. Crops are withering in parts of the Deccan and are generally in good condition elsewhere. Harvesting of autumn crops is progressing and a good outturn is expected. Spring sowings continue except in parts of the Deccan where they are retarded for want of sufficient moisture. Cotton-picking is progressing in Sukkur, Hyderabad, Thar and Parkar, Ahmedabad, Khandesh, and Ahmednagar. The supply of water for drinking and irrigation purposes is adequate. Agricultural stock is insufficient in parts of Ahmednagar, Poona, Sholapur, Bijapur, and Cutch. Cattle are generally in good condition. The fodder-supply is sufficient. Stocks of grain in markets are adequate. Prices are falling. The quantity of grain purchaseable per rupee is in the Deccan 18 to 45 per cent, in the Karnatak 11 to 30 per cent, and elsewhere 3 to 30 per cent less than normal. The demand for labour in the fields is increasing and labourers get sufficient employment. The public health is generally good. The numbers on relief are :—British districts :—Deccan—on gratuitous relief 911; Karnatak—on works 256, on gratuitous relief 23, total 279; Native States :—on gratuitous relief 53.

Hyderabad.—Rainfall—39 cents. Prospects are favourable. The autumn harvest is in progress. Early rice is being harvested in a few talukas. Spring sowings continue. The standing crop is fair to good. Prices :—wheat 8½ ; coarse rice 7½ ; and *juar* 16¾ seers per rupee.

Mysore.—There was slight rain throughout the State. The standing crops are in good condition. The prospects of the season are good Cattle are healthy. Water and fodder are available.

Coorg.—Rainfall —one inch 13 cents. Picking of cardamom continues. Coffee is ripening. Prices of food-grains are stationary. Water and fodder are sufficient.

Madras.—There was no rain during the week in Godavari and Anantapur ; it was heavy in Malabar, Tinnevelly, and Tanjore ; good in the Nilgiris, Madura, South Canara, Trichinopoly, Nellore, South Arcot and North Arcot, and light to fair elsewhere. Irrigation supplies are sufficient except in parts of the Circars, the Deccan, Salem, and Madura. Ploughing, sowing, weeding, and transplanting are in progress in parts. Standing crops are generally fair but require more rain in parts of Godavari and Kistna. Harvests continue with outturn poor to normal and bumper. Pasture is sufficient except in parts of Tinnevelly. Fodder is scanty in parts of Ganjam, Godavari, Kistna, Bellary, Anantapur, Salem, Coimbatore, and Tanjore. The condition of cattle is generally good. The price of rice is stationary in twelve districts ; has fallen in five, and slightly risen in six. The prices of millets have fluctuated as follows —*ragi* is stationary in six districts ; has fallen in ten , and has slightly risen in five. *Cholam* is stationary in three districts ; has fallen in nine ; and has slightly risen in two. *Cumbu* is stationary in two districts ; has fallen in ten , and has slightly risen in three.

The number of persons in receipt of relief during the preceding and present weeks in each Province or State is shown in the following table.

CALCUTTA, SATURDAY, NOVEMBER 3, 1906.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 25th October 1906.

From the 10th November next till further notice, the complete *Gazette of India* will be published at Calcutta. After the 3rd November all notifications and other matter intended for publication in the *Gazette* should be addressed to the Publisher, 8, Hastings Street, Calcutta.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

No. 538 of 1906—Walter Edward Kimber, engineer, of Corner of Marshall and Nugget streets, Johannesburg, Transvaal. *Improvements in apparatus for sharpening drills or drill bits.*

No. 539 of 1906.—Herbert Wilfred Perry, late executive engineer and now District Traffic Superintendent, in the employ of the South Indian Railway Company, and residing at Trichinopoly in the Madras Presidency. *A windproof central draught lamp.*

No. 540 of 1906.—Richard Wingfield Stuart, mining engineer, of "Conrad" Hunter's Hill near Sydney, in the state of New South Wales and commonwealth of Australia. *Improvements in steam cookers.*

No. 541 of 1906.—William Youlten, architect, of 159 Victoria street, Westminster, in the county of London, England. *Improvements in means for separating dirt and the like from the refuse and waste of cotton cleaning machines and from other materials.*

No. 542 of 1906.—George Farquhar and Robert North, food preservers, both of 12a Shenton street, London, England. *Improvements in and relating to devices for hermetically sealing metal receptacles for food and the like.*

No. 543 of 1906.—Gustave Ernest Cammiade, merchant and contractor, residing at Tondiarpet, in Madras. *The manufacture of carbonic acid gas.*

No. 544 of 1906.—Rev. B. H. Skelton, principal, Mount Abu High School, Rajputana. *Sterilising drinking-water to be called "The Home Water Sterilizer."*

No. 545 of 1906.—Ernest William Hart, electrical engineer, of Windmill road, Luton, in the county of Bedford, and William Peter Durtnall, mechanical engineer, of 8 Crofton Park road, Brockley, in the county of Kent. *Improvements in and connected with the propulsion of railway, tramway road or similar vehicles, boats and the like.*

No. 546 of 1906.—Henri Saul Samuel, Major, of the Glen, Paisley, N. B. *Improvements in or relating to wind or weather guards or shields for motor and similar vehicles.*

No. 547 of 1906.—The Magnoid Company, Limited, engineers, of 12 Camomile street, London, E.C., England. *Improvements in and relating to the joining of parts of cast iron to each other.*

No. 548 of 1906.—Thomas Claude Xavier Alphonse Berget, engineer, of 16 rue de Vaugirard, Paris, France. *Improved means for regulating the temperature in vehicles.*

No. 549 of 1906.—Thomas Claude Xavier Alphonse Berget, engineer, of 16 rue de Vaugirard, Paris, France. *Improved means for regulating the temperature in vehicles.*

No. 4277 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection from 11 A.M. to 3 P.M. at the Secretary's office, 2 Bankshall Street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 137 of 1906.—William Cameron, finishing overseer, Howrah Jute Mills, Howrah, Bengal, and Fred Cameron, merchant, 3 Misson row, Calcutta. *An improved shuttle to be used in the weaving of jute fabric.* (Specification filed 19 October 1906.)

No. 149 of 1906.—William Cameron, finishing overseer, Howrah Jute Mills, Howrah, Bengal, and Fred Cameron, merchant, 3 Mission row, Calcutta. *An improved cover for loom shuttles as used in the weaving of jute and other fabrics.* (Specification filed 19 October 1906.)

No. 219 of 1906.—Henry Angus Nicholson, agent, Otautau, of Wallace, in the Colony of New Zealand, and Annie Elizabeth Sophia Wilson, married woman, of Otautau, Wallace, in the Colony of New Zealand aforesaid. *A new composition of matter for use as a food preservative and antiseptic.* (Specification filed 22 October 1906.)

No. 467 of 1906.—Alexander Paterson, engineer, of Great Indian Peninsular Railway, Parel, Bombay, India. *Improvements in and relating to controlling or regulating apparatus for sight feed lubricators and the like.* (Specification filed 20 October 1906.)

No. 4278 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 214 of 1896.—Reuben Thomas Preston and James Holden. *Improved stays for steam and other boilers* (From 22 January 1907 to 22 January 1908.)

No. 168 of 1898.—Karl Ludwig Valentin Zimmer. *Improvements relating to paints suitable for coating iron and other surfaces.* (From 21 December 1906 to 21 December 1907.)

No. 18 of 1899.—Gustav Graf von Geldern-Egmond. *Improvements in the manufacture of explosives.* (From 10 May 1907 to 10 May 1908.)

No. 160 of 1900.—Illius Augustus Timmis. *Improvements in the manufacture of food.* (From 27 November 1906 to 27 November 1907.)

No. 4279 P.—WHEREAS the inventor of the undermentioned invention has failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fee hereinafter mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said invention in British India, and of authorizing others so to do, has ceased:—

No. 481 of 1901.—Gustav Durr. *Improvements in and connected with doors for boiler and other furnaces.* (Specification filed 22 July 1902.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. A consolidated index for the year 1905, entitled "Inventions and Designs in 1905," is also on sale, price one rupee. It contains a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in that year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or 1*s.* 1*d.* Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and Designs Act, V of 1888.

The 26th October 1906.

No. 1268—In exercise of the powers vested in him by section 3, sub-section (1), clause (*j*) of the Excise Act, 1896 (XII of 1896) as amended by the Excise (Amendment) Act (VII of 1906), the Honourable the Chief Commissioner, Ajmer-Merwara, is pleased to declare that cocaine and every preparation and admixture of cocaine are hereby included in the definition of "intoxicating drugs" contained in that section.

No. 1269—In exercise of the powers conferred by section 18, sub-section (2), clause (*a*) of the Excise Act (XII of 1896) as amended by the Excise Amendment Act (VII of 1906), and with reference to Notification No 1268, dated the 26th October 1906, by which cocaine is declared to be an intoxicating drug for the purposes of the said Act, the Honourable the Chief Commissioner is pleased to declare that the provisions of that section prohibiting the possession of cocaine shall not apply

(1) to cocaine possessed in accordance with the conditions of his license by a person who is authorised by a license granted under the provisions of the said Act to sell cocaine ; or

(2) to cocaine which has been purchased from a duly authorised vendor for medicinal purposes on the prescription of a person who practises medicine according to European methods provided that in the latter case the cocaine is in the possession of the person for whom it was prescribed or of a person authorised to purchase or possess it in his behalf ; or

(3) to cocaine up to the limit of one ounce required for the exercise of his profession in the possession of a person who has been registered under a European or American Medical Act or who has received a medical diploma from an Indian University or College and who practises medicine according to European methods ; or

(4) to cocaine possessed until the 1st of January 1907, by persons who were in possession thereof prior to the date of this Notification and who have been in the habit of dealing in cocaine.

Form of License.

Be it known that (name) residing in is hereby authorised by the Collector of Excise Revenue (Ajmer-Merwara), to sell cocaine *bona fide* as medicine at from the date of this license up to the 31st March 190 , subject to the following conditions:—

I. That he do not transfer or purport to transfer this license to any other person.

II. That he do not have in his possession at any one time more than one ounce of cocaine.

III. That he sell cocaine only at the premises for which this license is granted and that he do not sell cocaine in any other place without a separate license.

IV. That he purchase all cocaine to be sold under his license either direct from Europe or from a licensed vendor thereof in India, and that he do not receive or have in possession cocaine obtained elsewhere.

V. That he do not sell cocaine to any person other than

(*a*) A medicinal practitioner, that is to say, a person who has been registered under an European or American Medical Act or who has received a medical diploma from an Indian University or College and who practises medicine according to European methods.

(*b*) A person producing a prescription of a person who practises medicine according to European methods.

(*c*) A Pharmacist holding a license in this form.

VI. That he retain every prescription on the authority of which he has sold cocaine, and that he do not sell cocaine more than once on the authority of any one prescription.

VII. That he do not store any cocaine to be sold under this license in any premises other than those named herein.

VIII. That he keep a correct daily account in the following form to be balanced at the close of each day in a printed account book to be purchased from the Collector's office, a separate set of pages being set aside for cocaine and for each derivative thereof stocked by him.

Register of daily receipts and sales of cocaine and its derivatives in the shop of

Date.	Balance in hand yesterday.	Quantity received this day and whence received	Total quantity to be accounted for	Quantity sold this day	Name of purchaser.	Address	Date of prescription (if any) and name of medical practitioner who granted it	Remaining in store.	REMARKS
1	2	3	4	5	6	7	8	9	10
	Oz Grs	Oz Grs	Oz Grs	Oz Grs	...		..	Oz. Grs.	...

IX. That he produce his license and accounts of sale of cocaine for inspection at once on the demand of any officer specially or generally authorised by the Collector.

This license may be cancelled by the Collector if any breach of the Excise Act, 1896, or of the rules made thereunder or of the above-mentioned conditions is committed by the licensee or his partner or agent or any other person employed in the premises for which this license is granted

Given under my hand and seal this day of in the year at Ajmer.

Collector of Excise Revenue,
Ajmer-Merwara.

By order,

C. C. WATSON,

First Assistant to the Agent to the Governor General, Rajputana, and Chief Commissioner, Ajmer-Merwara.

* There was no transfer of Gold between the Paper Currency Reserve and the Gold Standard Reserve during the week ending 31st October 1906.

† In addition to amounts shown in columns 6 and 10, about 67 lakhs of tolas of Silver have been purchased from treasury funds.

The silver held in the Gold Standard Reserve (which is quite distinct from the Paper Currency Reserve) amounted on the 31st October 1906 to 408 lakhs of tolas.

O. T. BARROW,
Head Commissioner of Paper Currency.

THE HON'BLE THE AGENT TO THE GOVERNOR GENERAL IN BALUCHISTAN.

NOTIFICATION.

Quetta, the 29th October 1906.

No. 5019.—In exercise of the powers conferred by section 4 (2) of the Cantonments Act, 1889 (XIII of 1889), and with the previous sanction of the Governor General in Council the Hon'ble the Agent to the Governor General in Baluchistan is pleased, in supersession of his notification No. 1103, dated the 8th March 1904, and all previous notifications on the subject, to define the limits of the Quetta Cantonment as follows :—

Description of the Boundary of the Quetta Cantonment.

Boundary pillar No. 1 is situated near the West side of the Bridge leading to the Military Works Brickfield on the Right Bank of the Nullah which runs in a westerly direction at the South end of Little Road.

Bearing to Right hand point of Murdar . . .	136°
Bearing to Left hand point of Takatu . . .	33° 40′
Bearing to Dome in Hindu Burning ground . . .	138° 50′
Bearing to centre of pier of Bridge leading to Military Works Brickfield.	100° 10′
Distance	118 feet.
Bearing to South-East Corner of compound to the East of Officer's Quarters No. 8.	353° 30′
Distance	84 feet.
Magnetic variation	3° 25′ East.

Pillar. From	Pillar. To	Description.	Magnetic Bearing.	Direct Horizontal distance in feet.
1	2	From pillar No. 1 the boundary runs in a South-Westerly direction along the right bank of the Nullah to pillar No. 2.	255° 10′ 0″	944
2	3	From pillar No. 2 the boundary follows the right bank of the Quetta (or Habib) river in a West and North Westerly direction to pillar No. 3 situated just North of the centre of the Gymkhana.	293° 0′ 0″	6,175′
3	4	From pillar No. 3 the boundary runs almost due North and passes just East of the Village Kazi Atta Muhammad, then crosses the Samungli Road to pillar No. 4 situated North of the Quarantine Camp and 200 yards West of the Railway.	2° 15′ 0″	3,268′
4	5	From pillar No. 4 the boundary runs in the North-Easterly direction crossing the Railway to pillar No. 5 situated at the bend of the Baleli Road.	34° 15′ 0″	1,842′
5	6	From pillar No. 5 the boundary runs in a North-North-Westerly direction first parallel to the Baleli Road which bends and crosses it at 900 feet and then in the direction of the old Pishin road to pillar No. 6 situated just West of the Litter Yard.	343° 0′ 0″	2,718′
6	7	From pillar No. 6 the boundary runs in a North-North-Easterly direction skirting the old night soil depôt to pillar No. 7 situated at the North-West corner of the Cantonment.	15° 36′ 0″	2,755′
7	8	From pillar No. 7 the boundary runs in an East-South-Easterly direction to pillar No. 8 situated 260 yards South of the Village Nao Gaun.	101° 6′ 0″	2,555′
8	9	From pillar No. 8 the boundary continues in nearly the same direction to pillar No. 9 situated on the Quetta-Kach (Lytton) Road.	99° 47′ 0″	4,429′
9	10	From pillar No. 9 the boundary follows the West side of the Quetta-Kach (Lytton) Road in a North-North-Easterly direction to pillar No. 10.	25° 20′ 0″	6,512′
10	11	From pillar No. 10 the boundary continues in the same direction to pillar No. 11.	25° 20′ 0″	2,000′

Pillar.		Description.	Magnetic Bearing.	Direct Horizontal distance in feet.
From	To			
11	12	From pillar No. 11 the boundary runs in an East South-Easterly direction crossing the Quetta-Kach (Lytton) Road to pillar No. 12 situated on the East side of the road.	108° 50′ 0″	500′
12	13	From pillar No. 12 the boundary continues in the same direction to pillar No. 13.	108° 50′ 0″	5,000′
13	14	From pillar No. 13 the boundary continues in the same direction to pillar No. 14.	108° 50′ 0″	3,600′
14	15	From pillar No. 14 the boundary continues in the same direction to pillar No. 15.	108° 50′ 0″	3,000′
15	16	From pillar No. 15 the boundary continues in the same direction to pillar No. 16.	108° 50′ 0″	2,400′
16	17	From pillar No. 16 the boundary continues in the same direction crossing the Quetta-Hanna Road to pillar No. 17.	108° 50′ 0″	1,425′
17	18	From pillar No. 17 the boundary runs in a North-Easterly direction to pillar No. 18.	58° 51′ 0″	2,617′ (Estimated by the odolite triangulation.
18	19	From pillar No. 18, which is situated on a small hill to the North of Murdar Mountain, the boundary runs in a South-Easterly direction up the ridge of the spur to pillar No. 19.	160° 59′ 30″	5,717′ (Do.)
19	20	From pillar No. 19 which is situated on a mound on the top of the spur, the boundary runs in a Southerly direction to pillar No. 20.	169° 40′ 30″	800′ (Do.)
20	21	From pillar No. 20 which is situated on another mound, the boundary runs in a South-Easterly direction along the crest of the hill to pillar No. 21.	146° 18′ 0″	1,671′ (Do.)
21	22	From pillar No. 21 the boundary runs in a South-Easterly direction to pillar No. 22 as before following the crest of the hill.	149° 21′ 40″	4,272′ (Do.)
22	23	From pillar No. 22 the boundary following the crest of the hill crosses the Col at the head of the valley and runs in a South-West-Westerly direction to pillar No. 23.	202° 18′ 50″	3,892′ (Do.)
23	24	From pillar No. 23 which is situated on a spur running out from the hill a little West of North of Murdar, the boundary runs following the ridge in a South-Westerly direction to pillar No. 24.	241° 35′ 0″	2,524′ (Do.)
24	25	From pillar No. 24 which is situated on the summit on the hill the boundary runs in a South-Westerly direction to pillar No. 25.	225° 17′ 50″	285′ (Do.)
25	26	From pillar No. 25 which is situated on a mound near the summit, the boundary runs in a Westerly direction down the spur to a dry Nullah ascending the spur of the ridge the other side of the Nullah to pillar No. 26.	275° 52′ 0″	8,103′ (Do.)
26	27	From pillar No. 26 which is situated half way up the spur, the boundary runs in a Westerly direction to pillar No. 27.	267° 11′ 40″	1,047′ (Do.)
27	28	From pillar No. 27 which is situated on the ridge, the boundary runs along the ridge in a South-Westerly direction to pillar No. 28.	213° 3′ 30″	1,579′ (Do.)
28	29	From pillar No. 28 the boundary runs along the ridge in a Southerly direction to pillar No. 29.	192° 19′ 20″	2,735′ (Do.)
29	30	From pillar No. 29 the boundary runs in a South-Westerly direction along the ridge to pillar No. 30.	238° 32′ 20″	903′ (Do.)

Pillar. From	To	Description.	Magnetic Bearing		Direct Horizontal distance in feet.
30	31	From pillar No. 30 the boundary runs in a straight line up a steep slope to pillar No 31	223° 17'	40'	3,552' (Estimated by theodolite triangulation)
31	32	From pillar No. 31, which is situated on the summit of the hill West of Murdar, the boundary runs down a steep spur in a North-Westerly direction to pillar No 32	333° 56	20'	4 787' (Do)
32	33	From pillar No 32, which is situated near the bottom of the spur, the boundary runs in a Westerly direction South of the unmetalled road to pillar No 33	270° 30	0	3,427 (Do)
33	34	From pillar No 33, which is situated at the branch of the unmetalled road running South from the Ordnance Lascar Lines, the boundary runs in a North-Westerly direction to pillar No 34	333° 34'	0"	875' (Do.)
34	35	From pillar No 34, the boundary runs in a straight line in a Northerly direction to pillar No. 35.	345° 10	0	514
35	36	From pillar No. 35, the boundary runs in a straight line in an Easterly direction to pillar No 36.	73° 50	0	119'
36	37	From pillar No 36, the boundary runs in a straight line along the drain on the West side of the unmetalled road in a Northerly direction to pillar No 37.	353° 20	0'	1,548'
37	38	From pillar No 37, the boundary runs in a North-Westerly direction in a straight line to pillar No 38	342° 20	0'	879
38	39	From pillar No. 38, the boundary following the West side of the unmetalled road, runs in a North-Westerly direction to pillar No 39	324° 30'	0"	1,684'

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

CONTENTS.

PART I.

Government of India Notifications, Appointments, Promotions, etc.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Calcutta, the 5th November 1906.

No. 24.—In exercise of the power conferred by section 17 of the Indian Councils Act, 1861, the Governor General in Council is pleased to appoint Friday, the 14th December, 1906, at 11 A.M., as the time, and the Council Chamber in the Government House, Calcutta, as the place, for a meeting of the Council of the Governor General for the purpose of making Laws and Regulations.

J. M. MACPHERSON,
Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Simla, the 1st November 1906.

No. 2493—Under the provisions of section 9 of the Statute 24 and 25 Vict., cap. 67, the Governor General in Council is pleased to direct that His Excellency's Council shall assemble at Calcutta in the jurisdiction of the Lieutenant-Governor of Bengal.

MEDICAL.

Calcutta, the 6th November 1906.

No. 1-*C*.—In supersession of the Home Department Notification No. 850, dated the 6th October 1906, the services of the undermentioned officers are placed temporarily at the disposal of the Government of Bengal .—

Captain M. Mackelvie, M B , I M S

Captain F. P. Connor, F.R.C.S , I M.S.

JUDICIAL.

The 9th November 1906.

No. 1454.—His Majesty's Secretary of State for India has permitted the Hon'ble Mr. Justice F. Bodilly to resign his office of Judge of the High Court of Judicature at Fort William in Bengal, with effect from the 1st November 1906.

H. H. RISLEY,

Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 6th November 1906.

No. 159.—Mr. C. C. Swetenham, Examiner of Accounts, is, on return from leave, posted to the Office of the Examiner of Public Works Accounts, United Provinces.

L. M. JACOB,

Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATION.

Simla, the 6th November 1906.

No. 58-*A*.—His Excellency the Grand Master of the Most Exalted Order of the Star of India and of the Most Eminent Order of the Indian Empire will hold an Investiture of both Orders in the Fort at Agra on the 12th January, 1907, at 9 P.M. Members of either of the Orders who will be present in Agra on the date stated will be expected to attend, and they are requested to communicate their names and addresses to me not later than the 1st December, 1906.

L. W. DANE,

Secretary to the Orders of the Star of India and the Indian Empire.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Simla, the 5th November 1906.

No. 4300-*E. A.*—The combined leave granted in Notification No. 2935-E.A., dated the 13th July 1906, to Mr. J. P. Sequeira, Extra Assistant to the Political Resident in the Persian Gulf, is extended by six months.

The 6th November 1906.

No. 2635-*G.*—Lieutenant-Colonel J. F. Smyth, Indian Medical Service (Madras), Senior Surgeon and *ex-officio* Sanitary Commissioner with the Government of Mysore, is granted privilege leave for three months, with effect from the 16th September 1906, combined with furlough for fifteen months, under Articles 233 and 308 (*b*) of the Civil Service Regulations.

No. 2636-*G.*—Major T. W. Irvine, Indian Medical Service (Bombay), an Agency Surgeon of the 2nd class, is appointed to officiate as Senior Surgeon and *ex-officio* Sanitary Commissioner with the Government of Mysore, with effect from the date of assuming charge, and during the absence on leave of Lieutenant-Colonel J. F. Smyth, or until further orders.

No. 2639-*G.*—Major H. B. Peacock, a Political Agent of the 4th class, is posted, on return from furlough, as Assistant Commissioner of Ajmer.

No. 2642-*G.*—Captain E. Barnes, a Political Assistant of the 1st class, substantive *pro tempore*, is appointed to officiate as a Political Agent of the 4th class, and is posted as an Assistant Secretary to the Government of India in the Foreign Department.

No. 2651-*G.*—The undermentioned officer is selected as a probationer for the Political Department of the Government of India, and is placed on special duty in Simla, with effect from the 13th October 1906:—

Lieutenant A. J. H. Grey, Indian Army.

No. 2658-*G.*—Mr. W. H. J. Wilkinson, officiating Under Secretary, is posted temporarily as Assistant Secretary to the Government of India in the Foreign Department, with effect from the 7th October 1906.

No. 2661-*G.*—Captain G. H. Anderson, a Political Assistant of the 3rd class, is granted privilege leave for one month and thirteen days, with effect from the 8th October 1906, combined with furlough for eleven months and seventeen days, under Articles 233 and 308 (*a*) of the Civil Service Regulations.

No. 2662-*G.*—Captain C. G. Crosthwaite, Assistant Commissioner, Dera Ismail Khan, is appointed Commandant of the Border Military Police of that District, with effect from the 8th October 1906.

No. 2666-*G.*—The services of Mr. R. M. Williamson, Deputy Conservator of Forests, Central Provinces, are replaced at the disposal of the Hon'ble the Chief Commissioner of the Central Provinces on the termination of his deputation on Foreign Service in the Central India Agency, with effect from the forenoon of the 17th November 1906.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 25th October 1906.

From the 10th November next till further notice, the complete *Gazette of India* will be published at Calcutta. After the 3rd November all notifications and other matter intended for publication in the *Gazette* should be addressed to the Publisher, 8, Hastings Street, Calcutta.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,
Secretary to the Government of India.

No. 415 of 1899.—The Newellite Glass Tile Company, Limited. *Improved treatment of glass for coating purposes as a backing for slabs, tiles, facing plates, and the like, and for light reflection and other purposes.* (From 23 May 1907 to 23 May 1908.)

No. 145 of 1900.—Pneumatic Railway Signal Company. *Improvements in railway switch and semaphore apparatus.* (From 3 August 1906 to 3 August 1907.)

No. 367 of 1900.—John Harvey Kellogg. *An improved process of preparing cereal cakes.* (From 9 January 1907 to 9 January 1908.)

No. 418 of 1901.—Christopher Rawson. *Improvements in indigo manufacture.* (From 12 November 1906 to 12 November 1907)

No. 397 of 1902.—John Phillips. *Improvements in the construction of commutator trimming apparatus.* (From 28 April 1907 to 28 April 1908.)

No. 4357 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased :—

No. 485 of 1900.—Frank Shuman and Constantine Shuman. *Improvements in mercerizing machines.* (Specification filed 2 August 1901.)

No. 12 of 1901.—James Robinson Hatmaker. *Modification of milk casein and its preparation as a food.* (Specification filed 29 July 1901.)

Fee in respect of the continuance of an exclusive privilege—

4 (*b*) After the expiration of the fourth year and before the expiration of the fifth year from the date of filing of the specification—

The sum of R50 for each of the above inventions.

No. 486 of 1897.—The Velvril Company, Limited. *Improvements in the manufacture of machine belting.* (Specification filed 1 August 1898.)

Fee in respect of the continuance of an exclusive privilege—

4 (*e*) After the expiration of the seventh year and before the expiration of the eighth year from the date of the filing of the specification—

The sum of R50 for the above invention.

No. 204 of 1896.—Andrew Worthington Billings. *Improvements in the manufacture of beer.* (Specification filed 30 July 1896.)

Fee in respect of the continuance of an exclusive privilege—

4 (*g*) After the expiration of the ninth year and before the expiration of the tenth year from the date of the filing of the specification—

The sum of R100 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. A consolidated index for the year 1905, entitled "Inventions and Designs in 1905," is also on sale, price one rupee. It contains a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in that year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or *1s. 1d.* Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions,
and Designs Act, V of 1888.

By order,

A. L JACOB, Captain,

Secretary and First Assistant.

THE HONOURABLE THE CHIEF COMMISSIONER OF AJMER-MERWARA.

NOTIFICATION.

Abu, the 29th October 1906.

No. 1286—1087.—In exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), the Chief Commissioner of Ajmer-Merwara is pleased, with the previous sanction of the Governor-General in Council, to make the following rules to regulate the importation, possession, sale and transport of carbide of calcium in Ajmer-Merwara :—

RULES TO REGULATE THE IMPORTATION, POSSESSION, SALE AND TRANSPORT OF CARBIDE OF CALCIUM IN AJMER-MERWARA.

PART I.—OF IMPORTATION OF CARBIDE OF CALCIUM.

Applicable to maritime Provinces.

PART II.—OF POSSESSION AND SALE OF CARBIDE OF CALCIUM.

Carbide of calcium to be "commercially pure."

1. No carbide of calcium shall be kept at any place, with or without a license unless it is "commercially pure," *i.e.*, unless it contains no impurities liable to generate phosphoretted or siliciuretted hydrogen so as to render the gas evolved liable to ignite spontaneously.

Conditions of possession and sale without license.

2. No license shall be required for the possession or sale of carbide of calcium (i) in any quantity not exceeding five pounds if it is kept in separate vessels, each containing not more than one pound, of the nature described in, and labelled as required by rule 1 of Part V; (ii) in any quantity exceeding five and not exceeding twenty-eight pounds where the following conditions are observed and the vessels containing it are labelled as required by rule 1 of Part V:—

(*a*) the carbide shall be kept only in metal vessels hermetically closed at all times when the carbide is not actually being placed in or withdrawn from such vessels ;

(*b*) the vessels containing carbide shall be kept in a dry and well ventilated place ;

(*c*) due precautions shall be taken to prevent unauthorized person from having access to the carbide ;

(*d*) notice shall be given of such keeping to the licensing authority referred to in rule 8 of this Part, and free access shall be afforded to any duly authorized inspector to inspect the portion of the premises where the carbide is kept and the generator, if any, is situated.

Where a fixed generator is used on the premises :—

(*e*) full and detailed instructions as to the care and use of the generator shall be kept constantly posted up in such place as to be conveniently referred to by the generator attendant.

Where it is desired to keep a greater quantity or where the above conditions cannot be complied with, application must be made to the licensing authority for a license.

Licenses for possession.

3. Carbide of calcium in any quantity exceeding twenty-eight pounds may be kept only under a license to possess carbide of calcium granted under these rules. Every application for such a license shall be in form A in the schedule, and where the applicant proposes to engage in the manufacture of acetylene gas, the generating apparatus to be used by the licenses must, if manufactured in British India, have been examined by such competent authority as the Local Government or Administration of the province of manufacture may from time to time specially authorize in this behalf, and certified by it to be suitable; or, if imported, must either have been so examined and certified, or be of a type approved by the Committee on Acetylene Generators appointed by the Department of His Majesty's Inspector of Explosives, London.

Storage of carbide of calcium.

4. Notwithstanding anything contained in rule 3 of this Part, carbide of calcium may, with the special permission of the Local Government, and on such conditions as may be fixed by it, be stored without a license in premises provided for the purpose.

NOTE.—*This rule is intended to be applied only in the case of Port Trust and similar premises.*

Situation of storage buildings.

5. Carbide of calcium shall be stored,—

(*1*) if in quantities aggregating not more than four hundred and fifty pounds—in a suitable uninhabited building at least twenty feet away from any other premises: provided that quantities not exceeding two hundred and twenty-five pounds may be stored in place connected with a shop at a distance of at least ten feet from other premises;

(*2*) if in quantities aggregating more than four hundred and fifty pounds and not more than three thousand pounds—in a suitable uninhabited building at least forty feet away from any other premises;

(*3*) if in quantities aggregating more than three thousand pounds and not more than fifty tons—in an uninhabited building at least one hundred feet away from any other premises.

Not more than fifty tons of carbide of calcium shall be stored in any one building

Construction of storage buildings.

6. Every building for the storage of carbide of calcium shall be—

(*a*) constructed with stone, brick or iron walls, with terraced, tiled or iron roofs, and with tiled, paved or cemented, or iron (or steel) floors raised at least a foot above the ground level; and

(*b*) well ventilated and water-tight to the satisfaction of the licensing officer.

Arrangements in storage buildings.

7. Carbide of calcium shall be shored only on racks or trestles standing at least one foot above the level of the ground, and no articles of an inflammable or combustible nature shall be kept in the same building.

Licenses for possession.

8. Licenses to possess carbide of calcium shall be in Form B in the schedule, and may be granted by the District Magistrate or any Magistrate of the first class, or by such other officer as the Local Government may, from time to time, by an order in writing, appoint in this behalf

Continuance of license.

9. Such licenses shall be in force for one year from the dates of issue:

Provided that the licensing officer may, at any time, for good and sufficient reasons, cancel any such license.

Fee for license.

10 The fee for a license to possess carbide of calcium shall be five rupees.

Renewal of license.

11. Every application for the renewal of a license to possess carbide of calcium shall be made in the same manner as an application for an original license.

Date of, and fee for, application for renewal.

12. Every such application shall be made at a date not less than fifteen days prior to the date on which the original license expires The fee charged for the renewal of a license shall be three rupees

Packing and marking on sale by retail vendor.

13. Every retail vendor of carbide of calcium, selling any quantity exceeding half a pound to a purchaser, shall deliver it to him in an air-tight tin or drum, packed and marked in accordance with these rules, and bearing the name of the vendor plainly printed on the package.

14. Every retail vendor shall keep his carbide of calcium in a receptacle which can be easily opened and closed again so as to be air-tight, and shall open for the purposes of sale, not more than one receptacle at a time.

Packing and opening by retail vendor.

PART III.—TRANSPORT OF CARBIDE OF CALCIUM.

1. No license shall be required for the transport of carbide of calcium in any quantity not exceeding five pounds if it is packed in separate vessels, each containing not more than one pound, of the nature described in, and labelled as required by, rule 1 of Part V.

Conditions of transport without license.

2. Carbide of calcium in any quantity exceeding five pounds may be transported only under a license to transport carbide of calcium granted under these rules, and shall not be deposited at any time during transit in any building other than a building fulfilling the requirements of rules 5 and 6 of Part II, and shall not be stored in any such building except in accordance with the conditions as to storage prescribed by rule 7 of Part II.

Conditions of transport under license.

3. Notwithstanding anything contained in rule 2 of this part, carbide of calcium, while in the possession of a railway for transport, shall not be stored in any railway goods shed, but shall be stacked in the open under waterproof sheets and so placed as to prevent its getting wet.

Conditions of transport by railway.

4. All lights shall be kept away from carbide of calcium stacked as provided in rule 3 of this Part.

Special precautions.

5. If any carbide of calcium is wetted while in the possession of a railway for transport, it shall be destroyed by immersion in at least twenty times its bulk of water.

Method of disposal if wetted in transit.

NOTE.—*The fact of carbide of calcium having become wet will be indicated by the outward appearance of the drum, and probably by a disagreeable odour, showing a leakage of gas.*

6. (1) Where carbide of calcium is transported by passenger train, no quantity exceeding four hundred and fifty pounds shall be carried by any one train and the vehicles shall be well ventilated and as far as possible water-tight.

Condition of transport by passenger train.

(2) In no circumstances shall a naked lamp or other unprotected artificial light be taken into a wagon, vessel or conveyance containing carbide of calcium.

7. Licenses to transport carbide of calcium shall be either general or special in Form C or Form D in the schedule, and may be granted by the District Magistrate or any Magistrate of the first class, or by such other officer as the Local Government may, from time to time, by an order in writing, appoint in this behalf.

Transport licenses.

8. A general license to transport carbide of calcium may be granted only to a person who holds an annual license to possess a quantity exceeding four hundred and fifty pounds of carbide of calcium.

Grant of general transport license.

9. A special license to transport carbide of calcium may be granted to any person for a particular consignment at the discretion of the licensing officer.

Grant of special transport license.

10. The fee for a general license to transport carbide of calcium shall be three rupees.

Fee for general transport license.

11. An application for a general license to transport carbide of calcium shall state—

Application for general transport license.

(*a*) the number and date of the license to possess carbide of calcium held by the applicant; and

(*b*) the period of currency of that license.

12. A general license to transport carbide of calcium shall be in force for not more than one year, and shall in no case remain in force after the date on which the license to possess carbide of calcium held by the applicant expires.

Continuance of general transport license.

13. An application for special license to transport carbide of calcium shall state—

Application for special transport license.

(*a*) the place from which the carbide of calcium is to be transported;

(*b*) the place to which it is to be transported;

(*c*) the number of drums or cases;

(*d*) the quantity in each drum or case;

(*e*) the name and address of the consignee,

(*f*) whether the consignee has a license to possess carbide of calcium sufficient to cover the amount transported; and

(*g*) the date on which it is proposed to despatch the consignment.

14. A special license to transport carbide of calcium shall be in force for such period, not exceeding one month from the date of the grant of the license, as may be specified on the same.

Continuance of special transport license.

15. The fee for a special license to transport carbide of calcium shall be one rupee.

Fee for special transport license.

16. The holder of a general license to transport carbide of calcium shall, with each consignment conveyed under cover of his license, issue a pass in Form E in the schedule specifying—

Issue and contents of passes.

(a) the places fr m and to which the carbide of calcium is to be transported ;

(b) the quantity of carbide of calcium covered by the pass ;

(c) the name and address of the consignee ; and

(d) whether the consignee has a license to possess carbide of calcium sufficient to cover the amount transported.

17. Carbide of calcium may be transported within Ajmer-Merwara under cover of any license granted by the prescribed authority in any other province, provided that the conditions of such license are observed throughout the period during which the carbide of calcium is in transit.

Validity of license granted in another province.

PART IV.—OF INSPECTION.

1. The District Magistrate, the Sub-Divisional Magistrate or any Magistrate subordinate to the District Magistrate appointed by him in this behalf by order in writing, or any police officer of or above the rank of Inspector appointed by the District Magistrate in this behalf by order in writing, or any other officer appointed by the Local Government in this behalf, may at any time enter any premises in respect of which a license to possess carbide of calcium has been granted, for the purpose of inspecting the same.

Powers of inspecting officers.

2. Any officer so inspecting may require a sample or samples to be delivered to him from any drum or case of carbide of calcium stored in the premises inspected.

Requisition of samples.

3. The licensee of any premises inspected shall personally or through a representative show to the officer so inspecting every place and every vessel in which carbide of calcium in his possession is kept, deliver any samples required, and give such assistance as that officer may require.

Facilities to be afforded to inspecting officers.

4. Where a license to transport carbide of calcium has been granted, any officer authorised under rule 1 of this Part may, at any time and on or before the arrival of the carbide of calcium at its destination, board any ship or detain any conveyance, used for such transport, for the purpose of inspecting the license granted for the transport of the consignment or the pass issued by the licensee and seeing whether the provisions of these rules and the conditions of the license have been complied with.

Inspection during transit.

PART V.—GENERAL.

1. Where carbide of calcium—

Description and marking of vessels.

(a) is imported or kept at any place after seven days from the date of its importation, or

(b) is transported, or

(c) is sold or exposed for sale,

it shall be contained in substantial hermetically closed metal vessels, each containing not more than two hundred and twenty-four pounds, having no copper in their construction and having attached to them labels stating in conspicuous characters the words—"Carbide of calcium—dangerous if not kept dry," together with the following caution:—

"*The contents of this package are liable, if brought into contact with moisture, to give off a highly inflammable gas,*"

and with the addition,—

(d) in the case of a vessel kept, of the name and address of the consignee or owner ;

(e) in the case of a vessel transported, of the name and address of the sender ; and

(f) in the case of a vessel sold or exposed for sale, of the name and address of the vendor.

(2) A licensing officer may, for reasons to be reported to the Local Government, refuse a license in any case, the reasons for refusal being communicated to the applicant if a request to that effect is preferred by him ; and the Local Government may, on receipt of such report and of any representation made to it by the applicant, pass such orders on the case as it thinks fit.

Refusal of license.

3. Any explosion or accident occurring in connection with the importation, transport, possession or sale of carbide of calcium shall be reported by the person in charge of the same for the time being without delay at the nearest police station

Report of accident.

4. Where a licensee dies or becomes insolvent or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty or forfeiture under the Act or these rules for acting under the license during such time as may reasonably be necessary to allow him to make an application for a new license in his own name for the unexpired portion of the original license Such new license shall be granted on payment of one rupee

Procedure on death or disability of licensee

Loss of license

5 Where a license granted under these rules is lost or accidentally destroyed, a duplicate may be granted on payment of a fee of eight annas

6. The fees chargeable under these rules shall ordinarily be levied by means of impressed stamps An application for the grant or the renewal of a license shall bear the proper stamp provided that, if the application is refused, the value of the separate stamp (if any) which may have been already provided by the applicant for the desired license or renewed license *minus* the deductions prescribed by section 54 of the Indian Stamp Act, 1899 (II of 1899), may be refunded to the applicant An application should not be made on the stamped paper intended for the license or renewed license; but where this has been wrongly done, the value of the stamp may be refunded *minus*—

Levy of license-fees

(*i*) the value of the stamp which should have been affixed to the application, and

(*ii*) the deductions prescribed as aforesaid.

Where the fees leviable under these rules have been made over to any Local body, the fees shall be paid in such manner as that Local authority may from time to time direct

7. Any person holding a license or acting under a license granted under these rules shall be bound to produce the same when called upon to do so by any Magistrate or Police officer of or above the rank of an officer in charge of a police station.

Production of license

THE SCHEDULE.

FORM A

REGD. NO.

Application to the of for a license to possess Carbide of Calcium.

Name in full of applicant with particulars of his residence. If a firm or company, its name or that of its Agent or Secretary	
Situation of building for which the license is required	
Quantity to be covered by license	
Is the carbide for use or for sale unopened in the vessels in which it is received, and, if not, what will be done with it?	
In what vessels will the carbide be kept, what is the capacity of the same, how are they closed against moisture, and of what material are they made?	
In what part of the building will the carbide be kept? How are the premises constructed? Are the premises used for other purposes, and, if so, for what purposes?	

Is the carbide to be used for the manufacture of acetylene gas?	
How is the generator constructed, and what is its capacity? Give sketch.	
Give particulars as to the building in which the generator will be placed, and state whether it is detached from other buildings, and whether it is used for other purposes.	
How is it proposed to dispose of the residue?	
Will the generator be in the sole charge of a person competent to manage it?	

Signature of applicant.
Postal address.

RULES.

[Here enter rules 1, 2, 3, 5 to 14 of Part II, 1 to 3 of Part IV, and 1 to 7 of Part V.]

CONDITIONS.

This license is given subject to the provisions of the Indian Petroleum Act, 1899 (VII of 1899), and the above-mentioned rules for the possession and sale of carbide of calcium made thereunder

2. If the licensing officer or any officer appointed under rule 1 of Part IV calls on the license-holder, by notice in writing, to execute any repairs to the building licensed which may in the opinion of such officer, be necessary for the safety thereof, the license-holder shall execute the repairs within such period, not being less than one week from the date of receipt of the notice, as may be fixed by the notice

3 Subject to the provisions of rule 2 of Part II, the licensee shall not deliver any quantity of carbide of calcium exceeding twenty-eight pounds to any one who has not a license under section 5 or 6 of the Act, or any quantity of such carbide of calcium exceeding half a pound, except in accordance with the rules as to the manner in which carbide of calcium is to be packed

4 Vessels containing carbide of calcium shall be opened only for the time necessary for the removal of any quantity of carbide of calcium or for the refilling of other vessels During such removal or refilling every reasonable precaution shall be adopted for preventing moisture being brought into contact with the carbide of calcium, as well as for guarding against the risk of ignition of any gas which may be liberated

5. Every storage vessel of a greater storage capacity than two pounds shall be secured with a lock or be kept in a locked receptacle, so as to prevent unauthorised persons having access to the contents.

6. Due precaution shall at times be taken for the prevention of accidents from fire, and no smoking, light, or fire in any form shall be permitted at any time within or near the building in which the carbide of calcium is stored.

7 If carbide of calcium is used for the manufacture of acetylene gas, the following precautions for ensuring safety shall be adopted.

(a) The apparatus used must, if manufactured in India, have been examined by * ——— and certified by it to be suitable, or, if imported, either have been so examined and certified or be of a type approved by the Committee on Acetylene Generators appointed by the Department of His Majesty's Inspector of Explosives, London.

* *Vide* rule 3 of Part II.

(b) Every apparatus for generating and storing acetylene gas other than a portable apparatus holding a charge of less than two pounds of carbide of calcium shall be placed in an out-building which shall be separated as far as may be practicable from any inhabited building and shall be well ventilated.

(c) No fire or such artificial light as would ignite inflammable gas shall be taken into or near the building, in which a gas-making apparatus is placed.

8. Every apparatus (including generator and gas-holder) used for the manufacture of acetylene gas shall, as far as practicable, be constructed and used so as to provide against special risk, that is to say:—

(a) Copper shall not be used in any part of the apparatus.

(b) The various parts shall be of adequate strength.

(c) The escape of gas from the apparatus shall be carefully guarded against.

(d) Satisfactory provision shall be made against the dangerous development of heat.

(e) Satisfactory provision against undue pressure shall be made by the employment of an adequate safety valve connected with a pipe discharging into the open air and a suitable pressure gauge shall be attached to the apparatus.

(f) Provision shall be made for the residue of the carbide of calcium being mixed with at least ten times its bulk of water on being removed from the apparatus.

(g) No person shall have charge of an apparatus unless he has been properly instructed in its management.

The 30th October 1906.

No. 1290.—In exercise of the powers conferred by Section 5 of the Opium Act, 1878 (1 of 1878), and with the previous sanction of the Governor General in Council, the Chief Commissioner of Ajmer-Merwara is pleased to make the following additions to the rules published under his Notification No. 789-C, dated the 12th March 1904:—

(*1*) In rule 1(9), after the words "any quantity not exceeding five tolas in weight," add the words "morphia and its preparations when sold in any quantity not exceeding 10 grains in weight."

(*2*) In rule 5(1), before clause (*b*), add a new clause as follows, and renumber clauses (*b*) and (*c*) as clauses (*c*) and (*d*), respectively:—

"(*b*) Morphia and its preparations to an amount not exceeding 10 grains in weight."

(*3*) After rule 5(3), add the following note:—

"NOTE.—No license is required for the possession of medicinal preparations containing opium imported from Europe."

(4) After rule 7(2), add the following note:—

"NOTE.—No license is required for the sale by medical practitioners, chemists or druggists, of medicinal preparations containing opium imported from Europe."

(6) After rule 18(2), add the following note:—

"NOTE.—No permit is required for the import from Europe by a medical practitioner, chemist or druggist of medicinal preparations containing opium."

Mount Abu, the 3rd November 1906.

No. 1316—374.—In exercise of the powers conferred by sections 4 and 5 of the Hackney Carriages Act, 1879 (XIV of 1879), the Chief Commissioner of Ajmer-Merwara is pleased, with the previous sanction of the Governor-General in Council, to substitute the following rule for rule 11 of the rules for the regulation and control of hackney carriages in the Military Cantonment of Nasirabad, published in the Chief Commissioner's Notification No. 572—374, dated the 8th June 1888. The rule shall be published within the Cantonment limits in such manner as the Cantonment Committee may direct, for a period of not less than one month, at the expiration of which it shall have the force of law:—

11. The licenses for hackney carriages and drivers shall be in the form attached to these rules and shall be printed on strong paper. The fees for carriage and driver's licenses shall be as follows:—

	Carriage license.	Driver's license.
	R a. p.	R a. p.
For 1st class carriage . .	2 0 0	0 4 0
" 2nd " " . .	2 0 0	0 4 0
" 3rd " " . .	2 0 0	0 4 0
" 4th " " . .	1 0 0	0 4 0

By order,

C. C. WATSON,

First Assistant to the Agent to the Governor-General, Rajputana, and Chief Commissioner, Ajmer-Merwara.

ACCOUNTANT GENERAL.

NOTIFICATION.

Maymyo, the 2nd November 1906.

No. 453-C.—2P-4.—In accordance with the provisions of section 42 of the Land Acquisition Act, 1894, the following agreement made under section 41 of that Act between the Secretary of State for India in Council and the Burma Oil Company, Limited, for the acquisition of land for the purpose of constructing a pipe-line for the conveyance of crude oil from Yenangyat to Yenangyaung and from Yenangyaung to Rangoon, is published for general information.

By order,
R. E. V. ARBUTHNOT,
Revenue Secretary to the Government of Burma.

AN AGREEMENT made this First day of September 1906 between the SECRETARY OF STATE FOR INDIA IN COUNCIL hereinafter called the Secretary of State of the one part and the BURMA OIL COMPANY LIMITED a company incorporated under the English Companies Act and having its registered office at 175 West George Street, Glasgow, and its principal place of business at Merchant Street, Rangoon, hereinafter called the Company of the other part WHEREAS the Company is possessed of certain oil wells or mines at Yenangyat and Yenangyaung in Upper Burma. AND WHEREAS for the purpose of conveying the crude oil produced at the said wells or mines to the Company's refineries situate at Syriam the Company is desirous of constructing a pipe-line from Yenangyat to Yenangyaung and from Yenangyaung to Rangoon and is willing to allow the public to have the use of such pipe-line for the carriage of similar oil at such price and subject to such conditions as may from time to time be approved of by the Government of Burma. AND WHEREAS such pipe-line if laid must be laid in part in or upon land which is not now at the disposal of the Government of Burma and the Company has applied to the Government of Burma to acquire on behalf of the Company under the provisions of the Land Acquisition Act 1894 so much of the land necessary for the laying of such a pipe-line as is not at the disposal of the Government of Burma excepting always land in the occupation of the Burma Railways Company and land forming a portion of any road vested in a Municipality. AND WHEREAS the Government of Burma having held an enquiry and being satisfied that the proposed acquisition is needed for the construction of the said work and that such work is likely to prove useful to the public has pursuant to section 41 of the last mentioned Act required the Company to enter into such an agreement with the Secretary of State as is prescribed by the said section. AND WHEREAS it is also desired to provide for the granting to the Company of a lease of or license to use for the purposes of their pipe-line so much of the land required therefor as may be at the disposal of Government.

Now it is hereby agreed as follows :—

1. Upon and in consideration of the Government of Burma taking proceedings for the acquisition under the Land Acquisition Act 1894 of land for the purpose of the pipe-line above referred to the Company shall on demand pay to the Government of Burma the cost of the acquisition and all costs of and incidental to such proceedings (including costs incurred in reference to land which is not eventually acquired) as certified under the hand of a Secretary to the Government of Burma and shall from time to time pay to the Government of Burma on demand such sums as may be so certified to be required on account of such costs.

2. The land to be acquired shall so far as the Government of Burma shall consider expedient be along the alignment shown in the map annexed to this agreement but the Government of Burma shall be at liberty to divert the proposed alignment so as to avoid any lands to the acquisition of which there may in the opinion of the said Government be valid objections provided that except with the consent of the Company the sum of such diversions shall not increase the total length of the alignment shown in the plan by more than two per cent.

3. The land acquired shall not ordinarily be of a greater width than 10 feet.

4. Upon completion of the acquisition and upon payment by the Company to the Government of Burma of the costs to which the Company may be liable in respect thereof the Company shall accept a lease of the land so acquired. And in addition thereto the Government of Burma shall grant or cause to be granted to the Company and the Company shall accept a lease or leases as to part and a license or licenses as to the remainder of so much of the land necessary for the said pipe-line as shall be at the disposal of Government and it is agreed the the Government of Burma shall decide for what portions a lease and for what portions a license shall be granted.

5. If before a lease is executed in respect thereof the Company shall have the use and occupation of any of the land to be comprised in a lease the Company shall pay for such use and occupation at the rate of R2 per acre per annum.

6. Such lease or leases as aforesaid shall be for a term of 30 years from the date thereof at a rental or in consideration of a payment after the rate of Rs. 2 per acre of land per annum and shall be renewable at the option of the Company for two further periods of 30 years each at such rent or in consideration of such payment as may be determined by the Government of Burma at the date of each such renewal provided that the rent or consideration so determined shall not exceed the highest rates of land revenue payable at the date of each renewal for land in the neighbourhood of the land comprised in the instrument.

7. Such lease or leases as aforesaid shall be upon the following terms and conditions:—

(a) That the land shall be used solely for the purposes of the pipe-line.

(b) That all roads ways railways water-ways irrigation cuttings and other drainage channels now existing or hereafter to be made shall have free passage across the lands comprised in the lease and the pipe or pipes or other works in or upon the said land.

(c) That the Company shall construct and maintain to the satisfaction of the Government of Burma crossings for cart traffic and foot passengers across the pipe-line at such places and shall allow the public to use such crossings except at such times as the Government of Burma may from time to time prescribe.

(d) That if at any time during the continuance of a lease it shall in the opinion of the Government of Burma become necessary or expedient to alter the alignment of the pipe-line for the purposes of any road or railway or other works of a public nature the Company shall on being required to do so by the Government of Burma and within such reasonable time as may be specified in the requisition surrender so much of the land leased to them as may be required for such purposes and at its own expense remove the said pipe or pipes or other works to other land which shall be provided for the purpose by and at the expense of the Government of Burma and which shall be leased to the Company in substitution of and upon the same terms as that surrendered. And the Government of Burma shall not be liable to pay compensation on account of such removal.

(e) The terms contained in clauses 9, 10, 11, 12 and 13 of this agreement.

(f) That on failure by the Company to pay the rent or to carry out and perform any of the other terms or conditions of the lease the lease may be forfeited and Government may re-enter upon the land.

8. Such license or licenses as aforesaid shall authorize the Company to enter upon open and break up the soil of the land in respect of which the license is granted and lay down and do all acts necessary for the maintenance of their pipe-lines therein or thereon and shall be subject to such terms as the Government of Burma may decide.

9. The Company shall complete the laying of a line of pipe for the conveyance of oil between Yenangyat and Yenangyaung and between Yenangyaung and Rangoon and the necessary pumping stations, tanks and machinery within a reasonable time from the date of this agreement such time not to exceed five years without the special consent of the Government of Burma.

10. When such line of pipes pumping stations tanks and machinery have been completed the Company shall at all times during the continuance of any lease granted to them in pursuance of this agreement and in accordance with such rules or regulations as the Government of Burma may from time to time notify in that behalf make full and adequate provision for meeting the general requirements of the public in regard to the carriage of crude oil and whenever required to do so by any person carry crude oil from Yenangyat and Yenangyaung to Rangoon and shall if required to do so by the Government of Burma and within such time as may be fixed by the said Government increase the carrying capacity of their pipe-line and the capacity of their pumping stations tanks and other appliances PROVIDED ALWAYS that the Company shall not be bound to increase the capacity of their pipe-line pumping stations tanks or other appliances save upon the requisition of producers of crude oil who shall have given satisfactory guarantees of the permanence of the supply of crude oil to be carried by the Company and that the Company shall not be bound to carry crude oil below a flash point which may from time to time be fixed by the Government of Burma or otherwise than in accordance with rules and regulations to be made by the said Government in that behalf: Provided also that the Company shall not be bound to place at any one time at the disposal of the public more than 20 per centum of the full carrying capacity of their pipe-line as then constituted.

11. The Rules or Regulations in the last preceding clause mentioned may among other things fix a limit to the rates which the Company may charge for the carriage of oil and the terms and conditions upon which the Company shall be bound to carry oil for the public may attach a penalty to the breach by the Company of any such rule or regulation and provide a method for deciding all questions as to the performance by the Company of their obligations towards the public including questions as to the damages payable by the Company or other the liability of the Company for failure to perform such obligations. The Company shall execute in favour of the Secretary of State for India in Council a bond

in the sum of rupees ten thousand conditioned for the payment by them of any penalty or payment of any sum to which they may have become liable under such rules or regulations and for compliance with any such decision as aforesaid.

12. Upon the expiration or sooner determination of any lease granted in pursuance of this agreement the Secretary of State shall have the option of taking over the pipe-lines in or upon the land comprised in the lease together with all or any of the buildings erections pumping stations tanks machinery and appliances belonging to the Company and used or intended to be used for the purposes of the said pipe-lines or in connection therewith and the Secretary of State shall pay to the Company the actual cost price of the said pipe-lines buildings erections pumping stations tanks machinery and appliances so taken over less a reasonable sum for deterioration or wear and tear. The amount to be so paid shall in case of disagreement between the parties be fixed by arbitration.

13. In case the Secretary of State shall not desire to exercise the option reserved to him of taking over the pipe-lines buildings erections pumping stations tanks machinery and appliances as aforesaid the Company shall be at liberty to remove the same within a reasonable time after the expiration or determination of their lease.

Failing such removal the said pipe-lines buildings erections pumping stations tanks machinery and appliances shall vest in and become the property of the Secretary of State without liability to make compensation therefor.

IN WITNESS WHEREOF ROBERT EDWARD VAUGHAN ARBUTHNOT Secretary to the Government of Burma in the Revenue Department acting for and on behalf of the said Secretary of State for India in Council by order of the Lieutenant-Governor of Burma and CAMPBELL KIRKMAN FINLAY the duly authorized Agent and Attorney of the said Company in Burma have hereunto set their hands.

OFFICIAL PAPERS.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs., on Thursday, the 8th November 1906, based on the India Daily Weather Reports of the period.

Weather was settled during the week over the whole of the country, except in Burma and the southern half of the Peninsula. In the former of these areas rainfall was due to an area of low pressure in the neighbourhood of the Andamans, while in the latter monsoon conditions were feebly developed and precipitation was light.

Burma.—Rainfall was abundant in Tenasserim, while all the stations in the remainder of Burma had some rain during the week, the total fall being slightly above the normal for the period. Skies were generally lightly to moderately overcast, and temperature was normal or in slight excess.

North-east India and Orissa.—The rainfall initiated by last week's depression still continued for the first two days of the week, but in diminishing quantities, and was confined chiefly to the south-eastern districts of Eastern Bengal and Assam, Bengal, Orissa, and Chota Nagpur. On the 4th Dibrugarh was the only station that reported rain, and for the rest of the period no rain fell. Skies were clear at most stations, and temperature was generally normal throughout the division.

The United Provinces, Central India and the Central Provinces.—Chanda reported a light fall of rain on the 2nd and Raipur on the 3rd, but with these exceptions no rain fell in this division throughout the week. Skies were lightly to moderately clouded in the Central Provinces and Central India on the first two days of the period, but they were clear for the rest of the time in these areas, as well as in the United Provinces. Night temperature was in moderate to large excess in the Central Provinces on the 2nd and 3rd, but apart from this, both maximum and minimum temperatures were approximately normal.

North-west India.—No rain fell during the week and skies were clear, except for a few days in the extreme north, where they were lightly clouded owing to a slight disturbance. Temperature was normal or in excess throughout the week.

The Peninsula.—Precipitation was fairly abundant in Malabar, and in the remainder of South India, in the southern half of the Deccan and on the Circars coast light rainfall also occurred, but it was much below the normal fall for this period of the year. Skies were generally lightly to moderately clouded throughout the Peninsula, and both day and night temperatures were normal or in excess, the departures from normal being greatest in the Bombay Deccan.

The total rainfall of the period, from the 4th May to the 8th November, differs by less than twenty per cent. from the normal over the whole country, except in the West Satpuras and the sub-divisions of Indore and Simla, where it is in excess, and in Baluchistan, Sind, parts of Rajputana and in Orissa, where it is in defect.

The following list summarises the chief rainfall amounts of the week as reported at 8 hrs. each day :—

November	2nd,	Moulmein 2·54" and Chaibassa 1·20".
"	3rd,	Chittagong 1·67".
"	4th,	Toungoo 1·02".
"	5th,	Port Blair 1·25," Slipper Island 1·65" and Toungoo 1·26".
"	6th,	Tavoy 1·30".
"	7th,	Cochin 2·20" and Cuddalore 1·15".
"	8th,	Toungoo 1·88" and Yamethin 1·14".

Rainfall division with representative station.	Rainfall sub-division named after representative station.	Rainfall data for week ending on 8th November 1906.			Rainfall data from 4th May 1906 to 8th November 1906			Seasonal percentage departure from normal.

The 8th November 1906.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 3rd November 1906.

Burma.—The rainfall was mostly light and practically general with over 3 inches in Rangoon and Thaton, 10 and 12 cents in Minbu and Sagaing, respectively, and none Myingyan. Reaping of early wet weather paddy has commenced in Myitkyina and that of hill side paddy is completed in Myitkyina and the Ruby Mines district. Sowing of wheat is completed and reaping of early miscellaneous crops has commenced in the Northern Shan States. Sowing of tobacco has commenced in Akyab and ploughing for gram and wheat has commenced in Kyaukse. Plucking of cotton continues and the cultivation of miscellaneous crops is progressing satisfactorily. Slight damage to hill side paddy crops by rats is reported in the Banmauk township of Katha; in Minbu unirrigated paddy has failed, in Shwetachaung and other large tracts of Mandalay and in the Yamethin sub-division of Yamethin only a 4 anna paddy crop is expected. Rain is badly wanted throughout Myingyan and in the Sagaing, Myinmu, and Chaungwon townships of Sagaing. The condition of the standing crops is on the whole good. The price of paddy has risen slightly in Tharrawaddy, Maubin, and Myingyan and has further increased in Minbu where it is abnormally high; it has fallen considerably in Prome and Katha, and slightly in Rangoon.

Eastern Bengal and Assam.—The weather is seasonable. Light to moderate rain has fallen in all districts benefiting the standing crops. More rain is needed in Lakhimpur. Plucking and manufacture of tea continue, prospects are good in Sylhet, Nowgong, and Lakhimpur, and fair elsewhere. Ploughing for and sowing of mustard and sowing of pulses are in progress. Plucking of cotton has commenced and the prospects are fair. Prospects of winter rice and other standing crops are moderate. Washing of jute is nearly finished, and the outturn is good. Prices are falling. Prices of common rice:—Manipur 17; Kohima 10; Rangamati 7 to 10; Sibsagar 9, Noakhali 8 to 8½; Comilla 8¼; Chittagong, Dhubri, and Tezpur 8, Bakarganj 7½; Dacca and Pabna 7½; Nowgong and Dibrugarh 7; Faridpur 6¾; Mymensingh, Dinajpur, Malda, and Gauhati 6½, Rampur Boalia, Jalpaiguri, Rangpur, and Sylhet 6; Shillong 5½, Bogra 5¼; and Aijal 5 seers per rupee. Prices have risen in six; fallen in twelve; and have remained stationary in the remaining districts.

The number of persons receiving gratuitous relief is:—Tippera 116, Noakhali 376, Sylhet 14,276, Mymensingh 98. 196 persons are also employed on test works in Dacca and 350 in Tippera. The high prices are felt by the non-agricultural more than by the agricultural population. Prices are generally falling in most districts and the condition of the people is improving.

Bengal.—Rain was fairly general in all the Divisions of the Province, excepting Patna. It was heavy in Hooghly, Howrah, the 24-Parganas, Nadia, Jessore, the Sonthal Parganas, Cuttack, Singhbhum, and in the Contai sub-division of Midnapore, where a fall of 8·57 inches was recorded for the week. In the Patna Division, Gya alone recorded a slight fall of 0·38 inches only. The recent rain has been generally beneficial to *aman* paddy, but it is reported from Midnapore, Hooghly, Howrah, the 24-Parganas and the Sonthal Parganas that it has slightly damaged this crop in certain places. Standing crops, especially on high lands, are still in need of rain in the Patna Division and also in Monghyr, Bhagalpur and Purnea. Damage has been done by insect-pests in Nadia and Monghyr. The number of persons receiving gratuitous relief is—24-Parganas 10,897, Saran 1,061, Muzaffarpur 4,775, Darbhanga 22,493—total 39,226. The number of persons attending test-works is—Saran 693, Darbhanga 5,589. Fodder and water are generally sufficient,

The price of common rice has risen in twelve and fallen in six districts. The increase is noticeable in Darbhanga, where common rice is selling at 5 seers per rupee as against 7½ seers in the previous week.

United Provinces.—The week was rainless with the exception of slight showers in Almora. The late rice in the eastern districts is withering for want of rain; elsewhere harvest prospects are good and the spring crops have germinated well. Slight damage by insects is reported from parts of Gorakhpur and Banda. Cholera and malaria are decreasing. Markets are well stocked and fodder is generally sufficient. Prices show a tendency to rise in fourteen districts.

The weekly report on the famine and scarcity is as follows :—The agricultural situation in Gorakhpur remains unchanged. The numbers on relief are :—on works 572, on gratuitous relief 740, total 1,312.

Punjab.—No rain. Prices are generally unchanged ; wheat is rising in Hissar, Ambala and Sialkot and falling in Rohtak, Gurgaon, and Lyallpur. Harvesting of autumn and sowing of spring crops continue. The condition and prospects of the standing crops are generally good ; the outturn of autumn crops is good to average. The condition of cotton is still unsatisfactory in Lyallpur. Locusts appeared in parts of Mianwali and laid eggs ; young locusts are slightly damaging the growing spring crops in Lahore, Amritsar, Sialkot, and Shahpur ; measures are being taken for their destruction ; insects have also damaged, the water melon crops in Mianwali. Cattle are generally in good condition. Fodder is sufficient.

North-West Frontier Province.—No rain. Rain is wanted for unirrigated tracts. Spring sowings are in progress. The condition of the standing crops on irrigated and unirrigated areas is good except in the Swabi tehsil where it is slightly below average. The standing crops have been damaged by locusts in the Kulachi tehsil. Harvest prospects and the probable outturn of autumn crops are good ; the outturn of cotton is below average in Dera Ismail Khan , picking of cotton has commenced in Bannu. The water supply is sufficient. There is no irrigation from hill torrents in Dera Ismail Khan. The condition of cattle is good except in the Kulachi tehsil where fodder is not procurable. Prices are fluctuating. Prices :—wheat $14\frac{1}{16}$ to 19 ; gram $17\frac{3}{8}$ to 22 ; maize 15 to 27¾ ; and bajra 13 to $21\frac{1}{8}$ seers per rupee.

Jammu.—No rain. Prices are stationary. Prices :—wheat 11 to 23 and maize 12 to 34 seers per rupee. The condition of the standing crops is good. Fodder is sufficient except in the Kishtwar and Ramban tehsils. Land is being prepared for the spring harvest.

Kashmir.—The weather is generally bright and is becoming cooler. Prices are almost stationary.

Rajputana.—Harvesting operations continue and also sowings for spring crops ; prospects are favourable. Slight damage by locusts is reported from Jaisalmer, Tonk Jaipur, and Kishangarh. The condition of cattle is generally good Pasturage or fodder is sufficient. Prices are rising in Jaisalmer, Tonk, Jaipur, Kishangarh, and Bharatpur ; are falling in the Hill tracts , and are steady elsewhere. Prices are still high in some places.

Central India.—No rain. Harvesting of the early autumn crops and sowing of spring crops are in progress. The standing crops and probable outturn are good. Agricultural stock and pasturage are good and sufficient Prices are high in Gwalior, Baghelkhand, and in parts of Indore ; and are falling in Bundelkhand.

The weekly report on the famine and scarcity is as follows :—All relief measures in Bundelkhand have been closed since 31st October.

Central Provinces.—With the exception of light rain in Yeotmal, Raipur, Chanda, Balaghat, and Drug, the week was rainless. The weather is clear and warm and the nights and mornings cool. Harvesting of autumn crops and spring sowi ngs have been completed in most districts. In Raipur harvesting is impeded by rain. Germination is reported good everywhere. Linseed has been injured a little in Bilaspur tahsil by insects. The standing crops are in good condition and prospects continue to be generally favourable. Fodder and water are ample. Wheat in Buldana; gram in Saugor, Damoh, Chindwara, and Buldana; rice in Damoh, and Mandla; and juar in Buldana have become slightly cheaper. Gram in Hoshangabad ahd rice in Saugor have become a little dearer; elsewhere prices are steady or fluctuate slightly but continue equal to the scarcity level in Nagpur, Chanda, Balaghat, Drug, and Bilaspur. The prices of staple food grains in several districts are still higher than those ruling at this time last year.

Bombay.—There was slight rain during the week in parts of the Konkan, the Deccan, Karnatak, and Kolhapur. More rain is needed for maturing crops and for spring sowings in parts of Broach, the Deccan and Karnatak. The standing crops have been slightly damaged by locusts in parts of Sind, Poona, Sholapur, Satara, and Bijapur; by insects in Hyderabad, Upper Sind Frontier, Broach, and Bijapur; and are generally in good condition elsewhere. The harvesting of autumn crops is progressing and a good outturn is expected; spring sowings continue except in parts of the Deccan where they are retarded for want of sufficient moisture. Cotton picking is progressing in Sukkur, Hyderabad, Thar and Parkar, Ahmedabad, Khandesh, and Ahmednagar. The supply of drinking water is sufficient and water for irrigation purposes is adequate except in parts of Nasik, Poona, and Dharwar. Agricultural stock is insufficient in parts of Ahmednagar, Sholapur, Bijapur and Cutch. Cattle are generally in good condition. The fodder supply is sufficient. Stocks of grain in the markets are adequate. Prices are falling. The quantity of grain purchasable per rupee is in the Deccan 16 to 45 per cent.; in the Karnatak 11 to 30 per cent.; and elsewhere normal to 30 per cent. less than the normal. Labourers are getting sufficient employment in the fields and the public health is generally good. The number on gratuitous relief is—Poona 44, Belgaum 24, Jamkhandi 52, total 120.

Hyderabad.—Rainfall 38 cents. Prospects continue favourable. The autumn and early rice harvests and spring sowings continue. The standing crops are fair to good. Lands are being prepared for late rice sowings which have commenced in one taluk. Prices:—wheat 8¼; coarse rice 7½; and jowar 16¾ seers per rupee.

Mysore.—The standing crops are in good condition. The prospects of the season are good but more rain is needed in parts of Mysore. Cattle are healthy and water and fodder are available.

Coorg.—Rainfall 77 cents. Picking of cardamom continues. The prices of food grains are stationary. The water and fodder supply is sufficient.

Madras.—There was no rain in the Deccan, North Arcot, Salem, Coimbatore and the Nilgiris; the fall was heavy in Ganjam; good in Vizagapatam littoral, and Godavari; and light to fair elsewhere. Irrigation supplies are sufficient except in parts of Godavari, Kistna, the Deccan, Salem and Madura. Ploughings, sowing, weeding and transplanting are in progress in parts. The standing crops are generally fair but require more rain in parts of Godavari, Kistna, Kurnool, Chingleput, and Tanjore. Harvests continue with outturn poor to normal, and bumper. Pasture is sufficient except in parts of Tinnevelly. Fodder is scanty in parts of the Circars, Bellary, Anantapur, Salem, Coimbatore, and Tanjore. The condition of cattle is generally good. The price of rice is stationary in twelve districts; has fallen in five; and has very slightly risen in five. The prices of millets have fluctuated as follows:—Ragi is stationary in six districts; has fallen in eight; and has slightly risen in seven. Cholam is stationary in four districts; has fallen in eight; and has slightly risen in three. Cumbu is stationary in two districts; has fallen in five; and has slightly risen in eight.

The number of persons in receipt of relief during the preceding and present weeks in each Province or State is shown in the following table:—

3. The Governor General in Council is further pleased to direct that the gentlemen posted to Bengal shall, on arrival at Calcutta, report themselves to the Chief Secretary to the Government of Bengal. The officers posted to Eastern Bengal and Assam should telegraph from Calcutta to the Chief Secretary to the Government of that province at Shillong for orders as to their destination, in the event of their not finding instructions awaiting their arrival. Gentlemen who land at Bombay should inquire of the Chief Secretary to

the Government of Bombay whether any orders are awaiting them from the Government of the province to which they have been posted. The officers posted to Burma should proceed to Rangoon and report themselves to the Chie Secretary to the Government of that province.

4. The officers posted to the United Provinces should report themselves to the Chief Secretary to the Government of the United Provinces, Allahabad. These posted to the Punjab should telegraph from Bombay to the Chief Secretary to the Government of the Punjab, Lahore, for orders as to their destination, in the event of their not finding instructions awaiting their arrival The officers posted to the Central Provinces should report by telegraph from Bombay their arrival to the Chief Secretary to the Chief Commissioner of those provinces at Nagpur, by whom they will be instructed to which portion of the province to proceed.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Governments of Bengal, Eastern Bengal and Assam, the United Provinces, the Punjab and Burma, and to the Hon'ble the Chief Commissioner of the Central Provinces, for information and guidance; and that a copy be forwarded to the Foreign Department for information. Also that the Resolution be published in the Supplement to the *Gazette of India*, and that a copy be forwarded to each of the gentlemen named therein.

G. B. H. FELL,

for *Secretary to the Government of India.*

CONTENTS.

PART I.

Government of India Notifications, Appointments, Promotions, etc.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Calcutta, the 12th November 1906.

No. 25.—In exercise of the power conferred by section 10 of the Indian Councils Act, 1861 (24 and 25 Vict., c. 67), and section 1 of the Indian Councils Act, 1892 (55 and 56 Vict., c. 14), the Governor General is pleased to nominate the Hon'ble Mr. Francis Alexander Slacke, of the Indian Civil Service, to be an additional Member of the Council of the Governor General for the purpose of making Laws and Regulations.

J. M. MACPHERSON,
Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

ESTABLISHMENT.

Calcutta, the 16th November 1906.

No. 1320.—The services of Mr. G. F. Arnold, of the Indian Civil Service, are replaced at the disposal of the Government of Burma, with effect from the 18th November 1906 or the subsequent date on which he may be relieved of his present duties in the Legislative Department of the Government of India.

No. 1323—Sir Arthur Upton Fanshawe, K C.I.E, C S I, C.V O, has been permitted to resign His Majesty's Indian Civil Service, with effect from the 1st October 1906.

No. 1329.—The services of Mr. W. Alder, of the Indian Civil Service, are placed at the disposal of the Finance Department.

No. 1332.—Mr. C. G Bayne, C S I, has been permitted to resign His Majesty's Indian Civil Service, with effect from the 10th November 1906.

No. 1337.—The services of Mr. C. W. E. Cotton, of the Indian Civil Service, are replaced at the disposal of the Government of Madras, with effect from the 29th October 1906.

No. 1340.—The Hon'ble Mr. R. G. Hardy, C.S I, has been permitted to resign His Majesty's Indian Civil Service with effect from the 10th October 1906 or the subsequent date on which he sailed from India or relinquished charge of office in the event of his not taking subsidiary leave.

MEDICAL.

The 16th November 1906.

No. 944—The Home Department Notification No 920, dated the 2nd November 1906, placing the services of Captain J McC. A. Macmillan, M.B., I M.S, temporarily at the disposal of the Government of Eastern Bengal and Assam, is hereby cancelled.

JUDICIAL.

The 12th November 1906.

No. 1475-A.—The Home Department Notification No. 1319 dated the 28th September 1906, regarding the resignation by the Hon'ble Sir Chunder Madhub Ghose of his office of Judge of the High Court of Judicature at Fort William in Bengal, with effect from the 13th November 1906, is hereby cancelled.

ECCLESIASTICAL.

The 16th November 1906.

No. 486.—The following should be added as a note to rule XXII in part IV of the ecclesiastical rules published with the Home Department Notification No. 178, dated the 21st May 1897:—

NOTE.—This rule does not apply to cases in which pewage, reduced by the amount of interest calculated at 4 per cent on the Government grant towards the cost of construction, is paid on account of seats used by troops.

G. B. H. FELL,
for Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

NOTIFICATIONS.

CIVIL VETERINARY ADMINISTRATION.

RESOLUTION.

POST OFFICE.

Calcutta, the 16th November 1906

No. 8831—301.—In notifying the retirement from the service of Sir Arthur Upton Fanshawe, K.C.I.E., C.V.O., C.S.I., Director General of the Post Office of India, the Governor General in Council desires to place upon record his appreciation of the eminent services rendered to the State by that officer in the Post Office of India.

2. The connection of Sir Arthur Fanshawe with the Post Office commenced in 1881, and in 1889 he was appointed Director General, a post which he held until his retirement from the service. Of the seventeen years during which he was at the head of the Department, periods of leave and deputation occupied more than three, so that he was actually responsible for the work of the Department for nearly fourteen years. The period has been one of expansion, in which the work of the Post Office has exhibited rapid and continuous growth. Since 1889 the number of units of mail matter dealt with has more than doubled, while the gross revenue of the Department has risen from R1,30,00,000 with a deficit of R7,50,000 to R2,47,50,000 with a surplus of R11,30,000 As head of the Department it was Sir Arthur Fanshawe's task to develop such institutions as the Post Office Savings Bank and the Money Order and Life Assurance schemes which were inaugurated by his predecessors. His energies were also devoted to the reduction of rates, the formation of more intimate postal relations with foreign countries and Native States, the acceleration of the Railway Mail Service and of the steamer service to Europe, and to the extension of Post Office facilities for the convenience both of the general public and of the Departments of Government. An administrator of exceptional ability, at once firm and judicious, Sir Arthur Fanshawe deserves the chief share of the credit for the development of the Post Office system during the period of his incumbency and for its present efficient and flourishing condition. The Governor General in Council found him on all occasions a most sound and sagacious adviser, whose views were expressed with admirable lucidity and on whose judgment it was safe to rely.

W. L. HARVEY,
Secretary to the Government of India.

ARMY DEPARTMENT.

Fort William, the 16th November 1906.

APPOINTMENTS.

CANTONMENT MAGISTRATES' DEPARTMENT.

No. 575.—The services of Captain V de V. Hunt, 125th Rifles, are placed at the disposal of the Hon'ble The Agent to the Governor General in Central India, for employment as officiating Assistant Cantonment Magistrate at Mhow, with effect from 1st December 1906, or such date as he may relieve Captain R. W. Burton, who is about to be transferred to Nowgong as officiating Cantonment Magistrate.

NATIVE ARMY.

96th Berar Infantry.

No. 576.—Jemadar Gopal Singh, appointed on probation in Military Department Notification No 1185 of 1904, is confirmed in that rank, with effect from the 7th October 1904.

CANTONMENTS.

REGULATIONS.

No. 577.—In exercise of the powers conferred by sections 25 and 26 of the Cantonments Act, 1889 (XIII of 1889), and in modification of the Notification of the Government of India in the Military Department, No 664, of the 16th June 1899, as subsequently amended, the Governor General in Council is pleased to alter the Cantonment Code, 1899, to the extent set forth below :

Section 2 (1).

Clause (b).—For the words "General Officer of the Command in Command Orders," *substitute* "Officer Commanding the Division, in Divisional Orders."

Clause (c) is cancelled and the following *substituted :*

(c) "Brigade" means any body of troops, placed for administrative purposes under a Commander of one or more stations having the status of a Brigadier-General or Colonel on the Staff, and excludes the Aden, Bannu, Derajat and Kohat Independent Brigades

Insert the following after clause (c) *:*

(c)(c) "Division" means one of the Divisions into which the Army in India is, for the time being, divided, and includes the Aden, Bannu, Derajat and Kohat Independent Brigades.

Clause (g) is cancelled and the following *substituted :*

(g) "Officer Commanding the Division" means the Officer Commanding a Division, and includes the Officers Commanding the Aden, Bannu, Derajat and Kohat Brigades

Section 3 (1), clause (a), is cancelled and the following *substituted* :

(a) At the head-quarter cantonment of a Division or Brigade, an officer appointed by name in Station Orders by the Officer Commanding such Division or Brigade, in all other cases the Commanding Officer of the cantonment.

Clause (b)—In the proviso *for* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 3 (2) is cancelled and the following *substituted :*—At the head-quarter cantonment of the Division or Brigade the officer appointed under section 3, sub-section (1), clause (a), in all other cases the Officer Commanding the cantonment, shall be the President of the committee and the Cantonment Magistrate shall be the Secretary.

Section 4.—For the words "General Officer of the Command" *substitute* "Officer Commanding the Division."

Section 6 (1).—For the words "General Officer of the Command" *substitute* "Officer Commanding the Division."

Section 13 (1).—For the words "Officer Commanding the District" *substitute* "Officer Commanding the Brigade, or Division, as the case may be."

Section 13 (2).—For the words "General Officer of the Command through the Officer Commanding the District," *substitute* "Officer Commanding the Division, through the Officer Commanding the Brigade, if any"

Section 14 (1)—*For* the word "District" in first line *substitute* "Brigade," and in the marginal note showing contents of the section *substitute* the word "Brigade" *for* "District."

Section 14 (2).—For the word "District" in first line *substitute* "Brigade"

Section 14 (3).—For the word "District" in first line *substitute* "Brigade," and for the words "General Officer of the Command" *substitute* "Officer Commanding the Division."

Section 15.—For the words "General Officer of the Command" in first line, *substitute* "Officer Commanding the Division," and make a corresponding alteration in the marginal note showing contents of the section.

Clause (a).—To be reconstructed as follows:

(a) "Exercise any of the powers conferred by section 14, sub-section (1), on the Officer Commanding a Brigade"

Clause (c) (i).—For the word "District" *substitute* "Brigade."

Section 16.—For the words "General Officer of the Command" *substitute* "Officer Commanding the Division."

Section 17 (2).—For the words "where such Commanding Officer is the Officer Commanding the District, the officer who would succeed to the Command of the cantonment during his temporary absence" *substitute* "at the head-quarter cantonment of the Division or Brigade the officer appointed under section (3), sub-section (1), clause (a)."

Section 18 (1).—*For* the words "General Officer of the Command" in first line *substitute* "Officer Commanding the Division."

Section 18.—In the proviso *for* the word "District" *substitute* "Brigade."

The *Explanation* is cancelled.

Section 28 (1).—*For* the words "The Secretary to the Government of India in the Military Department" *substitute* "The Secretary to the Government of India in the Army Department" and *for* the words "General Officer of the Command" *substitute* "Officer Commanding the Division" and *for* the word "Command" in last line, *substitute* "Division."

Section 28 (2).—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division"

Section 29, clause (b), is *cancelled*.

Section 30, clause (b).—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 31.—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 32. (1).—*For* the words "General Officer of the Command" *substitute* "Officer Commanding the Division" and *for* the word "District" in third line *substitute* "Brigade or the Officer Commanding the Division, as the case may be"

Section 32 (3).—*For* the word "District" *substitute* "Brigade," and *for* the words "General Officer of the Command," *substitute* "Officer Commanding the Division"

Section 32 (4).—*For* the words "General Officer of the Command" *substitute* "Officer Commanding the Division"

Section 32 (6), clause (b).—*For* the words "General Officer of the Command" *substitute* "Officer Commanding the Division," and *for* the word "District," *substitute* "Brigade"

Section 33 (1) (a).—*For* the words "General Officer of the Command" *substitute* "Officer Commanding the Division"

Section 33 (1) (b).—*For* the word "District" *substitute* "Brigade, or Officer Commanding the Division, as the case may be"

Section 33.—In the proviso *for* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 33 (2).—*For* the words "General Officer of the Command or the Officer Commanding the District," *substitute* "Officer Commanding the Division or Officer Commanding the Brigade, as the case may be."

Section 34 (1) (b).—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 38.—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 52 (3).—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division"

Section 57.—*For* the words "the Government of India in the Military Department" *substitute* "the Government of India in the Army Department," and *for* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 58.—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 60.—*For* the words "General Officer of the Command," wherever they occur, *substitute* "Officer Commanding the Division."

Section 68, clause (c) is *cancelled*, and the following *substitute* :

"The Senior Supply and Transport Officers—all cattle yards, slaughter houses, transport lines, and other places used by establishments, under their charge"

Section 72 (2).—In the proviso *for* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 73.—*For* the words "General Officer of the Command," wherever they occur *substitute* "Officer Commanding the Division."

Section 80.—In the proviso *for* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 96.—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 133.—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 178 (1).—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division"

Section 211 (2).—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division, or, if the Commanding Officer of the Cantonment is the Officer Commanding the Division, the previous sanction of the Commander-in-Chief"

Section 211 (3).—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division or the Commander-in-Chief, as the case may be."

Section 214 (1).—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 228.—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division," and *for* the words "Officer Commanding the District," *substitute* "Officer Commanding the Brigade."

Section 230, clause (j) (i).—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division."

Section 243 (1).—*For* the words "General Officer of the Command," wherever they occur, *substitute* "Officer Commanding the Division."

Section 243 (2).—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division"

Section 258 (3).—*For* the words "General Officer of the Command" *substitute* "Officer Commanding the Division," and *for* the present proviso *substitute* the following:

"Provided that where the Commanding Officer of the cantonment is not the Officer Commanding the Division, the application shall be forwarded to the Officer Commanding the Division, through the Officer Commanding the Brigade, if any."

"Provided also that the Officer Commanding the Brigade, if any, may refuse to forward such application to the Officer Commanding the Division if he considers that the occupation of the land in the manner proposed would be objectionable as aforesaid."

Section 258 (5).—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division"

Section 259 (3) (b).—*For* the words "Officer Commanding the District or his principal staff officer," *substitute* "Officer Commanding the Brigade, or if there is no such officer the Commanding Officer of the cantonment."

Section 260 (2) is reconstructed as under:—

"transmit for record to the head-quarters of the division or independent brigade the counterpart with site plan annexed; and"

Section 271 (2).—*For* the words "Officer Commanding the District," *substitute* "Officer Commanding the Brigade or Division, as the case may be."

Section 277.—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division," and *for* the words "Command Orders," *substitute* "Divisional Orders."

Section 288.—*For* the words "General Officer of the Command," *substitute* "Officer Commanding the Division," and *for* the word "District," *substitute* "Brigade."

Section 289.—*For* the word "Command," *substitute* "Divisional."

Schedule I, Form 4.—Dele the words "one anna stamp, etc." from right top corner of cheque.

Schedule I, Form 8 (Budget Estimate of Expenditure)—

The heading 6 "Police" with its sub-heads *is cancelled.*

Insert "Pounds" under heading 11 "Miscellaneous."

Schedule I, Form 8, page 125.—Footnote (*a*) is amended as under:—

"In the Lower Provinces, the Treasury Rate"

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 25th October 1906.

From the 10th November next till further notice, the complete *Gazette of India* will be published at Calcutta. After the 3rd November all notifications and other matter intended for publication in the *Gazette* should be addressed to the Publisher, 8, Hastings Street, Calcutta.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,
Secretary to the Government of India.

No. 151 of 1902.—John McFarlane and David C. Reinohl. *A process of extracting oil from cotton seed.* (Specification filed 8 August 1902.)

No. 152 of 1902.—John McFarlane and David C Reinohl. *A process of hulling cotton seed* (Specification filed 8 August 1902.)

No. 191 of 1902.—Andrew Charles Joseph Charlier *Improvements in the manufacture of lead pigments and lead or other metallic compounds and in apparatus therefor also suitable for aerating or saturating liquids with gases.* (Specification filed 8 August 1902.)

No. 201 of 1902.—Charles Fletcher *Improvements in taps or valves.* (Specification filed 5 August 1902.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 28 of 1897.—Donald Barns Morison. *Improvements in stamp mills or apparatus for crushing ores and other substances* (Specification filed 9 August 1897.)

Fee in respect of the continuance of an exclusive privilege—

4 (*f*) After the expiration of the eighth year and before the expiration of the ninth year from the date of the filing of the specification—

The sum of R100 for the above invention.

No. 397 of 1895.—Walter Francis Reid and Edward John Vavasour Earle *Improvements in nitro-compounds* (Specification filed 4 August 1896.)

Fee in respect of the continuance of an exclusive privilege—

4 (*g*) After the expiration of the ninth year and before the expiration of the tenth year from the date of the filing of the specification—

The sum of R100 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. A consolidated index for the year 1905, entitled "Inventions and Designs in 1905," is also on sale, price one rupee. It contains a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in that year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or 1*s*. 1*d*. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and Designs Act, V of 1888.

NORTH-WEST FRONTIER PROVINCE—PUBLIC WORKS DEPARTMENT

NOTIFICATION.

Peshawar, the 9th November 1906.

No. 161.—Whereas it appears to the Honourable the Agent to the Governor-General and Chief Commissioner, North-West Frontier Province, that land is required by Government for a public purpose, namely, acquisition of land round the Jail at Abbottabad.

It is hereby declared that the undermentioned land is required for the said purpose.—

Specification of land.

District.	Pargana.	Mauza.	Area in acres.	Direction.	Boundaries.	Place where the plans may be inspected.
Hazara	Abbottabad	Salhad	0·27	North	Malakpura village.	Office of Assistant Commanding Royal Engineer, Abbottabad
				East, South and West.	Jail Garden	

This declaration is made under the provision of section 6, Act I of 1894, and under section 7 of the said Act, the Deputy Commissioner, Hazara, is hereby directed to take order for the acquisition of the land specified above.

J. E. DICKIE, Colonel,
Secretary to the Honourable the Agent to the Governor-General and Chief Commissioner, North-West Frontier Province, Public Works Department.

TREASURE TROVE.

NOTICE.

It is hereby notified, under section 5 of the Indian Treasure Trove Act (VI of 1878), that about the 14th June 1906 the marginally noted treasure was found in Survey No 37 of the village of Keli Rumbhanwadi, Taluka Akola, District Ahmednagar, while the owner of the field was ploughing it.

1. One old pair of Tôl bandı (a silver ornament for arm, of females) approximately weighing R22, value R12
2. One country made old Getha (a large silver ornament worn by the worshippers of Khandôba around the neck) approximately weighing R26 12 annas, value R16
3. One nose-ring of gold with 2 Aralis and 2 Silver Gunds and green coloured crystal approximately weighing ½ tola, value R6.

All persons claiming the said treasure or any part thereof are required to appear either in person or by Agent before the Mamledar of Akola on 25th March 1907 and to assert their claim if any to the said treasure so that the matter may be enquired into and determined by the Mamledar in accordance with the provisions of the Act.

J. P. ORR,
Collector.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs., on Thursday, the 15th November 1906, based on the Indian Daily Weather Reports of the period.

The first sign of the approach of the winter type of depressions appeared this week in the fall of the barometer by a fifth of an inch in Kashmir during the 9th and 10th, which followed a corresponding, but smaller, fall at Baghdad on the 8th and in Persia on the following day. A second and generally similar fall occurred at Teheran on the 12th and had reached Kashmir by the 14th. No rainfall resulted from these disturbances, but in each case skies became thickly clouded in Kashmir. In the south of the Peninsula weather was affected during the greater part of the week by a depression which was first noticeable on the 9th as a low pressure area over the south-east of the Bay. This subsequently extended and becoming better defined reached its greatest development on the 14th and was then situated over the sea area in close proximity to the land. In other parts of the Indian area rainfall was small or absent and skies were almost or quite clear.

Burma.—Rainfall was light and local, except in Tennaserim, where falls of from one and a half inches to two inches occurred early in the week, while during the last three days rainfall ceased altogether and the skies which had been generally cloudy were becoming clear. Temperature was in slight defect for the greater part of the week.

North-east India and Orissa.—Very little rain fell in this area and the total of the week did not nearly reach the small normal amount to be expected. Skies were clear, except in Assam and Orissa, and temperature was practically normal.

United Provinces, Central India and Central Provinces.—Skies were clear throughout the week and temperature was normal or in excess—the excess occurring chiefly in the Central Provinces and Central India.

North-west India.—Weather was dry and warmer than usual, and with the exception of the cloud given by the slight disturbances already referred to skies were clear. Both day and night temperatures were above normal, but the excess was shown chiefly in night temperature in Sind and Rajputana.

The Peninsula.—In consequence of the depression over the south-west of the Bay rainfall increased during the week on the South Madras Coast. On the 13th moderately heavy rain was reported, and on the next day the depression lay off Pamban and remaining in the same position gave nearly general, and at several stations heavy, rain on the 15th.

The total rainfall for the whole period, from the 4th May to the 15th November, was 20 per cent. or more in defect in Baluchistan, Sind, parts of Rajputana and Orissa, and in excess in the West Satpuras, and the rainfall sub-divisions of Indore and Simla. It was practically normal elsewhere.

The following summarises the chief rainfall amounts of the week as reported at 8 hrs. each day:—

November 9th, Moulmein 1·56".

" 10th, Mergui 1·83" and Tavoy 1·82".

" 11th, Cuddalore 1·65" and Pamban 1·61".

" 12th, Negapatam 2·02" and Pamban 1·90".

" 13th, Trivandrum 3·04", Negapatam 3·57" and Pamban 2·47".

" 14th, Trichinopoly 3·00", Cuddalore 3·08" and Negapatam 8·06".

" 15th, Kodaikanal 2·91", Cuddalore 9·11", Negapatam 4·27", Pamban 2·33" and Tinnevelly 1·85".

J. H. FIELD,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

SIMLA,
The 15th November 1906.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 10th November 1906.

*__Burma.__—There was heavy rain on the Burma coast and also in Toungoo, Myitkyina, and Shwebo, the greatest amount was 4·63 inches in Toungoo; elsewhere the rainfall was moderate and light except in the Arakan Hill Tracts, Prome, Bhamo, Katha, Myingyan, the Northern Shan States, and the Chin Hills. Reaping of hill side paddy is progressing in Tavoy, the Southern Shan States, and the Chin Hills and is completed in parts of the Katha and the Ruby Mines districts. Reaping of early wet weather paddy is in progress in Kyaukpyu, Pegu, Myaungmya, Toungoo, Mergui, Myitkyina, Shwebo, the Northern Shan States and is completed in Sandoway. Reaping of wet weather paddy is nearly completed in the Arakan Hill Tracts and the Southern Shan States; cultivation of miscellaneous crops is in progress in Upper Burma; reaping of maize is completed in the Pauk township of Pakokku; gathering of groundnuts is commencing in Magwe and is completed in Myingyan; plucking of cotton is progressing in Sagaing, Lower Chindwin, Meiktila, and Myingyan; light crops are expected in late planted lands in Prome; the recent rain has improved prospects in Bassein and Toungoo but has done some damage in Thaton and Amherst; in the Shwetachaung and Taze tracts in Mandalay and in unirrigated parts of Yamethin sub-division a four anna crop is only expected. More rain is required in Myingyan. The condition of the standing crops is good on the whole. The price of paddy has risen slightly in Pegu, Pyapon, Katha, and considerably in Prome; has fallen slightly in Myingyan and the Southern Shan States and considerably in Mandalay.

Eastern Bengal and Assam.—The weather is seasonable. Light rain has fallen in most of the hill districts and in the Assam Valley Districts. Plucking and manufacture of tea continue, the outturn is good in Sylhet, Nowgong, and Lakhimpur; and fair elsewhere. Ploughing for and sowing of mustard and pulses are in progress. Plucking of cotton and harvesting of winter rice have commenced. Insects are causing damage to the rice crop in Sylhet and Kamrup. Prospects of cotton are bad in the Khasi and Jaintia Hills and fair elsewhere. Prospects of winter rice and other standing crops are moderate. Washing of jute is nearly finished and the outturn is good. Prices of common rice:—Manipur 20; Kohima and Comilla 10; Chittagong, Noakhali, Silchar, and Sibsagar 9; Sylhet, Tezpur, and Nowgong 8; Barisal 7½; Mymensingh, Pabna and Faridpur 7¼; Dhubri, Dacca and Dibrugarh 7; Bogra 6¾; Gauhati, Dinajpur and Malda 6½; Rampur Boalia 6¼; Rangpur, Jalpaiguri and Aijal 6; Tura 5 to 6 seers and Shillong 5 seers per rupee. Prices have risen in two; fallen in eleven; and have remained stationary in the remaining districts. The number of persons attending test works is—Dacca 146 and Comilla 250. The number of persons receiving gratuitous relief is:—Mymensingh 48, Faridpur 445, Comilla 75, and Sylhet 12,430. Prices are daily falling in most districts and the condition of people is improving.

Bengal.—There was no rain in the Province, except in Darjeeling, from where a slight shower of only 0·14 inches is reported. Spring sowings are still in progress throughout the Province. The prospects of the winter rice crop are unfavourable in Darbhanga, Muzaffarpur, Champaran, Purneah and Darjeeling and in parts of Patna and Shahabad. Damage has been done to standing crops by insect-pests in the Kharsawan State in Chota Nagpur. The number of persons receiving gratuitous relief is:—24-Parganas 10,876, Saran 788, Muzaffarpur 6,047 and Darbhanga 23,364,—total 41,075. The number of persons attending test works is:—Saran 549, Muzaffarpur 575 and Darbhanga 4,703,—total 5,827. Fodder and water are generally sufficient. The price of common rice has risen in eight districts and fallen in thirteen districts.

United Provinces.—No rain. Autumn harvesting and spring sowing continue. Irrigation has commenced. Poppy is being sown; cotton picked; and cane pressed; prospects

* [In last week's report for Burma which was published in the Gazette of the 11th instant, delete the words:—" in Minbu unirrigated paddy has failed."]

are good except of late rice in Eastern districts. Cholera is increasing in Gonda but is abating elsewhere. Malaria is decreasing but is still prevalent in a few districts. Fodder and supplies are generally sufficient. Prices have risen in five districts and fallen in four.

The weekly report on the scarcity is as follows :—Gorakhpur is the only scarcity district; late rice is withering; spring sowings are nearing completion; some damage by insects is reported from one tahsil; supplies are sufficient but prices remain high. The numbers on relief are:—on works 615; on gratuitous relief 918; total 1,533.

Punjab.—No rain. Prices of food grains are generally unchanged; wheat is falling in Rohtak, Rawalpindi, and Lyallpur. Harvesting of autumn and sowings of spring crops continue. Sugarcane pressing has commenced in Amritsar. The condition and prospects of the standing crops are generally good; the outturn of autumn crops is good to average; cotton prospects are now somewhat better in Lyallpur. Locusts appeared in Rohtak, Ferozepore, Mianwali, Lyallpur, and Multan and damaged the crops to some extent in the first and last named districts; egg-laying by locusts is reported from some districts and measures for destruction of the eggs as well as the young locusts have been taken. Damage to growing wheat by young locusts is reported from Lahore and Sialkot. The condition of cattle is generally good. Fodder is sufficient throughout the Province. There are no complaints regarding the water-supply.

North-West Frontier Province.—There is no rain during the week. Rain is wanted for unirrigated areas. Spring sowings are in progress. The condition of the standing crops on irrigated and unirrigated areas is good. Locusts have damaged the standing crops in parts of Dera Ismail Khan; measures are being taken for their destruction. The harvest prospects and the probable outturn of autumn crops are good The outturn of cotton is average in Bannu and below average elsewhere. The water-supply is sufficient; there is no irrigation from hill torrents in Dera Ismail Khan. Fodder is procurable and the condition of cattle is good. Prices are fluctuating. Prices:—wheat $14\frac{1}{16}$ to 18; gram $17\frac{3}{16}$ to $21\frac{1}{2}$; maize 15 to $26\frac{1}{4}$; and bajra 16 to 22 seers per rupee.

Jammu.—No rain. Prices are stationary. Prices:—wheat 11 to 23 and maize 12 to 34 seers per rupee. The condition of the standing crops is good except in the Kishtwar and Ramban tehsils. Fodder is sufficient except in the Ramban and Kishtwar tehsils Lands for spring sowings are being prepared.

Kashmir.—The weather is generally bright and is becoming cooler. Prices ar almost stationary.

Rajputana.—Harvesting operations continue in some places and also sowings for spring crops; prospects are favourable. Slight damage by locusts is reported from Jasalmer, Tonk, Kishangarh, and Merwara. The condition of cattle is generally good. Pasturage or fodder is sufficient Prices are rising in Shahpura and Tonk and are steady elsewhere; prices are still high in some places.

Central India.—No rain. Autumn harvesting and spring sowings are in progress. The standing crops and probable outturn are generally good. Pasturage is good and sufficient Prices are high in Gwalior and Baghelkhand; are falling in parts of Malwa and Bundelkhand; and are normal elsewhere. Opium sowing has commenced in Gwalior and Bhopawar.

Central Provinces—The week was rainless and the weather clear and cool. The autumn harvest is nearly completed and picking of cotton has commenced Spring sowings are nearly over and germination is good, resowings are in progress in Raipur where the young spring crops were damaged owing to excessive rain. Linseed has been slightly injured by insects in parts of Nagpur, Chanda, and Yeotmal but these are disappearing from Nagpur owing to cold weather. The locusts which appeared in one or two villages of the Basim taluq (Akola) have now disappeared. The price of gram has risen in Balaghat and Drug and that of juar in Akola; wheat and juar have become cheaper in Chanda by $1\frac{1}{2}$ and 4 seers, respectively; elsewhere the prices are steady or fluctuate slightly but still continue equal to the scarcity level in Nagpur, Chanda, Balaghat, Drug, and Bilaspur.

Bombay.—There was slight rain during the week in parts of the Konkan, Ahmednagar, Poona, Satara, the Karnatak, Kolhapur, and Savantwadi. More rain is needed for spring crops in parts of Broach, the Deccan and Bijapur. The standing crops have been slightly damaged by locusts in parts of Sind, Sholapur, Satara, Bijapur, Cutch and Kolhapur; by insects in Hyderabad, Upper Sind Frontier, Thar and Parkar, and Bijapur; are withering in Ahmednagar and Sholapur; and are generally in good condition elsewhere. Harvesting of autumn crops is progressing and a good outturn is expected. Spring sowings continue but are retarded in parts of Ahmednagar and Poona for want of sufficient moisture. Cotton picking is progressing in Sukkur, Hyderabad, Thar and Parkar, Ahmedabad, Khandesh, Ahmednagar, Sholapur, and Kathiawar. The supply of drinking water is sufficient and water for irrigation purposes is adequate except in parts of Nasik, Poona, and Dharwar. Agricultural stock is insufficient in parts of Ahmednagar, Sholapur, Bijapur, and Cutch. Cattle are generally in good condition and the fodder supply is sufficient. Stocks of grain in markets are adequate. Prices are falling. The quantity of grain purchasable per rupee is in the Deccan 5 to 45 per cent.; in the Karnatak 11 to 35 per cent; and elsewhere normal to 30 per cent. less than the normal. Labourers are getting sufficient employment in the fields. The public health is generally good. Thirty-six persons are being relieved gratuitously in Belgaum.

Hyderabad.—Rainfall 17 cents. Prospects continue favourable but prices are high. The autumn and early rice harvests are in progress Spring sowings are nearing completion and crops are being weeded. The standing crops are fair to good. Lands are being prepared for late rice sowings which continue in one taluk. Prices:—wheat 8½; coarse rice 7½; and jowar 17 seers per rupee.

Mysore—There was slight rain throughout the State. The standing crops are in good condition. The prospects of the season are generally good. Cattle are healthy. Water and fodder are available.

Coorg.—Rainfall 5 cents. Picking of cardamom continues. Prices of food grains are stationary. Water and fodder are sufficient.

Madras.—The rainfall was good in Madras, Malabar, Coimbatore, Nilgiris, Madura, Tinnevelly, and South Canara and light to fair elsewhere. Irrigation supplies are sufficient except in parts of the Circars, the Deccan, South Arcot, North Arcot, Salem and Madura. Ploughing, sowing, weeding and transplanting are in progress in parts. The standing crops are generally fair but require more rain in parts of Godavari, Kistna, Kurnool, Chingleput, and Tanjore. Harvests continue, with outturn bad to normal and bumper. Pasture is sufficient except in parts of Tinnevelly. Fodder is scanty in parts of the Circars, Bellary, Anantapur, Salem, and Tanjore. The condition of cattle is generally good. The price of rice is stationary in thirteen districts; has fallen in four; and has slightly risen in six. The prices of millets have fluctuated as follows.—*ragi* is stationary in five districts; has fallen in seven, and has slightly risen in nine. *Cholam* is stationary in seven districts; has fallen in one; and has slightly risen in six *Cumbu* is stationary in eight districts; has fallen in three; and has slightly risen in four.

Nepal.—*Report for the quarter ending 15th October 1906.*—The rainfall for the period was 26·51 against 28·52 for the corresponding period in 1905.

July.—Rice was transplanted throughout the month in the hills and valleys and the standing crops of Indian corn and early rice did well. Towards the end of the month apples and peaches were gathered in and the harvest was good.

August—Rice sowings were commenced in the Terai and in Nepal pears began to ripen. The crops of Indian corn and rice both in the hills and valleys prospered.

September—Pears, chillies and early rice were gathered in Nepal, the outturn was good except as regards rice which was below the average; a good crop of millet was harvested in the hills The Indian corn crops both in the hills and lower valleys and in the Terai were good. Owing to heavy floods on the plains the rice and jute crops in the Eastern Terai suffered a great deal. Early winter vegetables, mustard and potatoes for the first crop commenced to be sown in Nepal.

October.—Low land rice was harvested in the hills and valleys. Pepper was picked and garlic and onions sown.

The markets are well stocked and the price of food grains continue normal. The health of the livestock continues good throughout the country On the 9th October a flight of locusts passed over the valley in a north-easterly direction but no damage is reported to have been done.

The number of persons in receipt of relief during the preceding and present weeks in each Province or State is shown in the following table :—

Short title. 1. This Law may be called the Bangalore Prisoners Law, 1906.

Definition. 2. In this Law unless there is anything repugnant in the subject or context.

(*a*) "Court" means any officer or tribunal in the Civil and Military Station of Bangalore lawfully exercising criminal jurisdiction and includes a Justice of the Peace appointed by the Governor-General in Council within the State of Mysore.

(*b*) "Prison" includes any jail or place, whether within or without the said Station used permanently or temporarily under the general or special order of the Resident in Mysore for the confinement of persons duly committed to custody by a Court.

Removal of Prisoners. 3. The Governor-General in Council may, by general or special order, provide for the removal of any person confined in a prison:—

(*i*) under a sentence passed by a Court—

(*a*) of death, or

(*b*) of imprisonment or transportation, or

(*c*) of imprisonment in default of payment of fine, or

(*ii*) by order of a Court for default of giving security for keeping the peace or for maintaining good behaviour to any prison in British India.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, NOVEMBER 24, 1906.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 25th October 1906.

From the 10th November next till further notice, the complete *Gazette of India* will be published at Calcutta. After the 3rd November all notifications and other matter intended for publication in the *Gazette* should be addressed to the Publisher, 8, Hastings Street, Calcutta.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,
Secretary to the Government of India.

Rates of subscription.	Per annum. R	a.	p.

The 23rd November 1906

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS

Calcutta, the 22nd November 1906.

NOTIFICATIONS.

No. 4561 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 19th November 1906:—

No. 571 of 1906.—Albert John Morphett Chapple, metallurgist, of Cobar, in the state of New South Wales, commonwealth of Australia. *An improved pipe coupling.*

No. 572 of 1906.—Adolf Gentzsch, mineralogist, of No. 1 Stiftgasse, Vienna, Austria *Improvements relating to the utilization of waste rubber.*

No. 573 of 1906.—Adolf Gentzsch, mineralogist, of No 1 Stiftgasse, Vienna, Austria. *Improvements relating to the utilization of waste rubber.*

No. 574 of 1906.—Fritz Ulmer, merchant, of No 101 Provinzialstrasse, Marxlohe, Germany, and Wilhelm Kleinebreil, engineer, of No. 98 Provinzialstrasse, Walsum-Aledenrade, Germany. *Improvements in and relating to safety-device for mine-cages.*

No. 575 of 1906.—Richard Dalley and Joseph Scrafton, both carrying on business in co-partnership as oil and flour manufacturers at Lahore, in the United Provinces, under the style of the Punjab Oil and Flour Mills. *An improved method of throwing the shuttle of a weaving loom and for any other similar work.*

No. 576 of 1906.—Arthur James Billows, manufacturing chemist, of 643 Ann street Fortitude Valley, Brisbane, in the state of Queensland, commonwealth of Australia. *Improvements in the mode of producing aerated drinks and apparatus therefor.*

No. 577 of 1906.—Henry Percival Floyd, Permanent Way Inspector, Karachi, Sind, India. *Safety single locking bolts for points, switches or tongue rails for any gauge railway.*

No. 578 of 1906.—Archibald A. Crawford, engineer, of 9 Medows street, Bombay. *A tubular coupling for electrical conductors.*

No. 4562 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection from 11 A.M. to 3 P.M. at the Secretary's office, 2 Bankshall Street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 72 of 1906.—William George Wheatley, engineer, of 10 Victoria Terrace, Calcutta, Bengal. *Improvements in block signalling on railway lines.* (Specification filed 19 September 1906.)

No. 75 of 1906.—William George Wheatley, engineer, of 10 Victoria Terrace, Calcutta, Bengal. *Improvements in block signalling on railway lines.* (Specification filed 19 September 1906)

No. 108 of 1906.—William George Wheatley, engineer, of 10 Victoria Terrace, Calcutta, Bengal *Improvements in block signalling in railways.* (Specification filed 19 September 1906)

No. 119 of 1906.—William George Wheatley, engineer, of 10 Victoria Terrace, Calcutta, Bengal *Improvements in block signalling in railways.* (Specification filed 19 September 1906.)

No. 151 of 1906.—William Alfred Lambert, caretaker, of the Imperial Secretariat Buildings, 4 Government Place, Calcutta. *An alternating or reciprocating rotary fan or punkah.* (Specification filed 22 October 1906.)

No. 177 of 1906.—The Badische Anilin and Soda Fabrik, of Ludwigshafen on Rhine, in the German Empire. *Improvements in the manufacture and production of indigo paste.* (Specification filed 8 November 1906.)

No. 178 of 1906.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, North Britain. *Improvements in feed regulating devices for machines for drying tea-leaves, or analogous products.* (Specification filed 8 November 1906.)

No. 179 of 1906.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, North Britain. *Improvements in air-heating stoves, more especially intended for use in drying tea-leaf and the like.* (Specification filed 8 November 1906.)

No. 202 of 1906.—Leopold Benoit de Laitte, engineer, of No. 117 Middlesex street, London, England. *Improved apparatus for the production of carburetted air for lighting and power purposes.* (Specification filed 14 November 1906.)

No. 203 of 1906.—William Paul Nolan, clerk, of Milton, Otago, New Zealand. *Improved ticket dater.* (Specification filed 14 November 1906.)

No. 210 of 1906.—Herbert Wilfred Perry, late executive engineer, and now District Traffic Superintendent, in the employ of the South Indian Railway Company, and residing at Trichinopoly, India. *An improved renewable rail cap.* (Specification filed 8 November 1906.)

No. 4563 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 341 of 1897.—Frederick Wicks. *Improvements in type founding apparatus.* (From 17 November 1906 to 17 November 1907.)

No. 333 of 1898.—John Pettigrew. *Improvements in hinges or like mechanism for controlling the action of fall down doors.* (From 26 November 1906 to 26 November 1907.)

No. 135 of 1899.—Solomon Robert Dresser. *Improvements in insulated pipe couplings.* (From 13 November 1906 to 13 November 1907.)

No. 215 of 1899.—Dadabhoy Adurji Doomusia. *A thorough improved distilling and condensing apparatus.* (From 1 December 1906 to 1 December 1907.)

No. 450 of 1901.—Thomas Henry Pearse. *Improvements in rollers for cotton gins and the like.* (From 20 February 1907 to 20 February 1908.)

No. 53 of 1902.—Alfred Ernest Terry. *Improvements in chest expanders exercisers and the like.* (From 1 August 1907 to 1 August 1908.)

No. 208 of 1902.—Arthur Arnould Rose. *An improved railway carriage and waggon coupling, to be called the "Victor Automatic Coupling".* (From 31 January 1907 to 31 January 1908.)

No. 449 of 1902.—Arthur Arnould Rose. *Improvements in roofing tiles, to be known as Rose's perfect tile.* (From 24 March 1907 to 24 March 1908.)

No. 4564 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased :—

No. 143 of 1901.—Ernst Emil V. Hedemann and Rosenoern V. Hedemann. *Improvements in or connected with slabs or panels of plaster of Paris or the like.* (Specification filed 12 August 1902.)

No. 280 of 1901.—C. J. Bhupati Naidu. *An improved water lift, entitled the "Sri-Krishna water lift".* (Specification filed 16 August 1902.)

No. 468 of 1901.—Siegmund Nelke. *A new or improved process of tanning.* (Specification filed 12 August 1902.)

No. 474 of 1901.—Frederick John Beaumont, and William Mudd Still. *Improvements in means or apparatus for driving dynamos on railway and other vehicles from the axles thereof, and for connecting the said dynamos and batteries to lighting, heating or other circuits on such vehicles* (Specification filed 13 August 1902.)

No. 7 of 1902.—George Westinghouse. *Improvements in internal combustion engines.* (Specification filed 11 August 1902)

No. 18 of 1902.—Ralph Blakiston *Improvements in liquid meters.* (Specification filed 16 August 1902)

No. 19 of 1902.—Jose Batlle Y. Hernandez and Jose Maria Bueno Y. Oliver. *Improvements in watt-meters.* (Specification filed 12 August 1902)

No. 34 of 1902.—Alfred Lovell and George Fincken. *Hermetically sealed boxes or cases and improved means of closing same.* (Specification filed 16 August 1902)

No. 111 of 1902.—Henry Arthur Icke *Improvements in measuring weirs and the like.* (Specification filed 13 August 1902)

No. 171 of 1902.—Jahar Lall Dhar. *Numerical key-hole shield for locks and safes.* (Specification filed 15 August 1902.)

No. 183 of 1902.—Electric Lighting Boards, Limited. *Improvements in caps for glow lamps.* (Specification filed 13 August 1902.)

No. 184 of 1902.—Electric Lighting Boards, Limited. *An improved flexible electrical conductor from any point of which a current may be taken* (Specification filed 13 August 1902.)

No. 185 of 1902.—Electric Lighting Boards, Limited *Improvements in electrical connections for tables and the like.* (Specification filed 13 August 1902.)

No. 186 of 1902.—Count Eugene Piatti dal Pozzo. *An electric race course for recreation.* (Specification filed 13 August 1902)

No. 204 of 1902.—George Failing and William Hulburt Clinton *Improvements in or relating to block-signal systems for railways.* (Specification filed 13 August 1902)

No. 244 of 1902.—Sir Bradford Leslie. *Improvements in apparatus for measuring and conveying coal or the like.* (Specification filed 13 August 1902.)

No. 273 of 1902.—William Edward Cook. *Improvements in rotary pumps.* (Specification filed 13 August 1902.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 66 of 1894.—Samuel Cleland Davidson and Fredrick George Maguire *A machine for packing tea or other substances in chests, cases or other like receptacles.* (Specification filed 16 August 1894)

Fee in respect of the continuance of an exclusive privilege—

4 (*i*) After the expiration of the eleventh year and before the expiration of the twelfth year from the date of the filing of the specification—

The sum of R100 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. A consolidated index for the year 1905, entitled "Inventions and Designs in 1905," is also on sale, price one rupee. It contains a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in that year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or 1*s.* 1*d.* Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and Designs Act, V of 1888.

REVENUE AND FINANCIAL SECRETARY TO THE CHIEF COMMISSIONER, NORTH-WEST FRONTIER PROVINCE.

NOTIFICATION.

Peshawar, the 15th November 1906.

No. 4900.—In accordance with the provisions of section 27 (3) of Act X of 1904 (The Co-operative Credit Societies Act), it is hereby notified that the Honourable the Chief Commissioner proposes to make the following rules under section 27 (1) and (2) (*p*) of the said enactment for the working of the Co-operative Credit Societies in the North-West Frontier Province. The rules proposed will be taken into consideration on or after the 1st January 1907.

Rules.

(8) Any dispute touching the business of a Society between members or past members of the Society or persons claiming through a member or past member or between a member or past member or persons so claiming and the Committee or any officer of the society shall be referred for decision to the Registrar or, if he so directs, to arbitration.

(9) If the dispute is referred to arbitration and the parties do not agree in the choice of an arbitrator or arbitrators, they or either of them may apply to the Collector to appoint an arbitrator or arbitrators, and the Collector shall have authority to make the appointment accordingly.

(10) In proceedings under these rules which relate to any dispute the statements of the parties and their witnesses shall be recorded, and the Registrar or arbitrator or arbitrators, as the case may be, shall decide the case after hearing the evidence and considering any documentary evidence produced, and shall record the decision, which shall be final.

M. F. O'DWYER,

Revenue and Financial Secretary to the Chief
Commissioner, N.-W. Frontier Province.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs., on Thursday, the 22nd November 1906, based on the Indian Daily Weather Reports of the period.

During the past week the weather was dry over the whole Indian region, with the exception of a few isolated falls of rain in Burma and Assam and scattered rainfall in the south of the Peninsula. The latter rainfall was associated with the continuance in the south-west of the Bay of the unsettled conditions which were noted last week, and had already been giving wet weather in that region. By the 22nd, however, pressure was again practically normal over the Peninsula, and the rainfall had diminished to a very few light falls which occurred chiefly on the south Madras coast.

Burma.—Maymyo reported one inch of rain on the 16th, but this was the only fall that exceeded a tenth of an inch in amount. Skies were clear or only lightly clouded on most days, and temperature was generally normal: in Tenasserim, however, night temperature was in moderate to considerable defect during the greater part of the week.

North-east India and Orissa.—Shillong is the only station that reported rain. Skies were clear, except for a little cloud in Bihar, Chota Nagpur and the coast districts, and temperature was normal or in slight excess.

The United Provinces, Central India, and the Central Provinces.—Cloud appeared during the latter half of the week in Central India and the Central Provinces and gave high night temperatures there. In the United Provinces skies were clear throughout the week, and temperature remained high both by day and night.

North-west India.—Cloud appeared in Kashmir at the close of the week and was associated with a fall of the barometer in the north-western Himalayas, but in other parts of north-west India skies remained clear. Both day and night temperatures were higher than usual, especially in Sind and the adjacent districts, where the excess in mean temperature averaged 6°.

The Peninsula.—Light to moderate rain was reported from the south-eastern districts on the 16th, but there was no rain on the 18th and 19th, and during the remaining days the rainfall was light. Throughout the week it was almost confined to the Coromandel coast and the extreme south of the Malabar coast. Skies were cloudy in the southern coast districts and from there northwards along the East Coast, and temperature, which was in slight defect in the area of rainfall, was practically normal over the greater part of the division.

The total rainfall for the whole period, from the 4th May to the 22nd November, was twenty per cent or more in defect in Baluchistan, Sind, parts of Rajputana and Orissa, and practically normal elsewhere, except in the West Satpuras and the sub-divisions of Indore and Simla, where it was in excess.

The following summarises the chief rainfall amount of the week as reported at 8 hrs., each day:

November 16th, Maymyo 1·02", Kodaikanal 1·50", Cuddalore 3·15", Negapatam 2·10" and Pamban 1·29".

" 17th, Shillong 0·75".

" 20th, Masulipatam 1·10", Nellore 0·88" and Cuddalore 1·19".

" 21st, Cuddalore 2·11" and Negapatam 1".

RAINFALL DIVISION WITH REPRESENTATIVE STATION.	Rainfall sub-division named after representative station.	Rainfall data for week ending on 22nd November 1906. Average actual rainfall.	Average normal rainfall.	Excess or defect in inches.	Rainfall data from 4th May 1906 to 22nd November 1906. Average actual rainfall of season to date.	Average normal rainfall. J. H. FIELD,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

SIMLA,
The 22nd November 1906.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 17th November 1906.

Burma.—Slight rain fell in eleven districts and in the Northern and Southern Shan States. Reaping of hill side paddy has commenced in parts of Thayetmyo; is progressing in Salween, the Southern Shan States and Chin hills; and is nearly completed in Tavoy. Reaping of early wet weather paddy has commenced in Prome, Thaton, Sagaing, and parts of Henzada and Kyaukse; is progressing in eleven districts and in the Northern Shan States; and is completed in parts of Katha and the Ruby Mines district. Reaping of wet weather paddy has commenced in Myitkyina and in the Northern Shan States and is practically completed in the Arakan hill tracts. Cultivation of miscellaneous crops is progressing in Upper Burma. Plucking of cotton is progressing in Pakokku and Lower Chindwin; is completed in Meiktila; and is nearly completed in Myingyan and Sagaing. The standing crops in Myingyan are withering for want of rain and more rain is wanted in Pakokku. In the Myinmu township of Sagaing the millet and sesamum crops are withering for want of rain. The condition of standing crops is generally good and prospects are favourable. The price of paddy has risen slightly in Pyapon, Thayetmyo and Myingyan, and considerably in Katha; it has fallen considerably in Akyab; and slightly in Pegu, Henzada, Shwebo and the Southern Shan States.

Eastern Bengal and Assam.—The weather is seasonable. Light rain has fallen in hill districts, but elsewhere there was no rain Plucking and manufacture of tea continue, the season is coming to a close, the outturn is good in Nowgong, middling in Kamrup, and fair in Darrang and Sibsagar. Ploughing for and sowing of mustard and pulses, plucking of cotton, and harvesting of winter rice are in progress Sowing of linseed has commenced. Insects are causing damage to the rice crop in parts of Mymensingh, Sylhet and Kamrup. Prospects of cotton are bad in the Khasi and Jaintia hills and fair elsewhere. Prospects of winter rice and of other standing crops are moderate. Washing of jute is finished and the outturn is good. Prices:—common rice—Manipur 20; Silchar 10 to $10\frac{1}{4}$; Chittagong and Kohima $10\frac{6}{16}$; Comilla $9\frac{7}{16}$, Noakhali and Sibsagar 9; Sylhet $8\frac{3}{4}$; Barisal $8\frac{1}{2}$; Dacca, Tezpur and Nowgong 8; Pabna $7\frac{3}{4}$; Mymensingh, Gauhati and Dibrugarh $7\frac{1}{2}$; Faridpur 7 to $7\frac{1}{2}$; Rangamati and Dhubri 7; Bogra $6\frac{3}{4}$; Malda $6\frac{1}{8}$; Rampur Boalia, Dinajpur and Jalpaiguri $6\frac{1}{2}$; Aijal 6; Tura 5 to 6; Rangpur $5\frac{1}{2}$; and Shillong 5 seers per rupee. Prices have risen in three, fallen in nine; and have remained stationary in the remaining districts.

The number of persons receiving gratuitous relief is:—Mymensingh 9, Noakhali 467, and Sylhet 7,402: 115 persons are employed on test works in Dacca: about 351 persons in Tippera; and 21 persons in Noakhali. New rice is coming on the market. Prices are daily falling in most districts and the condition of the people is improving.

Bengal.—During the week under report there was no rain in the Province except a very slight shower of 0·04 inches in Darjeeling. Rain is wanted for spring crops in Shahabad, Saran, Champaran, Darbhanga and Purnea. Harvesting of sugarcane has commenced in parts of Bihar. Prospects of *aman* paddy are still reported to be unfavourable in Darbhanga, Champaran, Darjeeling and in parts of Purnea. Some damage has been done to spring seedlings by insect pests in Gya. The number of persons receiving gratuitous relief is—24-Parganas 10,493, Saran 994, Muzaffarpur 4,427 and Darbhanga 19,454—total 35,368. The number of persons attending test-works is—Saran 657, Muzaffarpur 882 and Darbhanga 14,213—total 15,752. Fodder and water are generally sufficient. The price of common rice has risen in three and fallen in ten districts.

United Provinces.—No rain. Autumn harvesting and spring sowings are nearing completion and irrigation has commenced. Some damage by locusts is reported from Aligarh. Prices show little change.

The weekly report on the scarcity is as follows:—There was no rain in Gorakhpur where it is needed for the rice crop which is withering in most places. Spring sowings are nearly completed. Prices are still very high. The numbers on relief are:—on works 412, on gratuitous relief 953, total 1,365.

Punjab.—(Report not received).

North-West Frontier Province.—There was no rain during the week. Rain is still wanted for unirrigated tracts. Spring sowings are in progress. The condition of the

standing crops on irrigated and unirrigated areas is good; in Dera Ismail Khan the standing crops have been damaged by locusts which were destroyed as far as possible. Harvest prospects and the probable outturn of autumn crops are fair. The outturn of cotton is average in Bannu and below average elsewhere. The water-supply is sufficient except in the Swabi tehsil. The Kilapani supply is below average and there has been no irrigation from hill torrents in Dera Ismail Khan. Fodder is sufficient. The condition of cattle is below average in Dera Ismail Khan: elsewhere it is good. Prices are slightly falling. Prices:—wheat 14⅝ to 18⅞; gram 17$\frac{11}{16}$ to 21¼; maize 15 to 28⅜; and bajra 16 to 23 seers per rupee.

Jammu.—No rain. Prices are fluctuating. Prices:—wheat 15 to 27 and maize 14 to 35 seers per rupee. The condition of the standing crops is good. Fodder is sufficient except in the Kishtwar and Ramban tehsils where it is scarce. Land for spring sowings is being prepared.

Kashmir.—The weather is generally bright and is becoming cooler. Prices are almost stationary.

Rajputana.—Harvesting operations continue in some places and also sowings for spring crops; prospects are favourable. Slight damage by locusts is reported from Marwar, Jaisalmer, Mewar, Tank and Kishangarh. The condition of cattle is generally good. Pasturage or fodder is sufficient. Prices are rising in Kotah; are falling in Shahpura and Tank; and are steady elsewhere. Prices are still high in some places.

Central India.—No rain. Harvesting of autumn crops and sowing of spring crops are in progress. The standing crops and probable outturn are generally fair to good. The condition of agricultural stock and pasturage is fair to good. Prices are high in Gwalior and Baghelkhand; are falling in parts of Malwa, Bundelkhand and Indore; and are normal elsewhere. Sowing of opium has commenced in Malwa and Bhopawar.

Central Provinces.—The weather continues to be clear and cool. Harvesting of autumn crops and picking of cotton are in progress. Spring sowings are nearing completion and germination is good, but a shower of rain in parts of Chindwara, Nagpur, Wardha, and more dew in Akola would be very beneficial. *Tur* in Wardha and Nagpur, linseed in Akola, and *ringni juar* in Chanda have been slightly damaged by insects. Prospects are generally good. Fodder and water are sufficient. Rice has become cheaper and grain dearer in Mandla and Buldana, respectively, by a seer per rupee; elsewhere the prices are steady and continue equal to the scarcity rate in Nagpur, Chanda, Balaghat, Drug and Bilaspur.

Bombay.—There was slight rain during the week in parts of Ratnagiri and Poona. More rain is needed in parts of the Deccan and Bijapur, where the spring crops are said to be withering. There has been slight damage to the standing crops by locusts in parts of Karachi, Thar and Parkar, Sholapur, Satara and Bijapur; by insects in Hyderabad, Upper Sind Frontier, Thar and Parkar, and Bijapur; and by rats in Karachi and Thar and Parkar; crops are generally in good condition elsewhere. Harvesting of autumn crops is progressing and threshing has commenced in Sind, Kaira, Broach, Kolaba, Nasik, Ahmednagar and Baroda. Spring sowings continue, but are retarded in parts of Ahmednagar and Poona for want of sufficient moisture. Cotton picking is progressing in Sukkur, Hyderabad, Thar and Parkar, Ahmedabad, the Deccan and Kathiawar. The supply of drinking-water is sufficient and water for irrigation purposes is adequate, except in parts of Nasik, Poona, and Dharwar. Agricultural stock is generally sufficient and in good condition. The fodder supply is adequate. Prices of food grains are falling. The quantity purchasable per rupee is in the Deccan 4 to 45 per cent.; in the Karnatak 11 to 35 per cent. less than normal; elsewhere normal to 25 per cent. below normal. Labourers get sufficient employment in fields. The public health is generally good.

Hyderabad.—There was no rain during the week. Rain is required in two talukas. The autumn and early rice harvests continue. The standing spring crops are in good condition except in one taluka of Aurangabad. Weeding is in progress. Lands are being prepared for late rice sowings. Locusts have appeared in two taluks of Usmanabad. Prices are rising. Prices:—wheat 8¼; coarse rice 7½, and jowar 16⅝ seers per rupee.

Mysore.—The standing crops are in good condition and are being harvested throughout the State. The prospects of the season are good. Cattle are healthy, and water and fodder are available.

Coorg.—Rainfall 2 cents. Picking of cardamon continues. Picking of coffee has commenced. Prices of food grains are stationary. Water and fodder are sufficient.

Madras.—There was no rain in the Circars, Deccan, Nellore, South Canara; the fall was very heavy in Tanjore; heavy in South Arcot, Trichinoply, Chingleput and Tinnevelly; good in Madura, Madras, Coimbatore, Nilgiris; and fair elsewhere Irrigation supplies are sufficient except in parts of the Circars, the Deccan, North Arcot, Salem and Madura Ploughing, sowing, weeding and transplanting are in progress in parts. The standing crops are generally fair, but require more rain in parts of Godavari, Kistna, Kurnool, Nellore and Chingleput. Harvests continue with outturn poor to normal and bumper Pasture is sufficient. Fodder is scanty in parts of the Circars, Bellary, Anantapur, Salem and Tanjore. The condition of cattle is generally good The price of rice is stationary in seven districts, has fallen in two; and has slightly risen in fourteen. The prices of millets have fluctuated as follows:—*Ragi* is stationary in eight districts; has fallen in five, and has slightly risen in eight. *Cholam* is stationary in four districts, has fallen in five; and has slightly risen in five *Cumbu* is stationary in four districts; has fallen in three, and has slightly risen in eight.

The number of persons in receipt of relief during the preceding and present weeks in each Province or State is shown in the following table:—

Name of Province or State	Preceding week (Revised figures)			Present week			Increase or decrease.

FREDERICK NOËL-PATON,
Director-General of Commercial Intelligence

W. L. HARVEY,
Secretary to the Government of India

Calcutta, November 23, 1906

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

CUSTOMS.

Calcutta, the 22nd November 1906.

Customs Circulars Nos. IX and X of 1906 are published for general information:—

Customs Circular No. IX of 1906.

No. 3103-S. R., dated the 20th May 1904.

From—J. CAMPBELL, Esq., I.C.S., Under-Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT,

To—The Secretary to the Government of Madras, Revenue Department.
The Secretary to the Government of Bombay, Revenue Department.

I AM directed to acknowledge the receipt of your letter, No. 2054, dated the 29th August 1903, and No 513 dated the 8th March 1904 / letter, No. 1751, dated the 4th March 1904, regarding the exemption from customs duty of articles of British Indian production or manufacture imported into British India by land.

2. In reply, I am to say that the Government of India are pleased to exempt such goods from customs duty, subject to the conditions that their identity is established to the satisfaction of the Collector of Customs, and that the goods are imported into British India within six months from the date of their exportation. The exemption will extend to all goods, manufactured or produced in British India, which are exported to foreign territory and subsequently imported into India by land, with the exception of the articles enumerated in Schedules II and III of the Indian Tariff Act, 1894 (VIII of 1894), which are subject to special treatment.

* * * * * * * *

Customs Circular No. X of 1906.

No. 5449-S. R., dated the 31st August 1904.

From—J. CAMPBELL, Esq., I.C.S., Under-Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT,

To—The Secretary to the Government of Bombay, Revenue Department.

I AM directed to acknowledge the receipt of your letter No. 5827, dated the 30th July 1904, in which you suggest that the period within which articles of foreign production or manufacture may, under certain conditions, be re-imported into British India by land, free of duty, should be reduced from three years to six months. This recommendation is made in view of the orders issued with the letter in this Department,* No. 3103-S. R., dated the 20th May 1904, regulating the admission of similar articles of British Indian origin imported by land. In reply, I am to say that the Government of India accept the suggestion.

* Customs Circular No. IX of 1906.

Government of India Notifications, Appointments, Promotions, etc.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Calcutta, the 29th November 1906.

No. 26.—In exercise of the power conferred by section 10 of the Indian Councils Act, 1861 (24 and 25 Vict., c. 67), and section 1 of the Indian Councils Act, 1892 (55 and 56 Vict., c. 14), the Governor General is pleased to nominate Mr. Henry Alexander Sim, C.I.E., of the Indian Civil Service, to be an Additional Member of the Council of the Governor General for the purpose of making Laws and Regulations.

R SHEEPSHANKS,
Deputy Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

SANITARY.

PLAGUE.

Calcutta, the 30th November 1906.

No. 2078.—Whereas the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Srirangam in the Trichinopoly district of the Madras Presidency, if persons from the Mysore State, the cities of Bombay and Calcutta and the district of Howrah in Bengal are permitted to assemble at that place on the occasion of the ensuing Vaikunta Ekadasi Festival:

In exercise of the power conferred by section 2, sub-section (*1*), of the Epidemic Diseases Act, 1897 (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Trichinopoly Fort, Trichinopoly Junction, Trichi Palakarai, Tiruverumbúr, Murungappettai, Elamanur, and Perugamani on the South Indian Railway, shall be sold from the 6th December 1906 to the 4th January 1907 (both days inclusive) within the Mysore State, the cities of Bombay and Calcutta and the district of Howrah in Bengal to any person intending or believed to be intending to proceed to the Vaikunta Ekadasi Festival at Srirangam.

No. 2085.—Whereas the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Tiruvallur in the Chingleput district of the Madras Presidency, if persons from the Mysore State are permitted to assemble at that place on the occasion of the ensuing Tai New Moon and Brahmotsavam Festival of Sri Viraraghavaswami:

In exercise of the power conferred by section 2, sub-section (*1*), of the Epidemic Diseases Act, 1897 (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Tinnanúr, Sevvápet Road, Tiruvallúr, Kadambattúr, Manur and Tiruvelangadu on the Madras Railway shall be sold from the 9th to the 13th January 1907 (both days inclusive) within the Mysore State to any person intending or believed to be intending to proceed to the Tai New Moon and Brahmotsavam Festival of Sri Viraraghavaswami at Tiruvallúr.

No. 2091.—Whereas the Governor General in Council is satisfied that there is a danger of an outbreak of dangerous epidemic disease at Chidambaram in the South Arcot District of the Madras Presidency, if persons from the Mysore State are permitted to assemble at that place on the occasion of the ensuing Arudradarsanam Festival:

In exercise of the power conferred by section 2, sub-section (*1*), of the Epidemic Diseases Act, 1897 (III of 1897), the Governor General in Council is pleased to direct that no tickets to travel by railway to the stations of Alapákkam, Puduchattiram, Porto Novo, Kille, Chidambaram, Coleroon and Shiyali on the South Indian Railway shall be sold from the 17th to the 31st December 1906 (both days inclusive) within the Mysore State to any person intending or believed to be intending to proceed to the Arudradarsanam Festival at Chidambaram.

(*a*) impressed Stamps ; and

(*b*) adhesive Stamps.

CHAPTER II.

OF IMPRESSED STAMPS.

Hundi.

3. (1) Hundis, other than hundis which may be stamped with an adhesive stamp under section 11 of the Act, shall be written as follows, namely :—

(*a*) A hundi payable otherwise than on demand, but not at more than one year after date or sight and for an amount not exceeding rupees thirty thousand in value, shall be written on paper on which the necessary stamp bearing the word "Hundi" has been engraved or embossed.

(*b*) A hundi for an amount exceeding rupees thirty thousand in value, or payable at more than one year after date or sight, shall be written on paper, supplied for sale by the Government, to which a label has been affixed by the Superintendent of Stamps at Karachi or Lahore, and impressed by such officer in the manner herein-after prescribed by rule 10.

(2) Every sheet of such paper shall be of a size not less than 8½ × 5½ inches, and no plain paper shall be joined to it

(3) The provisions of sub-section (1) of Rule 6 shall apply also in the case of hundis.

(4) A promissory note or bill of exchange shall, except as provided by section 11 of the Act and by these rules, be written on paper, on which the necessary stamp, with or without the word "Hundi", has been engraved or embossed.

Promissory note and bills of exchange.

(5) Every other instrument chargeable with duty shall, except as provided by section 11 of the Act, be written on paper, on which the necessary stamp, not bearing the word "Hundi", has been engraved or embossed.

Other instruments.

6. (1) Where two or more sheets of paper on which stamps are engraved or embossed are used to make up the amount of duty chargeable in respect of any instrument, a portion of such instrument shall be written on each sheet so used.

Provision where single sheet of paper is insufficient.

(2) Where a single sheet of paper, not being paper bearing an impressed hundi-stamp, is found insufficient to admit of the entire instrument being written on the side of the paper which bears the stamp, so much plain paper may be subjoined thereto as may be necessary for the complete writing of such instrument:

Provided that in every such case the side of the sheet which bears the stamp shall be covered by a substantial part of instrument before any part of the latter is written on the plain paper joined to such sheet.

7. The duty payable on any instrument which is chrgeable with a duty of one anna under the Act may be denoted by a coloured impression marked on a skeleton form of such instrument by the Superintendent of Stamps at Karachi or Lahore.

One anna impressed stamps.

8. The Superintendents of Stamps at Karachi and Lahore are empowered to affix and impress labels, and each of them shall be deemed to be "the proper Officer" for the purposes of the Act and of these rules.

"The proper Officer."

9. (1) Labels may be affixed and impressed by the proper Officer in the case of any of the instruments mentioned in Appendix A, and of the counterparts thereof.

Affixing and impressing of labels by proper officer permissible in certain cases.

(2) Labels may likewise be affixed and impressed by the proper officer in the case of any of the instruments mentioned in Appendix B, when written in any European language, and accompanied, if the language is not English, by a translation into English.

10. (1) The proper officer shall, upon any such instrument as is referred to in rule 9 being brought to him before it is executed, and upon application being made to him for that purpose, affix thereto label or labels of such value as the applicant may desire and pay for and impress such label or labels by means of a stamping machine, and also stamp or write on the face of the label or labels the date of impressing the same before returning the instrument to the applicant. In the case of instruments written on parchment, the labels shall be further secured by means of metallic eyelets.

Mode of affixing and impressing labels.

(2) On affixing any label or labels under this rule, the proper officer shall, where the duty amounts to rupees five or upwards, write on the face of the label or labels his initials and where the duty amounts to rupees twenty or upwards, shall also attach his usual signature, to the instrument immediately under the label or labels.

11. (1) Instruments (other than instruments which under section 11 of the Act, may be stamped with adhesive stamps) executed out of British India or the Agency territories and requiring to be stamped after their receipt in the Agency territories shall be stamped with impressed labels.

Certain instruments to be stamped with impressed labels.

(2) Where any such instrument as aforesaid is taken to the Collector under section 18, sub-section (2), of the Act, the Collector shall send the instrument to the proper officer, remitting the amount of duty paid in respect thereof; and the proper officer shall stamp the instrument in the manner prescribed by rule 10 and return it to the Collector for delivery to the person by whom it was produced.

CHAPTER III.

OF ADHESIVE STAMPS.

12. Bills of exchange payable otherwise than on demand and drawn in sets, when the amount of duty does not exceed one anna for each part of the set, may be stamped with adhesive stamps.

Bills of exchange.

13. When any instrument of transfer of shares in a Company or Association is written on a sheet of paper on which the necessary stamps is engraved or embossed, and the value of the stamps so engraved, or embossed is subsequently, in consequence of a rise in the market value of such

Supply of deficient duty on transfer of share.

shares, found to fall short of the amount of duty chargeable under article No. 62(a) of Schedule 1 to the Act, one or more adhesive stamps bearing the words "Share Transfer," as hereinafter prescribed, may be used to make up the amount required.

Adhesive stamp or stamps denoting duty of one anna or half an anna.

14. Except as otherwise provided by these rules the adhesive stamp or stamps used to denote the duty of one anna shall bear the words "One Anna" or "Half Anna" as the case may be, and the adhesive stamp used to denote the duty of half an anna shall bear the words "Half Anna"; and such stamp or stamps may be superscribed either for postage or for revenue or for both postage and revenue.

Special adhesive stamps to be used in certain cases.

15. The following instruments, when stamped with adhesive stamps, shall be stamped in the manner hereinafter prescribed, that is to say :—

(a) Bills of exchange, cheques, and promissory notes drawn or made out of British India or the Agency territories and chargeable with a duty of more than one anna, shall be stamped with adhesive stamps bearing the words "Foreign Bill."

(b) Transfers of shares of Public Companies and Associations shall be stamped with adhesive stamps bearing the words "Share Transfer."

(c) Notarial acts shall be stamped with adhesive Foreign Bill stamps bearing the word "Notarial."

(d) Copies of maps or plans certified to be true copies shall be stamped with adhesive court-fee stamps.

CHAPTER IV.

MISCELLANEOUS.

Provision for cases in which improper description of stamp is used.

16. When an instrument bears a stamp of sufficient amount, but of improper description, the Collector may, on payment of the duty with which the same is chargeable, certify by endorsement on the instrument that it is duly stamped :

Provided that if application is made within three months of the execution of the instrument, and the Collector is satisfied that the improper description of stamp was used solely because of the difficulty or inconvenience of procuring one of proper description, he may remit the further payment of duty prescribed in this rule.

Evidence as to circumstances of claim to refund or renewal.

17. The Collector may require any person claiming a refund or renewal under Chapter V of the Act, or his duly authorised agent, to make an oral deposition on oath or affirmation, or to file an affidavit, setting forth the circumstances under which the claim has arisen, and may also, if he thinks fit, call for the evidence of witnesses in support of the statement set forth in any such deposition or affidavit as aforesaid.

Payment of allowances in respect of spoiled or misused stamps or on the renewal of debentures.

When an application is made for the payment, under Chapter V of the Act, of an allowance in respect of a spoiled or misused stamp, or on the renewal of a debenture, and an order is passed by the Collector sanctioning the allowance or calling for further evidence in support of the application, then if the amount of the allowance or the stamp given in lieu thereof is not taken, or if the further evidence required is not furnished, as the case may be, by the applicant within one year of the date of such order as aforesaid, the application shall be struck off and the spoiled or misused stamp (if any) sent to the Superintendent of Stamps at Karachi or Lahore for destruction.

Mode of cancelling original debenture in case under section 55 of Act.

18. Where the Collector makes refund under section 55 of the Act, he shall cancel the original debenture by writing on or across it the word "Cancelled" and his usual signature with the date thereof.

Rewards.

19. On the conviction of any offender under Chapter VII of the Act, the Collector may grant to any person who appears to him to have contributed thereto a reward within a limit to be fixed by the Local Government.

APPENDIX A.

List of instruments referred to in rule 9(1) of the rules.

	Number of Article in Schedule 1 of the Act.
(a) Administration bounds	2
(b) Affidavits	4
(c) Appointments made in execution of a power	7
(d) Articles of Association of a Company	10

(e) Articles of Clerkship	11
(f) Bills of lading	14
(g) Charter parties	20
(h) Declarations of trust	64 A
(i) Instruments evidencing an agreement relating to (1) the deposit of title-deeds or instruments constituting or being evidence of the title to any property whatever (other than a marketable security), or (2) the pawn or pledge or hypothecation of moveable property	6
(j) Leases printed or lithographed in an oriental language, when the written matter filled in does not exceed one-fourth of the printed matter	35
(k) Memoranda of Association of Companies	39
(l) Mortgages of crops	41
(m) Notes of protest by Masters of ships	44
(n) Policies of insurance	47
(o) Revocations of trust	64 B
(p) Share warrants issued by a Company in accordance with section 30 of the Indian Companies Act, 1882 (VI of 1882), other than share-warrants issued before the fourteenth day of November, 1890, with adhesive stamps bearing the words "Share Transfer" and denoting the full amount of duty payable thereon, which share-warrants shall be held to have been duly stamped	59
(q) Warrants for goods	65

APPENDIX B.

List of instruments referred to in rule 9 (2) of the rules.

	Number of Article in Schedule 1 of the Act
(a) Agreements or memoranda of agreements which, in the opinion of the proper officer, cannot conveniently be written on sheets of paper on which the stamps are engraved or embossed	5
(b) Instruments engrossed on parchment and written in the English style which, in the opinion of such officer, cannot conveniently be written on sheets of paper on which the stamps are engraved or embossed	..
(c) Awards	12
(d) Bills of exchange payable otherwise than on demand and drawn in the Agency territories	13 (b) and (c).
(e) Bonds	15, 16, 26, 34, 56, 57.
(f) Certificates of sale	18
(g) Composition deeds	22
(h) Conveyances	23
(i) Instruments imposing a further charge on mortgaged property	32
(j) Instruments of apprenticeship	9
(k) Instruments of co-partnership	46 A
(l) Instruments of dissolution of partnership	46 B
(m) Instruments of exchange	31
(n) Instruments of gift	33
(o) Instruments of partition	45
(p) Leases	35
(q) Letters of license	38
(r) Mortgage deeds	40
(s) Powers of attorney	48
(t) Reconveyances of mortgaged property	54
(u) Releases	55
(v) Settlements	58
(w) Transfers of the description mentioned in Article 62, clauses (c), (d), and (e), of Schedule 1 of the Act	62 (c), (d) and (e).

No. 4777-*I. A.*—Mr. F. D. H. Joy is appointed to be an Assistant Master in the Daly College, Indore, with effect from the 29th October 1906.

No. 2871-*G.*—Mr. S. S. Waterfield, Assistant Commissioner, is posted as District Judge, Bannu and Dera Ismail Khan.

No. 2875-*G.*—Captain H. Stewart, a Political Assistant of the 3rd class, is posted as Assistant Political Agent in Loralai.

L. W. DANE,
Secretary to the Government of India.

No. 6633-E. G.—Mr. P. G. Jacob is posted as Assistant Comptroller General with effect from the 7th of November 1906.

The 28th November 1906.

No. 6651-E.O.—Captain A. L. C. McCormick, R.E., is placed temporarily on special duty in the Bombay Mint with effect from the 23rd of November 1906.

The 30th November 1906.

No. 6703-E.O.—Mr. W H Dobbie, Accountant General, Madras, is granted privilege leave for 1 month and 19 days, with effect from the 26th of October 1906

Mr. K. B. Wagle, Deputy Accountant General, Madras, is appointed to officiate as Accountant General, Madras, with effect from the 26th of October 1906, during the absence on privilege leave of Mr W. H. Dobbie or until further orders.

No. 6704-E.O.—Mr A. H Clarke is posted as Deputy Accountant General, Madras, with effect from the 30th of October 1906.

No. 6728-E.O.—Mr T. K. Rajagopalan is posted as Assistant Comptroller General, with effect from the 25th of November 1906.

ACCOUNTS, ETC.

MINT.

The 28th November 1906

No. 6650-A—The following statements showing the position of the Gold Standard Reserve are published for general information :—

I. Statement of Receipts, Charges and Balance of the Reserve for the quarter ending on the 30th September 1906 .—

	Dr. £		Cr. £
Opening Balance	13,656,603		
Net profit on coinage	1,148,367		
Interest on Investments (including discount on Treasury Bills)	80,567	Closing Balance	14,885,537
TOTAL	14,885,537	TOTAL	14,885,537

II. Statement showing the form in which the balance of the Reserve was held on the 30th September 1906 :—

	£
As a book credit	247,956
Silver bullion in India sufficient to coin rupees equivalent to	2,301,867
British Government 2½ per cent. Consolidated Stock, 2¾ per cent. National War Loan Stock, 3 per cent. Local Loans Stock, 3 per cent. Transvaal Government Guaranteed Stock and 2¾ per cent Irish Land Guaranteed Stock of the nominal values of £7,832,608, £1,252,366 £500,000, £1,494,324, £538,720 respectively and Treasury Bills for £1,500,000	12,335,714
TOTAL	14,885,537

This amount has since been paid to the Reserve.

NOTE.—In the case of the profits on coinage which have been placed in the Gold Standard Reserve in the form of silver bullion, the figures show the sterling value of the number of rupees which the bullion will produce when coined.

J. S. MESTON,
Secretary to the Government of India.

DEPARTMENT OF COMMERCE AND INDUSTRY.

NOTIFICATIONS.

EXPLOSIVES.

RULES UNDER THE EXPLOSIVES ACT, 1884, FOR THE MANUFACTURE, POSSESSION AND SALE OF EXPLOSIVES.

Calcutta, the 29th November 1906.

No. 9045—8.—In exercise of the powers conferred by sections 5 and 7 of the Indian Explosives Act, 1884 (IV of 1884), the Governor-General in Council is pleased to make the following rules to regulate the manufacture, possession and sale of explosives in British India.

All rules heretofore made by the Governor-General in Council or any Local Government under the said Act, for regulating the manufacture, possession or sale of explosives, are hereby cancelled, except rules of the kind referred to in clause (2) of rule 1 of the present rules.

Preliminary.

1. These rules shall not apply to— General exemptions.

(1) the manufacture, possession or sale of gunpowder in any of the Agency tracts in the Ganjam, Vizagapatam and Godavari Districts of the Presidency of Madras, or

(2) the possession of any explosive in any *port in which special rules made by the Local Government under the Explosives Act, 1884 (IV of 1884), for regulating the possession of explosives, are for the time being in force.

2. (1) For the purposes of these rules, explosives shall be classified as follows, namely:— Classification of explosives.

Class 1	Gunpowder.
" 2	Nitrate-mixture.
" 3	Nitro-compound.
" 4	Chlorate-mixture.
" 5	Fulminate.
" 6	Ammunition.
" 7	Firework.

(2) When any explosive falls within more than one of the said classes, it shall be deemed to belong exclusively to the latest of such classes.

3. The expression "gunpowder," as used in these rules, means exclusively gunpowder ordinarily so-called. Definition of "gunpowder" (class 1).

4. The expression "nitrate mixture," as used in these rules, means any preparation, other than gunpowder, which is formed by the mechanical mixture of a nitrate with any form of carbon or with any carbonaceous substance not possessed of explosive properties, whether sulphur be or be not added to such preparation, and whether such preparation be or be not mechanically mixed with any other non-explosive substance. Definition of "nitrate-mixture" (class 2).

Nitrate-mixture includes among other explosives,—

Chilworth special powder,
Fortis explosive,
Ripp-Lene,
Safety blasting powder, and
Westfallite.

5. (1) The expression "nitro-compound," as used in these rules, means any chemical compound which is possessed of explosive properties or is capable of combining with metals to form an explosive compound, and is produced by the chemical action of nitric acid (whether mixed or not with sulphuric acid), or of a nitrate mixed with sulphuric acid upon any carbonaceous substance, whether such compound is mechanically mixed with other substances or not. Definition and sub-division of "nitro-compound" (class 3).

---

* Further exemptions are made by section 14 of the Indian Explosives Act, 1884, which runs as follows :—

Saving for manufacture, possession, use, sale, transport or importation by Government. "Nothing in this Act shall apply to the manufacture, possession, use, sale, transport or importation of any explosive—

(a) by order of the Government, or
(b) by any person employed under the Government in the execution of this Act, or as a keeper of a magazine, artizan, soldier, sailor, policeman or otherwise, or enrolled as a volunteer under the Indian Volunteers Act, 1869, in the course of his employment or duty as such." XX of 1869.

(2) Nitro-compound shall, for the purposes of these rules, be sub-divided as follows, namely:—

(a) Division 1, comprising—

(i) such explosives as—

Amberite No. 1,	Dynamite,
Ballistite,	Gelatine dynamite,
Blasting gelatine,	Gelignite,
Carbonite,	Lithofracteur,
Cordite,	Nitro-glycerine, and

Stonite, and

(ii) any chemical compound or mechanically mixed preparation which consists, either wholly or partly, of nitro-glycerine or some other liquid nitro-compound; and

(b) Division 2, comprising—

(i) such explosives as—

Amberite No. 2,	Nitrated gun-cotton.
Ammonite,	Picrates,
Bellite,	Picric powder,
Coopal's powder,	Roburite,
Cotton gunpowder,	Sawdust and gun-cotton powder,
E C powder,	Schultz's powder, and
Gun-cotton ordinarily so-called,	Tonite (or cotton powder), and

(ii) any nitro-compound, as hereinbefore defined, which is not comprised in Division 1.

Definition and sub-division of "chlorate-mixture" (class 4).

6 (1) The expression "chlorate-mixture," as used in these rules, means any explosive containing a chlorate

(2) Chlorate-mixture shall, for the purposes of these rules, be sub-divided as follows, namely :—

(a) Division 1, comprising—

(i) such explosives as—

Horsley's blasting powder, and

Brain's blasting powder, and

(ii) any chlorate preparation which consists partly of nitro-glycerine or of some other liquid nitro-compound; and

(b) Division 2, comprising—

(i) such explosives as—

Horsley's oirginal blasting powder,	Hochstadter's blasting charges,
Erhardt's powder,	Reichen's blasting charges,
Reveley's powder,	Teutonite, and

Chlorated gun-cotton, and

(ii) any chlorate-mixture, as hereinbefore defined, which is not comprised in Division 1.

Definition and sub-division of "fulminate" (class 5).

7. (1) The expression "fulminate," as used in these rules, means any chemical compound or mechanical mixture, whether included in any of the foregoing definitions or not, which, from its great susceptibility to detonation, is suitable for employment in percussion-caps or any other appliance for developing detonation, or which, from its extreme sensibility to explosion and from its great instability (that is to say, readiness to undergo decomposition from very slight exciting causes), is especially dangerous

(2) Fulminate shall, for the purposes of these rules, be sub-divided as follows, namely :—

(a) Division 1, comprising such compounds as the fulminates of silver and of mercury, and preparations of those substances, such as are used in percussion-caps, and any preparation consisting of a mixture of a chlorate with phosphorous, or certain descriptions of phosphorous compounds, with or without the addition of carbonaceous matter, and any preparation consisting of a mixture of a chlorate with sulphur or with sulphuret, with or without carbonaceous matter ; and

(b) Division 2, comprising such substances as the chloride and the iodide of nitrogen, fulminating gold and silver, diazobenzol, and the nitrate of diazobenzol.

Definition of "ammunition," "percussion-cap," "detonator" "safety fuze" and "safety cartridge," and sub-division of "ammunition" (class 6).

8. (1) The expression "ammunition," as used in these rules, means any explosive included in any of the foregoing definitions, when the same is enclosed in any case or contrivance, or is otherwise adapted or prepared, so as to form—

(a) a cartridge or charge for small-arms cannon or any other weapon, or for blasting, or

(*b*) a safety or other fuze for blasting or for shells, or

(*c*) a tube for firing explosives, or

(*d*) a percussion-cap, a detonator, a fog-signal, a shell, a torpedo, a war-rocket, or any other contrivance other than a firework.

(*2*) The expression "percussion-cap," as used in these rules, does not include a detonator.

(*3*) The expression "detonator," as used in these rules, means a capsule or case which is of such strength and construction, and contains fulminate in such quantity, that the explosion of one capsule or case would communicate the explosion to other like capsules or cases.

(*4*) The expression "safety fuze," as used in these rules, means a fuze for blasting which burns and does not explode, and which does not contain its own means of ignition, and which is of such strength and construction, and contains an explosive in such quantity, that the burning of such fuze would not communicate laterally with other like fuzes.

(*5*) The expression "safety cartridge", as used in these rules,—

(*i*) means a cartridge for small-arms, the case of which can be extracted from the small-arm after firing, and which is so closed as to prevent any explosion in one cartridge being communicated to other cartridges, and

(*ii*) includes a rifle-calibre machine-gun cartridge, if it is as described in clause (*i*), whether it is for use with a machine-gun having chambers identical with those of rifles or with a machine-gun having special chambers;

Provided that the diameter of the cartridge in either case (*i*) or case (*ii*) does not exceed one inch.

(*6*) Ammunition shall, for the purposes of these rules, be sub-divided as follows, namely :—

(*a*) Division 1, comprising exclusively—

Safety cartridges,
Safety fuzes for blasting,
Railway fog-signals, and
Percussion-caps; and

(*b*) Division 2, comprising any ammunition, as hereinbefore defined, which does not contain its own means of ignition and is not included in Division 1, such as—

Cartridges for small-arms, other than safety cartridges,
Cartridges and charges for cannon, shells, mines, blasting or other like purposes,
Shells and torpedoes containing any explosive,
Fuzes for blasting, other than safety fuzes,
Fuzes for shells,
Tubes for firing explosives, and
War-rockets,

which do not contain their own means of ignition, and

(*c*) Division 3, comprising any ammunition, as hereinbefore defined which contains its own means of ignition and is not included in Division 1, such as—

Detonators,
Cartridges for small-arms which are not safety cartridges,
Fuzes for blasting, which are not safety fuzes.
Fuzes for shells, and
Tubes for firing explosives,

containing their own means of ignition.

Explanation—The expression "ammunition containing its own means of ignition" means ammunition having an arrangement, whether attached to or forming part of the ammunition, which is adapted to explode or fire the ammunition by friction or percussion.

9. Fireworks shall, for the purposes of these rules, be sub-divided as follows, namely :— Sub-division of "firework" (class 7).

(*1*) Division 1, comprising firework compositions, that is to say,—

(*a*) any chemical compound or mechanically mixed preparation of an explosive or inflammable nature, which is used for the purpose of making manufactured fireworks, and is not included in any of the foregoing definitions,

(*b*) any star, and

(*c*) (except as declared in the proviso to this rule) any coloured fire composition; and

(*2*) Division 2, comprising manufactured fireworks, that is to say, any explosive of class 1, 2, 3, 4, 5 or 6 and any firework composition, when such explosive or composition is enclosed in any case or contrivance, or is otherwise manufactured so as to form a squib, cracker, toy cap or amorce, serpent, rocket (other than a war-rocket), maroon, lance, wheel, Chinese fire, Roman candle, or other article specially adapted for the production of pyrotechnic effects or pyrotechnic signals or sound signals:

Provided that a substantially constructed and hermetically closed metal case containing not more than one pound of coloured fire composition of such a nature as not to be liable to spontaneous ignition shall be deemed to be a "manufactured firework" and not "firework composition."

Licenses when required.

License when required for manufacture.

10. (*1*) An explosive shall not be manufactured except under, and in accordance with the conditions of, a license granted under these rules for such manufacture.

(*2*) Provided that clause (*1*) of this rule shall not apply—

(*a*) to the making of a small quantity of an explosive for the purpose of chemical experiment and not for practical use or for sale; or

(*b*) to the filling for private use, and not for sale, of any safety cartridges to the amount allowed by these rules to be possessed for private use; or

(*c*) in the case of any person who holds a license under these rules to possess an explosive, and who, duly observing the regulations prescribed in clause (1) of rule 30 in connection with his magazine or licensed premises, fills with the said explosive, for sale or otherwise, cartridges for small-arms; or

(*d*) in the case of any person who holds a license under these rules to possess an explosive, and who, duly observing the regulations prescribed in clause (2) of rule 30 in connection with his magazine or licensed premises, by filling cartridges, making charges, or drying, sifting, fitting or otherwise, adapts or prepares the said explosive for use exclusively in his mine or quarry or in some excavation or work carried on by him or under his control.

License when required for possession.

11. (*1*) An explosive shall not be possessed except under, and in accordance with the conditions of, a license granted under these rules for such possession.

(*2*) Provided that clause (*1*) of this rule shall not apply to the possession—

(*a*) of any explosive by a carrier or other person for the purpose of transport, when the same is being kept or transported in accordance with rules made under the Indian Explosives Act, 1884 (IV of 1884), and for the time being in force for regulating the transport of such explosive; or

(*b*) of any explosive on board any ship in pursuance of the Merchant Shipping Acts for the time being in force, or of any order or regulation for the time being in force thereunder; or

(*c*) by any person who is lawfully entitled under the Indian Arms Act, 1878 (XI of 1878), or the rules for the time being in force thereunder, to possess any explosive coming under the head of ammunition as defined in that Act, of such explosives in such quantities as may be prescribed by the said Act, or rules, or, when no quantities are so prescribed, in reasonable quantities for his own private use; or

(*d*) by any person, of manufactured fireworks in any quantity not exceeding two hundred pounds when the same are obtained and intended for immediate use and not for sale, and are possessed by such person for a period not exceeding fourteen days, and

(*i*) not being in Burma, when they are kept in a substantial receptacle which is exclusively appropriated to the keeping of explosives and is closed and secured so as to prevent unauthorised persons from having access to the explosives; and (if such fireworks be kept in a municipality in any quantity exceeding fifty pounds) when they are covered by a permit issued by a Magistrate of the first class or a Police-officer not below the rank of Assistant District Superintendent of Police, and

(*ii*) being in Burma, when they are covered by a permit issued free of cost by a Magistrate of the first class or by a Police-officer not below the rank of a District Superintendent of Police requiring them to be kept in a separate closed receptacle in a building or excavation at a safe distance from any dwelling-house, shop or public way, and when they are kept in accordance with the terms of such permit.

(3) Provided also that clause (1) of this rule shall not aply to the possessi on by any person, for his private use and not for sale, of

(i) gunpowder in any quantity not exceeding thirty pounds; or

(ii) safety cartridges made with gunpowder and containing in all not more than one hundred and fifty pounds of gunpowder; or

(iii) cartridges (non-safety) for small-arms, made with gunpowder and containing in all not more than five pounds of gunpowder; or

(iv) cartridges for cannon or blasting, made with gunpowder and not containing their own means of ignition, and containing in all not more than thirty pounds of gunpowder; or

(v) cartridges for small-arms, made with small-arm nitro-compound and containing in all not more than ten pounds of small-arm nitro-compound, or

(vi) small-arm nitro-compound in any quantity not exceeding ten pounds; or

(vii) percussion-caps or safety fuzes for blasting; or

(viii) railway fog-signals, when kept by a railway company for use on their Railway; or

(ix) any other explosives in any quantity not exceeding ten pounds (whether or not contained in cartridges), or, in the case of detonators, in any quantity not exceeding one hundred in number, provided that the possession of the explosives is covered by a permit issued by a Magistrate of the first class or a Police-officer not below the rank of Assistant District Superintendent of Police.

(4) The quantity of any kind of explosive kept by any person for his private use under clause (3) without a license shall be in substitution for the like quantity of any other kind of explosive (whether gunpowder or not) which might otherwise be so kept by him, and the quantity of such other kind of explosive shall be reduced accordingly provided that, if the explosive so kept is in any other form than that of cartridges for small-arms, the explosive of which the quantity is so reduced shall be some explosive other than safety cartridges made with gunpowder

(5) Notwithstanding anything contained in clause (3) or clause (4) of this rule, clause (1) shall apply to the possession for private use of explosives of the 5th (fulminate) class in any quantity

12 Nothing in these rules shall be deemed to authorise the manufacture or possession of any explosive in contravention of any prohibition notified under section 6 of the Indian Explosives Act, 1884 (IV of 1884), and for the time being in force

Saving of notifications under section 6 of the Explosives Act, 1884

13 (1) An explosive shall not be sold except under, and in accordance with the conditions of, a license granted under these rules for such sale

License when required for sale.

(2) Provided that clause (1) of this rule shall not apply to the sale by any person of an explosive, which he is lawfully entitled to possess for his own private use, to any person who is lawfully entitled to possess the same

Grant of licenses.

14. (1) Licenses to manufacture, possess and sell or to possess and sell, or to possess, or to sell from stock kept in a magazine in respect of which a license has been granted under rule 17—

Grant of licenses for manufacture, possession and sale in certain cases.

(a) an explosive of the 1st (gunpowder) class, or

(b) small-arm nitro-compound belonging to the 3rd class, or

(c) an explosive of the 1st division of the 6th (ammunition) class, or

(d) an explosive of the 7th (firework) class,

may be granted in a Presidency-town or its suburbs or in Rangoon by the Commissioner of Police, and elsewhere by the District Magistrate

(2) A license granted under this rule shall not entitle the licensee to possess at the same time more than—

(i) two hundred pounds of gunpowder or small-arm nitro-compound, together with any quantity of explosives contained in ammunition of the 1st division of the 6th (ammunition) class, or

(ii) two hundred pounds of manufactured fireworks, or

(iii) sixty pounds of explosives (including gunpowder, small-arm nitro-compound and manufactured fireworks), together with any quantity of explosives contained in ammunition of the 1st division of the 6th (ammunition) class, or

(iv) any such less quantity of any of the said explosives as the licensing officer may think fit to specify in the license:

Provided that a licensee in the Presidency of Madras, may, if he obtains a permit to this effect from a Magistrate of the 1st class or a Police-officer not below the rank of

Assistant District Superintendent of Police, possess subject to the conditions of his license, for a period of two days at the time of the Dipavali Festival, any quantity of manufactured fireworks not exceeding 1,000 lbs.

(3) Every such license shall specify the place in which alone the explosives referred to in it may be kept; and such place shall (except in the case of a license to sell from stock kept in a magazine in respect of which a license has been issued under rule 17) be approved by the licensing authority.

(4) Notwithstanding anything contained in the foregoing clauses of this rule, any Mamlatdar or Mahalkari in the Presidency of Bombay who is specially authorised by the District Magistrate in this behalf may grant licenses entitling *bonâ fide* agriculturists residing within the limits of the taluka under the charge of such Mamlatdar or Mahalkari to possess at the same time not more than one hundred pounds of gunpowder and not more than ten safety fuses for use with the same.

(5) Every license granted under this rule shall be in Form A, Form B, Form C, Form D, or Form E, in the Schedule hereto annexed, as the case may be, and shall contain the conditions prescribed therein.

(6) The expression "small-arm nitro-compound", as used in this rule, means a nitro-compound adapted and intended exclusively for use in cartridges for small-arms.

...of licenses ... manufacture in ... not provided for rule 14.

15. (1) Licenses to manufacture explosives in cases not provided for by rule 14 may be granted by the Governor General in Council.

(2) Every such license shall be in such form and shall contain such conditions as may be prescribed by the Governor General in Council:

Provided that the conditions so prescribed in the case of the manufacture of any explosive in any quantity shall comprise all the conditions prescribed in these rules and the Forms hereto annexed in the case of the possession of such explosive in such quantity.

...of licenses for ... in certain ... not provided for rule 14.

16. (1) Licenses for the possession, at such places as may be approved by the licensing officer, of explosives other than those specified in rule 14 may, if the explosive is not one of the 5th (fulminate) class, and if the quantity to be possessed at the same time does not exceed sixty pounds, be granted in a Presidency-town or its suburbs or in Rangoon by the Commissioner of Police, and elsewhere by the District Magistrate.

(2) Every such license shall be in Form F in the Schedule hereto annexed and shall contain the conditions prescribed therein.

...of licenses for ... in, and ... from, a magazin ... other cases.

17. (1) Licenses for the possession of explosives in, and the sale of explosives from, a magazine in cases not provided for by rules 14 and 16, may, if the explosive is not one of the 5th (fulminate) class, be granted by the Local Government, or by any officer authorised by the Local Government in this behalf.

(2) An applicant for such a license must submit to the District Magistrate, or, in a Presidency-town or any of its suburbs, or in Rangoon, to the Commissioner of Police, an application in Form G in the Schedule hereto annexed, and shall comply with the conditions embodied therein.

(3) Upon receipt of the said application, the District Magistrate or Commissioner of Police, as the case may be, shall forthwith cause notice to be published of the application and fix a day on which will be heard any persons who object to the establishment of a magazine on the proposed site and who have, not less than seven clear days before the day of hearing, sent to the said District Magistrate or Commissioner of Police, and to the applicant, notice of their intention to appear and object with their name, address and calling, and a short statement of the grounds of their objection.

(4) The day of hearing to be fixed under clause (3) shall be a day following soon after the expiration of a period of one month from the publication and service of the notices prescribed by this rule.

(5) Where the site of the proposed magazine lies within, or within one mile of the limits of the jurisdiction of any Municipal Authority or Port Authority, the applicant shall prepare, for service on such Authority, a notice of the application and of the said day of hearing.

(6) The notice by the District Magistrate or Commissioner of Police under clause (3) shall be published, and the notice under clause (5) shall be served, at the cost of the applicant, by the District Magistrate or Commissioner of Police, not less than one month before the said day of hearing.

(7) On consideration of the application, and on making such inquiry as he may deem neccessary, the District Magistrate or Commissioner of Police may dissent altogether from the establishment of the magazine on the proposed site, or may assent thereto, either absolutely, or on any conditions requiring additional restrictions or precautions.

(8) On the completion of the inquiry, the District Magistrate or Commissioner of Police shall forward the application and draft license with his recommendation to the Chief Inspector of Explosives, who shall forward to the applicant a statement in Form H in the Schedule hereto annexed, showing the distances which should, in his opinion, be kept clear round the

magazine. The table of distances which will ordinarily be followed is that annexed to these rules.

(9) The said Form H shall be returned, with the third column duly filled in, by the applicant to the Chief Inspector of Explosives, who shall submit it to the licensing authority constituted by clause (1) of this rule, with his recommendations, and with the draft license and a statement in Form I showing the distances which, after considering any representation made by the applicant when returning Form H to him, he considers should be kept clear round the magazine.

(10) The licensing authority may thereupon grant the license as applied for, or with such modifications or restrictions as may be deemed proper, or may reject the application

(11) A copy of each license granted shall be forwarded to the Chief Inspector of Explosives, and the original license shall be forwarded to the District Magistrate or to the Commissioner of Police, as the case may be, if the license has not been granted by him

(12) The District Magistrate or Commissioner of Police, when satisfied that the magazine is sufficiently completed according to the license to justify the use thereof, shall confirm the license; and unless and until so confirmed the license shall not come into force.

(13) If the District Magistrate or Commissioner of Police decides not to confirm any license, he shall forthwith inform the Chief Inspector of Explosives

(14) Every license granted under this rule shall be in Form J in the Schedule hereto annexed, and shall contain the conditions prescribed therein.

18. (1) With the previous sanction of the Governor General in Council, the Local Government may, in cases of urgency and for any period not exceeding six months, grant a license for the possession of explosives under rule 17 in a floating magazine. *Grant of licenses fo possession in a floating magazine.*

(2) Notwithstanding anything contained in clause (14) of rule 17, such licenses shall be in Form K in the Schedule hereto annexed, and shall contain the conditions and restrictions prescribed therein and such further conditions and restrictions (if any) as the Local Government may in any case direct

19 Licenses for the possession of explosives of the 5th (fulminate) class may be granted by the Governor General in Council in such form, and subject to such conditions, as he may in each case prescribe. *Grant of licenses for possession of fulminates.*

20. (1) Licenses for the sale of explosives in cases not provided for by rules 14 and 17 may be granted, in a Presidency-town or its suburbs or in Rangoon, by the Commissioner of Police, and elsewhere by the District Magistrate, to any person licensed to possess the same. *Grant of licenses for sale in cases not provided for by rules 14 and 17.*

(2) Every such license shall be in Form L in the Schedule hereto annexed, and shall contain the conditions prescribed therein.

Duration of licenses.

21. All licenses granted under any of these rules except rule 18 shall expire on the 31st day of December of the year for which they are granted. *Duration of licenses.*

Renewal of licenses.

22. The Local Government may from time to time, renew, on the same or on altered conditions, any license granted by the Governor General in Council under rule 15 for the manufacture of explosives: *Renewal of licenses granted under rule 15.*

Provided as follows:—

(1) no such renewal shall admit of the manufacture of any explosive other than that specified in the original license;

(2) every such renewal shall first be approved by an Inspector of Explosives; and

(3) every such renewal shall be for a period not exceeding one year.

23. (1) Any licensee who desires the renewal of a license granted under rule 17 must, before the expiration of the license, submit the license to the Chief Inspector of Explosives with a written application stating the quantity and description of explosives for the storage of which he desires the license to be renewed. *Renewal of licenses granted under rule 17.*

(2) On receipt of such application the Chief Inspector of Explosives shall, if there is any variation in the particulars of the license, send to the applicant a statement in Form H in the schedule hereto annexed, showing the distances which should, in his opinion, be kept clear round the magazine.

(3) The procedure prescribed in clauses (9) to (13) of rule 17 shall then be followed, so far as it is applicable.

24. Any license granted under any of these rules other than rule 15 or rule 17 may, unless the circumstances have so changed that the grant of a new license either would not be authorised under the Indian Explosives Act, 1884 (IV of 1884), and these rules, or is deemed objectionable by the licensing authority, be renewed on application made previous to its expiration. *Renewal of other licenses.*

Duplicate licenses.

Grant of duplicate licenses.

25. When a license granted under these rules is lost or accidentally destroyed, a duplicate may be granted to the licensee.

Temporary licenses.

Disposal of stock and grant of temporary license on expiration or forfeiture of license.

26. (1) A person licensed to manufacture, possess or sell any explosives shall, on the expiration or forfeiture of his license, forthwith give notice to the District Magistrate or the Commissioner of Police, as the case may be, of the quantity of such explosives then in his possession, and shall comply with any directions which the said Magistrate or Commissioner may think fit to give in regard to the possession or transport of the same

(2) On receiving a notice under clause (1) of this rule, the said Magistrate or Commissioner may grant, for a term not exceeding three months, a temporary license for the possession or sale of the actual stock of explosives which is held at the time of the issue of such license.

Fees for licenses.

Payment of fees.

27. The following fees shall be charged for licenses granted under these rules, namely :—

A—Each license granted under rule 14—

(1) to manufacture, possess and sell the maximum quantity of explosives mentioned in the said rule, or any less quantity exceeding one-half .	Twenty rupees;
(2) to manufacture, possess and sell half the quantity of explosives mentioned in the said rule, or any less quantity exceeding one-fourth .	Ten rupees;
(3) to manufacture, possess and sell a fourth of the quantity of explosives mentioned in the said rule, or any less quantity . . .	Five rupees;
(4) to possess and sell the maximum quantity of explosives mentioned in the said rule, or any less quantity exceeding one-half . . .	Ten rupees;
(5) to possess and sell half the quantity of explosives mentioned in the said rule, or any less quantity exceeding one-fourth	Five rupees;
(6) to possess and sell a fourth of the quantity of explosives mentioned in the said rule, or any less quantity	Two rupees and eight annas;
(7) to possess explosives	Eight annas;

Provided that only one-half of the fees prescribed above shall be charged in the case of licenses, in Form D, to manufacture, possess and sell or to possess and sell fireworks in villages or other rural areas.

B—Each license granted under—

rule 15 or rule 19	Such fee as the Governor-General in Council may in each case prescribe.
rule 16 or rule 20	Five rupees.
rule 17 or rule 18	Twenty rupees.
C—Each license on renewal . . .	The same fee as that charged for the original license.
D—Each duplicate license granted under rule 25.	Eight annas.
E—Each temporary license granted under rule 26.	A fee bearing the same proportion to the fee charged for the annual license as the period covered by the temporary license bears to a full year.
F—Each new license granted under rule 37.	One rupee.

28. Notwithstanding anything contained in rule 27—

Exemptions from payment of fees.

(1) the holder of a license duly granted in Form VI-B, or in Form VII-P, under rule 11 of the rules made under the Indian Arms Act, 1878 (XI of 1878), may on production of such license before the District Magistrate or in a Presidency-town or its suburbs or in Rangoon, before the Commissioner of Police, be granted a license under rule 14 of these rules without payment of any fee, and

(2) no fee shall be charged for licenses granted to contractors, cultivators or other persons to possess gunpowder, fuses or other explosives in reasonable quantities when the same are proved to the satisfaction of the officer granting the license to be required *bonâ fide* for blasting purposes.

Provision for payment of fees.

29. (1) The fees chargeable under these rules shall ordinarily be levied by means of impressed stamps An application for the grant or the renewal of a license shall bear the proper stamp: provided that if the application is refused, the value of the separate stamp (if any) which may have been already provided by the applicant for the desired license

or renewed license, minus the deductions prescribed by section 54 of the Indian Stamp Act, 1899 (II of 1899), may be refunded to the applicant An application should not be made on the stamped paper intended for the license or renewed license; but where this has been wrongly done, the value of the stamp may be refunded *minus*—

(*i*) the value of the stamp which should have been affixed to the application, and

(*ii*) the deductions prescribed as aforesaid.

(*2*) Where the fees leviable under these rules have been made over to any local body, the fees shall be paid in such manner as that local authority may from time to time direct.

Supplemental provisions.

30. (*1*) When any person referred to in sub-clause (*c*) of clause (*2*) of rule 10 fills cartridges as indicated in that sub-clause he shall see to the observance of the following regulations, namely:— Regulations to be observed by certain persons who are exempted from taking out a license for manufacture.

(*a*) there shall not be in the room in which such filling is being carried on more than five pounds of gunpowder or small-arm nitro-compound or such quantity of any other explosive as is prescribed by the Local Government in this behalf, unless it is made up into safety cartridges;

(*b*) no work unconnected with the making of the cartridges shall be carried on in the said room while such filling is being carried on;

(*c*) there shall not be in the said room, while such filling is being carried on, any fire or any artificial light except a light of such construction, position and character as not to cause any danger of fire or explosion;

(*d*) if filling is done on magazine premises the said room shall be detached from the magazine, but shall be situated in the immediate neighbourhood thereof, and shall be situated at such distance therefrom as may be specified on the license by the authority granting the same; and

(*e*) the licensee shall give notice to the authority which granted his license that he intends to carry on such filling of cartridges as is allowed by this rule.

(*2*) When any person referred to in sub-clause (*d*) of clause (*2*) of rule 10 adapts or prepares explosives as indicated in that clause, he shall see to the observance of the following regulations, namely:—

(*i*) there shall not be in the workshop in which such adaptation or preparation is carried on more than one hundred pounds of gunpowder, or such quantity of any other explosive as is prescribed by the Local Government in this behalf;

(*ii*) no work unconnected with such adaptation or preparation shall be carried on in the said workshop while such adaptation or preparation is being carried on;

(*iii*) the said workshop shall be detached from the magazine or licensed premises, but shall be situated in the immediate neighbourhood thereof, and shall be situated at such distance therefrom as may be specified on the license by the authority granting the same;

(*iv*) an explosive of one description shall not be converted into an explosive of another description, and an explosive shall not be unmade or resolved into its ingredients; and

(*v*) the licensee shall give notice to the authority which granted his license that he intends to carry on such adaptation or preparation as is allowed by this rule.

31. Any authority granting a license under these rules may, if such authority thinks fit, direct, by an order written on the license, that it shall have the effect of a like license granted by the like authority under the Indian Arms Act, 1878 (XI of 1878). Power to extend effect of license.

32. (*1*) Any of the officers mentioned in clause (*2*) of this rule may, within the areas respectively specified in that clause, but subject to the provisions of the Indian Arms Act, 1878 (XI of 1878), and of any ruels for the time being in force thereunder, in cases to which that Act applies— Powers of inspections, search, seizure, etc.

(*a*) enter, inspect and examine any place, carriage or vessel in which an explosive is being manufactured, possessed or sold under a license granted under these rules or any prior rules made under the Indian Explosives Act, 1884 (IV of 1884), or in which he has reason to believe that an explosive has been or is being manufactured, possessed or sold in contravention of the said rules or Act;

(*b*) search for explosives therein;

(*c*) take samples of any explosives found therein, on payment of the value thereof, and

(*d*) seize, detain, remove and, if necessary, destroy or otherwise render harmless any explosive found therein in respect of which he has reason to believe that any of the provisions of the said rules or Act have been contravened.

(2) The officers and areas referred to in clause (1) of this rule are:—

Officers.	Areas.
The Chief Inspector and Inspector of Explosives.	In all parts of British India.
All District Magistrates.	Within their respective Districts.
All Magistrates subordinate to the District Magistrate.	Within the areas respectively subject to their jurisdiction.
The Commissioner of Police, and all Police-officers of rank not below that of Inspector, if specially deputed in this behalf by the Commissioner of Police.	In Presidency-towns and Rangoon.
All Police-officers of rank not below that of Inspector.	Within the respective areas over which their authority extends.

(3) Whenever the Chief Inspector or an Inspector of Explosives, or any Magistrate subordinate to the District Magistrate, or any Police-officer seizes, detains or removes any explosive under this rule, he shall report the fact to the District Magistrate or (in a Presidency-town or its suburbs or in Rangoon) the Commissioner of Police.

(4) Neither the Chief Inspector nor an Inspector of Explosives, nor any Magistrate subordinate to the District Magistrate, nor any Police-officer shall under these rules destroy or otherwise render harmless any explosive without the previous sanction of the District Magistrate or (in a Presidency-town or its suburbs or in Rangoon) the Commissioner of Police, unless the matter appears urgent and fraught with serious public danger.

(5) Whenever any officer destroys any explosive or otherwise renders it harmless, he shall take and keep a sample thereof, and shall, if required, give a portion of the sample to the person owning the explosive or having the same under his control at the time of seizure; and whenever any officer other than the District Magistrate or Commissioner of Police so deals with any explosive, he shall report the circumstances to the District Magistrate or (in a Presidency-town or its suburbs or in Rangoon) the Commissioner of Police.

Production of license or authenticated copy thereof.

33. (1) Every person holding a license, or acting under a license, granted under these rules, shall be bound to produce the same, or an authenticated copy kept at the magazine or place to which the license applies, when called upon to do so by any Inspector of Explosives, any Magistrate, any Police-officer in charge of a police-station, or any Police-officer of higher rank.

(2) Copies of any such license may, for the purposes of this rule, be authenticated free of charge by any of the officers aforesaid or by the authority which granted the license.

Control over officers.

34. All Magistrates and other authorities shall, in the exercise of their functions under these rules, be subject to the control of their immediate executive superiors and of the Local Government.

Penalties.

Fines.

35 Whoever commits any offence mentioned in column 1 of the following table shall be punishable with fine which may extend to the amount mentioned in that behalf in column 2 of that table:—

1	2
Offences.	Fine which may be imposed.
Manufacturing an explosive in contravention of rule 10.	Three thousand rupees
Possessing an explosive in contravention of rule 11	One thousand rupees
Selling an explosive in contravention of rule 13 .	Five hundred rupees.
Committing a breach of any condition in a license granted under—	
rule 14 or rule 20	Five hundred rupees.
rule 16, rule 17, rule 18, or rule 19 . . .	One thousand rupees.
rule 15	Three thousand rupees.
Possessing or transporting an explosive in contravention of any direction given under rule 26, clause (1).	One thousand rupees.
Failing to produce a license or an authenticated copy thereof, when called upon to do so under rule 33, clause (1).	Two hundred rupees

Forfeiture of licenses.

36. Every license granted under these rules shall be liable to be forfeited on breach of any of the conditions contained therein.

Exemption from penalties of persons carrying on business of deceased or disabled licensee.

37. If any person licensed to manufacture, possess or sell an explosive dies or becomes bankrupt, or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty under these rules for carrying on the business or acting under the license during such reasonable time as may be necessary to admit of his making an application to the authority which granted the license for a new license in his own name during the currency of the unexpired portion of the original license.

W. L. HARVEY,

Secretary to the Government of India.

SCHEDULE.

FORM A.

(*See rule 14.*)

[FEE RUPEES IN STAMPS.]

License to manufacture, possess and sell gunpowder, or small-arm nitro-compound, or an explosive of the 1st Division of the 6th (Ammunition) Class, or (elsewhere than in villages or other rural areas) an explosive of the 7th (Firework) Class.

[Granted in a Presidency-town or its suburbs or in Rangoon by the Commissioner of Police, and elsewhere by the District Magistrate.]

Name, etc., of licensee and place of residence.	Place of business, factory or shop.	Maximum quantity of explosive to be possessed at any one time.	Description and quantity of explosive to be manufactured during the year.	Description and quantity of explosive to be possessed and sold during the year	Date on which license expires.
1	2		4	5	6
					The 31st December 190.

_____ Town or District, } Seal. (Signature.)

_____ 190 . _____ of _____

Conditions.

1. This license is granted subject to the provisions of the Indian Explosives Act, 1884 (IV of 1884), and the rules thereunder.

2. The licensee shall keep records and accounts of all explosives manufactured, of all stock in hand, and of all sales, in such form as the Local Government may from time to time direct.

3. The licensee shall exhibit his stock and his books and records of manufacture and sales to any Magistrate or to any Police-officer not below the rank of Inspector, whenever such Magistrate or officer may call upon him so to do

4. (*1*) The explosive shall be manufactured in a tent or lightly constructed building exclusively appropriated for the purpose and separated from any dwelling-house, highway, street, public thoroughfare or public place by the distance—

(*a*) in the case of gunpowder or small-arm nitro-compound, of one hundred yards, or

(*b*) in the case of an explosive of the 1st division of the 6th (ammunition) class, or of the 7th (firework) class, of fifty yards.

(*2*) In the case of filling cartridges for small arms the operation may, if preferred, be carried out in the upper room of a building to which the conditions in clause (1) as to distance shall not apply: Provided that no more than five pounds of explosive (except such as may be contained in safety cartridges) shall be in the room where the operation is being carried on.

(*3*) In all other cases the manufacture shall be carried on in a one-storeyed building.

5. The number of persons employed in manufacture in any one building or room shall not exceed six, and only persons actually manufacturing or superintending manufacture shall be allowed inside the place of manufacture.

6. No iron or steel implements shall be used in manufacture. Only copper, gun-metal or wooden tools are permissible.

7. All explosives, as manufactured, shall be removed without delay to a safe place of storage, and no explosives shall be allowed to accumulate in the place of manufacture.

8. Manufacture shall only be carried on between sunrise and sunset.

9. No smoking or lights shall be allowed in or near a room where explosives are being manufactured.

10. All sales of explosives under this license must be effected on the premises shown on the face of the license.

11. An explosive shall not be sold to any child apparently under the age of fourteen years, nor shall any child under that age be employed in manufacture.

12. (*1*) The explosives possessed by the licensee shall be kept in one or other or both of the following modes :—

Mode A, that is to say, in a building or excavation, which is detached from any dwelling-house, and is separated by the distances prescribed in condition No. 4* from any highway, street, public thoroughfare or public place, and is made and closed so as to prevent unauthorised persons from having access thereto and to secure it from danger from without, and is exclusively appropriated to keeping explosives; and

(*a*) such a building must be substantially constructed of brick, stone or concrete, or must be a securely constructed fireproof safe; and

(*b*) such an excavation must be formed in solid rock, or earth, or in mine refuse not liable to ignition, and must not open into, from or out of any mine, quarry, tunnel or underground place which is in use for the carrying on of any work or for the employment of any person.

Mode B, that is to say, in a substantial receptacle (whether or not a fireproof safe) which is closed and secured so as to prevent unauthorised persons from having access thereto, and is exclusively appropriated to the keeping of explosives, and is placed inside a dwelling-house, or inside a building which is not itself qualified for the keeping of explosives in Mode A.

(*2*) A fireproof safe shall not be used for the keeping of any explosive other than gunpowder or small-arm nitro-compound and cartridges of the 2nd division of the 6th (ammunition), class (not containing their own means of ignition) and made with gunpowder or small-arm nitro-compound, such as cartridges or charges for cannon or blasting purposes.

13. The maximum quantity of explosives allowed to be kept at the same time shall be the following :—

(1) if the only explosive kept be one or more of the following, namely :—

(*a*) gunpowder;

(*b*) small-arm nitro-compound ; or

(*c*) ammunition of the first division of the 6th class,

the maximum shall be—

	In Mode A. lbs.	In Mode B. lbs.
gunpowder and small arm nitro-compound, in all	Two hundred.	Fifty.
and, in addition, of explosives contained in ammunition of the 1st division of the 6th class	Any quantity.	Any quantity.

(2) if the only explosive kept be manufactured fireworks the maximum shall be—

	In Mode A. lbs.	In Mode B. lbs.
manufactured fireworks	Two hundred.	Fifty.

(3) in any other case the maximum shall be—

mixed explosives, including gunpowder, small-arm nitro-compound and manufactured fireworks, etc., in all	Sixty.	Fifteen.
and, in addition, of explosives contained in ammunition of the 1st division of the 6th class	Any quantity.	Any quantity ;

Provided that in each of the three cases above-mentioned the aggregate quantity kept on the premises in Mode A and Mode B together may not in any case exceed the maximum quantity which may be kept in Mode A.

14. With respect to a building or excavation used in Mode A, and a receptacle used in Mode B,—

the interior thereof, and the shelves and fittings therein, shall be so constructed, or so lined and covered, as to prevent the exposure of any iron or steel, or the detaching of any grit, iron or steel or similar substance, in such manner as to come into contact with the explosive ;

and such interior, shelves and fittings shall, so far as is reasonably practicable, be kept free from grit and otherwise clean ;

* These distances may be reduced to one-half when the building is surrounded by a traverse as high as the eaves of the building.

and, in the case of any explosive being possessed which is liable to be dangerously affected by water, due precautions shall be taken to exclude water therefrom;

and all articles or substances of an explosive or highly inflammable nature, and all lights, shall be kept at a safe distance from the explosive, and from any room or part of a building, excavation or receptacle containing the same;

and no person entering any such room or part of a building or any such excavation, or any such receptacle, shall have any iron or steel in his possession, or attached to or on his boots or shoes:

Provided that this condition, so far as it relates to the exposure of iron or steel or similar substances, shall not be obligatory in the case where no explosive is kept other than ammunition of the 1st division of the 6th (ammunition) class.

15. All explosives exceeding five pounds in quantity of the 1st division of the 6th (ammunition) class or of the 2nd division of the 7th (firework) class, and all other explosives exceeding one pound in quantity, shall be kept in a substantial case, bag, canister or other receptacle, made and closed so as to prevent the explosives from escaping;

and, when publicly exposed for sale or when sold, the outermost receptacle containing such explosives shall have affixed the name of the explosives in conspicuous characters by means of a brand or securely-attached label or other mark:

Provided that two samples of each kind of firework may be exposed for sale without complying with the foregoing clauses of this condition, if such samples be placed in such a position that no light or fire is, or is likely to be, brought near them.

16. (1) Each description of explosive which may be kept under this license shall be separated by an intervening partition of such substance and character, or by such intervening space, as will effectually prevent explosion or fire in the one communicating with the other:

(2) Provided as follows:—

(a) Gunpowder, small-arm nitro-compound and safety fuzes belonging to the 1st division of the 6th (ammunition) class may be kept with each other without any intervening partition or space;

(b) the various explosives of the 1st division of the 6th (ammunition) class may be kept with each other without any intervening partition or space;

(c) the various explosives of the 7th (firework) class may be kept with each other without any intervening partition or space.

17. *The licensee shall affix to his shop or place of business a signboard as required by rule 11 of the rules framed under the Indian Arms Act, 1878 (XI of 1878), and shall post up in his shop a copy of section 28 of that Act.

18. *The licensee shall at the time of purchase endorse upon the license of every purchaser holding a license under Form VIII or IX of the forms prescribed under the Indian Arms Act, 1878 (XI of 1878), the following particulars, namely:—

(a) the name and address of the person who takes delivery of the articles sold;

(b) the nature and amount of articles sold; and

(c) the date of sale;

and shall append his signature to the endorsement.

19. A similar endorsement shall be made upon the license of every purchaser holding a license under the Explosives Act for the possession of explosives.

FORM B.

(See rule 14.)

[FEE RUPEES IN STAMPS.]

License to possess and sell gunpowder, or small-arm nitro-compound, or an explosive of the 1st Division of the 6th (Ammunition) Class or (elsewhere than in villages or other rural areas) an explosive of the 7th (Firework) Class.

[Granted in a Presidency-town or its suburbs or in Rangoon by the Commissioner of Police, and elsewhere by the District Magistrate.]

Name, etc., of licensee and place of residence.	Place of business factory or shop.	Maximum quantity of explosive to be possessed at any one time.	Description and quantity of explosive to be possessed and sold during the year.	Date on which license expires.

_______ *of* _______

*These conditions are to be added only when the authority granting this license directs, in pursuance of rule 31, by an order written on the license, that this license shall have the effect of a like license granted under the Indian Arms Act, 1878 (XI of 1878).

Conditions.

1. This license is granted subject to the provisions of the Indian Explosives Act, 1884 (IV of 1884), and the rules thereunder.

2 The licensee shall keep records and accounts of all explosives in stock and of all sales, in such form as the Local Government may from time to time direct.

3. The licensee shall exhibit his stock and his books and records of sales to any Magistrate or to any Police-officer not below the rank of Inspector, whenever such Magistrate or officer may call upon him so to do.

4. All sales of explosives under this license must be effected upon the premises shown on the face of the license.

5. An explosive shall not be sold to any child apparently under the age of fourteen years.

6. (1) The explosives possessed by the licensee shall be kept in one or other or both of the following modes :—

Mode A, that is to say, in a building or excavation, which is detached from any dwelling-house, and is separated by the prescribed distances,* from any highway street, public thoroughfare or public place, and is made and closed so as to prevent unauthorised persons from having access thereto and to secure it from danger from without, and is exclusively appropriated to keeping explosives; and

(*a*) such a building must be substantially constructed of brick, stone or concrete, or must be a securely constructed fireproof safe ; and

(*b*) such an excavation must be formed in solid rock or earth or in mine refuse not liable to ignition, and must not open into, from or out of any mine, quarry, tunnel or underground place which is in use for the carrying on of any work or for the employment of any person.

Mode B, that is to say, in a substantial receptacle (whether or not a fireproof safe) which is closed and secured so as to prevent unauthorised persons from having access thereto, and is exclusively appropriated to the keeping of explosives, and is placed inside a dwelling-house, or inside a building which is not itself qualified for the keeping of explosives in Mode A.

(2) A fireproof safe shall not be used for the keeping of any explosive other than gunpowder or small-arm nitro-compound and cartridges of the 2nd division of the 6th (ammunition) class (not containing their own means of ignition) and made with gunpowder or small-arm nitro-compound, such as cartridges or charges for cannon or blasting purposes.

7. The maximum quantity of explosives allowed to be kept at the same time shall be the following :

(1) if the only explosive kept be one or more of the following, namely :—

(*a*) gunpowder,

(*b*) small-arm nitro-compound, or

(*c*) ammunition of the 1st division of the 6th class,

the maximum shall be—

	In Mode A. lbs.	In Mode B. lbs.
gunpowder and small-arm nitro-compound in all	Two hundred.	Fifty.
and, in addition, of explosives contained in ammunition of the 1st division of the 6th class . . .	Any quantity.	Any quantity.

(2) if the only explosive kept be manufactured fireworks, the maximum shall be—

manufactured fire-works . . .	Two hundred.	Fifty.

(3) in any other case the maximum shall be—

mixed explosives, including gunpowder, small-arm nitro-compound and manufactured fireworks, etc., in all	Sixty.	Fifteen.
and, in addition, of explosives contained in ammunition of the 1st division of the 6th class . . .	Any quantity.	Any quantity

* In the case of gunpowder or small-arm nitro-compound, one hundred yards.
In the case of an explosive of the 1st division of the 6th (ammunition) class or of the 7th (firework) class, fifty yards:
Provided that these distances may be reduced to one-half when the building is surrounded by a traverse as high as the eaves of the building.

Provided that in each of the three cases above-mentioned the aggregate quantity kept on the premises in Mode A and Mode B together may not in any case exceed the maximum quantity which may be kept in Mode A.

8. With respect to a building or excavation used in Mode A, and a receptacle used in Mode B,—

the interior thereof, and the shelves and fittings therein, shall be so constructed or so lined and covered as to prevent the exposure of any iron or steel, or the detaching of any grit, iron or steel or similar substance, in such manner as to come into contact with the explosive;

and such interior, shelves and fittings shall, so far as is reasonably practicable, be kept free from grit and otherwise clean;

and, in the case of any explosive being possessed which is liable to be dangerously affected by water, due precautions shall be taken to exclude water therefrom;

and all articles or substances of an explosive or highly inflammable nature, and all lights, shall be kept at a safe distance from the explosive, and from any room or part of a building, excavation or receptacle containing the same;

and no person entering any such room or part of a building, or any such excavation, or any such receptacle, shall have any iron or steel in his possession, or attached to or on his boots or shoes:

Provided that this condition, so far as it relates to the exposure of iron or steel or similar substances, shall not be obligatory in the case where no explosive is kept other than ammunition of the 1st division of the 6th class.

9. All explosives exceeding five pounds in quantity of the 1st division of the 6th (ammunition) class or of the 2nd division of the 7th (firework) class and all other explosives exceeding one pound in quantity shall be kept in a substantial case, bag, canister or other receptacle, made and closed so as to prevent the explosives from escaping;

and, when publicly exposed for sale or sold, the outermost receptacle containing such explosives shall have affixed the name of the explosives in conspicuous characters by means of a brand or securely-attached label or other mark:

Provided that two samples of each kind of firework may be exposed for sale without complying with the foregoing clauses of this Condition, if such samples be placed in such a position that no light or fire is, or is likely to be, brought near them.

10. (*1*) Each description of explosive which may be kept under this license shall be separated by an intervening partition of such substance and character, or by such intervening space, as will effectually prevent explosion or fire in the one communicating with the other:

(*2*) Provided as follows:—

(*a*) Gunpowder, small-arm nitro-compound and safety fuzes belonging to the 1st division of the 6th (ammunition) class, may be kept with each other without any intervening partition or space;

(*b*) the various explosives of the 1st division of the 6th (ammunition) class may be kept with each other without any intervening partition or space;

(*c*) the various explosives of the 7th (firework) class may be kept with each other without any intervening partition or space.

11. *The licensee shall affix to his shop or place of business a signboard as required by rule 11 of the rules framed under the Indian Arms Act, 1878 (XI of 1878), and shall post up in his shop a copy of section 28 of that Act.

12. *The licensee shall at the time of purchase endorse upon the license of every purchaser holding a license under Form VIII or IX of the forms prescribed under the Indian Arms Act, 1878 (XI of 1878), the following particulars:—

(*a*) the name and address of the person who takes delivery of the articles sold;

(*b*) the nature and amount of the articles sold; and

(*c*) the date of sale;

and shall append his signature to the endorsement.

13. A similar endorsement shall be made upon the license of every purchaser holding a license under the Explosives Act, for the possession of explosives.

*These conditions are to be added only when the authority granting this license directs, in pursuance of rule 31, by an order written on the license, that this license shall have the effect of a like licens granted under the Indian Arms Act, 1878 (XI of 1878).

_______________*of*_______________

Conditions.

1. This license is granted subject to the provisions of the Indian Explosives Act, 1884 (IV of 1884), and the rules thereunder.

2. (*1*) The explosive shall be kept in a substantially constructed building which is exclusively appropriated for the purpose, and is detached from any dwelling-house, and is situated at a safe distance from any highway, street, public thoroughfare or public place, and is made and closed so as to prevent unauthorised persons from having access thereto and to secure it from danger from without:

(*2*) Provided that any quantity not exceeding fifteen pounds of any such explosive may be kept inside any building not conforming to clause (*1*) of this condition, if the explosive is placed in a receptacle exclusively appropriated to the keeping of explosives.

3. All articles or substances of an explosive or highly inflammable nature shall be kept at a safe distance from the explosives and from any building or receptacle containing the same.

4. No building exclusively appropriated for the purpose of keeping the explosives, and no receptacle in which the explosives are kept, shall have any exposed iron or steel in the interior thereof.

5. All explosives exceeding one pound in quantity shall be kept in a substantial case, bag, canister or other receptacle, made and closed so as to prevent the explosive from escaping.

6. Each description of explosive which may lawfully be kept under this license shall be separated by an intervening partition of such substance and character, or by such intervening space, as will effectually prevent explosion or fire in the one communicating with the other.

7. The licensee shall at the time of purchase have the following particulars endorsed upon his license by the vendor from whom he purchases, and under the vendor's signature, namely:—

(*a*) the name and address of the person who takes delivery of the articles purchased;

(*b*) the nature and amount of the articles purchased; and

(*c*) the date of purchase.

FORM G.

[*See Rule 17 (2).*]

THE INDIAN EXPLOSIVES ACT, 1884.

Form of application for a license for possession of explosives (other than fulminates) in, and sale from, a Magazine.

	The replies to be written in this column.
1. Applicant's Name . . . . . " Calling . . . . . " Address	
NOTE.—In cases where the application is made on behalf of a company, the name, calling and address of the company, and the name of the manager or agents, should be given.	
2. Situation of the proposed Magazine— Presidency or Province . . . District . . . . . . Village	
3. Explosive proposed to be stored— Class . . . . Division (if any) . . . . . Name and description . . .	
NOTE.—The class and division (if any) stated should be in accordance with the classification in the General Rules to regulate the manufacture, possession and sale of explosives.	
4. Draft license containing the terms which the applicant proposes to have inserted, and specifying such of the matters stated below as are applicable.	
NOTE.—A draft license must be attached to this application and must be accompanied by a plan of the proposed magazine and of the site, with the boundaries thereof drawn to scale.	
The plan should also show the distance from the proposed magazine of the room (if any) to be used in connection therewith for the filling of cartridges for small arms with explosives, in pursuance of rule 30 (1) of the rules under the Indian Explosives Act, 1884, for the manufacture, possession and sale of explosives, and of the workshop (if any) to be used in connection therewith for the adaptation or preparation of explosives, in pursuance of rule 30(2) of the said rules; and, if both a room and workshop are to be used, the distance of the room from the workshop.	
The matters referred to above, and required (so far as applicable) to be specified, are as follows:—	
(a) the boundaries of the land forming the site of the magazine, and either any belt of land surrounding the site which is to be kept clear, and the buildings and works from which it is to be kept clear, or the distance to be maintained between the magazine or any part thereof and other buildings and works (for buildings and works here referred to, see 1st column of table of distances appended to these rules); and	
(b) the situation, character and construction of all the mounds, buildings and works on or connected with the magazine, and the distances thereof from each other; and	
(c) the nature of the work, if any, to be carried on in connection with the magazine and the place at which such work is to be carried on, and the places in the magazine at which explosives, and any articles liable to spontaneous ignition, or inflammable or otherwise dangerous, are to be kept; and	
(d) the situation of each building forming part of the magazine in which the explosive is to be kept, and the maximum amount of explosive to be kept in each such building; and	
(e) any special terms which the applicant may propose by reason of any special circumstances arising from the locality, the situation or construction of any buildings or works, or the nature of any process or otherwise.

Conditions.

This license is granted subject to the provisions of the Indian Explosives Act, 1884 (IV of 1884), and the rules thereunder.

2. The licensee shall keep records and accounts of all explosives in stock, and of all sales in such form as the Local Government may from time to time direct

3. There shall not be at the same time in the magazine any quantity of explosives exceeding the quantity specified in the license.

4. The magazine shall be used only for the keeping of the explosives specified in the license, and of receptacles for, or tools of implements for work connected with, the keeping of such explosives

5. The interior of the magazine, and the benches, shelves and fittings therein, shall be so constructed or so lined or covered as to prevent the exposure of any iron or steel, and the detaching of any grit, iron, steel or similar substances in such manner as to come into contact with the explosives; and such interior, benches, shelves and fittings shall, so far as is reasonably practicable, be kept free from grit and otherwise clean, and, in the case of any explosive being possessed which is liable to be dangerously affected by water, due precautions shall be taken to exclude water therefrom:

Provided that so much of this condition as relates to precautions against the exposure of any iron or steel and the detaching of any grit, iron, steel or similar substances shall not be obligatory in a building in which no explosive other than an explosive of the first division of the 6th (ammunition) class is kept.

6. The magazine shall have attached thereto a sufficient lightning conductor, which shall be tested at least once during the currency of the license.

7. Before repairs are done to any room or magazine or part thereof, the same shall, as far as is practicable, be cleaned by the removal of all explosives or mixed ingredients thereof, and the thorough washing out of such room, magazine or part; and after such

cleaning these conditions shall cease to apply to such room or part of the magazine until any explosive is again taken into it :

Provided that this condition shall not be obligatory in a magazine in which no explosive other than an explosive of the first division of the 6th (ammunition) class is kept.

8. Except after such cleaning, all tools and implements used in, or in making any repairs to, any part of the magazine shall be made only of wood, copper or brass or some soft metal or material, or shall be covered with some safe and suitable material :

Provided that this condition shall not be obligatory in a magazine in which no explosive other than an explosive of the 1st division of 6th (ammunition) class is kept.

9. Due provision shall be made, by the use of suitable working clothes without pockets, or of suitable shoes, or by searching or otherwise, or by some such means, for preventing the introduction into the magazine of fire, lucifer matches or any substance or article likely to cause explosion or fire, or of any grit, iron or steel ; but this rule shall not prevent the introduction of an artificial light of such construction, position or character as not to cause any danger or fire or explosion

Provided that so much of this condition as applies to the exclusion of grit, iron or steel shall not be obligatory in a building in which no explosive other than an explosive of the first division of the 6th (ammunition) class is kept

10. No person shall smoke in any part of the magazine.

11. No person under the age of fourteen years shall be employed in or enter the magazine, except in the presence and under the supervision of some grown-up person, and no explosive shall be sold to any such person.

12. (*1*) Two or more descriptions of explosives which may lawfully be possessed in a licensed magazine may be possessed in the same magazine if they are separated from each other by an intervening partition of such substance and character, or by such intervening space, as will effectually prevent explosion or fire in the one communicating with the other:

(*2*) Provided as follows :—

(*a*) the various explosives of classes 1 (gunpowder), 2 (nitrate-mixture), 3 (nitro-compound) and 4 (chlorate-mixture), safety fuzes belonging to the 1st division of the 6th (ammunition) class and such of the various explosives of the 2nd division of the 6th (ammunition) class as do not contain any exposed iron or steel, may be kept with each other without any intervening partition or space ;

(*b*) the various explosives of the 1st division of the 6th (ammunition) class may be kept with each other without any intervening partition or space ;

(*c*) such of the various explosives of the 2nd division of the 6th (ammunition) class as contain any exposed iron or steel may be kept with each other without any intervening partition or space ;

(*d*) the various explosives of the 3rd division of the 6th (ammunition) class may be kept with each other without any intervening partition or space ;

(*e*) the various explosives of the 7th (firework) class may be kept with each other without any intervening partition or space.

(*3*) Save as aforesaid, two or more descriptions of explosives shall not be kept in the same magazine

13 The licensee, and every person employed in or about the magazine, shall take all due precaution for the prevention of accidents by fire or explosion in the magazine, and for preventing unauthorised persons from having access to the magazine or to the explosives therein, and shall abstain from any act whatever which tends to cause fire or explosion and is not reasonably necessary for the purpose of the work in such magazine

14. (*1*) Blasting gelatine or any of its kindred gelatinous nitro-compounds shall not be kept in the magazine after the expiration of three years from the date of its or their importation into British India, except with the special sanction of an Inspector of Explosives.

(*2*) When such sanction has been given, a written certificate, showing the period covered by the sanction, must be obtained from an Inspector of Explosives at each inspection, and must be kept by the licensee at the magazine

Secretary.

Conditions.

1. This license is granted subject to the provisions of the Indian Explosives Act, 1884 (IV of 1884), and the rules thereunder

2. The whole vessel, barge or craft in or on board which the explosives are stored shall be deemed to constitute the magazine

3. The magazine shall be used only for the keeping of such explosives as may be specified in the license, and of receptacles for, or tools or implements for work connected with, the keeping of such explosives

4. The interior of the magazine, and the benches, shelves and fittings therein, shall be so constructed or so lined or covered as to prevent the exposure of any iron or steel in such manner, and the detaching of any grit, iron, steel or similar substance in such manner as to come into contact with the explosives in such magazine, and such interior, benches, shelves and fittings shall, so far as is reasonably practicable, be kept free from grit and otherwise clean.

5. The magazine shall have attached thereto a sufficient lightning conductor, which shall be tested previous to the storage of explosives

6. No charcoal, whether ground or otherwise, oiled cotton, oiled rags or oiled waste and no article whatever which is liable to spontaneous ignition, shall be taken into the magazine.

7 Before repairs are done to or in any part of the magazine, it shall, so far as practicable, be cleaned by the removal of all explosives, and by a thorough washing out. After being so cleaned, it shall not be deemed to be a magazine until explosives are again taken into it.

8. There shall be constantly kept in the magazine, affixed in such manner as to be easily read, a copy of the license, and of any special rules that may be issued from time to time for the keeping of explosives in a floating magazine.

9. All tools and implements used in any repairs to or in any part of the magazine shall be made only of wood or copper or brass or some soft metal or material, or shall be covered with some safe and suitable material.

10. No fires, lights or lucifer matches, and no substance or article which is likely to cause explosion or fire, shall be permitted to be at any time in the magazine.

11. Due provision shall be made, by the use of suitable working clothes without pockets, or of suitable shoes, or by searching or otherwise, or by some such means, for preventing the introduction into the magazine of fire, lucifer matches or any substance or article which is likely to cause explosion or fire; and for preventing the introduction of any grit, iron or steel, into any part of the magazine where it would be likely to come into contact with explosive; and in any part of the magazine in which any explosive is kept which is liable to be dangerously affected by water, due precautions shall be taken to exclude water from such part; but this condition shall not prevent the introduction of an artificial light of such construction, position, or character as not to cause any danger of fire or explosion; and so much of this condition as relates to the exclusion of grit, iron or steel shall not be obligatory in the case of a magazine in which no explosive other than explosives of the 1st division of the 6th (ammunition) class is kept.

12. No person shall smoke in any part of the magazine.

13. (1) The licensee shall not employ any vessel, barge or craft to carry an explosive to or from the magazine unless the cabin, hold or other part of the vessel, barge or craft which the explosive is or is to be carried—

(a) is constructed without any exposed iron or steel in the interior thereof,

(b) contains only explosives, and

(c) is closed or otherwise properly covered over:

Provided that clause (a) shall not apply in the case of any vessel, barge or craft which carries no explosive other than explosives of the 1st division of the 6th (ammunition) class, or which is specially exempted by an order of the Chief Inspector of Explosives or by an order of the Local Government endorsed on this license.

(2) The licensee shall see that the explosives to be placed on any vessel, barge or craft so employed are loaded, carried and unloaded with all due diligence and with such precautions and in such manner as will sufficiently guard against any accidental ignition.

14. The licensee shall see—

(a) that no fire, unprotected light or smoking is allowed while any explosive [other than explosives of the 1st division of the 6th (ammunition) class] is being received or delivered, or while the hatches or door of the magazine, or the hatches or coverings of any vessel, barge or craft alongside containing any such explosive, are open; and

(b) that no receipt or delivery of explosive is carried on, and that the hatches or door of the magazine are or is kept closed, when any vessel, barge or craft having on board a fire (other than engine-fires properly banked up) or an unprotected light is alongside a magazine containing an explosive other than explosives of the 1st division of the 6th (ammunition) class, or in its immediate vicinity.

15. A person under the age of fourteen years shall not be employed in or enter the magazine, except in the presence and under the supervision of some grown-up person.

16. In the case of the magazine being approachable at low water by carriages, the words "vessel, barge, or craft," in Nos. 13 and 14 of these conditions, shall be taken to include a carriage.

17. (1) Two or more descriptions of explosives, which may lawfully be possessed in a licensed magazine, may be possessed in the same magazine, if they are separated from each other by an intervening partition of such substance and character, or by such intervening space, as will effectually prevent explosion or fire in one compartment from extending to another compartment:

(2) Provided as follows:—

(a) the various explosives of classes 1 (gunpowder), 2 (nitrate-mixture), 3 (nitro-compound and 4 (chlorate mixture), safety fuzes belonging to the 1st division of the 6th (ammunition) class, and such of the various explosives of the 2nd division of the 6th (ammunition) class, as do not contain any exposed iron or steel, may be kept with each other without any intervening partition or space;

(b) the various explosives of the 1st division of the 6th (ammunition) class may be kept with each other without any intervening partition or space;

(c) such of the various explosives of the 2nd division of the 6th ammunition) class as contain any exposed iron or steel, may be kept with each other without any intervening partition or space;

(d) the various explosives of the 3rd division of the 6th (ammunition) class may be kept with each other without any intervening partition or space,

(e) the various explosives of the 7th (firework) class may be kept with each other without any intervening partition or space.

(3) Save as aforesaid, two or more descriptions of explosive shall not be kept in the same magazine.

Conditions.

1 This license is granted subject to the provisions of the Indian Explosives Act, 1884 (IV of 1884), and the rules thereunder

2 The licensee shall keep records and accounts of all explosives in stock, and of all sales, in such form as the Local Government may from time to time direct.

3. Explosives shall not be sold to any child apparently under the age of fourteen years.

4 All explosives exceeding one pound in weight, when publicly exposed for sale or sold, shall be in a substantial case, bag, canister or other receptacle, made and closed so as to prevent the explosives from escaping; and the outermost receptacle containing such explosives shall have affixed the name of the explosives, with the word "explosive" added thereto in conspicuous characters by means of a brand or securely attached label or other mark.

The 30th November 1906.

No. 9359.—32.—In accordance with the provisions of section 18 of the Indian Explosives Act, 1884 (IV of 1884), and of the notification of the Government of India in the Home Department, No. 1964, dated the 2nd September 1887, the Governor General in Council is pleased to publish for general information the following draft rules which His Excellency in Council proposes to make, in exercise of the powers conferred by sections 5 and 7 of the said Act. The draft will be taken into consideration by the Governor General in Council on the expiration of two months from the date of publication of this notification in the *Gazette of India.*

DRAFT RULES TO REGULATE THE TRANSPORT AND IMPORTATION OF EXPLOSIVES.

Preamble

In supersession of the Notification of the Government of India in the Home Department, No. 5528 (Public), dated the 11th October 1901, and of all amending notifications, and in exercise of the powers conferred by sections 5 and 7 of the Indian Explosives Act, 1884 (IV of 1884), the Governor General in Council is pleased to make the following rules to regulate the transport and importation of explosives.

Extent of application.

These rules extend to the whole of British India, but the rules relating to the transport of explosives shall cease to apply to any port as defined in the Indian Ports Act, 1889 (X of 1889), for which special rules made by the Local Government are for the time being in force, in so far as they are expressly superseded by, or are inconsistent with, such special rules.

General exemptions

Nothing in these rules shall apply to the packing, transport or importation of capped safety cartridge cases, if otherwise empty, when packed, transported or imported in the same consignment with arms covered by a licence granted under the Indian Arms Act, 1878 (XI of 1878).*

PRELIMINARY.

Classification of explosives

1. (*1*) For the purposes of these rules, explosives shall be classified as follows, namely:—

Class	1	Gunpowder.
"	2	Nitrate-mixture.
"	3	Nitro-compound.
"	4	Chlorate mixture.
"	5	Fulminate
"	6	Ammunition
"	7	Firework.

(*2*) When any explosive falls within more than one of the said classes, it shall be deemed to belong exclusively to the latest of such classes.

Definition of "gunpowder" (class 1).

2. The expression "gunpowder," as used in these rules, means exclusively gunpowder ordinarily so-called.

Definition of "nitrate-mixture" (class 2).

3. The expression "nitrate-mixture," as used in these rules, means any preparation, other than gunpowder, which is formed by the mechanical mixture of a nitrate with any form of carbon or with any carbonaceous substance not possessed of explosive properties, whether sulphur be or be not added to such preparation, and whether such preparation be or be not mechanically mixed with any other non-explosive substance.

Nitrate-mixture includes, among other explosives,—

Chilworth special powder,
Fortis explosive,
Ripp-Lene,
Safety blasting powder, and
Westfallite.

---

* Further exemptions are made by section 14 of the Indian Explosives Act, 1884, which runs as follows —

Saving for manufacture, possession, use, sale, transport or importation by Government.

"Nothing in this Act shall apply to the manufacture, possession, use, sale, transport or importation of any explosive —

(*a*) by order of the Government, or

(*b*) by any person employed under the Government in the execution of this Act, or as a keeper of a magazine, artizan, soldier, sailor, policeman or otherwise, or enrolled as a volunteer, under the Indian Volunteers Act, 1869, in the course of his employment or duty as such." XX of 1869.

Definition and subdivision of "nitro-compound" (class 3).

4. (1) The expression "nitro-compound," as used in these rules, means any chemical compound which is possessed of explosive properties or is capable of combining with metals to form an explosive compound, and is produced by the chemical action of nitric acid (whether mixed or not with sulphuric acid), or of a nitrate mixed with sulphuric acid upon any carbonaceous substance, whether such compound is mechanically mixed with other substances or not.

(2) Nitro-compound shall, for the purposes of these rules, be sub-divided as follows, namely:—

(a) Division 1, comprising—

(i) such explosives as—

Amberite No. 1,	Dynamite,
Ballistite,	Gelatine dynamite,
Blasting gelatine,	Gelignite,
Carbonite,	Lithofracteur,
Cordite,	Nitro-glycerine, and

Stonite, and

(ii) any chemical compound or mechanically mixed preparation which consists, either wholly or partly, of nitro-glycerine or some other liquid nitro-compound; and

(b) Division 2, comprising—

(i) such explosives as—

Amberite No. 2,	Nitrated-gun-cotton,
Ammonite,	Picrates,
Bellite,	Picric powder,
Coopal's powder,	Roburite,
Cotton gunpowder,	Sawdust and gun-cotton powder,
E. C. powder,	Schultz's powder, and
Gun-cotton ordinarily so-called,	Tonite (or cotton powder), and

(ii) any nitro-compound, as hereinbefore defined, which is not comprised in Division 1.

Definition and sub-division of "chlorate-mixture" (class 4).

5. (1) The expression "chlorate-mixture," as used in these rules, means any explosive containing a chlorate.

(2) Chlorate-mixture shall, for the purposes of these rules, be sub-divided as follows, namely:—

(a) Division 1, comprising—

(i) such explosives as—

Horsley's blasting powder, and
Brain's blasting powder, and

(ii) any chlorate preparation which consists partly of nitro-glycerine or of some other liquid nitro-compound, and

(b) Division 2, comprising—

(i) such explosives as—

Horsley's original blasting powder,	Hochstadter's blasting charges,
Erhardt's powder,	Reichen's blasting charges,
Reveley's powder,	Teutonite, and

Chlorated gun-cotton, and

(ii) any chlorate-mixture, as hereinbefore defined, which is not comprised in Division 1.

Definition and sub-division of "fulminate" (class 5).

6. (1) The expression "fulminate," as used in these rules, means any chemical compound or mechanical mixture, whether included in any of the foregoing definitions or not, which, from its great susceptibility to detonation, is suitable for employment in percussion-caps or any other appliance for developing detonation, or which, from its extreme sensibility to explosion and from its great instability (that is to say, readiness to undergo decomposition from very slight exciting causes), is especially dangerous.

(2) Fulminate shall, for the purposes of these rules, be sub-divided as follows, namely:—

(a) Division 1, comprising such compounds as the fulminates of silver and of mercury, and preparations of those substances, such as are used in percussion-caps, and any preparation consisting of a mixture of a chlorate with phosphorus, or certain descriptions of phosphorus compounds, with or without the addition of carbonaceous matter, and any preparation consisting of a mixture of a chlorate with sulphur, or with sulphuret, with or without carbonaceous matter; and

(b) Division 2, comprising such substances as the chloride and the iodide of nitrogen, fulminating gold and silver, diazobenzol, and the nitrate of diazobenzol.

Definition of "ammunition," "percussion-cap," "detonator," "safety fuze" and "safety cartridge," and sub-division of "ammunition" (class 6).

7. (1) The expression "ammunition," as used in these rules, means any explosive included in any of the foregoing definitions, when the same is enclosed in any case or contrivance, or is otherwise adapted or prepared, so as to form—

(a) a cartridge or charge for small-arms, cannon or any other weapon, or for blasting or

(b) a safety or other fuze for blasting or for shells, or

(c) a tube for firing explosives, or

(d) a percussion-cap, a detonator, a fog-signal, a shell, a torpedo, a war-rocket, or any other contrivance other than a firework.

(2) The expression "percussion-cap," as used in these rules, does not include a detonator.

(3) The expression "detonator," as used in these rules, means a capsule or case which is of such strength and construction, and contains fulminate in such quantity, that the explosion of one capsule or case would communicate the explosion to other like capsules or cases.

(4) The expression "safety fuze," as used in these rules, means a fuze for blasting which burns and does not explode, and which does not contain its own means of ignition, and which is of such strength and construction, and contains an explosive in such quantity, that the burning of such fuze would not communicate laterally with other like fuzes.

(5) The expression "safety cartridge," as used in these rules,—

(i) means a cartridge for small arms, the case of which can be extracted from the small-arm after firing, and which is so closed as to prevent any explosion in one cartridge being communicated to other cartridges; and

(ii) includes a rifle-calibre machine-gun cartridge, if it is as described in clause (i) whether it is for use with a machine-gun having chambers identical with those of rifles or with a machine-gun having special chambers.

Provided that the diameter of the cartridge in either case (i) or case (ii) does not exceed one inch.

(6) Ammunition shall, for the purposes of these rules, be sub-divided as follows, namely:—

(a) Division 1, comprising exclusively—

Safety cartridges,
Safety fuzes for blasting,
Railway fog-signals, and
Percussion-caps; and

(b) Division 2, comprising any ammunition, as hereinbefore defined, which does not contain its own means of ignition and is not included in Division 1, such as—

Cartridges for small-arms, other than safety cartridges,
Cartridges and charges for cannon, shells, mines, blasting or other like purposes,
Shells and torpedoes containing any explosive,
Fuzes for blasting, other than safety fuzes,
Fuzes for shells,
Tubes for firing explosives, and
War-rockets,

which do not contain their own means of ignition; and

(c) Division 3, comprising any ammunition, as hereinbefore defined, which contains its own means of ignition and is not included in Division I, such as—

Detonators,
Cartridges for small-arms, which are not safety cartridges,
Fuzes for blasting, which are not safety fuzes,
Fuzes for shells, and
Tubes for firing explosives,

containing their own means of ignition.

Explanation—The expression "ammunition containing its own means of ignition" means ammunition having an arrangement, whether attached to or forming part of the ammunition, which is adapted to explode or fire the ammunition by friction or percussion

Sub-Division of "firework" (class 7).

8 Fireworks shall, for the purposes of these rules, be sub-divided as follows, namely —

(1) Division 1, comprising firework compositions, that is to say,—

(a) any chemical compound or mechanically mixed preparation of an explosive or inflammable nature, which is used for the purpose of making manufactured fireworks, and is not included in any of the foregoing definitions,

(b) any star, and

(c) (except as declared in the proviso to this rule) any coloured fire composition; and

(2) Division 2, comprising manufactured fireworks, that is to say, any explosive of class 1, 2, 3, 4, 5 or 6 and any firework composition, when such explosive or composition is enclosed in any case or contrivance, or is otherwise manufactured so as to form a squib, cracker, toy cap or amorce, serpent, rocket (other than a war-rocket), maroon, lance, wheel, Chinese fire, Roman candle, or other article specially adapted for the production of pyrotechnic effects or pyrotechnic signals or sound signals:

Provided that a substantially constructed and hermetically closed metal case containing not more than one pound of coloured fire composition of such a nature as not to be liable to spontaneous ignition shall be deemed to be a "manufactured firework" and not a "firework composition."

TRANSPORT.

Packing of Explosives for conveyance.

9. The following general rules shall be observed with respect to the packing of explosives for conveyance.—

(1) Unless the context otherwise requires,—

the expression "outer package" means a box, barrel, case or cylinder, of wood, metal or other solid material, of such strength, construction and character that it will not be broken or accidentally opened, nor become defective or insecure whilst being conveyed, and will not allow any explosive to escape,

the expression "inner package" means a substantial case, bag, canister or other receptacle, made and closed so as to prevent any explosive from escaping,

the expression "authorized explosive" means exclusively an explosive included in a List of Authorized Explosives prepared by the Chief Inspector of Explosives with the Government of India, and published annually in the *Gazette of India*, and in force for the time being;

the expression "propellant" means an authorized explosive of class 3 adapted and intended exclusively for use as a propelling charge in cannon or small arms; and the expression "special authority" means a written authority granted by the Chief Inspector of Explosives, to which may be attached such conditions as may, in the opinion of the Chief Inspector of Explosives, be necessary to meet the special requirements of the case.

(2) The interior of every package shall be free from grit and otherwise clean.

(3) Save as hereinafter provided, there shall not be any iron or steel in the construction of any package unless the same is covered with suitable material so as effectually to prevent the exposure of such iron or steel.

(4) Every package when actually used for the packing of one explosive shall not be used for the packing of any other explosive or any other article or substance.

Provided that this rule shall not prevent the packing of inner packages containing a propellant in an outer package with inner packages containing gunpowder or another propellant.

Provided also that this rule shall not prevent the packing of any article which is not of an inflammable or explosive nature, or liable to cause fire or explosion, in the same package as an explosive of the 1st Division of the 6th (Ammunition) Class.

(5) Subject to the foregoing provisions, the following shall be the method of packing authorized explosives of the various classes, respectively, and the maximum amounts which may be in any one package:—

Class.	Method of packing.	Amount in any one outer package	Amount in any one inner package
Class 1	When the quantity in any one consignment does not exceed 5 lbs in amount, a single outer package, otherwise A double package, the inner and outer packages being as above defined	100 lbs. Provided that where gunpowder and propellant are packed together the amount shall not exceed— 50 lbs.	100 lbs. 25 lbs
Class 2	As for Class 1	50 lbs.	50 lbs
Class 3, Division 1, other than propellants	As for Class 1, provided that either the outer or inner package shall be thoroughly waterproof, and both shall be without metal in the construction thereof	50 lbs.	5 lbs
Class 3, Division 1, propellants	As for Class 1	50 lbs	50 lbs
Class 3, Division 2, other than Picric Acid and Wet Guncotton	As for Class 1	50 lbs	50 lbs.
Picric Acid	As for Class 1	Unlimited.	Unlimited.
Guncotton so wetted with water as to be absolutely uninflammable	As for Class 1, provided that the inner or outer package, or both of them, shall be of such a nature, and so closed, as to prevent any material loss of moisture during conveyance.	Unlimited	Unlimited.
Class 4	As for Class 1	50 lbs	50 lbs
Class 5	Packed in water A treble package, the innermost package being a bag permeable to water, enclosed in a case containing sufficient water to ensure the explosive being kept constantly wet; and the outer package containing sufficient water constantly to surround the case Both the case and the outer package shall be of such construction as will not allow water to escape. If the explosive is of such character that it cannot be packed in a thoroughly wet condition, it shall be packed in accordance with conditions set forth in a special authority.	200 lbs	25 lbs
Class 6, Division 1, other than Pin-fire cartridges for pistols.	A single outer package: Provided that the above general rule (3) shall not apply to explosives of this Division Provided also that bulleted cartridges of a calibre exceeding 0 5 inch and belonging to this Division shall be packed in such a manner that the point of any bullet cannot come in contact with the cap of another cartridge.	Unlimited.	...
Pin-fire cartridges for pistols.	(a) Not exceeding 50 in number in any one consignment —So packed in a single package that the bases lie alternately in opposite directions The bases and pins shall be so fitted into perforations in millboard or other suitable material as to prevent the firing of any one of the said cartridges by an explosion in any other of the said cartridges.	50 in number.	..

Class.	Method of packing.	Amount in any one outer package.	Amount in any one inner package.
	(b) Exceeding 50 in number :—In an inner and outer package, the cartridges being packed in inner packages with millboard as above required	2,500 in number.	50 in number.
Class 6, Division 2 . .	Explosives made up into cartridges or charges for cannon, shells, torpedoes, mines, blasting or other like purposes, shall be packed in such manner and in such quantity as is required for the same explosive when not so made up; provided that, where a double package is required, the enclosing case of such cartridges or charges may, if it satisfies the conditions required for an inner package, be held to be such inner package	......	......
	Other ammunition of this Division :—A single outer package.	100 lbs.	
Class 6, Division 3, other than Detonators and Electric Detonators	As for Class 1 . . . . . . Provided that bulleted cartridges of a calibre exceeding 0·5 inch and belonging to this Division shall be packed in such a manner that the point of any bullet cannot come in contact with the cap of another cartridge	50 lbs	2 lbs or 10 in number, whichever be the greater.
Detonators . . .	(a) Not exceeding 1,000 in any one consignment :—As for Class 1, provided that the detonators and the spaces between the same and between the sides of the inner package and the said detonators shall all be filled, as far as practicable, with fine sawdust or other similar material; a layer of felt or other soft yielding material shall be placed between both ends of all the detonators and the interior of the inner package in which the same are placed in such manner, and so secured, that both ends of the detonators will rest upon the said cotton wool or other material; every inner package, if of metal, to be lined throughout with paper or other soft material; and	1,000 in number	100 in number
	(b) Exceeding 1,000 detonators :— The detonators shall be packed in inner packages, with sawdust and cotton wool as above described Such inner packages shall be placed inside a substantial case of wood or metal, made and closed so as to prevent any of the inner packages escaping therefrom, and such case shall be placed inside an outer package in such manner and so secured as to leave a clear space of not less than three inches between the case and every part of the interior of the said outer package, notwithstanding that such clear space may, if preferred, be filled with sawdust, straw, or other similar material, or may contain a light framework or battens of wood to keep the case aforesaid in position in the outer package; and	10,000 in number	100 in number.
	(c) where the number of detonators exceeds 5,000 such outer package shall be provided with handles or other contrivance by means of which it can be safely and conveniently carried.		

Class.	Method of packing.	Amount in any one outer package.	Amount in any one inner package.
Electric Detonators	As for Class 1, provided that where the number in any outer package exceeds 3,000, such outer package shall be provided with handles or other contrivance, by means of which it can be safely and conveniently carried.	5,000 in number	100 in number.
Class 7, Division 1	Double package, the inner package being hermetically closed, and contained in an outer package as above defined.	20 lbs.	1 lb.
Class 7, Division 2	Single outer package, provided that the above general rule (3) shall not apply to explosives of this Division.	100 lbs.	......

(6) Nothing in this rule shall be deemed to prohibit the use of an additional package whether inner or outer, provided that such additional package shall not be of such character as shall have been prohibited in writing by the Chief Inspector of Explosives.

(7) An explosive which is not an authorized explosive shall be packed in such manner as may be directed by a special authority with reference to such explosive.

(8) On the outermost package there shall be affixed in conspicuous characters, by means of a brand or securely attached label or other mark, the word "Explosive," the name of the explosive, the number of the class and division to which it belongs, and the name of the manufacturer or sender.

In the case of explosives of Classes 3 and 4, there shall be added the date of manufacture or issue from the factory, or such sign indicating such date as may be approved by the Chief Inspector of Explosives.

Provided, first, that in the case of cartridges or charges for cannon, shells, mines, blasting or other like purpose, which do not contain their own means of ignition, the marking shall be as for the explosive when not so made up.

Provided, secondly, that in the case of explosives of Class 6, Division I (Safety Fuzes excepted), there shall be added the words "Not liable to explode in bulk."

Provided, thirdly, that in the case of Pin-fire cartridges for pistols there shall be added the words "Pin-fire cartridges."

Provided, fourthly, that in the case of Safety Fuzes or Gunpowder the word "Explosive" and the number of the class and division may be omitted, and

Provided, fifthly, that, where an outer package contains more than one explosive, the marking above required shall be affixed separately in respect of each explosive so contained.

(9) To meet special cases exemption may be granted by special authority from the observance of any one or more of the condition imposed by this rule.

10. Whoever commits a breach of any of the foregoing rules relating to the packing of explosives for conveyance shall be punishable with fine which may extend to Rs. 1,000. Penalty.

11. The following general rules shall be observed with respect to the conveyance of explosives : Mode of conveyance.

I.—No explosive shall be conveyed from place to place unless packed in the manner provided for in the foregoing rules.

II.—There shall not be conveyed in any carriage or vessel which is being used for the conveyance of an explosive, any explosive of a different class and division, of whatsoever nature, which contains its own means of ignition, unless it is sufficiently separated therefrom to prevent any fire or explosion which may take place in one such explosive being communicated to another.

III.—Except in the case of small consignments carried by railway which may be unloaded at any time, explosives shall be loaded or unloaded only between sunrise and sunset. For the purposes of this rule no consignment of more than half a wagon-load booked to one station shall be deemed to be a small consignment.

IV.—Whilst the explosive is being loaded on or unloaded out of any carriage or vessel, no fire or artificial light, or any article which is liable to cause or communicate fire or explosion [such as charcoal, lucifer matches, articles for striking a light, petroleum to which the Indian Petroleum Act, 1899 (VIII of 1899), or any other Act for the time being in force regarding the importation, possession, and transport of petroleum, applies, or any spirit or oil or substance that gives forth an inflammable vapour at a temperature below 100° Fahrenheit] shall be, or shall be allowed to be, brought, had or used dangerously near to such carriage, ship, or boat, and no smoking shall be allowed in, on, or dangerously near to, the same :

Provided that when the use of a light for the purposes of such loading or unloading is unavoidable, a lamp of such construction, position, or character as not to cause any danger from fire or explosion may be used; and no person, while handling any explosive (except an explosive of Division 1, Class 6, if packed in accordance with the packing rules) shall wear boots or shoes with iron or steel nails, heels or tips.

V.—In the loading or unloading of any explosive, the casks and packages containing the same shall be passed from hand to hand and not rolled upon the ground; they shall not be thrown or dropped down, but shall be carefully deposited and stowed.

VI.—The explosive shall not be conveyed except in the interior of a carriage so enclosed on all sides with wood or metal, or in the hold of a ship or boat having a close deck so closed, as effectually to protect the explosive against accident by fire from without. If the explosive cannot be so secured, it shall be completely covered with painted cloth, tarpaulin, or other suitable material so as to effectually protect it against communication of fire.

VII.—There shall not be any iron or steel in the interior of the portion of the carriage or vessel with which the case containing the explosive is or may come in contact, unless the same is effectually covered with leather, wood, cloth, or other suitable material.

VIII.—In the stowing of the explosive, due precautions shall be taken by means of a partition or otherwise and by careful stowing to secure such explosive from being brought into contact with, or endangered by, any other article or substance conveyed in such carriage or vessel which is liable to cause fire or explosion; and if the explosive is dangerously affected by water, due precautions shall be taken to exclude water from coming into contact with such explosive.

IX.—The amount of the explosives conveyed in any one carriage or vessel at any one time shall not exceed 2,000 lbs unless the carriage be so enclosed on all sides with wood or metal, or the vessel have a close deck so closed, as effectually to protect the explosive against accident by fire from without, in which case the amount of the explosives conveyed shall not exceed the following:*

	Tons.
In any one carriage on a railway	10
In any one other carriage	2
In any one vessel	20

* NOTE.—This rule shall, in the case of dynamite conveyed by railway, be read subject to paragraph XII of Rule 13.

X.—Nothing in the foregoing rules (except Rule 1) shall apply to any explosive of the 1st Division of the 6th (Ammunition) Class:

Provided that all due precautions are taken for the prevention of accidents.

Conveyance otherwise than by railway.

12. The following rules shall be observed with respect to the conveyance of explosives otherwise than by railway:

I.—No explosive shall be conveyed in a carriage or boat whilst carrying or plying for public passengers, unless the quantity is less than 5 lbs. and notice has been given beforehand to the person in charge of such carriage or boat: and all due precautions are taken for the prevention of accidents by fire or explosion:

Provided that there shall not be conveyed in any such carriage or boat any explosive of the 5th (Fulminate) Class or any explosive of the 3rd Division of the 6th (Ammunition) Class or of the 1st Division of the 7th (Firework) Class, except detonators packed according to Rule 9 to the number of 200:

Provided that the amount of explosive of the 5th (Fulminate) class in the detonator shall in no case exceed in the aggregate 3 oz. (a certificate to this effect being given by the agent of the company by whom the detonators are tendered for transport):

Provided also that no other explosive is carried in the same compartment.

II.—With respect to the conveyance by carriage or vessel of explosives of the 5th (Fulminate) class, or of the 3rd Division of the 6th (Ammunition) Class or of the 1st Division of the 7th (Firework) Class, or of larger quantities than 5 lbs. of any other explosive, the following regulations shall be observed:

(1) The person in charge of the carriage or vessel shall not drive or conduct the same in a dangerous or reckless manner, and shall take all due precautions to avoid fire and explosion, and no person shall do any act or thing in relation to the explosive which tends to cause fire or explosion, and is not reasonably necessary for the conveyance of the explosive or for work immediately connected with such conveyance; and a person who is intoxicated shall not have charge of any carriage or vessel conveying explosive, and shall not be permitted to be in, or on, or attending the same.

(2) A person shall not forward to any warehouseman or carrier a consignment of explosive, unless he has given notice to such warehouseman or carrier beforehand, stating the name and quantity of the explosive proposed to be conveyed, and the name and address of the proposed consignee, and has had an intimation that the warehouseman or carrier is prepared to receive the

consignment, and a warehouseman or carrier shall not make such an intimation nor receive such consignment, unless he is prepared to receive it, and forthwith to despatch the same, or to deposit it in a magazine or at a place at which a person is licensed to possess the same.

(3) The carriage or vessel conveying the explosive shall be in charge of, and constantly attended by, some competent person, or by a sufficient number of competent persons, and such persons shall not, if the amount of the explosive conveyed exceed 100 lbs., stop or delay for a longer time than may be reasonably necessary or stop unnecessarily at any place where such stopping would be attended with special public danger.

III.—No explosive belonging to class 1 (gunpowder class), class 2 (nitrate-mixture class), class 3 (nitro-compound class), class 4 (chlorate-mixture class) or class 5 (fulminate class), shall be carried, otherwise than by rail, across any railway bridge over which reasonable facilities for the conveyance thereof by rail are afforded by the Railway Administration.

Provided that this prohibition shall not apply in respect of quantities of explosives of class 1 (gunpowder class) or class 3 (nitro-compound class) not exceeding 5 lbs. in weight

13. The following rules shall be observed with respect to the conveyance of explosives by public railways : *Conveyance by public railways.*

I.—No person shall send for carriage upon any railway any consignment of an explosive, unless he has given to the officer in charge of the railway station previous notice in writing which, at the option of the Railway Administration, may extend to 48 hours, of his intention to send such consignment, and stating the true name, description, quantity, and mode of packing of the explosive proposed to be conveyed, and his own name and address, and also the name and address of the proposed consignee, and unless he has had an intimation in writing from an authorized officer of the railway that such consignment will be received.

II.—No explosive which a Railway Administration shall, by any notice or regulation for the time being in force, notify that they will not receive, shall be brought, sent, or forwarded to or upon any railway of the said Railway Administration

III.—Consignments of explosives shall be sent to the forwarding station and shall be received by the railway servants only at such times, between sunrise and sunset, as the Railway Administration may appoint, and every package containing any explosive proposed to be conveyed on any railway shall immediately on arrival at the station be unloaded and placed in a safe place under the special direction of the officer in charge of the station.

All gunpowder under despatch or receipt by a Government arsenal, depôt, or factory, shall be loaded or unloaded in the railway vans by Government servants employed in such arsenal, depôt, or factory. In each van used by the railway for the transport of gunpowder the packages of gunpowder shall be secured in such a way as to prevent concussion when the train is in motion.

IV.—An explosive shall be removed by the consignee from the receiving station during the twelve hours of daylight after arrival : if this condition is not strictly complied with, the Railway Administration may return the consignment to the consignor at his risk and expense. And such packages shall in the meanwhile be kept as far away from the station buildings as possible, in the wagon they were conveyed in, or, if unloaded, shall be completely covered with tarpaulins or other suitable material, and if necessary, shall be protected by a police guard.

V.—The Railway Administration may refuse to receive any packages which they suspect to contain any explosive packed or sent in contravention of these regulations And in case any package, which the Railway Administration suspect, shall be upon any railway, the Railway Administration may open, or require to be opened, such package to ascertain the fact, at the risk and expense of the consignor, and may return the explosive contained in the package to the consignor at his risk and expense, keeping the packages, pending such return in the manner prescribed in the preceding rule.

VI.—Subject to the exception provided for in clause (*e*), no explosive shall be conveyed by passenger train except of the kinds and in the manner hereinafter specified in this rule :

(*a*) Safety-cartridges and percussion-caps and safety-fuze (for blasting), also fog signals for railway use which may be conveyed in ordinary wagons or carriages.

(*b*) Explosives of the 3rd (nitro-compound) class which may be carried in the form of cartridges up to the limit of 5 lbs :

Provided that no detonators are carried in the same compartment.

(*c*) Detonators packed according to Rule 9 may be carried to the number of 200

Provided that in no case the amount of fulminate of mercury in the package or packages containing the detonators exceeds in the aggregate 3 oz (a

/ 1

certificate to this effect being given by the company, firm, or person tendering the detonators for transport or by its or his agent:

Provided also that no other explosive is carried in the same compartment.

(*d*) Sporting gunpowder or non-safety cartridges packed in double cases as before provided, so long as the gunpowder is contained in one-pound tin canisters packed in a stout wooden case with an outer covering of tin or zinc completely spark-proof, or in metal-lined cases of a pattern approved by the Railway Administration. But no outer case shall contain more than 25 lbs. of gunpowder, and the total consignment of gunpowder or non-safety cartridges by one train shall not exceed 80 lbs.

(*e*) Explosives may be carried by mixed trains on any line on which goods trains are not running, subject to the conditions that they are loaded in properly constructed powder vans; that not more than one powder van containing explosives is forwarded at any one time by a mixed train; that there are not less than three vehicles between the powder-van and either the engine or the passenger coaches; that the powder van is close coupled to the adjoining vehicles: and that directly a powder-van containing explosives arrives at a section on which goods trains are running, it is detached from the mixed train.

VII.—Not more than five carriages containing explosives shall be loaded or unloaded at any railway station, or be conveyed by any one train at any one time; and the quantity of explosive to be contained in any one carriage shall not exceed two-thirds of the normal load, unless the carriages shall be specially built and approved by the Railway Board for the conveyance of explosives. But nothing in this clause shall be held to apply to separate consignments of safety cartridges for small arms.

VIII.—There shall not be conveyed in the same carriage with any explosive any lucifer or other matches, fuzes, pipelights, acids, naptha, paraffine, petroleum to which the Indian Petroleum Act, 1899 (VIII of 1899), or any other Act for the time being in force regarding the importation, possession, and transport of petroleum, applies or any other volatile spirit substance liable to give off an inflammable vapour or liable to spontaneous ignition, or to cause or communicate fire or explosion.

IX.—The consignor shall attach to the consignment note a certificate or (provided the original is produced for verification) copy of a certificate, signed by an officer authorized by the Local Government in this behalf that the explosive if it is an explosive of class 3 or 4, is of the standard purity; and further in the case of dynamite, and all nitro-glycerine compounds, that there are no signs of exuded nitro-glycerine or of liquefaction. The consignor shall also certify that the explosive has been packed in accordance with the packing rules in force in England or in British India.

X.—In the case of explosives under classes 3 and 4, the outer packages shall be marked with the date of the manufacture of the explosives. The abovementioned certificate shall contain sufficient information to admit of all packages being easily recognized.

XI.—The certificate referred to in Rule 13 (IX) shall be valid for six months after date, if the examination has been made between the 15th October and 31st March, but any Railway Administration which accepts dynamite and other nitro-glycerine compounds for transport may demand a fresh certificate for these explosives, if presented for conveyance between 1st April and 15th October (both inclusive).

XII.—Packages containing dynamite and other blasting explosives of the 3rd (nitro-compound) class, or explosives of the 4th (chlorate-mixture), 5th (fulminate) classes or of the 1st division of the 7th (firework) class shall be stowed in one layer only and secured so as to prevent movement during transit, and the gross load in any one wagon shall not exceed 3 tons:

Provided that, if the packages of explosive are in rectangular form and are properly secured so as to prevent movement during transit, they may be stowed in any number of layers not exceeding five, and the gross load in any one wagon shall not exceed 5 tons.

XIII.—No explosive of the 5th (fulminate) class or of the 3rd division of the 6th (ammunition) class, or of the 7th (firework) class shall be carried in the same train with any explosive not of the class and division to which it belongs, unless it be sufficiently separated therefrom to prevent any fire or explosion which may take place in one such explosive being communicated to another.

XIV.—Wagons used for the carriage of explosives shall be examined to see that they are spark-proof, and have been cleaned out before they are loaded. Hair, cloth, hides, or other suitable materials shall be spread on the floor of the wagon and between each layer of packages, except when the packages are covered with gunny or felt, or contain safety cartridges for small arms packed in tin-lined service pattern boxes.

XV.—Wagons containing explosives shall be loaded and unloaded on sidings distant as far as possible from the station buildings.

XVI.—Packages containing explosives other than those referred to in Rule 13 (XII) shall not be stored in more than three layers one above the other But if the packages are in rectangular form and of uniform size (provided they are double packages, and are so secured as to prevent movement during transit) they may be packed in five layers one above the other. But in the case of safety cartridges, for small arms packed in tin-lined service-pattern boxes, there is no restriction. Subject to the provisions of Rule 11 (III), the loading and unloading of explosives when once begun shall be diligently proceeded with until the same is completed.

XVII —When the train is being marshalled, wagons loaded with explosive, may be shunted by a locomotive, if they are separated from the engine by not less than three wagons containing no explosive nor easily inflammable substance. This precaution is not necessary with wagons specially constructed for the carriage of explosives. The speed of these movements shall be restricted to five miles an hour; they shall be superintended by a duly authorized officer, who shall be held responsible for the observance of these orders. Flying shunts are strictly prohibited.

XVIII —Wagons containing explosives shall be placed at the end of the train away from the locomotive, and shall be close-coupled to one another as well as to the adjoining wagons, and shall be preceded and followed by three wagons not loaded with explosive or other traffic of an inflammable nature:

Provided as follows ;—

(*a*) on the Darjeeling-Himalayan Railway, wagons containing explosives and adjoining wagons need not be close-coupled to one another ; and

(*b*) on the Nilgiri Railway only one wagon need intervene between the locomotive and wagons containing explosives.

XIX.—If the wagons employed in the transport of explosives are provided with brakes other than iron brakes, the brakes thereon shall on no account be worked while the wagons are running with a train, nor shall brakes, other than iron brakes, on vehicles immediately adjoining such wagons, be worked while such wagons are so running.

XX.—Wagons shall in every case be locked when loaded with explosives.

XXI.—All operations connected with the transhipment of explosives at junction stations shall take place during daylight.

14 Whoever commits a breach of any of the foregoing rules relating to the mode of conveyance of explosives shall be punishable with a fine which may extend to Rs. 100 *Penalty*

IMPORTATION.

15 Subject to the following provisos, an explosive shall not be imported by sea or land into British India, except under and in accordance with the conditions of a license to import the explosive. *License when required for importation.*

Provided that explosives may be imported by sea, previous to the grant of an importation license, in accordance with rules I, II, III, and IV of this rule

I.—Any explosive other than an explosive specified in rule 18 may previously to the grant of license to import, if it is included in a list published under clause (1) of rule 9 and for the time being in force, and if it is certified to be of British manufacture or, if not of British manufacture, if it is imported from the United Kingdom and covered by the certificate granted by one of His Majesty's Inspector of Explosives in England, be landed in acordance with such regulations as the Local Government may prescribe in this behalf and be stored in a place set apart by the Local Government for this purpose, or in any private magazine declared by the Local Government to be suitable therefor.

II.—Any such explosive of British manufacture, may also be transported by rail to any such private magazines previously to the grant of a license to import.

III.—The Governor-General in Council may extend to any such explosive not of British manufacture regarding which he is satisfied that it has been manufactured under adequate official supervision the privilege of landing granted by rule I but such explosives may not be transported by rail until an importation license has been granted

IV.—Before any explosive is landed under rules I and III, the consignee shall give to the Chief Customs officer of the port such undertaking, with or without security, as the said officer thinks sufficient, to obey, in the event of the explosive failing to satisfy the prescribed tests, such directions as to its disposal as the Local Government may see fit to prescribe.

If samples are taken, the procedure shall be that described in rule 23.

Provided, also, that explosives of British manufacture may be imported by land, previous to the grant of an importation license, in accordance with rules V and VI of this rule.

V.—Explosives (except those specified in rule 18) included in a list published under rule 9 (1); and certified to be of British manufacture, may, previously to the grant of a license, be imported and conveyed under such conditions as the Local Government may prescribe, to a magazine appointed in this behalf by the Local Government

VI.—Before an explosive is imported under rule V, the consignee shall give to the Magistrate of the District in which the magazine appointed under rule V is situate, or to the Commissioner of Police if such magazine is situate in a Presidency town or Rangoon, such notice of his intention to import the explosive as the Local Government may prescribe; and shall give such undertaking, with or without security, as the said District Magistrate or Commissioner of Police may require, that he will, in the event of the explosive failing to satisfy the prescribed tests comply with such directions as to its disposal as the Local Government may issue.

If samples are taken, the procedure laid down in rule 24 shall be followed.

Penalty.

16. Whoever imports an explosive in contravention of rule 15 shall be punishable with fine which may extend to three thousand rupees.

Ports at which importation is lawful.

17. An explosive shall not be imported by sea except at one of the ports of Calcutta (including Moyapur and Diamond Harbour), Madras, Bombay, Rangoon, Calicut, Karachi Aden and (in the case of crackers only) Negapatam and Moulmein. But a license to import an explosive by sea from Rangoon into the port of Akyab, Sandoway, Kyouk Phyoo, Tavoy, Mergui or Victoria Point as the case may be, may be granted by the Magistrate of the District in which such port is situated. The fee payable in respect of each such license shall be one rupee, and the license shall be in Form A in the schedule hereto annexed.

Grant of licenses for importation in certain cases.

18 If the explosive is gunpowder or an explosive of the 1st division of the 6th (ammunition) class or of the 7th (firework) class, the license to import the same may be granted,—

(*a*) if the importation is by sea, by the Commissioner of Police of Calcutta, Madras, Bombay or Rangoon, or the District Magistrate of Calicut, Karachi, Aden, Negapatam or Moulmein as the case may be, and,

(*b*) if the importation is by land, by the officer appointed to grant licenses under rule 21.

Fees for licenses granted under Rule 18.

19. The fee payable in respect of each such license shall be Rs. 10; but if any explosive imported under a license into a British port is exported thence to another British port named in Rule 17 the necessary license for such re-import may be granted on payment of a fee of one rupee instead of Rs. 10.

Grant of licenses for importation by sea in cases not provided for by rule 18.

20 Licenses for the importation by sea of any explosives other than those specified in Rule 18 shall be granted by the Local Government or by some officer specially authorized by the Local Government in this behalf.

Grant of licenses for importation by land and fees for such licenses.

21. Licenses for the importation of explosives into British India by land shall be granted by the Magistrate of the District to which the explosives are consigned, or, if the explosives are consigned to a Presidency-town, or Rangoon by the Commissioner of Police. The fee payable in respect of each such license shall be Rs. 10.

Conditions for granting licenses under Rule 2

22. No license shall be granted for the importation of any explosives of the description referred to in Rule 20 unless—

(*a*) it is an explosive authorized for manufacture in, or importation into, the United Kingdom for general sale,

(*b*) its importation is recommended by the Chief Inspector of Explosives with the Government of India, and,

(*c*) if it is an explosive for which a test or examination has been prescribed by or under the orders of the Government of India, samples of it taken as hereinafter provided are certified by the Chemical Examiner or some other officer appointed by the Local Government in this behalf to have passed the test or examination from time to time prescribed.

Testing of importations by sea in certain cases.

23 On the arrival in any port at which the importation of explosives is lawful, of a ship having on board an explosive other than an explosive of the description referred to in Rule 18, such officer as the Chief Customs Officer authorizes in this behalf shall, as soon as may be, proceed on board and shall, if testing or examination is requisite under the last preceding rule, obtain samples of the explosive.

All explosives of which samples are taken for examination shall forthwith be deposited in a place or magazine set apart or notified under rule 15 I., and shall not be distributed for use until the importer has received from the licensing authority notice that it may be so distributed.

The master of the ship shall give to the said officer, without charge, such samples as he may require. The said officer shall affix to each such sample the name of the ship and of the consignee and such other distinguishing marks as he may think necessary, and shall forward the same to the Chemical Examiner or officer, as aforesaid, for report.

The Chemical Examiner or officer as aforesaid, after testing the said samples, shall without delay forward to the licensing authority, through the Chief Customs Officer, a report under his signature certifying whether the explosive has satisfied the prescribed test.

24. When an explosive imported by land has been conveyed to, and deposited in, the magazine referred to in rule 15-V, the person owning or being in charge of such magazine shall forthwith, if the testing or examination of the explosive is required by Rule 22, deliver free of charge to such officer or person as may be appointed by the Local Government in this behalf such samples as he may require. No explosive of which a sample has been so taken, shall be removed to its destination or distributed for use until the importer or the person in charge of the magazine has received from the licensing authority a notice that it may be so removed or distributed. *Testing of importations by land in certain cases.*

The officer or person appointed as aforesaid shall affix to the sample received by him the name of the consignee and such other distinguishing marks as he may think necessary, and shall forward the sample for report to the Chemical Examiner or other officer appointed by the Local Government in this behalf.

The Chemical Officer or such other officer as aforesaid shall, after testing the sample, without delay forward to the licensing authority, through the officer or person from whom he received the sample, a report under his signature certifying whether the prescribed test has been satisfied.

25. Explosives, other than those referred to in Rule 18, which have already undergone the test prescribed by Rules 22 and 23 at the ports of Calcutta (including Moyapur and Diamond Harbour), Madras, Bombay, Rangoon, Calicut, Karachi, or Aden, may be re-imported by sea into any other of those ports under a license granted under Rule 20 without re-testing, but subject, in the case of such explosives as are mentioned in Rule 13, Clause IX, to the production of the certificate prescribed in that clause. *Re-importation from one prescribed port into another.*

Such certificate shall be valid for six months after date, if the examination has been made between the 15th October and 31st March; but in the case of dynamite, a fresh certificate may be demanded if the consignment is imported between the 1st April and 15th October (both inclusive).

26. The period for which a license to import an explosive, granted under Rules 20 and 21 shall continue in force shall not exceed such period as may seem necessary to the authority granting the license. *Duration of license granted under Rules 20 and 21.*

27. The fee payable on a license granted under Rule 20 shall be Rs. 10, but if any explosive imported under a license into a British port is exported thence to another British port named in Rule 17, the necessary license for such re-import may be granted on payment of a fee of one rupee instead of Rs. 10. *Fees for licenses granted under Rule 20.*

28. Every license granted under Rules 18, 20 and 21, shall be in Form A in the Schedule hereto annexed, and shall be subject to the conditions therein prescribed, and also to such additional conditions with respect to the time and place of unloading, landing, delivery and conveyance of the explosive, and such other conditions as may in each case be thought by the licensing officer to be necessary for the public safety or in the interest of the State. *Form of licenses under Rules 18, 20 and 21.*

29. Whoever commits a breach of any condition, subject to which a license under Rules 18, 20 and 21 is granted, shall be punishable with fine which may extend to three thousand rupees. *Penalty.*

30. (*1*) Any of the officers mentioned in clause (*2*) of this rule may, within the areas respectively specified in that clause, but subject to the provisions of the Indian Arms Act, 1878 (XI of 1878), and of any rules for the time being in force thereunder, in cases to which that Act applies,— *Powers of inspection, search, seizure, etc.*

(*a*) enter, inspect and examine any carriage or vessel in which an explosive is being transported or imported under a license granted under these rules or any prior rules made under the Indian Explosives Act, 1884 (IV of 1884), or in which he has reason to believe that an explosive has been or is being transported or imported in contravention of the said rules or Act, and may enter, inspect and examine any magazine or place in which explosives are stored under the provisions of rule 15;

(*b*) search for explosives in any such carriage, vessel, magazine, or place;

(*c*) take samples of any explosives found therein, on payment of the value thereof, if payment can be made at the time the samples are taken; and

(*d*) seize, detain, remove and, if necessary, destroy or otherwise render harmless any explosive found therein in respect of which he has reason to believe that any of the provisions of the said rules or Act have been contravened.

(*2*) The officers and areas referred to in clause (*1*) of this rule are.—

Officers.	Areas.
The Chief Inspector and Inspector of Explosives.	In all parts of British India.
All District Magistrates.	Within their respective districts.
All Magistrates subordinate to the District Magistrate.	Within the areas respectively subject to their jurisdiction.
The Commissioner of Police, and all Police-officers of rank not below that of Inspector, if specially deputed in this behalf by the Commissioner of Police.	In Presidency towns and Rangoon.
All Police-officers of rank not below that of Inspector.	Within the respective areas over which their authority extends

(3) Whenever the Chief Inspector or an Inspector of Explosives, or any Magistrate subordinate to the District Magistrate, or any Police-officer seizes, detains or removes any explosive under this rule, he shall report the fact to the District Magistrate or (in a Presidency town or its suburbs or in Rangoon) the Commissioner of Police.

(4) Neither the Chief Inspector nor an Inspector of Explosives, nor any Magistrate subordinate to the District Magistrate, nor any Police-officer shall under these rules destroy or otherwise render harmless any explosive without the previous sanction of the District Magistrate or (in a Presidency-town or its suburbs or in Rangoon) the Commissioner of Police unless the matter appears urgent and fraught with serious public danger.

(5) Whenever any officer destroys any explosive or otherwise renders it harmless, he shall take and keep a sample thereof, and shall if required, give a portion of the sample to the person owning the explosives or having the same under his control at the time of seizure, and, whenever any officer other than the District Magistrate or Commissioner of Police so deals with any explosive, he shall report the circumstances to the District Magistrate or (in a Presidency-town or its suburbs or in Rangoon) the Commissioner of Police.

GENERAL.

Forfeiture of licenses.

31. Every license granted under these rules shall be liable to be forfeited on breach of any of the conditions subject to which it is granted.

Exemption from penalties of persons carrying on business of deceased or disabled licensee.

32. If a person licensed to import an explosive dies or becomes bankrupt or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty or forfeiture under the Indian Explosives Act, 1884 (IV of 1884), or the rules thereunder for acting under the license during such reasonable time as may be necessary to allow him to make an application to the authority granting the license for a new license in his own name during the currency of the unexpired portion of the original license. Such new license shall be granted on payment of one rupee.

Method of levying fees.

33. All fees chargeable for licenses under these rules shall ordinarily be levied by means of impressed stamps. An application for the grant or the renewal of a license shall bear the proper stamp: provided that, if it is refused, the value of the separate stamp (if any) which may have been already provided by the applicant for the desired license or renewed license, *minus* the deductions prescribed by section 54 of the Indian Stamp Act, 1899 (II of 1899), may be refunded to the applicant. An application should not be made on the stamped paper intended for the license or renewed license; but, where this has been wrongly done, the value of the stamp may be refunded *minus*—

(i) the value of the stamp which should have been affixed to the application, and

(ii) the deductions prescribed as aforesaid.

Where the fees leviable under these rules have been made over to any local body, the fees shall be paid in such manner as that local authority may from time to time direct.

Grant of duplicate licenses.

34. When a license granted in accordance with these rules is lost, or accidentally destroyed, a duplicate may be granted to the licensee on payment of a fee of 8 annas.

Production of licenses.

35. Any person holding a license, or acting under a license granted in accordance with these rules, shall be bound to produce the same when called upon to do so by any Magistrate, or by any Police officer in charge of a Police station, or by any Police officer of higher rank.

Control over officers.

36. All Magistrates or other authorities acting under these rules shall perform their duties subject to the control of their executive superiors and of the Local Government.

Power to extend effect of license.

37. Any authority empowered to grant a license under the foregoing rules may, if he thinks fit, direct by an order written on the license that it shall have the effect of a like license under the Indian Arms Act, 1878 (XI of 1878).

Importation without license.

38. Any persons lawfully entitled under the Indian Arms Act, 1878 (XI of 1878), or the rules thereunder, to possess any explosive coming under the head of ammunition, as defined in that Act, may import without license under these rules any such explosive in such quantities as may be prescribed by that Act or the rules thereunder, or, when no quantities are prescribed, in reasonable quantities for his own private use; but, when an explosive is so imported, the Collector of Customs or any other officer empowered by the Local Government in this behalf by name or by virtue of his office may at any time detain such explosive until he receives the orders of the Local Government thereon.

FORM A.

(*See Rules 18, 20, 21 and 28.*)

FEE TEN RUPEES IN STAMPS.

License to import Explosives.

Name, etc., and address of licensee-holder.	Number of packages.	Explosive.			Purpose for which required.	Destination.	Period for which the license is valid.
		Description.	Weight.	Number			
							From ______ ______ the of ______ ______ to the ______ ______ th of ______ ______ 190

The ______ of ______ 190

(Seal)

(Signature) ______ of ______

CONDITIONS.

1. This license is given subject to the provisions of the Indian Explosives Act, 1884 (IV of 1884), and the rules thereunder. Certain general rules are quoted separately below.

2. This license shall become void after expiry of the period named thereon.

3. This license is valid for importation only; if the articles named herein are to be transported to any place outside the Presidency town / * town of, they must be protected by a transport license, to be issued in accordance with the rules under the Indian Arms Act, 1878 (XI of 1878), except in the case of explosives despatched to places or magazines set apart or notified under the proviso to rule 15.

4. On the outside of each package there shall be affixed in conspicuous characters by means of a brand or securely attached label or mark the word "Explosive," followed by the name of the explosives or other description of the contents and the name and address of the owners or senders.

GENERAL RULES.

* * *

31. Every license granted under these rules shall be liable to be forfeited on breach of any of the conditions subject to which it is granted. *Forfeiture of license.*

32. If a person licensed to import an explosive dies or becomes bankrupt or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty or forfeiture under the Indian Explosives Act, 1884 (IV of 1884) or the rules thereunder for acting under the license during such reasonable time as may be necessary to allow him to make an application to the authority granting the license for a new license in his own name during the currency of the unexpired portion of the original license. Such new license shall be granted on the payment of one rupee. *Exemption from penalties of persons carrying on business of deceased or disabled licensee.*

* *Note*—In the case of explosives imported into a town other than a Presidency town as defined in the General Clauses Act, 1897 (X of 1897), section 3, clause (41), the name of the town should be inserted

Method of levying fees.

33. All fees chargeable for licenses under these rules shall ordinarily be levied by means of impressed stamps. An application for the grant or the renewal of a license shall bear the proper stamp: provided that, if it is refused, the value of the separate stamp (if any) which may have been already provided by the applicant for the desired license or renewed license, *minus* the deductions prescribed by section 54 of the Indian Stamp Act, 1899 (II of 1899), may be refunded to the applicant. An application should not be made on the stamped paper intended for the license or renewed license; but where this has been wrongly done, the value of the stamp may be refunded *minus*—

(*i*) the value of the stamp which should have been affixed to the application, and

(*ii*) the deductions prescribed as aforesaid.

Where the fees leviable under these rules have been made over to any local body, the fees shall be paid in such manner as that local authority may from time to time direct.

Grant of duplicate licenses.

34. When a license granted in accordance with these rules is lost, or accidentally destroyed, a duplicate may be granted to the licensee on payment of a fee of 8 annas.

Production of licenses.

35. Any person holding a license, or acting under a license granted in accordance with these rules, shall be bound to produce the same when called upon to do so by any Magistrate, or by any Police officer in charge of a Police station, or by any Police officer of higher rank.

Draft Rule for Testing Explosives.

With reference to Rule 22 of the Rules to regulate the transport and importation of explosives published with this Notification and in supersession of the Notification of the Government of India in the Home Department, No 5529 (Public), dated the 11th October 1901, the Governor-General in Council is pleased to make the following rule on the subject of the tests which explosives should be required to pass before their importation is permitted:

RULE.

Class 1.—Gunpowder class. Gunpowder is not required to pass a test.

Class 2.—Nitrate-mixture class. Nitrate-mixture explosives are not ordinarily required to pass a test. The Local Government, however, or the authorized officer granting the import license under Rules 20 and 21 of the Rules to regulate the transport and importation of explosives published with this Notification may in any particular case or class of cases require that a sample of the explosive which is to be imported be sent first to the Chemical Examiner for an analysis of its constituent parts.

Class 3.—Nitro-compound class. It is for explosives of this class that testing is chiefly required, in respect to the purity of their composition and their liability to liquefaction or exudation. The tests prescribed for nitro-compound explosives are contained in Schedule A attached to this rule.

Class 4.—Chlorate-mixture class. See Schedule A for remarks regarding the testing of this class (*).

Class 5.—Fulminate class. No test has been laid down for explosives of the Fulminate class (*).

Class 6.—Ammunition class. No test is required for explosives of the 1st Division of this class. If the substances of which explosives of the 2nd and 3rd Divisions are composed have to be tested under the preceding rules, they will be equally liable to be tested when enclosed in any case or contrivance and thus falling under the Ammunition class.

Class 7.—Firework class. Explosives of this class are not required to pass a test.

SCHEDULE A.

Heat Test as applied to Explosives of the Nitro-compound Class.

GENERAL INSTRUCTIONS.

Apparatus required.

1. A water bath, consisting of a spherical glass or copper vessel [(*a*) Fig. 1] of about 8 inches diameter, and with an aperture of about 5 inches; the bath is filled with water to within a quarter of an inch of the edge. It has a loose cover of sheet copper about 6 inches in diameter (*b*), and rest on a tripod stand about 14 inches high (*c*), which is covered with coarse iron wire gauge (*e*), and is surrounded with a screen of thin sheet tin or copper (*d*). Within the latter is placed an Argand burner (*f*), with glass chimney. The cover (*b*) has

(*) Licenses are not at present given for the importation into British India of any explosives of these classes.

four holes arranged as seen in Fig. II, No. 4 to receive the regulator, No. 3 the thermometer, Nos. 1 and 2 the test-tubes containing the gun-cotton or other materials to be tested. Around holes 1 and 2 on the under side of the cover are soldered three pieces of brass wire with points slightly converging (Fig. III); these act as springs and allow the test-tubes to be easily placed in position and removed.

Fig. I

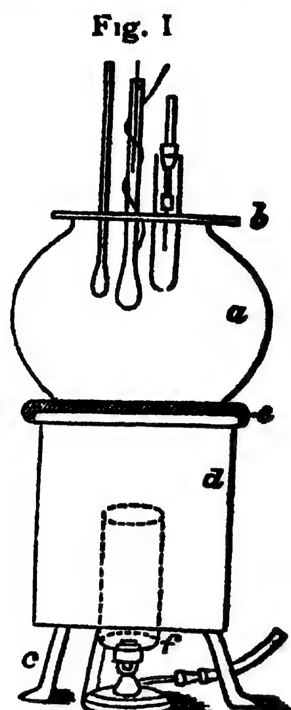

Fig. II.

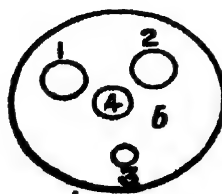

Fig IV.

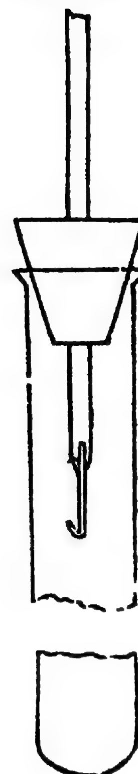

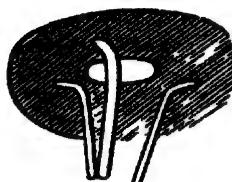

Fig III.

* 2. Scheibler's or Page's temperature regulator.

* 3. Two cells of Le Clanche's battery No. 1 } if Scheibler's regulator is used.
* 4. A few yards of insulated copper wire }

5. Test-tubes from 5½ to 5¾ inches long, and of such diameter that they will hold from 20 to 22 cubic centimeters of water when filled to a height of 5 inches.

6. India-rubber stoppers, fitting the test-tubes and carrying an arrangement for holding the test-paper, *viz.*, a narrow glass tube passing through the centre of the stopper, drawn out so as to form a hook, or terminating in a platinum wire hook (Fig. IV).

7. A thermometer, with range not less than from 30° to 212° Fahrenheit.

8. A minute clock.

Materials required.

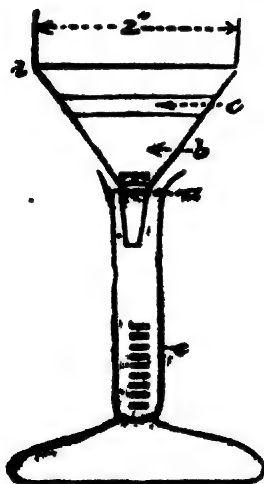
(*a*) *Test-paper* —The test-paper is prepared as follows :—45 grains of white maize starch (cornflour), previously washed with cold water, are added to 8¾ ounces of distilled water, the mixture is stirred, heated to boiling, and kept gently boiling for 10 minutes; 15 grains of pure potassium iodide (*i e*, which has been recrystallized from alcohol) are dissolved in 8¾ ounces of distilled water. The two solutions are thoroughly mixed and allowed to get cold Strips, or sheets, of best white English filter paper, weighing, air dry, from 4·1 to 4 6 grains per 100 square inches, previously washed with water and redried, are dipped into the solution thus prepared, weighing, air dry, about 6 5 grains per 100 square inches, and allowed to remain in it for not less than 10 seconds, they are then allowed to drain and dry in a place free from laboratory fumes and dust. The upper and lower margins of the strips, or sheets, are cut off, and the paper is preserved in well-stoppered or cork bottles *and in the dark*.† The dimensions of the pieces of test-paper used are about $\frac{4}{10}$ inch by $\frac{8}{10}$ inch (10 mm. by 20 mm).

* This is not absolutely required, as the temperature of the bath can be kept constant by proper attention to the heating flame.

† When a paper is freshly prepared, and as long as it remains in good condition, a drop of dilute acetic acid, put on the paper with a glass rod, produces no coloration. In process of time, however, the stronger the light to which the paper is exposed, the sooner a drop of acid produces a brown or bluish coloration (a single hour of direct sunlight produces a marked effect), and when ever this is the case the paper should be rejected. After preparation the paper should be kept in the dark for a month before being taken into use. After that, if carefully kept in the dark, it will remain good for six months or more, but should be tested from time to time as above.

(*b*) *Standard tint paper.*—A solution of caramel in water is made of such concentration that when diluted one hundred times (10 cc. made up to 1 litre) the tint of this diluted solution equals the tint produced by the Nesser test in 100 cc. water containing 0·000075 grm. of ammonia or 0·00023505 grm. of chloride of ammonium. With this caramel solution lines are drawn on strips of white filter paper* by means of a clean quill pen. When the marks thus produced are dry the paper is cut into pieces of the same size as the test-paper previously described, in such a way that each piece has a brown line across it near the middle of its length, and only such strips are preserved in which the brown line has a breadth varying from ½ mm. to 1 mm. ($\frac{1}{50}$ of an inch to $\frac{1}{25}$ of an inch).

I.—Testing Dynamite, Blasting Gelatine, and other Eplosives of the First Division of the Nitro-compound class.



A. DYNAMITE, ETC., ETC.

Nitro-Glycerine preparations, from which the nitro-glycerine can be extracted in the manner described below, *must* satisfy the following test.

This test, however, though at present looked upon as the most important, as far as testing the purity of the nitro-glycerine is concerned, is in England only one of several which any given sample of nitro-glycerine preparation has to satisfy in order to establish its compliance with the definition in the Authorised List.

Apparatus required.

A funnel 2 inches across (*d*), a cylindrical measure divided into grains (*e*). (See sketch.)

Mode of operation.

About 300 to 400 grains of dynamite (*b*) finely divided are placed into the funnel which has previously been loosely plugged by some freshly-ignited asbestos (*a*).

The surface is smoothed by means of a flat-headed glass rod or stopper, and some clean washed and dried Kieselguhr (*c*) is spread over it to the depth of about ⅛ inch.

Water is next carefully dropped from a wash bottle upon this Kieselguhr, and when the first portion has been soaked up more is added; this is repeated until sufficient nitro-glycerine has been collected in the graduated measure (*e*) below.

If any water should have passed through with the nitro-glycerine, it should be removed with a piece of blotting paper, and the nitro-glycerine, if necessary, filtered through a dry paper filter.

Application of the Test.

The thermometer is fixed so as to be inserted through the lid of the water bath described under I, into the water (which is to be steadily maintained at a temperature of 160° Fahr.†) to a depth of 2½ inches. Fifty grains of nitro-glycerine, to be tested are weighed into a test-tube in such a way as not to soil the sides of the tube. A test-paper

---

* This paper must be carefully washed with distilled water, in the first instance, to remove any traces of bleaching matter, and dried

† For explosives supplied for His Majesty's Military and Naval Services the temperature is fixed by the War Office at 180°.

is fixed on the hook of the glass rod, so that when inserted into the tube it will be in a vertical position. A sufficient amount of a mixture of half distilled water and half glycerine to moisten the upper half of the paper is now applied to the upper edge of the test-paper, by means of a camel's-hair pencil, the cork carrying the rod and paper is fixed into the test-tube and the position of the paper adjusted so that its lower edge is about half-way down the tube; the latter is then inserted through one of the perforations of the cover to such a depth that the lower margin of the moistened part of the paper is about five-eighths of an inch above the surface of the cover. The test is complete when the faint brown line which after a time makes its appearance at the line of boundary between the dry and moist part of the paper equals in tint the brown line of the standard tint paper.

The nitro-glycerine under examination will not be considered to have satisfied the test unless the time necessary to produce the standard tint as above described is at *least* 15 minutes.

B.—BLASTING GELATINE, GELATINE DYNAMITE, AND ANALOGOUS PREPARATIONS.

Fifty (50) grains of blasting gelatine are to be intimately incorporated with one hundred (100) grains of French chalk.* The mixture is to be gradually introduced into a test-tube of the dimensions prescribed above for the dynamite heat test, with the aid of gentle tapping upon the table, between the introduction of successive portions of the mixture into the tube, so that when the tube contains all the mixture it shall be filled to the extent of 1¾ inches (one inch and three-quarters) of its height. The test-paper is then to be inserted and the heat is to be applied in the manner prescribed above for the dynamite heat test, and the sample tested is to withstand exposure to 160° Fahr. for a period of ten (10) minutes, before producing a discoloration of the test-papers corresponding in tint to the standard colour test which is employed for governing the results of the dynamite heat test.

(For Exudation and Liquefaction tests for Blasting Gelatine, etc., etc., *see* Appendix).

N. B.—Non-gelatinised nitro-glycerine preparations, from which the nitro-glycerine cannot be expelled by water, are tested without any previous separation of the ingredients, the temperature being as above (160° Fahr.) and the time being seven (7) minutes.

C.—CORDITE AND BALLISTITE.

1. Apparatus required.

The apparatus necessary for the application of the heat test to cordite is identical with that described above for explosive of the nitro-compound class generally† with the addition of a mill and a nest of sieves‡ similar to those used at Waltham Abbey for preparing the cordite for testing (*see* instructions below).

2. Preparation of the sample to be tested.

Pieces half an inch long are cut from one end of every stick selected for the test; in the case of the thicker cordites, each piece so cut is further sub-divided into about four portions. These cut pieces are then passed once through the mill, the first portion of material which passes through being rejected on account of the possible presence of foreign matter from the mill. The ground material is put on the top sieve of the nest of sieves and sifted. That portion which has passed through the top sieve and been stopped by the second is taken for the test. If the mill is properly set, the greater portion of the ground material will be of the proper size.

If the volatile matter in the explosive exceeds 0·5 per cent. the sifted material should be dried at a temperature not exceeding 140° Fahr. until the proportion does not exceed 0·5 per cent.

* This can be readily effected by carefully working the two materials together with a wooden pestle in a wooden Mortar.

The French chalk should be of good commercial quality, and, after being carefully washed with distilled water and dried in a water oven, it should be exposed under a bell jar to moist air until it has taken up about 0·5 per cent. of moisture. It should then be bottled for use; and with ordinary care the limits of 0·5 per cent. can be maintained in keeping.

† In the Waltham Abbey apparatus the cover (Fig. II) has all the holes around the circumference instead of having one in the centre and three around the circumference.

‡ A nest of two sieves with holes drilled in sheet copper. The holes in the top sieve have a diameter = 14 B. W. G.; those in the second = 21 B. W. G.

If too hard for the mill, it may be softened by exposure to the vapour of acetone, or reduced to the necessary degree of sub-division by means of a sharp moderately coarse rasp. Should it have become too soft in the acetone vapour for the mill, it should be cut up into small pieces which may be brought to any desired degree of hardness by simple exposure to air.

Explosives which consist partly of gelatinized collodion cotton and partly of ungelatinized gun-cotton are best reduced to powder by a rasp, or softened by exposure to mixed ether and alcohol vapour at a temperature of 90° to 100° Fahr

After each sample has been ground, the mill must be taken to pieces and carefully cleaned.

3. Application of the Test.

The thermometer is fixed so as to be inserted through the lid of the water bath described under I, so as to be immersed in the water to a depth of 2¾ inches. The water is maintained at a constant temperature of 180° Fahr When this temperature is reached, 25 grains of the sifted cordite are put into one of the test-tubes, and collected at the bottom by gentle tapping. A test-paper is fixed on to the hook of the glass rod, so that when inserted into the tube it will be in a vertical position. A mixture of equal parts of distilled water and pure glycerine (Price's) is now applied to the upper edge of the test-paper by means of a camel's-hair pencil, in sufficient amount to moisten the upper half; the stopper carrying the rod and paper is fixed into the test-tube and the position of the paper adjusted, so that its lower edge is about half-way down the tube; the latter is then inserted through one of the perforations of the cover to the same depth as the thermometer. The lower margin of the moistened part of the paper should then be about five-eighths of an inch above the surface of the cover. The test is completed when the faint brown line, which after a time makes its appearance at the margin between the wet and dry portions of the test-paper, equals in depth of tint the brown line drawn on the standard tint paper.

4 The time which elapses between the insertion of the test-tube and the completion of the test must not be less than 15 minutes.

N. B.—In the case of ballistite the treatment is the same, except that when it is in a very finely granulated condition it need not be cut up.

II.—Testing Gun-cotton, Schultz's Gunpowder, E. C. Powder, and other explosives of the 2nd Division of the Nitro-compound class.

A.—COMPRESSED NITRO CELLULOSE, TONITE, ETC., ETC.

Sufficient material to serve for two or more tests is removed from the centre of the cartridge by gentle scraping, and if necessary, further reduced by rubbing through a sieve with a clean hard brush

The fine powder thus produced is spread out in a thin layer upon a paper tray 6 inches by 4½ inches which is then placed inside a water oven, kept, as nearly as possible, at 120° Fahr.

The wire gauze shelves in the oven should be about 3 inches apart The sample is allowed to remain at rest for 15 minutes in the oven, the door of which is left wide open.

After the lapse of 15 minutes the tray is removed and exposed to the air of the room for two hours, the sample being at some point within that time rubbed upon the tray with a brush, in order to reduce it to a fine and uniform state of division.

Application of the Test.

The cover of the water bath is fitted with the gas regulator which is inserted through the centre hole (No 4). The thermometer is fixed into hole No 3. The water in the bath is then heated to 170° Fahr., and the regulator set to maintain that temperature. Twenty grains of the sample to be tested are weighed out, placed in the test-tube, and gently pressed down until the specimen occupies a space of not more than 1 3/8 inches in a test-tube of the dimensions specified A test-paper is affixed to the hook of the glass rod or tube, and moistened by touching the upper edge with a drop of distilled water containing 50 per cent. of Price's glycerine. The quantity of liquid used must be only sufficient to moisten about half of the paper. The cork carrying the rod and test-paper is then fixed into the test-tube, and the latter inserted into the bath to a depth of 2¼ inches, measured from the cover, the regulator and thermometer being inserted to the same depth. The test-paper is to be kept near the top of the test-tube but clear of the cork until the tube has been immersed for about five minutes A ring of moisture will about this time be deposited upon the sides of the test-tube a little above the cover of the bath, the glass rod must then be lowered until the lower margin of the moistened part of the paper is on a level with the bottom of the ring of moisture in the tube, the paper is now closely watched The test is complete when the faint brown line which makes its appearance at the line of boundary between the dry and moist parts of the paper equals in tint the brown line of the standard tint paper.

The interval of time between the first insertion of the tube containing the sample of gun-cotton in the water at 170° and the production of the standard tint constitutes the test and this interval of time must be *not less* than 10 minutes, or the sample will not be considered to have satisfied the test.

B.—GELATINIZED AND SEMI-GELATINIZED NITRO-CELLULOSE PREPARATIONS.*

Twenty-five grains introduced into the test-tube* of the dimensions prescribed for the dynamite heat test, then proceed as for Blasting Gelatine, etc., taking the temperature at 180° Fahr., and the time as 15 minutes.

C.—NITRO-CELLULOSE NOT INCLUDED IN A. OR B., SCHULTZ'S POWDER, E. C. POWDER, ETC., ETC.

Sufficient of the sample, without further mechanical division, is dried in the oven as above, and then exposed for two hours to the air. The test as directed above for Compressed Nitro-Cellulose, etc., is then applied, the minimum duration of test being the same, *viz.*, 10 minutes.

D.—PICRIC ACID.

(1) The material shall contain not more than 0·3 part of mineral or non-combustible matter in 100 parts by weight of the material dried at 160° Fahr.

(2) It should not contain more than a minute trace of lead.

(3) One hundred parts of the dry material shall not contain more than 0·3 part of *total* (free and combined) sulphuric acid, of which not more than 0·1 part shall be *free* sulphuric acid.

(4) Its melting point should be between 248° and 253° Fahr.

E.—AMMONITE, BELLITE, ROBURITE, AND EXPLOSIVES OF SIMILAR COMPOSITION.

These are required to stand the same heat test as Compressed Nitro-Cellulose.

III.—Testing Chlorate Mixtures:

The material must not be too sensitive † and must show no tendency to increase in sensitiveness on keeping.

The material must contain nothing liable to reduce the chlorate.

Chlorides calculated as Potassium Chloride must not exceed 0·25 per cent.

The material must contain no free acid, or substance liable to produce free acid.

Explosives of this class containing nitro-compounds will be subject to the Heat Test as if they belong to Class III.

APPENDIX.

Exudation and Liquefaction Test for Blasting Gelatine, Gelatine Dynamite and analogous Preparations.

TEST FOR LIQUEFACTION.

A cylinder of blasting gelatine is to be cut from the cartridge to be tested, the length of the cylinder to be about equal to its diameter and the ends being cut flat.

The cylinder is to be placed on end on a flat surface without any wrapper, and secured by a pin passing vertically through its centre.

In this condition the cylinder is to be exposed for one hundred and forty-four (144) consecutive hours (six days and nights) to a temperature ranging from 85° to 90° Fahr. (inclusive), and during such exposure the cylinder shall not diminish in height by more than one-fourth of its original height, and the upper cut surface shall retain its flatness and the sharpness of its edge.

Note.—If the blasting gelatine and the gelatine dynamite to be tested be not made up in a cylindrical form, the above test is to be applied with the necessary modifications.

TEST FOR LIABILITY TO EXUDATION.

There shall be no separation from the general mass of the blasting gelatine or gelatine dynamite of a substance of less consistency than the bulk of the remaining portion of the

* If in a compressed form it should be broken up in the same manner as cordite and ballistite.

† They will be considered too sensitive if they can be exploded however partially by means of a glancing blow with a broomstick on soft wood (such as deal).

materials under any conditions of storage, transport, or use, or when the material is subjected three times in succession to alternate freezing and thawing, or when subjected to the liquefaction test hereinbefore described.

CUSTOMS.

The 29th November 1906.

No. 9227—75—In exercise of the power conferred by section 19 of the Sea Customs Act, 1878 (VIII of 1878) the Governor General in Council is pleased to prohibit the bringing by sea or by land into British India of cocaine by means of the post; and to restrict its importation by any other means to cases in which it is imported by persons, or by their authorised agents, who have been specially permitted to import the drug by a Local Government or Administration

GEOLOGY AND MINERALS.

The 29th November 1906.

No. 9397—198.—Mr. W. A K Christie is appointed to the post of Chemist in the Geological Survey of India, with effect from the afternoon of the 17th November 1906.

POST OFFICE.

GENERAL MATTERS.

The 29th November 1906.

No. 9249.—In exercise of the powers conferred by section 25 of the Indian Post Office Act, 1898 (VI of 1898), the Governor General in Council is pleased to empower the officers noted in the margin to search, or cause search to be made, for any cocaine, the bringing of which, by sea or land, into British India is prohibited by Notification No. 9227—75 (Customs) of this date, in course of transmission by post to any place in British India, and to direct that the said officers shall deliver all such cocaine found to the nearest officer for the time being in charge of the excise administration, and that such cocaine shall be disposed of in accordance with the rules for the time being in force relating to cocaine confiscated under the provisions of the Excise law in force for the time being in the part of British India in which the actual delivery of the cocaine so found was made to the excise officer aforesaid.

(1) The mail officer for the time being in charge of the Bombay-Aden Sea Post Office.
(2) The Postmaster and the Deputy Postmaster at Karachi.
(3) The Presidency Postmaster, the Deputy Postmaster, and the Assistant Postmasters at Bombay.
(4) The Presidency Postmaster, the Deputy Postmaster and the Assistant Postmasters at Madras.
(5) The Postmaster and Deputy Postmaster at Tuticorin.
(6) The Presidency Postmaster, the Deputy Postmaster and the Assistant Postmasters at Calcutta
(7) The Postmaster, the Deputy Postmaster and the Assistant Postmasters at Rangoon.

Notification No. 5367 P. O, dated the 28th September 1905, in the Department of Commerce and Industry is hereby cancelled.

W. L HARVEY,
Secretary to the Government of India.

ARMY DEPARTMENT.

Fort William, the 30th November 1906.

APPOINTMENTS.

INDIAN ARMY.

No. 618.—In lines 7 and 24 of Army Department Notification No. 571 of 1906 *for* "Cannon" *read* "Gannon".

COMMANDS.

No. 619.—Colonel L. M. M. Hall, Indian Army, to officiate in command of the Garhwal Brigade, *vice* Major-General A. G. F. Browne, C.B., D.S.O., on leave. Dated 18th November 1906.

PROMOTIONS.

INDIAN ARMY.

No. 620.—The following promotions are made, subject to His Majesty's approval :—

To be Lieutenant-Colonel.

[*General Distribution.*]

Circular No. R. T. $\frac{89 F.}{2}$

RAILWAY BOARD.

Calcutta, the 16th November 1906.

Postponement of the date of introduction of the General Rules of 1906 for working open lines of railway in British India administered by the Government from the 1st January 1907 to the 1st July 1907.

READ—

Railway Board's Notification No. 183, dated the 8th September 1906, and Railway Board's Circular No. R. T. $\frac{89 A.}{5}$, dated the 8th September 1906

Railway Board's Notification No. 205, dated the 5th October 1906, and Railway Board's Circula No. R. T. $\frac{163 B.}{2}$, dated the 26th September 1906.

READ ALSO—

Letter from the Manager, Oudh and Rohilkhand railway, No. 568 R. B., dated the 12th October, 1906.

Letter from the Secretary, Indian Railway Conference Association, dated the 20th October 1906.

RESOLUTION—In paragraph 5 of the resolution embodied in Railway Board's Circular No. R. T. $\frac{89\ A.}{5}$, dated the 8th September 1905, published in the supplement to the *Gazette of India* of the 8th September 1906, it was directed that the General Rules for working open lines of railway, therewith promulgated, shall be brought into force on the 1st January 1907, on all lines of railway in British India administered by the Government.

2. It has since been recommended by the Indian Railway Conference Association that the introduction of the General Rules in question should be deferred to the 1st July 1907.

3. In modification of that portion of paragraph 5 of the resolution embodied in Railway Board's Circular No. R. T. $\frac{89\ A.}{5}$, dated the 8th September 1906, which prescribed that the General Rules therein referred to shall be brought into force on the 1st January 1907 on all lines of railway in British India administered by the Government, the Railway Board direct that the date of introduction of the rules on the State lines in question shall be postponed to the 1st July 1907.

ORDER—Ordered that this circular be communicated to the Governments, Administrations, and officers noted in the margin, for information. Also that it be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section 3 of the Indian Railways Act, 1890 (IX of 1890).

The Governments of Madras, Bombay and Burma, Public Works Department, Railway Branch.
The Governments of Bengal, the United Provinces, and Eastern Bengal and Assam, Public Works Department.
The Government of Bengal, Marine Department.
The Honourable the Resident at Hyderabad.
The Honourable the Agent to the Governor General for Rajputana.
The Consulting Engineers to the Government of India for Railways, Calcutta and Lucknow.
The Managers of the North Western, Oudh and Rohilkhand and Eastern Bengal (State) railways.
The Agent, Kalka-Simla railway.

By order,

R. C. F. VOLKERS,

Secretary, Railway Board.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, DECEMBER 1, 1906.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 25th October 1906.

From the 10th November next till further notice, the complete *Gazette of India* will be published at Calcutta. After the 3rd November all notifications and other matter intended for publication in the *Gazette* should be addressed to the Publisher, 8, Hastings Street, Calcutta.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,
Secretary to the Government of India.

No. 355 of 1902.—Strowager Automatic Telephone Exchange. *Automatic telephone exchange.* (From 25 November 1906 to 25 November 1907.)

No. 311 of 1893.—Wilbur Stephen Scudder. *Improvements in machines for casting lines of type for use in printing.* (From 23 November 1906 to 23 November 1907.)

No. 417 of 1896.—Bernhard Baron. *Improvements in or relating to the manufacture of cigarettes.* (From 28 January 1907 to 28 January 1908.)

No. 430 of 1902.—Robert Simpson Hamilton. *A tea cultivator for use in the cultivation of tea gardens.* (From 13 January 1907 to 13 January 1908.)

No. 205 of 1897.—Anton Raky. *Improvements in boring-apparatus for deep-borings.* (From 20 December 1906 to 20 December 1907.)

No. 370 of 1898.—Auguste Collette Fils and Auguste Boidin. *Improvements in apparatus for the manufacture of alcohol by saccharification and fermentation by means of mucedineæ.* (From 14 April 1907 to 14 April 1908.)

No. 192 of 1899.—Guglielmo Marconi and the Wireless Telegraph and Signal Company, Limited. *Improvements in apparatus employed in wireless telegraphy.* (From 29 December 1906 to 29 December 1907.)

No. 204 of 1900.—James Frederick Bennett, Thomas Parkin Moorwood and Hedley Stanley Moorwood. *Improvements in or relating to hydro-carbon motors.* (From 14 December 1906 to 14 December 1907.)

No. 201 of 1901.—Louis Engelhorn. *Process and apparatus for manufacture of ice.* (From 16 December 1906 to 16 December 1907.)

No. 350 of 1901.—American Machinery and Construction Company. *An improvement in cotton seed delinters.* (From 18 January 1907 to 18 January 1908.)

No. 4709 P.—Whereas the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased :—

No. 31 of 1902.—James Marsland and Joseph Gaut. *Improvements in fire arms.* (Specification filed 20 August 1902.)

No. 51 of 1902.—Gustav Durr. *Improvements relating to the plugs or handhole covers for steam generators.* (Specification filed 19 August 1902.)

No. 102 of 1902.—Ralph Hugh Page. *Improvement in process for making organic peroxides.* (Specification filed 19 August 1902.)

No. 134 of 1902. John Marolf. *Improvements in rudders.* (Specification filed 20 August 1902.)

No. 155 of 1902.—Samuel Thomas Gresham. *Improvements in frames for anti-friction point rod rollers.* (Specification filed 20 August 1902.)

No. 164 of 1902.—Harry Howlett Young. *Improvements in or connected with punkahs.* (Specification filed 20 August 1902.)

No. 180 of 1902.—Albert Edward Hodder. *Improvements in or relating to apparatus for mixing materials particularly applicable to the blending of tea and like substances.* (Specification filed 23 August 1902.)

No. 276 of 1902.—The Flameless Gas Light Company, Limited. *Improvements in and relating to incandescent gas and vapour burners.* (Specification filed 20 August 1902.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 89 of 1900.—Edward William Mackenzie Hughes. *Improvements in the manufacture of axle boxes.* (Specification filed 22 August 1900.)

Fee in respect of the continuance of an exclusive privilege—

4 (*c*) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of R50 for the above invention.

No. 257 of 1899.—William Jackson *Improvements in apparatus for classifying and for removing dust and light material from tea or other produce.* (Specification filed 21 August 1899.)

Fee in respect of the continuance of an exclusive privilege—

4 (*d*) After the expiration of the sixth year and before the expiration of the seventh year from the date of the filing of the specification—

The sum of R50 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. A consolidated index for the year 1905, entitled "Inventions and Designs in 1905," is also on sale, price one rupee. It contains a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in that year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or 1*s*. 1*d*. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and Designs Act, V of 1888

F. B. LONGE, Colonel, R.E.,

Surveyor General of India.

THE HONOURABLE THE CHIEF COMMISSIONER OF AJMER-MERWARA.

NOTIFICATIONS.

Abu, the 21st November 1906.

No. 268-*K*.-4.—In accordance with the provisions of section 25 of the Ajmer Municipalities Regulation (V of 1886), the Honourable the Chief Commissioner of Ajmer-Merwara is pleased to notify the re-appointment of Bohra Kalu Ram as a member of the Kekri Municipal Committee for a period of three years, with effect from the 8th October 1906.

A. G. G.'s Camp, Rajputana, the 26th November 1906.

No. 1187-*C*.—The Honourable the Chief Commissioner of Ajmer-Merwara is pleased to make the additions hereinafter set forth to the rules published under his Notification No. 83-C-984, dated the 25th January 1900, for regulating the procedure in the acquisition of land under Act I of 1894 and the award and payment of compensation for land acquired thereunder :—

Add at the end of rule 8 :—

"Sufficient notice shall also be given of the date of hearing to the departmental or other officer concerned to enable him to appear either personally or through an agent to produce evidence as to the value of the land and to make any representation he may desire. Such representation may be either oral or in writing."

Add after the word "and" and before the words "shall make an award," etc., in rule 11 :—

"after considering any representation made by the departmental or other officer concerned and any evidence which he may have produced as to the value of the land."

Add after rule 11 :—

"11-A. If the officer making the award is not the Collector of the district, he shall before making his award refer his proceedings in cases that come under rule 16 of the appendix or in which he proposes to award compensation in excess of the original estimate to the Collector. The Collector shall thereupon issue such instructions as he deems fit, and the acquiring officer shall make his final award in accordance with those instructions."

"11-B. When a case has been referred to the Court, the Collector shall arrange for the defence of the award as if it were a suit against Government whether the said award has been given by himself or by an officer who has been temporarily appointed Collector for the purposes of the Land Acquisition Act.

No. 1196-*C*.—*B*.-31.—Whereas the land designated below is required for a public purpose, this declaration is made accordingly under the provisions of section 6 of the Land Acquisition Act I of 1894 :—

District.	Pargana.	Mouza.	Approximate area.	For what purpose.	Authority.	REMARKS.
Ajmer .	Ajmer	Ajmer .	29,405 square feet.	For the construction of quarters for Clerks and Camp Office of the Hon'ble the Agent to the Governor-General in Rajputana.	Secretary to the Hon'ble the Agent to the Governor-General, Rajputana, and Chief Commissioner, Ajmer-Merwara's letter No. 4059-S., dated the 6th October 1906.	The plan can be seen at the Office of the Collector of Ajmer.

Under section 7 of the Act the Collector of Ajmer is hereby directed to take order for the acquisition of the land specified above.

By order,

C. C. WATSON,

First Assistant to the Agent to the Governor General, Rajputana, and Chief Commissioner, Ajmer-Merwara.

DEPARTMENT OF MINES IN INDIA.

NOTIFICATION.

No. 3399.

Calcutta, the 28th November 1906.

Regulations made by the Board of Examiners under Rule 30 of the rules applying to coal-mines made under section 20 of the Indian Mines Act, 1901, for the conduct of examinations for managers' certificates of competency.

1. No member of the Board of Examiners shall act as a local examiner, except in emergent cases.

2. When possible, one or more members of the Board of Examiners shall attend every examination on at least one of the days.

3. So far as is practicable, the local examiners shall be :—

(a) An Inspector of Mines, who shall be Secretary to the local examiners.

(b) Two Mining Engineers or Colliery Managers who must be the holders of first class certificates: Provided, that a mining professor may be appointed instead of one of the Mining Engineers or Managers.

4. The remuneration of each local examiner shall be R150 for each examination, and a capitation fee of R2 for each first class candidate and R1 for each second class candidate examined, and travelling expenses and halting allowances on the first class scale under Civil Service Regulations; but an Inspector of Mines, acting as a local examiner, shall not be entitled to any fee or remuneration whatsoever, beyond the travelling expenses and halting allowances due to him in his official capacity.

5. The subjects for examination shall be :—

(a) *Arithmetic and Hand-writing.*

(b) *Practical and theoretical coal-mining* including: surface and underground arrangements, sinking, timbering, ventilation, gases met with in coal-mines, a knowledge of plans, surveying and levelling, and of the various instruments used in mining. Questions may also be asked upon geology, sanitation, hydraulics, explosives, safety lamps and similar subjects. The candidates may also be required to show how to arrange the ventilation and haulage of a mine on a given plan.

(c) *Practical mechanics* including steam, steam-engines, steam-boilers, pumps and strength of materials ; and questions may be asked upon electricity and compressed air as applied to coal-mining.

(d) *The Indian Mines Act, 1901*, and rules made under the Act.

6. The examinations shall be both written and oral, and the subjects and conditions shall be the same for candidates for both classes of certificates; but the examination questions shall be made suitable for each class of certificate.

7. The following shall be the maximum number of marks given for each subject :—

Subject.	First Class.			Second Class.		
	Papers.	Vivâ voce.	Total.	Papers.	Vivâ voce.	Total.
(a) Arithmetic and hand-writing . . .	50	.	50	50	.	50
(b) Mining . . .	160	60	220	140	80	220
(c) Mechanics .	110	40	150	100	50	150
(d) Indian Mines Act	60	20	80	50	30	80
Totals .	380	120	500	340	160	500

8. No candidate who fails to obtain 66 per cent. of the total number of marks, or 33 per cent. in either of the subjects of mining or mechanics shall be passed by the examiners, and if a candidate fails to obtain 33 per cent of the marks given for either of the subjects of Arithmetic and Hand-writing of the Indian Mines Act, any marks he may have obtained in such subjects shall not be included when the total is determined.

9. Before each examination each candidate shall declare whether he presents himself for a first or second class certificate. No candidate for a second class certificate shall be eligible at that examination for a first class certificate, but a candidate for a first class certificate, who does not reach the necessary standard, may, nevertheless, at the discretion of the local examiners, be recommended to the Board of Examiners, for a second class certificate, if, in their opinion, he has done sufficiently well to deserve it.

10. The Secretary to the local examiners shall report, by registered post, the result of the examinations giving the number of marks obtained by each candidate in each subject, to the President of the Board of Examiners within one month of the close of the examination.

11. The questions which the local examiners intend to put in the examination papers shall be submitted in draft to the Board of Examiners, for approval, at least six weeks before the date of the examination.

12. At least one examination shall be held annually in the Bengal coal-fields, and in other parts of India examinations will be held whenever, in the opinion of the Board of Examiners, the number of candidates in a coal-mining centre justifies the holding of an examination.

W. H. PICKERING,
Chief Inspector of Mines in India.
